SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

Form 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.
For the fiscal year ended December 31, 2012

or

TRANSITION REPORTS PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from _____ **to** _____
Commission File Number: 0-24006

NEKTAR THERAPEUTICS

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

94-3134940
(IRS Employer
Identification No.)

455 Mission Bay Boulevard South
San Francisco, California 94158
(Address of principal executive offices and zip code)
415-482-5300
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Name of Each Exchange on Which Registered</u>
Common Stock, \$0.0001 par value	NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days) Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input checked="" type="checkbox"/>	Accelerated filer <input type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2) Yes No

The approximate aggregate market value of voting stock held by non-affiliates of the registrant, based upon the last sale price of the registrant's common stock on the last business day of the registrant's most recently completed second fiscal quarter, June 29, 2012 (based upon the closing sale price of the registrant's common stock listed as reported on the NASDAQ Global Select Market), was approximately \$922,720,854. This calculation excludes approximately 440,759 shares held by directors and executive officers of the registrant. Exclusion of these shares does not constitute a determination that each such person is an affiliate of the registrant.

As of February 21, 2013, the number of outstanding shares of the registrant's common stock was 115,289,548.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of registrant's definitive Proxy Statement to be filed for its 2013 Annual Meeting of Stockholders are incorporated by reference into Part III hereof. Such Proxy Statement will be filed with the Securities and Exchange Commission within 120 days of the end of the fiscal year covered by this Annual Report on Form 10-K.

Forward-Looking Statements

This report includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical fact are “forward-looking statements” for purposes of this annual report on Form 10-K, including any projections of earnings, revenue, milestone payments, royalties, sales or other financial items, any statements of the plans and objectives of management for future operations (including, but not limited to, preclinical development, clinical trials and manufacturing), any statements related to our financial condition and future working capital needs, any statements concerning proposed drug candidates, any statements regarding the timing for the start or end of clinical trials or submission of regulatory approval filings, any statements regarding future economic conditions or performance, any statements regarding the success of our collaboration arrangements or future payments that may come due to us under these arrangements, any statements regarding our plans and objectives to initiate or continue clinical trials, and any statements of assumptions underlying any of the foregoing. In some cases, forward-looking statements can be identified by the use of terminology such as “may,” “will,” “expects,” “plans,” “anticipates,” “estimates,” “potential” or “continue,” or the negative thereof or other comparable terminology. Although we believe that the expectations reflected in the forward-looking statements contained herein are reasonable, such expectations or any of the forward-looking statements may prove to be incorrect and actual results could differ materially from those projected or assumed in the forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to inherent risks and uncertainties, including, but not limited to, the risk factors set forth in Part I, Item 1A “Risk Factors” below and for the reasons described elsewhere in this annual report on Form 10-K. All forward-looking statements and reasons why results may differ included in this report are made as of the date hereof and we do not intend to update any forward-looking statements except as required by law or applicable regulations. Except where the context otherwise requires, in this annual report on Form 10-K, the “Company,” “Nektar,” “we,” “us,” and “our” refer to Nektar Therapeutics, a Delaware corporation, and, where appropriate, its subsidiaries.

Trademarks

The Nektar brand and product names, including but not limited to Nektar®, contained in this document are trademarks, registered trademarks or service marks of Nektar Therapeutics in the United States and certain other countries. This document also contains references to trademarks and service marks of other companies that are the property of their respective owners.

PART I

Item 1. Business

We are a clinical-stage biopharmaceutical company developing a pipeline of drug candidates that utilize our PEGylation and advanced polymer conjugate technology platforms. These platforms enable the development of new molecular entities that target known mechanisms of action. Our current proprietary pipeline is comprised of drug candidates across several therapeutic areas including oncology, pain, anti-infectives and immunology. Our research and development activities involve both small molecule and biologic drug candidates. We create innovative drug candidates by using our proprietary advanced polymer conjugate technologies and expertise to modify the chemical structure of pharmacophores to create new molecular entities. Polymer chemistry is a science focused on the synthesis or bonding of polymer architectures with drug molecules to alter the properties of a molecule when it is bonded with polymers. Additionally, we may utilize established pharmacologic targets to engineer a new drug candidate relying on a combination of the known properties of these targets and our proprietary polymer chemistry technology and expertise. Our drug candidates are designed to improve the overall benefits and use of a drug for patients by improving the metabolism, distribution, pharmacokinetics, pharmacodynamics, half-life and/or bioavailability of drugs. Our objective is to apply our advanced polymer conjugate technology platform to create new drug candidates in multiple therapeutic areas that address large potential markets.

Our most-advanced proprietary drug candidate, naloxegol (formerly known as NKTR-118), is an oral peripherally-acting opioid antagonist, which has completed Phase 3 clinical studies for the treatment of opioid-induced constipation (OIC) in patients with non-cancer pain. OIC is a common side effect of prescription opioids when used for chronic pain management. In September 2009, we entered into a global license agreement with AstraZeneca AB (AstraZeneca) for the global development and commercialization of naloxegol and naloxegol fixed-dose combination products. On November 12, 2012, AstraZeneca announced positive top-line results for naloxegol from two Phase 3 clinical studies and one safety extension study. On February 26, 2013, AstraZeneca announced positive top-line results from the long-term safety clinical study of naloxegol in patients with OIC. The naloxegol fixed-dose combination program, formerly known as the NKTR-119 program, is an early stage research and development program that is designed to combine various opioids with naloxegol. AstraZeneca is responsible for all clinical, regulatory and commercialization costs for both the naloxegol drug candidate and all drug candidates within the naloxegol fixed-dose combination program.

Our second-most-advanced drug candidate, etirinotecan pegol (also known as NKTR-102), is a next-generation topoisomerase I inhibitor, currently being evaluated in a Phase 3 clinical study as a single-agent therapy for patients with metastatic breast cancer. This Phase 3 clinical study, which we call the BEACON study (BrEAst Cancer Outcomes with NKTR-102), was initiated by us in December 2011. The BEACON study is designed to enroll approximately 840 women with metastatic breast cancer who have had prior treatment with anthracycline, taxane and capecitabine in either the adjuvant or metastatic setting. Patients in the BEACON study are randomized on a 1:1 basis to receive either single-agent etirinotecan pegol or a single agent of physician's choice. The primary endpoint of the BEACON study is overall survival, and secondary endpoints include progression-free survival and objective tumor response rate. In November 2012, the U.S. Food and Drug Administration (FDA) designated etirinotecan pegol as a Fast Track development program for the treatment of patients with locally recurrent or metastatic breast cancer progressing after treatment with an anthracycline, a taxane, and capecitabine.

In the fourth quarter of 2012, we completed a Phase 2 clinical study of single-agent etirinotecan pegol in approximately 170 women with platinum-resistant/refractory ovarian cancer. Results from this study and communication with government health authorities in both the United States (U.S.) and European Union (E.U.) will guide our future development and regulatory strategy for etirinotecan pegol in ovarian cancer. A Phase 1 study to evaluate etirinotecan pegol in combination with 5-Fluorouracil/leucovorin in refractory solid tumor cancers has also been completed, and a Phase 2 clinical trial evaluating etirinotecan pegol as a single agent in patients with metastatic colorectal cancer is enrolling patients. On August 7, 2012, we announced a Phase 2

[Table of Contents](#)

investigator-initiated clinical study of etirinotecan pegol in patients with bevacizumab (Avastin)-resistant high-grade glioma being conducted at the Stanford Cancer Institute. On February 5, 2013, we announced a Phase 2 investigator-initiated clinical study of etirinotecan pegol in patients with metastatic and recurrent non-small cell lung cancer being conducted at the Abramson Cancer Center of the University of Pennsylvania.

Our third-most-advanced proprietary drug candidate, NKTR-181, is currently being evaluated in a Phase 2 clinical study in patients with moderate to severe chronic pain from osteoarthritis of the knee. Enrollment in this study is ongoing with a design to enroll approximately 200 patients in a randomized controlled study to receive either NKTR-181 or placebo. NKTR-181 is designed to be a novel, orally-available mu-opioid agonist molecule with a long-acting profile. The molecule has been designed to have a slow rate of entry into the brain, which is expected to reduce the attractiveness of the molecule as a target of abuse and reduce other serious central nervous system (CNS)-related side effects, such as sedation and respiratory depression, which are commonly associated with standard opioid therapies. As a new molecular structure, NKTR-181's abuse deterrent property does not rely on a formulation approach, a common method used with opioid drugs to reduce their ease of conversion into abusable forms of an opioid. In May 2012, the development program for NKTR-181 for the treatment of moderate to severe chronic pain was granted Fast Track designation by the FDA.

We also have additional proprietary preclinical and clinical drug candidates being developed for pain relief. NKTR-192 is designed to be a novel orally available mu-opioid analgesic molecule with a short-acting profile to treat acute pain. This molecule is designed to address the serious CNS-related side effects associated with standard short-acting opioid therapies. NKTR-192 is in Phase 1 clinical development. NKTR-171 is a novel, orally-available sodium channel blocker and is being developed as a treatment for neuropathic pain. NKTR-171 is designed to be peripherally-acting in order to avoid the serious CNS-related side effects associated with existing sodium channel blockers. The product candidate is currently undergoing investigational new drug application (IND)-enabling studies in preparation for clinical studies in healthy volunteers.

We have a significant collaboration with Baxter Healthcare to identify and develop PEGylated drug candidates with the objective of providing new long-acting therapies for hemophilia patients. Under the terms of this collaboration, we are providing our PEGylation technology and expertise and Baxter is responsible for all clinical development. The first drug candidate in this collaboration, BAX 855, is a longer-acting (PEGylated) form of a full-length recombinant factor VIII (rFVIII) protein which has completed Phase 1 clinical development in patients with hemophilia A. In February 2013, Baxter initiated a Phase 3 multi-center, open-label clinical study called PROLONG-ATE that will enroll more than 100 previously treated adult patients with severe hemophilia A to assess the efficacy, safety and pharmacokinetics of BAX 855 for prophylaxis and on-demand treatment of bleeding.

We also have a significant collaboration with Bayer Healthcare LLC (Bayer) to develop BAY41-6551 (Amikacin Inhale, formerly known as NKTR-061), which is an inhaled solution of amikacin, an aminoglycoside antibiotic. We originally developed the liquid aerosol inhalation platform and NKTR-061 drug candidate and entered into a collaboration agreement with Bayer in August 2007 to further advance the drug candidate's development and potential commercialization. The stability studies on the nebulizer device that needed to be completed prior to the start of the Phase 3 clinical study were successfully completed in February 2013. The Phase 3 clinical program is expected to be initiated by Bayer in March 2013. In 2011, Bayer achieved agreement with the FDA on the design of the planned Phase 3 clinical studies of BAY41-6551 under the Special Protocol Assessment process that is intended to support the submission of a New Drug Application (NDA) if the planned Phase 3 clinical study is successful.

We also have a number of license, manufacturing and supply agreements with leading biotechnology and pharmaceutical companies, including Affymax, Inc., Amgen Inc., MAP Pharmaceuticals, Inc., Merck & Co., Inc. (through its acquisition of Schering Plough), Pfizer Inc., F. Hoffmann-La Roche Ltd (Roche), and UCB Pharma. A total of eight products using our PEGylation technology have received regulatory approval in the U.S. or E.U.,

[Table of Contents](#)

and are currently marketed by our collaboration partners. There are also a number of other products in clinical development that incorporate our advanced PEGylation and advanced polymer conjugate technologies.

On December 31, 2008, we completed the sale and transfer of certain pulmonary technology rights, certain pulmonary collaboration agreements and approximately 140 of our dedicated pulmonary personnel and operations to Novartis Pharma AG. We retained all of our rights to BAY41-6551 and our right to receive royalties on net sales of the Cipro DPI (Cipro Dry Powder Inhaler, previously called Cipro Inhale) program with Bayer Schering Pharma AG that we transferred to Novartis as part of the transaction. In August 2012, Bayer initiated a global Phase 3 program called RESPIRE for the Cipro DPI product candidate in patients with non-cystic fibrosis bronchiectasis. The two placebo-controlled trials, RESPIRE-1 and RESPIRE-2, are enrolling up to 600 patients and will evaluate Cipro DPI as a chronic, intermittent therapy over a period of 48 weeks.

Corporate Information

We were incorporated in California in 1990 and reincorporated in Delaware in 1998. We maintain our executive offices at 455 Mission Bay Boulevard South, San Francisco, California 94158, and our main telephone number is (415) 482-5300. Our website is located at www.nektar.com. The information contained in, or that can be accessed through, our website is not part of, and is not incorporated in, this Annual Report.

Our Technology Platform

As a leader in the PEGylation field, we have advanced our technology platform to include new advanced polymer conjugate chemistries and polymer technologies that can be tailored in specific and customized ways with the objective of optimizing and significantly improving the profile of a wide range of molecules including many classes of drugs targeting many disease areas. PEGylation has been a highly effective technology platform for the development of therapeutics with significant commercial success, such as Amgen's Neulasta® (pegfilgrastim) and Roche's PEGASYS® (PEG-interferon alfa-2a). Nearly all of the PEGylated drugs approved over the last fifteen years were enabled with our PEGylation technology through our collaborations and licensing partnerships with a number of well-known biotechnology and pharmaceutical companies. PEGylation is a versatile technology as a result of polyethylene glycol (PEG) being a water soluble, amphiphilic, non-toxic, non-immunogenic compound that has been shown to safely clear from the body. Its primary use to date has been in currently approved biologic drugs to favorably alter their pharmacokinetic or pharmacodynamic properties. However, in spite of its widespread success in commercial drugs, there are some limitations with the first-generation PEGylation approaches that have been used with biologics. These techniques cannot be used successfully to create small molecule drugs which could potentially benefit from the application of the technology. Other limitations of the early applications of PEGylation technology include sub-optimal bioavailability and bioactivity, and its limited ability to be used to fine-tune properties of the drug, as well as its inability to be used to create oral drugs.

With our expertise and proprietary technology in PEGylation, we have created the next generation of PEGylation technology. Our advanced polymer conjugate technology platform is designed to overcome the limitations of the first generation of the technology platform and to allow the platform to be utilized with a broader range of molecules across many therapeutic areas. We have also developed robust manufacturing processes for generating second generation PEGylation reagents that allow us to utilize the full potential of these newer approaches.

Both our PEGylation and advanced polymer conjugate technology platforms have the potential to offer one or more of the following benefits:

- improve efficacy or safety in certain instances as a result of better pharmacokinetics, pharmacodynamics, longer half-life and sustained exposure of the drug;
- improve targeting or binding affinity of a drug to its target receptors with the potential to improve efficacy and reduce toxicity or drug resistance;

[Table of Contents](#)

- improve solubility of a drug;
- enable oral administration of parenterally-administered drugs, or drugs that must be administered intravenously or subcutaneously, and increase oral bioavailability of small molecules;
- prevent drugs from crossing the blood-brain barrier, or reduce their rate of passage into the brain, thereby limiting undesirable central nervous system effects;
- reduce first-pass metabolism effects of certain drug classes with the potential to improve efficacy, which could reduce the need for other medicines and reduce toxicity;
- reduce the rates of drug absorption and of elimination or metabolism by improving stability of the drug in the body and providing it with more time to act on its target;
- differentially alter binding affinity of a drug for multiple receptors, improving its selectivity for one receptor over another; and
- reduce immune response to certain macromolecules with the potential to prolong their effectiveness with repeated doses.

We have a broad range of approaches that we may use when designing our own drug candidates, some of which are further described below.

Small Molecule Stable Polymer Conjugates

Our customized approaches for small molecule polymer conjugates allows for the fine-tuning of the physicochemical and pharmacological properties of small molecule oral drugs to potentially increase their therapeutic benefit. In addition, this approach can enable oral administration of subcutaneously or intravenously delivered small molecule drugs that have low bioavailability when delivered orally. The benefits of this approach can also include: improved potency, modified biodistribution with enhanced pharmacodynamics, and reduced transport across specific membrane barriers in the body, such as the blood-brain barrier. Two primary examples of reducing transport across the blood-brain barrier are naloxegol, an orally-available peripherally-acting opioid antagonist that is in late stage clinical development in collaboration with AstraZeneca, and NKTR-171, a novel peripherally-acting sodium channel blocker that is currently in IND-enabling studies for the treatment of neuropathic pain. An additional example of the application of membrane transport, specifically slowing transport across the blood-brain barrier is NKTR-181, an orally-available mu-opioid analgesic molecule that is being evaluated in a Phase 2 clinical study in patients with moderate to severe chronic pain from osteoarthritis of the knee.

Small Molecule Pro-Drug Releasable Polymer Conjugates

The pro-drug polymer conjugation approach can be used to optimize the pharmacokinetics and pharmacodynamics of a small molecule drug to substantially increase its efficacy and improve its side effect profile. We are currently using this platform with oncolytics, which typically have sub-optimal half-lives that can limit their therapeutic efficacy. With our technology platform, we believe that these drugs can be modulated for programmed release within the body, optimized bioactivity and increased sustained exposure of active drug to tumor cells in the body. We are using this approach with the oncolytic drug candidate in our pipeline, etirinotecan pegol, a next-generation topoisomerase I-inhibitor, currently in Phase 3 clinical development in metastatic breast cancer, and Phase 2 clinical development in ovarian and colorectal cancers.

Large Molecule Polymer Conjugates (Proteins and Peptides)

Our customized approaches with large molecule polymer conjugates have enabled numerous successful PEGylated biologics on the market today. Based on our knowledge of the technology and biologics, our scientists have designed novel hydrolyzable linkers that in many cases can be used to optimize bioactivity. Through

[Table of Contents](#)

rational drug design, a protein or peptide's pharmacokinetics and pharmacodynamics can be substantially improved and its half-life can be significantly extended. An example of this is BAX 855, a longer-acting (PEGylated) form of a full-length recombinant factor VIII (rFVIII) protein, which is currently being evaluated in Phase 3 clinical development in collaboration with Baxter for the treatment of hemophilia A.

Antibody Fragment Polymer Conjugates

This approach uses a large molecular weight PEG conjugated to antibody fragments in order to potentially improve their toxicity profile, extend their half-life and allow for ease of synthesis with the antibody. The specially designed PEG replaces the function of the Fc domain of full length antibodies with a branched architecture PEG with either stable or degradable linkage. This approach can be used to reduce antigenicity, reduce glomerular filtration rate, enhance uptake by inflamed tissues, and retain antigen-binding affinity and recognition. There is currently one approved product on the market that utilizes our technology with an antibody fragment, CIMZIA® (certolizumab pegol), which was developed by our partner UCB Pharma and is approved for the treatment of Crohn's Disease in the U.S. and rheumatoid arthritis in the U.S. and E.U.

Our Strategy

The key elements of our business strategy are described below:

Advance Our Proprietary Clinical Pipeline of Drug Candidates that Leverage Our PEGylation and Advanced Polymer Conjugate Platform

Our objective is to create value by advancing our lead drug candidates through various stages of clinical development. To support this strategy, over the past five years we have significantly expanded and added expertise to our internal preclinical, clinical development and regulatory departments. A key component of our development strategy is to potentially reduce the risks and time associated with drug development by capitalizing on the known safety and efficacy of approved drugs as well as established pharmacologic targets and drugs directed to those targets. For many of our novel drug candidates, we may seek to study the drug candidates in indications for which the parent drugs have not been studied or approved. We believe that the improved characteristics of our drug candidates will provide meaningful benefit to patients compared to the existing therapies. In addition, in certain instances we have the opportunity to develop new treatments for patients for which the parent drugs are not currently approved.

Ensure Future Growth of our Proprietary Pipeline through Internal Research Efforts and Advancement of our Preclinical Drug Candidates into Clinical Trials

We believe it is important to maintain a diverse pipeline of new drug candidates to continue to build on the value of our business. Our discovery research organization is continuing to identify new drug candidates by applying our technology platform to a wide range of molecule classes, including small molecules and large proteins, peptides and antibodies, across multiple therapeutic areas. We continue to advance our most promising research drug candidates into preclinical development with the objective to advance these early stage research programs to human clinical studies over the next several years.

Enter into Strategic and High-Value Partnerships to Bring Certain of Our Drug Candidates to Market

We decide on a drug candidate-by-drug candidate basis how far to advance clinical development (e.g. Phase 1, 2 or 3) and whether to commercialize products on our own, or seek a partner, or pursue a combination of these approaches. For example, in December 2010, we decided that we would move etirinotecan pegol (NKTR-102) into Phase 3 clinical development in metastatic breast cancer prior to completing a collaboration partnership for this drug candidate. When we determine to seek a partner, our strategy is to enter into collaborations with leading pharmaceutical and biotechnology companies to fund further clinical development, manage the global

[Table of Contents](#)

regulatory filing process, and market and sell drugs in one or more geographies. The options for future collaboration arrangements range from comprehensive licensing and commercialization arrangements to co-promotion and co-development agreements with the structure of the collaboration depending on factors such as the structure of economic risk sharing, the cost and complexity of development, marketing and commercialization needs, therapeutic area and geographic capabilities.

Continue to Build a Leading Intellectual Property Estate in the Field of PEGylation and Polymer Conjugate Chemistry across Therapeutic Modalities

We are committed to continuing to build on our intellectual property position in the field of PEGylation and polymer conjugate chemistry. To that end, we have a comprehensive patent strategy with the objective of developing a patent estate covering a wide range of novel inventions including among others, polymer materials, conjugates, formulations, synthesis, therapeutic areas, methods of treatment and methods of manufacture.

Nektar Proprietary Drug Candidates in Clinical Development

The following table summarizes our proprietary drug candidates that are being developed by us or in collaboration with other pharmaceutical companies. The table includes the type of molecule or drug, the target indications for the drug candidate, and the status of the clinical development program.

Drug Candidate/Program	Target Indications	Status(1)
Naloxegol (orally available peripherally-acting mu-opioid receptor antagonist)	Opioid-induced constipation	Completed Phase 3 (Partnered with AstraZeneca AB)
Etirinotecan pegol (next-generation topoisomerase I inhibitor)	Metastatic breast cancer	Phase 3
BAY41-6551 (Amikacin Inhale, formerly NKTR-061)	Gram-negative pneumonias	Completed Phase 2 (Partnered with Bayer Healthcare LLC)*
Etirinotecan pegol	Platinum-resistant/refractory ovarian cancer	Completed Phase 2
Etirinotecan pegol	Second-line metastatic colorectal cancer in patients with the KRAS gene mutation	Phase 2
NKTR-181 (orally-available mu-opioid analgesic molecule)	Moderate to severe chronic pain	Phase 2
Etirinotecan pegol (in combination with 5-Fluorouracil/leucovorin)	Metastatic colorectal cancer	Completed Phase 1
NKTR-192 (orally-available mu-opioid analgesic molecule)	Acute pain	Phase 1
Naloxegol fixed-dose combinations (opioid/NKTR-118 combinations)	Chronic pain without constipation	Research/Preclinical (Partnered with AstraZeneca AB)
NKTR-171 (orally-available peripherally-acting sodium channel blocker)	Neuropathic pain	Research/Preclinical
NKTR-214 (cytokine immunostimulatory therapy)	Oncology	Research/Preclinical

[Table of Contents](#)

(1) Status definitions are:

Approved — regulatory approval to market and sell product obtained in the U.S., EU and other countries.

Filed — an application for approval and marketing has been filed with the applicable government health authority.

Phase 3 or Pivotal — product in large-scale clinical trials conducted to obtain regulatory approval to market and sell the drug (these trials are typically initiated following encouraging Phase 2 trial results).

Phase 2 — a drug candidate in clinical trials to establish dosing and efficacy in patients.

Phase 1 — a drug candidate in clinical trials, typically in healthy subjects, to test safety.

Research/Preclinical — a drug candidate is being studied in research by way of vitro studies and/or animal studies

* This drug candidate uses, in part, a liquid aerosol technology platform that was transferred to Novartis by us in the pulmonary asset sale transaction that was completed on December 31, 2008. As part of that transaction, we retained an exclusive license to this technology for the development and commercialization of this drug candidate originally developed by us.

[Table of Contents](#)

Approved Drugs and Drug Candidates Enabled By Our Technology through Licensing Collaborations

The following table outlines our collaborations with a number of pharmaceutical companies that license our intellectual property and, in some cases, purchase our proprietary PEGylation materials for their drug products. A total of eight products using our PEGylation technology have received regulatory approval in the U.S. or Europe. There are also a number of other candidates that have been filed for approval or are in various stages of clinical development. These collaborations generally contain one or more elements including a license to our intellectual property rights and manufacturing and supply agreements under which we may receive manufacturing revenue, milestone payments, and/or royalties on commercial sales of drug products.

Drug	Primary or Target Indications	Drug Marketer/Partner	Status(1)
Neulasta® (pegfilgrastim)	Neutropenia	Amgen Inc.	Approved
PEGASYS® (peginterferon alfa-2a)	Hepatitis-C	F. Hoffmann-La Roche Ltd	Approved
Somavert® (pegvisomant)	Acromegaly	Pfizer Inc.	Approved
PEG-INTRON® (peginterferon alfa-2b)	Hepatitis-C	Merck (through its acquisition of Schering-Plough Corporation)	Approved
Macugen® (pegaptanib sodium injection)	Age-related macular degeneration	Valeant Pharmaceuticals International, Inc.	Approved
CIMZIA® (certolizumab pegol)	Rheumatoid arthritis	UCB Pharma	Approved in U.S., EU and Switzerland; filed in Japan*
CIMZIA® (certolizumab pegol)	Crohn's disease	UCB Pharma	Approved in the U.S. and Switzerland*
MIRCERA® (C.E.R.A.) (Continuous Erythropoietin Receptor Activator)	Anemia associated with chronic kidney disease in patients on dialysis and patients not on dialysis	F. Hoffmann-La Roche Ltd	Approved in U.S., EU and Japan (Launched only in the EU and Japan)**
OMONTYS® (peginesatide)	Anemia associated with chronic kidney disease (CKD) in adult patients on dialysis	Affymax, Inc.	Approved in U.S.; filed in EU (voluntary recall of product in U.S. on February 23, 2013)
LEVADEX®	Migraine	MAP Pharmaceuticals	Filed for approval in U.S.
CIMZIA® (certoluzimab pegol)	Psoriasis/Ankylosing Spondylitis	UCB Pharma	Phase 3
Cipro Dry Powder Inhaler (Cipro DPI)	Cystic fibrosis lung infections	Bayer Schering Pharma AG	Phase 3***
BAX 855 (pegylated rFVIII)	Hemophilia A	Baxter Healthcare	Phase 3
Longer-acting blood clotting proteins	Hemophilia	Baxter Healthcare	Research/Preclinical

(1) Status definitions are:

Approved — regulatory approval to market and sell product obtained in the U.S., EU and other countries.

[Table of Contents](#)

Filed — an application for approval and marketing has been filed with the applicable government health authority.

Phase 3 or Pivotal — product in large-scale clinical trials conducted to obtain regulatory approval to market and sell the drug (these trials are typically initiated following encouraging Phase 2 trial results).

Phase 2 — a drug candidate in clinical trials to establish dosing and efficacy in patients.

Phase 1 — a drug candidate in clinical trials, typically in healthy subjects, to test safety.

Research/Preclinical — a drug candidate is being studied in research by way of vitro studies and/or animal studies

* In February 2012, we sold our rights to receive royalties on future worldwide net sales of CIMZIA® effective as of January 1, 2012.

** Amgen Inc. prevailed in a patent lawsuit against F. Hoffmann-La Roche Ltd and as a result of this legal ruling Roche is currently prevented from marketing MIRCERA® in the U.S. until July 2014. In February 2012, we sold our rights to receive royalties on future worldwide net sales of MIRCERA® effective as of January 1, 2012 until the agreement with Roche is terminated or expires.

*** This drug candidate was developed using our proprietary pulmonary delivery technology that was transferred by us to Novartis in an asset sale transaction that closed on December 31, 2008. As part of the transaction, Novartis assumed our rights and obligations for Cipro DPI (formerly known as Cipro Inhale) under our agreements with Bayer Schering Pharma AG; however, we maintained the rights to receive royalties on commercial sales of Cipro DPI if the drug candidate is approved.

With respect to all of our collaboration and license agreements with third parties, please refer to Item 1A, Risk Factors, including without limitation, “We are a party to numerous collaboration agreements and other significant agreements which contain complex commercial terms that could result in disputes, litigation or indemnification liability that could adversely affect our business, results of operations and financial condition.”

Overview of Selected Nektar Proprietary Drug Development Programs and Significant Partnered Drug Development Programs

Naloxegol and Naloxegol Fixed-Dose Combination Products (formerly NKTR-118 and NKTR-119), License Agreement with AstraZeneca AB

In September 2009, we entered into a global license agreement with AstraZeneca AB (AstraZeneca) pursuant to which we granted AstraZeneca a worldwide, exclusive, perpetual, royalty-bearing license under our patents and other intellectual property to develop, market and sell naloxegol and naloxegol fixed-dose combination products. Under the terms of this agreement, AstraZeneca made an initial license payment to us of \$125.0 million and AstraZeneca has responsibility for all activities and bears all costs associated with research, development and commercialization for naloxegol and naloxegol fixed-dose combination products. For naloxegol, we are also entitled to up to \$235.0 million upon certain filings and commercial launch milestones, and \$375.0 million in sales milestones if the product achieves certain annual commercial sales levels. With respect to the \$235.0 million in milestone payments due upon certain filings and commercial launch milestones for naloxegol, when filing occurs in the U.S. and in the E.U., we will be entitled to receive \$95.0 million of those milestones. The remaining milestone payments are due upon the commercial launches of naloxegol in those regions. For the naloxegol fixed-dose combination products, we are also eligible to receive significant development milestones as well as significant sales milestone payments if the program achieves certain annual commercial sales levels. For both naloxegol and the fixed-dose combination products, we are also entitled to significant double-digit royalty payments, varying by country of sale and level of annual net sales. Our right to receive royalties (subject to certain adjustments) in any particular country will expire upon the later of (a) specified period of time after the first commercial sale of the product in that country or (b) the expiration of patent rights in that particular country. AstraZeneca has agreed to use commercially reasonable efforts to develop one naloxegol fixed-dose combination product and has the right to develop multiple products which combine naloxegol with other opioids.

[Table of Contents](#)

Naloxegol is an orally-available peripherally-acting mu-opioid antagonist being investigated for the treatment of opioid-induced constipation (OIC) which is a common side effect of prescription opioid medications. Opioids attach to specific proteins called opioid receptors. When the opioids attach to certain opioid receptors in the gastrointestinal tract, constipation may occur. OIC is a result of decreased fluid absorption and lower gastrointestinal motility due to opioid receptor binding in the gastrointestinal tract. Globally, approximately 40–50% (28-35 million) patients taking opioids for long-term pain develop constipation. It is estimated that approximately 40–50% (11-18 million) of those OIC sufferers achieve the desired treatment outcomes with current options that include over-the-counter and prescription laxatives.

AstraZeneca has completed a Phase 3 clinical program for naloxegol AstraZeneca calls the KODIAC studies. The KODIAC studies (KODIAC-04, KODIAC-05, KODIAC-07 and KODIAC-08) evaluated the efficacy and safety of naloxegol for treating OIC in patients with non-cancer pain. KODIAC-04 and KODIAC-05 were replicate, multicenter- randomized, double-blind, placebo-controlled pivotal trials of 12 weeks duration that evaluated 12.5 mg and 25 mg naloxegol administered once-daily. The primary endpoint in both trials was percentage of OIC responders versus placebo over 12 weeks of treatment. The studies enrolled approximately 630 patients each. KODIAC-07 was a three-month safety extension of KODIAC-04. All three studies were conducted in patients with non-cancer pain and documented OIC, who required daily opioid therapy.

On November 12, 2012, AstraZeneca reported top-line efficacy and safety results from KODIAC-04, -05 and -07. For both KODIAC-04 and -05, the 25 mg dose of naloxegol demonstrated statistically significant results for the primary endpoint. In KODIAC-04, the 12.5 mg dose of naloxegol demonstrated statistically significant results for the primary endpoint and in KODIAC-05 the 12.5 mg dose did not meet statistical significance for the primary endpoint. The safety analyses also showed no clinically relevant imbalances in serious adverse events (SAEs), including externally adjudicated major cardiovascular events, across the three treatment arms in KODIAC-04, -05 and -07. The most common adverse events (AEs) in the naloxegol treatment arms in both trials were abdominal pain, diarrhea and nausea. In KODIAC-07, the safety extension of KODIAC-04, the occurrence of AEs and SAEs was lower than in KODIAC-04 and -05. All other common AEs were distributed similarly across the three treatment arms. In KODIAC-04 and -05 for either naloxegol dose, compared to placebo, there were no significant differences in change from baseline in mean daily pain scores or mean total daily opioid dose.

KODIAC-08 was an open-label, randomized, 52-week, long-term safety trial of naloxegol versus usual care (UC) in patients with non-cancer related pain and OIC. This trial was designed to evaluate the long-term safety and adverse event profile of naloxegol in patients taking 25 mg of naloxegol once daily, as compared to UC. In the trial, a total of 534 patients received naloxegol once daily for up to 52 weeks, while 270 patients received UC for OIC during the same treatment period. UC was defined as the investigator's choice of an existing laxative treatment regimen for OIC. On February 26, 2013, AstraZeneca announced positive top-line results from KODIAC-08. The trial reported no imbalances in SAEs. In addition, there were a low number of major adverse cardiovascular events, as adjudicated by an independent external committee, and there was no imbalance of these events across naloxegol and UC arms. There were no increases from baseline levels in mean daily pain scores or mean total daily opioid dose in either the naloxegol or the UC arm. Additionally, there were no reports of opioid withdrawal AEs which could be attributed to naloxegol. The most commonly reported AEs occurring more frequently on naloxegol than on UC included abdominal pain, diarrhea, nausea and headache.

AstraZeneca has stated that it plans to submit an NDA filing in the U.S. and a Marketing Authorization Application (MAA) filing in the E.U. in the third quarter of 2013, pending AstraZeneca's final preparation of the registration package and a pre-NDA meeting with the FDA. Naloxegol is currently considered a Schedule II controlled substance by the U.S. Drug Enforcement Administration (DEA) based on structural relatedness to noroxymorphone. AstraZeneca has conducted the studies necessary to evaluate the abuse potential and dependence-producing properties of naloxegol in support of obtaining decontrol. A petition for the decontrol of naloxegol was submitted to the DEA in March 2012 and subsequently accepted for review. Commercialization and launch in the U.S. will be subject to both FDA approval and DEA schedule determination. Please refer to

[Table of Contents](#)

Item 1A, Risk Factors, including without limitation, “If we or our partners do not obtain regulatory approval for our drug candidates on a timely basis, or at all, or if the terms of any approval impose significant restrictions or limitations on use, our business, results of operations and financial condition will be negatively affected.”

Etirinotecan pegol (next generation topoisomerase I inhibitor)

We are developing etirinotecan pegol (also known as NKTR-102), a next generation topoisomerase I (topo I) inhibitor which was designed using our PEGylation technology. Etirinotecan pegol is a novel macromolecular chemotherapeutic designed to enhance the anti-cancer effects of topo I inhibition while minimizing its toxicities. Unlike irinotecan, which is a first generation topo I inhibitor that exhibits a high initial peak concentration and short half-life, etirinotecan pegol’s pro-drug design results in a lower initial peak concentration of active topo I inhibitor in the blood. The large etirinotecan pegol molecule is inactive when administered. Over time, the body’s natural enzymatic processes slowly metabolize the linkers within the molecule, continuously freeing active drug that then can work to stop tumor cell division through topo I inhibition. In preclinical models, etirinotecan pegol achieved a 300-fold increase in tumor concentration as compared to irinotecan. Because etirinotecan pegol is a large molecule, based on preclinical studies we believe that it may penetrate the leaky vasculature within the tumor environment more readily than normal vasculature, concentrating and trapping etirinotecan pegol in tumor tissue. Clinical studies have shown that etirinotecan pegol has an extended pharmacokinetic profile and remains in circulation throughout the entire chemotherapy cycle, providing sustained exposure to topo I inhibition.

Etirinotecan pegol is currently being evaluated as a single-agent therapy (145 mg/m² every 21 days) in a Phase 3 open-label, randomized, multicenter clinical study in patients with metastatic breast cancer. This Phase 3 clinical study, which we call the BEACON study (BrEAst Cancer Outcomes with NKTR-102), was initiated in December 2011. The target enrollment for the BEACON study is 840 patients with metastatic breast cancer who have had prior treatment with anthracycline, taxane and capecitabine in either the adjuvant or metastatic setting. This study will randomize patients on a 1:1 basis to receive single-agent etirinotecan pegol or a single agent chosen from a defined set of physician’s choice alternatives. The physician’s choice single agents includes the following: ixabepilone, vinorelbine, gemcitabine, eribulin, or a taxane. Randomization is being stratified by geographic region, prior treatment with eribulin and whether or not the patient has triple negative breast cancer. The primary endpoint of the BEACON study is overall survival, and secondary endpoints include progression-free survival and objective tumor response rate. Secondary endpoints and objectives also include clinical benefit rate, duration of response, pharmacokinetic data, safety profiles, quality-of-life measurements, and pharmacoeconomic implications. Exploratory objectives of the study include collecting specific biomarker data to correlate with objective tumor response rate, progression-free survival, overall survival and selected toxicities. In November 2012, the FDA designated etirinotecan pegol as a Fast Track development program for the treatment of patients with locally recurrent or metastatic breast cancer progressing after treatment with an anthracycline, a taxane, and capecitabine.

According to the American Cancer Society and World Health Organization, more than 1.4 million women worldwide are diagnosed with breast cancer globally every year. The chance of developing invasive breast cancer at some time in a woman’s life is a little less than one in eight (12%). In 2013, the American Cancer Society estimates there will be 232,000 new cases of breast cancer in the United States. Metastatic breast cancer refers to cancer that has spread from the breast to distant sites in the body. Anthracyclines and taxanes are among the most active and widely used chemotherapeutic agents for breast cancer, but the increased use of these agents at an early stage of disease often renders tumors resistant to these drugs by the time the disease recurs, thereby reducing the number of treatment options for metastatic disease. There are currently no FDA-approved topoisomerase I inhibitors to treat breast cancer.

Etirinotecan pegol has also completed a Phase 2 clinical study in approximately 170 patients with platinum-resistant/refractory ovarian cancer. The Phase 2 clinical study included two phases. The first phase was an open-label, randomized, study evaluating two treatment schedules of single-agent etirinotecan pegol (145 mg/m² every 14 days or every 21 days). Each schedule originally followed a two-stage Simon design and a total of 71 patients

[Table of Contents](#)

were initially included in the study that was completed in the first half of 2010. The second phase was an expansion of patients in the every 21 day dosing schedule in women with platinum-resistant/refractory ovarian cancer who had previously received Doxil therapy. We are currently in the process of compiling and performing verification procedures on the final results from this clinical study. Results from this study and communication with government health authorities in both the U.S. and E.U. will guide our future development and regulatory strategy for etirinotecan pegol in ovarian cancer. Please refer to Item 1A, Risk Factors, including without limitation, “The results from the expanded Phase 2 clinical study for etirinotecan pegol in women with platinum-resistant/refractory ovarian cancer are unlikely to result in a review or an approval of a NDA by the FDA.”

Ovarian cancer is also a significant health problem for women worldwide. According to the American Cancer Society, in 2013, there will be an estimated 22,240 new cases of ovarian cancer diagnosed and an estimated 14,030 deaths from ovarian cancer in the United States. Ovarian cancer is the ninth most common cancer among women, excluding non-melanoma skin cancers. It ranks fifth in cancer deaths among women, accounting for more deaths than any other cancer of the female reproductive system. Historically, less than 40% of women with ovarian cancer are cured. According to the World Health Organization, about 230,000 women globally are diagnosed each year with ovarian cancer.

An etirinotecan pegol Phase 2 clinical study was initiated in June 2008 to evaluate the efficacy and safety of etirinotecan pegol monotherapy versus irinotecan in second-line metastatic colorectal cancer patients with the KRAS mutant gene. The primary endpoint of the Phase 2 clinical study in metastatic colorectal cancer is progression-free survival as compared to standard irinotecan monotherapy. According to recent data presented at the American Society of Clinical Oncology in 2010, it is estimated that up to 43.5% of colorectal cancer cases have this mutation in the KRAS gene and do not respond to EGFR-inhibitors, such as cetuximab. The Phase 2 clinical study is designed to enroll 174 patients with metastatic colorectal cancer. The study is still enrolling and patient enrollment in this study has been challenging due to the fact that the comparator arm of this study, single-agent irinotecan, is not the common standard of care for second line metastatic colorectal therapy in the U.S. or E.U. In June 2010, we started a Phase 1 dose-escalation clinical study designed to enroll up to approximately 40 patients to evaluate etirinotecan pegol in combination with 5-Fluorouracil (5-FU)/leucovorin in refractory solid tumor cancers. The chemotherapy agent 5-FU is currently used as a part of a combination treatment regimen for colorectal cancer in combination with irinotecan, which is also known as the FOLFIRI regimen. This study was completed in 2012 and established a dose of 75 mg/m² of etirinotecan pegol in combination with a standard dose of 5-FU/leucovorin.

Colorectal cancer is the third most commonly diagnosed cancer and the third leading cause of cancer death in the U.S. According to the American Cancer Society, nearly 143,000 new cases of colon and rectal cancer will be diagnosed in the U.S. in 2013, and about 51,000 people will die annually of the disease. Worldwide, over 1.2 million people are diagnosed annually with colorectal cancer and, according to the World Health Organization, there are 690,000 deaths annually from colorectal cancers. Most metastatic colorectal cancer patients have recurrence within two years and require retreatment with chemotherapy regimens.

In addition to the clinical studies being conducted by us, there are also two investigator-initiated Phase 2 studies being conducted for etirinotecan pegol. On August 7, 2012, we announced a Phase 2 investigator-initiated clinical study of etirinotecan pegol in patients with bevacizumab (Avastin)-resistant high-grade glioma being conducted at the Stanford Cancer Institute. On February 5, 2013, we announced a Phase 2 investigator-initiated clinical study of etirinotecan pegol in patients with metastatic and recurrent non-small cell lung cancer being conducted at the Abramson Cancer Center of the University of Pennsylvania.

BAY41-6551 (Amikacin Inhale, formerly NKTR-061), Agreement with Bayer Healthcare LLC

In August 2007, we entered into a co-development, license and co-promotion agreement with Bayer Healthcare LLC (Bayer) to develop a specially-formulated Amikacin (BAY41-6551, Amikacin Inhale, formerly called NKTR-061) for the treatment of gram negative pneumonias. Under the terms of the agreement, Bayer is

[Table of Contents](#)

responsible for most future clinical development and commercialization costs, all activities to support worldwide regulatory filings, approvals and related activities, further development of formulated Amikacin and final product packaging for BAY41-6551. We are responsible for all future development, manufacturing and supply of the nebulizer device for clinical and commercial use. We have engaged third party contract manufacturers to perform our device manufacturing obligations for this program. We are entitled to up to \$60.0 million in development milestone payments as well as sales milestone payments upon achievement of certain annual sales targets. We are also entitled to royalties based on annual worldwide net sales of BAY41-6551. Our right to receive these royalties in any particular country will expire upon the later of ten years after the first commercial sale of the product in that country or the expiration of certain patent rights in that particular country, subject to certain exceptions. The agreement expires in relation to a particular country upon the expiration of all royalty and payment obligations between the parties related to such country. Subject to termination fee payment obligations, Bayer also has the right to terminate the agreement for convenience. In addition, the agreement may also be terminated by either party for certain product safety concerns, the product's failure to meet certain minimum commercial profile requirements or uncured material breaches by the other party.

Bayer currently plans to move BAY41-6551 into Phase 3 clinical development to treat Gram-negative pneumonias, including hospital-acquired (HAP), healthcare-associated, and ventilator-associated pneumonias. Gram-negative pneumonias are often the result of complications of other patient conditions or surgeries. Gram-negative pneumonias carry a mortality risk that can exceed 50% in mechanically-ventilated patients and accounts for a substantial proportion of the pneumonias in intensive care units today. BAY41-6551 is designed to be an adjunctive therapy to the current antibiotic therapies administered intravenously as standard of care. The aerosol generator within the nebulizer for BAY41-6551 delivers a fine aerosol of the antimicrobial agent directly to the site of infection in the lungs. This drug candidate can be integrated with conventional mechanical ventilators or used as a hand-held 'off-vent' device for patients no longer requiring breathing assistance. This drug candidate has completed Phase 2 clinical development. In 2011, Bayer received agreement with the FDA on the design of the Phase 3 clinical studies of BAY41-6551 under the Special Protocol Assessment (SPA) process that is intended to support the submission of a New Drug Application (NDA) if the Phase 3 clinical study commences and is successful.

Bayer and Nektar have completed the design of the nebulizer device for commercial production and have manufactured sufficient devices for the Phase 3 clinical studies of BAY41-6551. In November 2012, Bayer hired a contract research organization to conduct the Phase 3 program for Amikacin Inhale. The stability studies on the nebulizer device that needed to be completed prior to the start of the Phase 3 clinical study were successfully completed in February 2013. The Phase 3 clinical program is expected to be initiated by Bayer in March 2013. Please refer to Item 1A, Risk Factors, "Delays in clinical studies are common and have many causes, and any significant delay in clinical studies being conducted by us or our partners could result in delay in regulatory approvals and jeopardize the ability to proceed to commercialization."

NKTR-181 (mu-opioid analgesic molecule for chronic pain)

NKTR-181 is an orally-available mu-opioid drug candidate in development as a long-acting analgesic to treat chronic pain. NKTR-181 is designed with the objective to address the abuse liability and serious central nervous system (CNS) side effects associated with current opioid therapies. NKTR-181 is a novel mu-opioid analgesic molecule created using Nektar's proprietary polymer conjugate technology, which provides it with a long-acting profile and slows its entry into the CNS. Its potential differentiating properties are inherent to the design of the new molecule and as a new molecular structure. NKTR-181's abuse deterrent property does not rely on a formulation approach to prevent its conversion into a more abusable form of an opioid. In May 2012, the development program for NKTR-181 for the treatment of moderate to severe chronic pain was granted Fast Track designation by the FDA.

In 2011, we completed two separate Phase 1 clinical studies of NKTR-181. The first study, a single-ascending dose study of NKTR-181 evaluated the pharmacokinetics and pharmacodynamics of a 50-fold range of

[Table of Contents](#)

single oral doses of NKTR-181 in 84 healthy subjects at up to 500 mg dose levels. The second study, a multiple-ascending dose study of NKTR-181 evaluated the pharmacokinetics and pharmacodynamics of four separate dose cohorts of NKTR-181 (100 mg – 400 mg) administered orally twice-daily. The study enrolled a total of 60 healthy subjects over an eight-day treatment period, and included a placebo arm (n=3) for each dose cohort. Measurements in the study included plasma concentrations-time profiles, reductions in pupil diameter, and a cold pressor test, a model of pain used in healthy subjects to measure central analgesic activity. In this multiple dose Phase 1 clinical study, NKTR-181 exhibited a sustained analgesic response. Pupillometry data from the study demonstrated that NKTR-181's centrally-mediated opioid effects are dose-dependent and indicates that the molecule enters the brain slowly, which has the potential to reduce the euphoria and other CNS side effects that are associated with current opioids. NKTR-181 was also well-tolerated at all doses evaluated in both studies.

In July 2012, we initiated a Phase 2 clinical study to evaluate the efficacy, safety and tolerability of NKTR-181 in patients with moderate to severe chronic pain from osteoarthritis of the knee. The Phase 2 clinical study utilizes a double-blind, placebo-controlled, randomized withdrawal, enriched enrollment study design. This design includes a baseline period and a drug titration period followed by a randomized, placebo-controlled, double-blind phase of the study. Approximately 200 patients will be randomized to receive either NKTR-181 or placebo in the study. The primary endpoint of the study will be the average change in a patient's pain score from baseline to the end of the double-blind, randomized treatment period. The study will enroll opioid-naïve patients with osteoarthritis of the knee who are not getting adequate pain relief from their current non-opioid pain medication. Patients who qualify during the baseline period will enter a titration phase, during which they will be titrated on NKTR-181 tablets administered orally twice-daily until a dose is reached that provides a reduction of at least 20% in the patient's pain score as compared to the patient's own baseline. Patients that achieve this level of analgesia will then be randomized on a 1:1 basis to either continue to receive their analgesic dose of NKTR-181 or to receive placebo for up to 25 days. Secondary endpoints of the study include quality-of-life assessment, sleep and motor activity scoring, as well as tolerability endpoints. In the first half of 2013, we also are planning to initiate a separate human abuse liability study for NKTR-181 as part of Phase 2 development for this product candidate. This study is designed to measure liking scores for NKTR-181 as compared to an active opioid in approximately forty non-dependent recreational opioid drug users.

According to a 2011 report from the National Academy of Sciences, chronic pain conditions, such as osteoarthritis, back pain and cancer pain, affect at least 100 million adults in the U.S. annually and contribute to over \$300 billion a year in lost productivity. Opioids are considered to be the most effective therapeutic option for pain. However, opioids cause significant problems for physicians and patients because of their serious side effects such as respiratory depression and sedation, as well as the risks they pose for addiction, abuse, misuse, and diversion. The FDA has cited prescription opioid analgesics as being at the center of a major public health crisis of addiction, misuse, abuse, overdose and death. A 2010 report from the Center for Disease Control and Prevention (CDC) notes that emergency room visits tied to the abuse of prescription painkillers is at an all-time high, having increased 111 percent over a five-year period.

NKTR-192 (mu-opioid analgesic molecule for acute pain)

NKTR-192 is an orally-available mu-opioid analgesic molecule in preclinical development that is intended to be a short-acting analgesic to treat acute pain. NKTR-192 is also designed to address the abuse liability and serious CNS side effects associated with current opioid therapies. NKTR-192 is also designed to have slow entry into the CNS. Its differentiating properties are inherent to the design of the new molecule and as a new molecular structure, NKTR-192 does not rely on a formulation approach to prevent its conversion into a more abusable form of an opioid. NKTR-192 entered Phase 1 clinical development in 2012.

NKTR-171 (neuropathic pain)

NKTR-171 is a novel, orally-available sodium channel blocker and is being developed as a treatment for neuropathic pain. NKTR-171 is designed to be peripherally-acting in order to address the serious CNS-related

[Table of Contents](#)

side effects associated with existing sodium channel blockers. The product candidate is currently in investigational IND-enabling studies in preparation for clinical studies in healthy volunteers.

NKTR-214 (cytokine immunostimulatory therapy)

NKTR-214 is an engineered immunostimulatory cytokine and is being developed for the treatment of solid tumors. NKTR-214 is engineered to selectively activate IL-2 receptors on cytotoxic T cells that kill tumor cells, with relatively low affinity for IL-2 receptors on regulatory T cells that dampen the immune response to tumors. This receptor selectivity is intended to increase efficacy and improve safety over existing immunostimulatory cytokine drugs. The product candidate is currently in investigational IND-enabling studies in preparation for clinical studies in cancer patients.

Overview of Select Technology Licensing Collaborations and Programs

We have a number of product candidates in clinical development and approved products in collaboration with our partners that use our technology or involve rights over which we have patents or other proprietary intellectual property. In a typical collaboration involving our PEGylation technology, we license our proprietary intellectual property related to our PEGylation technology or proprietary conjugated drug molecules in consideration for upfront payments, development milestone payments and royalties from sales of the resulting commercial product as well as sales milestones. In certain cases, we also manufacture and supply our proprietary PEGylation materials to our partners.

OMONTYS® (Peginesatide), Agreement with Affymax, Inc.

In April 2004, we entered into a license, manufacturing and supply agreement with Affymax, Inc. (Affymax), under which we granted Affymax a worldwide, non-exclusive license to certain of our proprietary PEGylation technology to develop, manufacture and commercialize OMONTYS®. OMONTYS® is a synthetic PEGylated peptidic compound that binds to and stimulates the erythropoietin receptor and thus acts as an erythropoietin stimulating agent (ESA). It is the only ESA that is peptide-based and its building blocks (amino acids) are arranged in a different order than erythropoietin (i.e., it has no sequence homology to endogenous erythropoietin). The compound was discovered by Affymax and is being co-developed and marketed by Affymax and Takeda Pharmaceutical Company Limited (Takeda). In March 2012, the FDA approved OMONTYS® for the treatment of dialysis patients with anemia due to chronic kidney disease (CKD). OMONTYS® is the first once-monthly ESA for anemia in CKD for dialysis patients available in the U.S. In February 2012, Takeda announced the acceptance of a Marketing Authorization Application for OMONTYS® by the European Medicines Agency. The application is currently under review by that agency.

On February 23, 2013, Affymax and Takeda announced a voluntary recall of all lots of OMONTYS® drug product to the user level as a result of new post-marketing reports regarding serious hypersensitivity reactions, including anaphylaxis, which can be life-threatening or fatal. The FDA has been notified by Affymax of 19 reports of anaphylaxis with 3 of those cases resulting in death. The reported serious hypersensitivity reactions have occurred within 30 minutes after such administration of OMONTYS. There have been no reports of such reactions following subsequent dosing, or in patients who have completed their dialysis session. Since launch of the drug, more than 25,000 patients have received OMONTYS in the post-marketing setting.

We currently manufacture our proprietary PEGylation materials for Affymax exclusively on a fixed price basis subject to annual adjustments. In addition, Affymax is responsible for all clinical development, regulatory and commercialization expenses and we are entitled to development milestones and royalties on net sales of peginesatide. We will share a portion of our future royalty payments with Enzon Pharmaceuticals, Inc. for a specified period of time based on certain patent expiration dates. Our right to receive royalties in any particular country will expire upon the later of ten years after the first commercial sale of the product in that country or the expiration of patent rights in that particular country. The agreement expires on a country-by-country basis upon the expiration of Affymax's royalty obligations. The agreement may also be terminated by either party for the

[Table of Contents](#)

other party's continued material breach after expiration of a cure period or by us in the event that Affymax challenges the validity or enforceability of any patent licensed to them under the agreement.

LEVADEX[®], Agreement with MAP Pharmaceuticals

In June 2004, we entered into a license agreement with MAP Pharmaceuticals, Inc. (MAP), which includes a worldwide, exclusive license, to certain of our patents and other intellectual property rights to develop and commercialize a formulation of dihydroergotamine (DHE) for administration to patients via the pulmonary or nasal delivery route, which resulted in the development of LEVADEX[®]. In 2006, we amended and restated this agreement. Under the terms of the agreement, we have the right to receive certain milestone payments based on development criteria that are solely the responsibility of MAP and royalties based on net sales of LEVADEX[®]. LEVADEX[®] is a self-administered formulation of DHE using an inhaler device. Our right to receive royalties in any particular country will expire upon the later of (i) 10 years after first commercial sale in that country, (ii) the date upon which the licensed know-how becomes known to the general public, and (iii) expiration of certain patent claims, each on a country-by-country basis. Either party may terminate the agreement upon a material, uncured default of the other party. On May 26, 2011, MAP submitted an NDA to the FDA for LEVADEX[®]. In March of 2012, the FDA issued a complete response letter identifying issues relating to chemistry, manufacturing and controls deficiencies at a third party manufacturer that needed to be resolved to the FDA's satisfaction as well as citing the need for additional time to complete review of inhaler usability information. In December 2012, MAP announced that its NDA resubmission for LEVADEX[®] was accepted for filing by the FDA. The FDA set a target date of April 15, 2013 under the Prescription Drug User Fee Act (PDUFA) to complete its review of the NDA resubmission. The FDA endeavors to complete its review of NDAs by the PDUFA date but does not always do so and the FDA's decision regarding a NDA can be delayed significantly beyond the original PDUFA date through various regulatory delays or regulatory actions. On January 22, 2013, Map entered into an agreement and plan of merger with Allergan, Inc. and a wholly-owned subsidiary of Allergan pursuant to which Allergan commenced a tender offer for all of the outstanding shares of Map. The tender offer acquisition transaction is scheduled to be completed on February 28, 2013.

BAX 855 and Long-Acting Therapies for Hemophilia A, Agreement with Subsidiaries of Baxter International

In September 2005, we entered into an exclusive research, development, license, manufacturing and supply agreement with Baxter Healthcare SA and Baxter Healthcare Corporation (Baxter) to develop products with an extended half-life for the treatment and prophylaxis of Hemophilia A patients using our proprietary PEGylation technology. The first product in this collaboration, BAX 855, is a longer-acting (PEGylated) form of a full-length recombinant factor VIII (rFVIII) protein. BAX 855 is a full-length PEGylated longer-acting recombinant factor VIII (rFVIII) that was developed to increase the half-life of ADVATE (Antihemophilic Factor (Recombinant) Plasma/Albumin-Free Method). We are entitled to up to \$84.0 million in total development and sales milestone payments of which \$11.0 million has been paid to date, as well as royalties on net sales varying by product and country of sale. Our right to receive these royalties in any particular country will expire upon the later of ten years after the first commercial sale of the product in that country or the expiration of patent rights in certain designated countries or in that particular country.

In 2012, Baxter completed a Phase 1 clinical study for BAX 855 that was a prospective, open-label study assessing the safety, tolerability and pharmacokinetics of BAX 855 in 19 previously treated patients age 18 years or older with severe hemophilia A. In January 2013, Baxter announced the top level results from this Phase 1 clinical study. This study demonstrated that the half-life (measuring the duration of activity of the drug in the body) of BAX 855 was approximately 1.5-fold higher compared to ADVATE. A longer half-life was achieved in all patients in the study using BAX 855, no patients developed inhibitors to either base molecule, BAX 855 or PEG, and no patients had allergic reactions. Eleven adverse events were reported in eight patients across both treatment arms, but none was serious, treatment-related or resulted in withdrawal from the study. Baxter recently initiated a Phase 3 clinical study of BAX 855 in the U.S. and patient enrollment commenced in February 2013.

[Table of Contents](#)

The Phase 2/3 clinical study is designed as a multi-center, open-label study called PROLONG-ATE and will enroll more than 100 previously treated adult patients with severe hemophilia A to assess the efficacy, safety and pharmacokinetics of BAX 855 for prophylaxis and on-demand treatment of bleeding.

Cipro DPI (formerly known as Cipro Inhale), Agreement with Bayer Schering Pharma AG Assigned to Novartis as of December 31, 2008

We were a party to a collaborative research, development and commercialization agreement with Bayer Schering Pharma AG (Bayer) related to the development of an inhaled powder formulation of ciprofloxacin delivered by way of a dry powder inhaler, Cipro DPI (formerly known as Cipro Inhale) for the treatment of chronic lung infections caused by *Pseudomonas aeruginosa* in cystic fibrosis patients. On December 31, 2008, we assigned the agreement to Novartis Pharma AG in connection with the completion of the pulmonary asset sale transaction. However, we retained our economic interest in the future potential net sales royalties if Cipro DPI receives regulatory approval and is successfully commercialized by Bayer. Cipro DPI has completed Phase 2 clinical development with Bayer for the treatment of chronic lung infections. In August 2012, Bayer initiated a Phase 3 clinical study which it calls RESPIRE for Cipro DPI in patients with non-cystic fibrosis bronchiectasis. The two placebo-controlled trials, RESPIRE-1 and RESPIRE-2, are enrolling up to 600 patients and will evaluate Cipro DPI as a chronic, intermittent therapy over a period of 48 weeks.

Overview of Select Licensing Partnerships for Approved Products

Neulasta®, Agreement with Amgen, Inc.

In July 1995, we entered into a non-exclusive supply and license agreement (the 1995 Agreement) with Amgen, Inc., pursuant to which we licensed our proprietary PEGylation technology to be used in the development and manufacture of Neulasta®. Neulasta® selectively stimulates the production of neutrophils that are depleted by cytotoxic chemotherapy, a condition called neutropenia that makes it more difficult for the body to fight infections. On October 29, 2010, we amended and restated the 1995 Agreement by entering into a supply, dedicated suite and manufacturing guarantee agreement (the 2010 Agreement) and an amended and restated license agreement with Amgen Inc. and Amgen Manufacturing, Limited (together referred to as Amgen). Under the terms of the 2010 Agreement, we guarantee the manufacture and supply of our proprietary PEGylation materials (Polymer Materials) to Amgen in an existing manufacturing suite to be used exclusively for the manufacture of Polymer Materials for Amgen in our manufacturing facility in Huntsville, Alabama. This supply arrangement is on a non-exclusive basis (other than the use of the manufacturing suite and certain equipment) whereby we are free to manufacture and supply the Polymer Materials to any other third party and Amgen is free to procure the Polymer Materials from any other third party. Under the terms of the 2010 Agreement, we received a \$50.0 million upfront payment in return for guaranteeing supply of certain quantities of Polymer Materials to Amgen and the Additional Rights described below, and Amgen will pay manufacturing fees calculated based on fixed and variable components applicable to the Polymer Materials ordered by Amgen and delivered by us. Amgen has no minimum purchase commitments. If quantities of the Polymer Materials ordered by Amgen exceed specified quantities (with each specified quantity representing a small portion of the quantity that we historically supplied to Amgen), significant additional payments become payable to us in return for guaranteeing supply of additional quantities of the Polymer Materials.

The term of the Agreement runs through October 29, 2020. In the event we become subject to a bankruptcy or insolvency proceeding, we cease to own or control the manufacturing facility in Huntsville, Alabama, we fail to manufacture and supply the Polymer Materials or certain other events occur, Amgen or its designated third party will have the right to elect, among certain other options, to take title to the dedicated equipment and access the manufacturing facility to operate the manufacturing suite solely for the purpose of manufacturing the Polymer Materials (Additional Rights). Amgen may terminate the 2010 Agreement for convenience or due to an uncured material default by us. Either party may terminate the 2010 Agreement in the event of insolvency or bankruptcy of the other party.

***PEGASYS®*, Agreement with F. Hoffmann-La Roche Ltd**

In February 1997, we entered into a license, manufacturing and supply agreement with F. Hoffmann-La Roche Ltd and Hoffmann-La Roche Inc. (Roche), under which we granted Roche a worldwide, exclusive license to use certain intellectual property related to our PEGylation materials to manufacture and commercialize a certain class of products, of which PEGASYS® is the only product currently commercialized. PEGASYS® is approved in the U.S., E.U. and other countries for the treatment of Hepatitis C and is designed to help the patient's immune system fight the Hepatitis C virus. As a result of Roche exercising a license extension option in December 2009, beginning in 2010 Roche has the right to manufacture all of its requirements for our proprietary PEGylation materials for PEGASYS® and we supply raw materials or perform additional manufacturing, if any, only on a back-up basis. In connection with Roche's exercise of the license extension option in December 2009, we received a payment of \$31.0 million. The agreement expires on the later of January 10, 2015 or the expiration of our last relevant patent containing a valid claim.

***Somavert®*, Agreement with Pfizer, Inc.**

In January 2000, we entered into a license, manufacturing and supply agreement with Sensus Drug Development Corporation (subsequently acquired by Pharmacia Corp. in 2001 and then acquired by Pfizer, Inc. in 2003), for the PEGylation of Somavert® (pegvisomant), a human growth hormone receptor antagonist for the treatment of acromegaly. We currently manufacture our proprietary PEGylation reagent for Pfizer on a price per gram basis. The agreement expires on the later of ten years from the grant of first marketing authorization in the designated territory, which occurred in March 2003, or the expiration of our last relevant patent containing a valid claim. In addition, Pfizer may terminate the agreement if marketing authorization is withdrawn or marketing is no longer feasible due to certain circumstances, and either party may terminate for cause if certain conditions are met.

***PEG-Intron®*, Agreement with Merck (through its acquisition of Schering-Plough Corporation)**

In February 2000, we entered into a manufacturing and supply agreement with Schering-Plough Corporation (Schering) for the manufacture and supply of our proprietary PEGylation materials to be used by Schering in production of a pegylated recombinant human interferon-alpha (PEG-Intron). PEG-Intron is a treatment for patients with Hepatitis C. Schering was acquired by, and became a wholly-owned subsidiary of, Merck & Co., Inc. We currently manufacture our proprietary PEGylation materials for Schering on a price per gram basis. In December 2010, the parties amended the manufacturing and supply agreement to provide for a transition plan to an alternative manufacturer and extension of the term through the successful manufacturing transition or December 31, 2018 at the latest. The amended agreement provided for a one-time payment and milestone payments as well as increased pricing for any future manufacturing performed by us.

***Macugen®*, Agreement with Valeant Pharmaceuticals International, Inc.**

In 2002, we entered into a license, manufacturing and supply agreement with Eyetech, Inc. (subsequently acquired by Valeant Pharmaceuticals International, Inc or Valeant), pursuant to which we license certain intellectual property related to our proprietary PEGylation technology for the development and commercialization of Macugen®, a PEGylated anti-vascular endothelial growth factor aptamer currently approved in the U.S. and E.U. for age-related macular degeneration. We currently manufacture our proprietary PEGylation materials for Valeant on a price per gram basis. Under the terms of the agreement, we will receive royalties on net product sales in any particular country for the longer of ten years from the date of the first commercial sale of the product in that country or the duration of patent coverage. We share a portion of the payments received under this agreement with Enzon Pharmaceuticals, Inc. The agreement expires upon the expiration of our last relevant patent containing a valid claim. In addition, Valeant may terminate the agreement if marketing authorization is withdrawn or marketing is no longer feasible due to certain circumstances, and either party may terminate for cause if certain conditions are met.

CIMZIA® Agreement with UCB Pharma

In December 2000, we entered into a license, manufacturing and supply agreement covering our proprietary PEGylation materials for use in CIMZIA® (certolizumab pegol) with Celltech Chiroscience Ltd., which was acquired by UCB Pharma (UCB) in 2004. Under the terms of the agreement, UCB is responsible for all clinical development, regulatory, and commercialization expenses. We have the right to receive manufacturing revenue on the basis of a fixed price per gram. We were also entitled to receive royalties on net sales of the CIMZIA® product for the longer of ten years from the first commercial sale of the product anywhere in the world or the expiration of patent rights in a particular country. In February 2012, we sold our rights to receive royalties on future worldwide net sales of CIMZIA® effective as of January 1, 2012 until the agreement with UCB is terminated or expires. This sale is further discussed in Note 7 of Item 8, Financial Statements and Supplementary Data. We share a portion of the payments we receive from UCB with Enzon Pharmaceuticals, Inc. The agreement expires upon the expiration of all of UCB's royalty obligations, provided that the agreement can be extended for successive two year renewal periods upon mutual agreement of the parties. In addition, UCB may terminate the agreement should it cease the development and marketing of CIMZIA® and either party may terminate for cause under certain conditions.

MIRCERA® (C.E.R.A.) (Continuous Erythropoietin Receptor Activator), Agreement with F. Hoffmann-La Roche Ltd

In December 2000, we entered into a license, manufacturing and supply agreement with F. Hoffmann-La Roche Ltd and Hoffmann-La Roche Inc. (Roche), which was amended and restated in its entirety in December 2005. Pursuant to the agreement, we license our intellectual property related to our proprietary PEGylation materials for the manufacture and commercialization of Roche's MIRCERA® product. MIRCERA® is a novel continuous erythropoietin receptor activator indicated for the treatment of anemia associated with chronic kidney disease in patients on dialysis and patients not on dialysis. As of the end of 2006, we were no longer required to manufacture and supply our proprietary PEGylation materials for MIRCERA® under our original agreement. In February 2012, we entered into a toll-manufacturing agreement with Roche under which we manufactured our proprietary PEGylation material for MIRCERA®. Roche entered into the toll-manufacturing agreement with the objective of establishing us as a secondary back-up source on a non-exclusive basis. Under the terms this agreement, Roche agreed to pay us an up-front payment of \$5.0 million plus a total of up to \$22.0 million in performance-based milestone payments upon our achievement of certain manufacturing readiness, validation and production milestones, including the delivery of specified quantities of PEGylation materials, all of which were successfully completed by the end of January 2013. Roche would also pay us additional consideration for any future orders of the PEGylation materials for MIRCERA® beyond the initial quantities ordered as part of the initial arrangement. Roche may terminate the toll-manufacturing agreement due to an uncured material default by us or for convenience under certain circumstances and subject to certain financial obligations. We were also entitled to receive royalties on net sales of the MIRCERA® product. In February 2012, we sold all of our future rights to receive royalties on future worldwide net sales of MIRCERA® effective as of January 1, 2012. This sale is further discussed in Note 7 of Item 8, Financial Statements and Supplementary Data.

Significant Developments in our Most Recent Five Year Period

Exit from the Inhaled Insulin Programs

In 1995, we entered into a collaborative development and licensing agreement with Pfizer to develop and market Exubera® and, in 2006 and 2007, we entered into a series of interim letter agreements with Pfizer to develop a next generation form of dry powder inhaled insulin and proprietary inhaler device, also known as NGI. In January 2006, Exubera® received marketing approval in the U.S. and EU for the treatment of adults with Type 1 and Type 2 diabetes. Under the collaborative development and licensing agreement, Pfizer had sole responsibility for marketing and selling Exubera®. We performed all of the manufacturing of the Exubera® dry powder insulin, and we supplied Pfizer with the Exubera® inhalers through third party contract manufacturers

[Table of Contents](#)

(Bespak Europe Ltd. and Tech Group North America, Inc.). We recorded no revenue from Pfizer related to these activities for the years ended December 31, 2012, 2011, 2010, 2009, and 2008.

On October 18, 2007, Pfizer announced that it was exiting the Exubera® business and gave notice of termination under our collaborative development and licensing agreement. On November 9, 2007, we entered into a termination agreement and mutual release with Pfizer. Under this agreement we received a one-time payment of \$135.0 million in November 2007 from Pfizer in satisfaction of all outstanding contractual obligations under our then-existing agreements relating to Exubera® and NGI. All agreements between Pfizer and us related to Exubera® and NGI, other than the termination agreement and mutual release and a related interim Exubera® manufacturing maintenance letter, terminated on November 9, 2007. In February 2008, we entered into a termination agreement with Bespak and Tech Group pursuant to which we paid an aggregate of \$40.2 million in satisfaction of outstanding accounts payable and termination costs and expenses that were due under the Exubera® inhaler contract manufacturing agreement. We also entered into a maintenance agreement with both Pfizer and Tech Group to preserve key personnel and manufacturing capacity to support potential future Exubera® inhaler manufacturing if we found a new partner for the inhaled insulin program.

On April 9, 2008, we announced that we had ceased all negotiations with potential partners for Exubera® and NGI as a result of new data analysis from ongoing clinical trials conducted by Pfizer which indicated an increase in the number of new cases of lung cancer in Exubera® patients who were former smokers as compared to patients in the control group who were not former smokers. In April 2008, we ceased all spending associated with maintaining Exubera® manufacturing capacity and any further NGI development, including, but not limited to, terminating the Exubera® manufacturing capacity maintenance arrangements with Pfizer and Tech Group.

Asset Sale to Novartis

On December 31, 2008, we completed the sale of certain assets related to our pulmonary business, associated technology and intellectual property to Novartis Pharma AG and Novartis Pharmaceuticals Corporation (together referred to as Novartis) for a purchase price of \$115.0 million in cash (Novartis Pulmonary Asset Sale). Under the terms of the transaction, we transferred to Novartis certain assets and obligations related to our pulmonary technology, development and manufacturing operations including:

- dry powder and liquid pulmonary technology platform including but not limited to our pulmonary inhalation devices, formulation technology, manufacturing technology and related intellectual property;
- capital equipment, information systems and the facility lease for our pulmonary development and manufacturing facility in San Carlos, California;
- manufacturing and associated development services payments for the Cipro Inhale program;
- manufacturing and royalty rights to the Tobramycin Inhalation Powder (TIP) program through the termination of our collaboration agreement with Novartis;
- certain other interests that we had in two private companies; and
- approximately 140 of our personnel primarily dedicated to our pulmonary technology, development programs, and manufacturing operations.

In addition, we retained all of our rights to BAY41-6551, partnered with Bayer Healthcare LLC, certain royalty rights for the Cipro DPI development program partnered with Bayer Schering Pharma AG, and certain intellectual property rights specific to inhaled insulin.

In connection with the Novartis Pulmonary Asset Sale, we also entered into an Exclusive License Agreement with Novartis Pharma. Pursuant to the Exclusive License Agreement, Novartis Pharma granted back

[Table of Contents](#)

to us an exclusive, irrevocable, perpetual, non-transferable, royalty-free and worldwide license under certain specific patent rights and other related intellectual property rights acquired by Novartis Pharma from Nektar in the transaction, as well as certain improvements or modifications thereto that are made by Novartis Pharma after the closing. Certain of such patent rights and other related intellectual property rights relate to our development program for inhaled vancomycin or are necessary for us to satisfy certain of our continuing contractual obligations to third parties, including in connection with development, manufacture, sale, and commercialization activities related to BAY41-6551. We also entered into a service agreement pursuant to which we have subcontracted to Novartis certain services to be performed related to our partnered program for BAY41-6551 and a transition services agreement pursuant to which Novartis and we will provide each other with specified services for limited time periods following the closing of the Novartis Pulmonary Asset Sale to facilitate the transition of the acquired assets and business from us to Novartis.

Government Regulation

The research and development, clinical testing, manufacture and marketing of products using our technologies are subject to regulation by the FDA and by comparable regulatory agencies in other countries. These national agencies and other federal, state and local entities regulate, among other things, research and development activities and the testing (in vitro, in animals, and in human clinical trials), manufacture, labeling, storage, recordkeeping, approval, marketing, advertising and promotion of our products.

The approval process required by the FDA before a product using any of our technologies may be marketed in the U.S. depends on whether the chemical composition of the product has previously been approved for use in other dosage forms. If the product is a new chemical entity that has not been previously approved, the process includes the following:

- extensive preclinical laboratory and animal testing;
- submission of an Investigational New Drug application (IND) prior to commencing clinical trials;
- adequate and well-controlled human clinical trials to establish the safety and efficacy of the drug for the intended indication; and
- extensive pharmaceutical development for the characterization of the chemistry, manufacturing process and controls for the active ingredient and drug product; and
- submission to the FDA of an NDA for approval of a drug, a Biological License Application (BLA) for approval of a biological product or a Premarket Approval Application (PMA) or Premarket Notification 510(k) for a medical device product (a 510(k)).

If the active chemical ingredient has been previously approved by the FDA, the approval process is similar, except that certain preclinical tests relating to systemic toxicity normally required for the IND and NDA or BLA may not be necessary if the company has a right of reference to such data or is eligible for approval under Section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act or the biosimilars provisions of the Public Health Services Act.

Preclinical tests include laboratory evaluation of product chemistry and animal studies to assess the safety and efficacy of the product and its chosen formulation. Preclinical safety tests must be conducted by laboratories that comply with FDA good laboratory practices (GLP) regulations. The results of the preclinical tests for drugs, biological products and combination products subject to the primary jurisdiction of the FDA's Center for Drug Evaluation and Research (CDER) or Center for Biologics Evaluation and Research (CBER) are submitted to the FDA as part of the IND and are reviewed by the FDA before clinical trials can begin. Clinical trials may begin 30 days after receipt of the IND by the FDA, unless the FDA raises objections or requires clarification within that period.

[Table of Contents](#)

Clinical trials involve the administration of the drug to healthy volunteers or patients under the supervision of a qualified, identified medical investigator according to a protocol submitted in the IND for FDA review. Drug products to be used in clinical trials must be manufactured according to current good manufacturing practices (cGMP). Clinical trials are conducted in accordance with protocols that detail the objectives of the study and the parameters to be used to monitor participant safety and product efficacy as well as other criteria to be evaluated in the study. Each protocol is submitted to the FDA in the IND.

Apart from the IND process described above, each clinical study must be reviewed by an independent Institutional Review Board (IRB) and the IRB must be kept current with respect to the status of the clinical study. The IRB considers, among other things, ethical factors, the potential risks to subjects participating in the trial and the possible liability to the institution where the trial is conducted. The IRB also reviews and approves the informed consent form to be signed by the trial participants and any significant changes in the clinical study.

Clinical trials are typically conducted in three sequential phases. Phase 1 involves the initial introduction of the drug into healthy human subjects (in most cases) and the product generally is tested for tolerability, pharmacokinetics, absorption, metabolism and excretion. Phase 2 involves studies in a limited patient population to:

- determine the preliminary efficacy of the product for specific targeted indications;
- determine dosage and regimen of administration; and
- identify possible adverse effects and safety risks.

If Phase 2 trials demonstrate that a product appears to be effective and to have an acceptable safety profile, Phase 3 trials are undertaken to evaluate the further clinical efficacy and safety of the drug and formulation within an expanded patient population at geographically dispersed clinical study sites and in large enough trials to provide statistical proof of efficacy and tolerability. The FDA, the clinical trial sponsor, the investigators or the IRB may suspend clinical trials at any time if any one of them believes that study participants are being subjected to an unacceptable health risk. In some cases, the FDA and the drug sponsor may determine that Phase 2 trials are not needed prior to entering Phase 3 trials.

Following a series of formal meetings and communications between the drug sponsor and the regulatory agencies, the results of product development, preclinical studies and clinical studies are submitted to the FDA as an NDA or BLA for approval of the marketing and commercial shipment of the drug product. The FDA may deny approval if applicable regulatory criteria are not satisfied or may require additional clinical or pharmaceutical testing or requirements. Even if such data are submitted, the FDA may ultimately decide that the NDA or BLA does not satisfy all of the criteria for approval. Additionally, the approved labeling may narrowly limit the conditions of use of the product, including the intended uses, or impose warnings, precautions or contraindications which could significantly limit the potential market for the product. Further, as a condition of approval, the FDA may impose post-market surveillance, or Phase 4, studies or risk evaluation and mitigation strategies. Product approvals, once obtained, may be withdrawn if compliance with regulatory standards is not maintained or if safety concerns arise after the product reaches the market. The FDA may require additional post-marketing clinical testing and pharmacovigilance programs to monitor the effect of drug products that have been commercialized and has the power to prevent or limit future marketing of the product based on the results of such programs. After approval, there are ongoing reporting obligations concerning adverse reactions associated with the product, including expedited reports for serious and unexpected adverse events.

Each manufacturing establishment producing drug product for the U.S. market must be registered with the FDA and typically is inspected by the FDA prior to NDA or BLA approval of a drug product manufactured by such establishment. Establishments handling controlled substances must also be licensed by the U.S. Drug Enforcement Administration. Manufacturing establishments of U.S. marketed products are subject to inspections

[Table of Contents](#)

by the FDA for compliance with cGMP and other U.S. regulatory requirements. They are also subject to U.S. federal, state, and local regulations regarding workplace safety, environmental protection and hazardous and controlled substance controls, among others.

A number of the drugs we are developing are already approved for marketing by the FDA in another form or using another delivery system. We believe that, when working with drugs approved in other forms, the approval process for products using our alternative drug delivery or formulation technologies may involve less risk and require fewer tests than new chemical entities do. However, we expect that our formulations will often use excipients not currently approved for use. Use of these excipients will require additional toxicological testing that may increase the costs of, or length of time needed to, gain regulatory approval. In addition, as they relate to our products, regulatory procedures may change as regulators gain relevant experience, and any such changes may delay or increase the cost of regulatory approvals.

For product candidates currently under development utilizing pulmonary technology, the pulmonary inhaler devices are considered to be part of a drug and device combination for deep lung delivery of each specific molecule. The FDA will make a determination as to the most appropriate center and division within the agency that will assume primary responsibility for the review of the applicable applications, which would consist of an IND and an NDA or BLA where CDER or CBER are determined to have primary jurisdiction or an investigational device exemption application and PMA or 510(k) where the Center for Devices and Radiological Health (CDRH) is determined to have primary jurisdiction. In the case of our product candidates, CDER in consultation with CDRH could be involved in the review. The assessment of jurisdiction within the FDA is based upon the primary mode of action of the drug or the location of the specific expertise in one of the centers.

Where CDRH is determined to have primary jurisdiction over a product, 510(k) clearance or PMA approval is required. Medical devices are classified into one of three classes — Class I, Class II, or Class III — depending on the degree of risk associated with each medical device and the extent of control needed to ensure safety and effectiveness. Devices deemed to pose lower risks are placed in either Class I or II, which requires the manufacturer to submit to the FDA a Premarket Notification requesting permission to commercially distribute the device. This process is known as 510(k) clearance. Some low risk devices are exempted from this requirement. Devices deemed by the FDA to pose the greatest risk, such as life-sustaining, life-supporting or implantable devices, or devices deemed not substantially equivalent to a previously cleared 510(k) device are placed in Class III, requiring PMA approval.

To date, our partners have generally been responsible for clinical and regulatory approval procedures, but we may participate in this process by submitting to the FDA a drug master file developed and maintained by us which contains data concerning the manufacturing processes for the inhaler device, PEGylation materials or drug. For our proprietary products, we prepare and submit an IND and are responsible for additional clinical and regulatory procedures for product candidates being developed under an IND. The clinical and manufacturing, development and regulatory review and approval process generally takes a number of years and requires the expenditure of substantial resources. Our ability to manufacture and market products, whether developed by us or under collaboration agreements, ultimately depends upon the completion of satisfactory clinical trials and success in obtaining marketing approvals from the FDA and equivalent foreign health authorities.

Sales of our products outside the U.S. are subject to local regulatory requirements governing clinical trials and marketing approval for drugs. Such requirements vary widely from country to country.

In the U.S., under the Orphan Drug Act, the FDA may grant orphan drug designation to drugs intended to treat a rare disease or condition, which is generally a disease or condition that affects fewer than 200,000 individuals in the U.S. The company that obtains the first FDA approval for a designated orphan drug for a rare disease receives marketing exclusivity for use of that drug for the designated condition for a period of seven years. In addition, the Orphan Drug Act provides for protocol assistance, tax credits, research grants, and exclusions from user fees for sponsors of orphan products. Once a product receives orphan drug exclusivity, a

[Table of Contents](#)

second product that is considered to be the same drug for the same indication may be approved during the exclusivity period only if the second product is shown to be “clinically superior” to the original orphan drug in that it is more effective, safer or otherwise makes a “major contribution to patient care” or the holder of exclusive approval cannot assure the availability of sufficient quantities of the orphan drug to meet the needs of patients with the disease or condition for which the drug was designated. Similar incentives also are available for orphan drugs in the E.U.

In the U.S., the FDA may grant Fast Track or Breakthrough designation to a product candidate, which allows the FDA to expedite the review of new drugs that are intended for serious or life-threatening conditions and that demonstrate the potential to address unmet medical needs. Important features of Fast Track or Breakthrough designation include a potentially reduced clinical program and close, early communication between the FDA and the sponsor company to improve the efficiency of product development.

Patents and Proprietary Rights

We own more than 150 U.S. and 500 foreign patents and a number of pending patent applications that cover various aspects of our technologies. We have filed patent applications, and plan to file additional patent applications, covering various aspects of our PEGylation and advanced polymer conjugate technologies and our proprietary product candidates. More specifically, our patents and patent applications cover polymer architecture, drug conjugates, formulations, methods of making polymers and polymer conjugates, methods of administering polymer conjugates, and methods of manufacturing polymers and polymer conjugates. Our patent portfolio contains patents and patent applications that encompass our PEGylation and advanced polymer conjugate technology platforms, some of which we acquired in our acquisition of Shearwater Corporation in June 2001. Our patent strategy is to file patent applications on innovations and improvements to cover a significant majority of the major pharmaceutical markets in the world. Generally, patents have a term of twenty years from the earliest priority date (assuming all maintenance fees are paid). In some instances, patent terms can be increased or decreased, depending on the laws and regulations of the country or jurisdiction that issued the patent.

In January 2002, we entered into a Cross-License and Option Agreement with Enzon Pharmaceuticals, Inc., pursuant to which we and Enzon provided certain licenses to selected portions of each party’s PEGylation patent portfolio. In certain cases, we have the option to license certain of Enzon’s PEGylation patents for use in our proprietary products or for sublicenses to third parties in each case in exchange for payments to Enzon based on manufacturing profits, revenue share or royalties on net sales if a designated product candidate is approved in one or more markets.

In connection with the Novartis Pulmonary Asset Sale, as of December 31, 2008, we entered into an exclusive license agreement with Novartis Pharma. Pursuant to the exclusive license agreement, Novartis Pharma grants back to us an exclusive, irrevocable, perpetual, royalty-free and worldwide license under certain specific patent rights and other related intellectual property rights acquired by Novartis from us in the Novartis Pulmonary Asset Sale, as well as certain improvements or modifications thereto that are made by Novartis. Certain of such patent rights and other related intellectual property rights relate to our development program for inhaled vancomycin or are necessary for us to satisfy certain continuing contractual obligations to third parties, including in connection with development, manufacture, sale, and commercialization activities related to BAY41-6551 partnered with Bayer Healthcare LLC.

We also rely on trade secret protection for our confidential and proprietary information. No assurance can be given that we can meaningfully protect our trade secrets. Others may independently develop substantially equivalent confidential and proprietary information or otherwise gain access to, or disclose, our trade secrets. Please refer to Item 1A, Risk Factors, including but not limited to “We rely on trade secret protection and other unpatented proprietary rights for important proprietary technologies, and any loss of such rights could harm our business, results of operations and financial condition.”

[Table of Contents](#)

In certain situations in which we work with drugs covered by one or more patents, our ability to develop and commercialize our technologies may be affected by limitations in our access to these proprietary drugs. Even if we believe we are free to work with a proprietary drug, we cannot guarantee that we will not be accused of, or determined to be, infringing a third party's rights and be prohibited from working with the drug or found liable for damages. Any such restriction on access or liability for damages would have a material adverse effect on our business, results of operations and financial condition.

The patent positions of pharmaceutical and biotechnology companies, such as ours, are uncertain and involve complex legal and factual issues. There can be no assurance that patents that have issued will be held valid and enforceable in a court of law. Even for patents that are held valid and enforceable, the legal process associated with obtaining such a judgment is time consuming and costly. Additionally, issued patents can be subject to opposition or other proceedings that can result in the revocation of the patent or maintenance of the patent in amended form (and potentially in a form that renders the patent without commercially relevant and/or broad coverage). Further, our competitors may be able to circumvent and otherwise design around our patents. Even if a patent is issued and enforceable, because development and commercialization of pharmaceutical products can be subject to substantial delays, patents may expire early and provide only a short period of protection, if any, following the commercialization of a products encompassed by our patent(s). We may have to participate in interference proceedings declared by the U.S. Patent and Trademark Office, which could result in a loss of the patent and/or substantial cost to us. Please refer to Item 1A, Risk Factors, including without limitation, "If any of our pending patent applications do not issue, or are deemed invalid following issuance, we may lose valuable intellectual property protection."

U.S. and foreign patent rights and other proprietary rights exist that are owned by third parties and relate to pharmaceutical compositions and reagents, medical devices and equipment and methods for preparation, packaging and delivery of pharmaceutical compositions. We cannot predict with any certainty which, if any, of these rights will be considered relevant to our technology by authorities in the various jurisdictions where such rights exist, nor can we predict with certainty which, if any, of these rights will or may be asserted against us by third parties. We could incur substantial costs in defending ourselves and our partners against any such claims. Furthermore, parties making such claims may be able to obtain injunctive or other equitable relief, which could effectively block our ability to develop or commercialize some or all of our products in the U.S. and abroad and could result in the award of substantial damages. In the event of a claim of infringement, we or our partners may be required to obtain one or more licenses from third parties. There can be no assurance that we can obtain a license to any technology that we determine we need on reasonable terms, if at all, or that we could develop or otherwise obtain alternative technology. The failure to obtain licenses if needed may have a material adverse effect on our business, results of operations and financial condition. Please refer to Item 1A, Risk Factors, including without limitation, "We may not be able to obtain intellectual property licenses related to the development of our drug candidates on a commercially reasonable basis, if at all."

It is our policy to require our employees and consultants, outside scientific collaborators, sponsored researchers and other advisors who receive confidential information from us to execute confidentiality agreements upon the commencement of employment or consulting relationships with us. These agreements provide that all confidential information developed or made known to the individual during the course of the individual's relationship with us is to be kept confidential and not disclosed to third parties except in specific circumstances. The agreements provide that all inventions conceived by an employee shall be our property. There can be no assurance, however, that these agreements will provide meaningful protection or adequate remedies for our trade secrets in the event of unauthorized use or disclosure of such information.

Customer Concentrations

Our revenue is derived from our collaboration agreements with partners, under which we may receive contract research payments, milestone payments based on clinical progress, regulatory progress or net sales achievements, royalties or manufacturing revenue. UCB Pharma, Roche, and Affymax represented 30%, 23%, and 11% of our revenue, respectively, for the year ended December 31, 2012. No other collaboration partner accounted for more than 10% of our total revenue during the year ended December 31, 2012.

Backlog

Pursuant to our collaboration agreements, we manufacture and supply our proprietary PEGylation materials, inventory is produced and sales are made pursuant to customer purchase orders for delivery. The volume of our proprietary PEGylation materials actually ordered by our customers, as well as shipment schedules, are subject to frequent revisions that reflect changes in both the customers' needs and our manufacturing capacity. In our partnered programs where we provide contract research services, those services are typically provided under a work plan that is subject to frequent revisions that change based on the development needs and status of the program. The backlog at a particular time is affected by a number of factors, including scheduled date of manufacture and delivery and development program status. In light of industry practice and our own experience, we do not believe that backlog as of any particular date is indicative of future results.

Competition

Competition in the pharmaceutical and biotechnology industry is intense and characterized by aggressive research and development and rapidly-evolving science, technology, and standards of medical care throughout the world. We frequently compete with pharmaceutical companies and other institutions with greater financial, research and development, marketing and sales, manufacturing and managerial capabilities. We face competition from these companies not just in product development but also in areas such as recruiting employees, acquiring technologies that might enhance our ability to commercialize products, establishing relationships with certain research and academic institutions, enrolling patients in clinical trials and seeking program partnerships and collaborations with larger pharmaceutical companies.

Science and Technology Competition

We believe that our proprietary and partnered products will compete with others in the market on the basis of one or more of the following parameters: efficacy, safety, ease of use and cost. We face intense science and technology competition from a multitude of technologies seeking to enhance the efficacy, safety and ease of use of approved drugs and new drug molecule candidates. A number of the drug candidates in our pipeline have direct and indirect competition from large pharmaceutical companies and biopharmaceutical companies. With our PEGylation and advanced polymer conjugate technologies, we believe we have competitive advantages relating to factors such as efficacy, safety, ease of use and cost for certain applications and molecules. We constantly monitor scientific and medical developments in order to improve our current technologies, seek licensing opportunities where appropriate, and determine the best applications for our technology platforms.

In the fields of PEGylation and advanced polymer conjugate technologies, our competitors include Biogen, Savient, Dr. Reddy's Laboratories, Enzon Pharmaceuticals, Inc., Mountain View Pharmaceuticals, Inc., SunBio Corporation, NOF Corporation, and Novo Nordisk A/S (formerly assets held by Neose Technologies, Inc.). Several other chemical, biotechnology and pharmaceutical companies may also be developing PEGylation technology, advanced polymer conjugate technology or technologies intended to deliver similar scientific and medical benefits. Some of these companies license intellectual property or pegylation materials to other companies, while others apply the technology to create their own drug candidates.

Product and Program Specific Competition

Naloxegol (formerly NKTR-118) (orally-available peripheral opioid antagonist)

There are no oral drugs approved specifically for the treatment of opioid-induced constipation (OIC) or opioid bowel dysfunction (OBD). The only approved treatment for OIC is a subcutaneous treatment known as methylnaltrexone bromide marketed by Salix Pharmaceuticals, Ltd under a license from Progenics Pharmaceuticals, Inc. Methylnaltrexone bromide is indicated for the treatment of opioid-induced constipation in patients with advanced illness who are receiving palliative care, when response to laxative therapy has not been sufficient. In August 2012, Ironwood Pharmaceuticals, Inc. (which is in collaboration with Forest Laboratories) received approval from the FDA for LINZESS™ (linaclotide) as a once-daily treatment for adult men and women with irritable bowel syndrome with constipation or chronic idiopathic constipation. Other therapies used to treat OIC and OBD include over-the-counter laxatives and stool softeners, such as docusate sodium, senna, and milk of magnesia. These therapies do not address the underlying cause of constipation as a result of opioid use and are generally viewed as ineffective or only partially effective to treat the symptoms of OIC and OBD.

There are a number of companies developing potential products which are in various stages of clinical development and are being evaluated for the treatment of OIC and OBD in different patient populations. Potential competitors include Progenics Pharmaceuticals, Inc. in collaboration with Salix Pharmaceuticals, Ltd., Cubist Pharmaceuticals, GlaxoSmithKline, Mundipharma Int. Limited, Theravance, Inc., Sucampo Pharmaceuticals, Alkermes, Inc. and Takeda Pharmaceutical Company Limited.

Etirinotecan pegol (next-generation topoisomerase I inhibitor)

There are a number of chemotherapies and cancer therapies approved today and in various stages of clinical development for breast and ovarian cancers including but not limited to: Abraxane (paclitaxel protein-bound particles for injectable suspension (albumin bound)), Afinitor® (everolimus), Doxil® (doxorubicin HCl), Ellence® (epirubicin), Gemzar® (gemcitabine), Halaven® (eribulin), Herceptin® (trastuzumab), Hycamtin® (topotecan), Ixempra® (ixabepilone), Navelbine® (vinorelbine), Paraplatin® (carboplatin), Taxol® (paclitaxel) and Taxotere (docetaxel). These therapies are only partially effective in treating breast and ovarian cancer. Major pharmaceutical or biotechnology companies with approved drugs or drugs in development for these cancers include Bristol-Myers Squibb, Eisai, Inc., Roche Holding Group (including its Genentech subsidiary), GlaxoSmithKline plc, Pfizer, Inc., Eli Lilly & Co., and many others. There are currently no drugs in Phase 3 development to specifically treat metastatic breast cancer following anthracycline, taxane and capecitabine therapy in either the adjuvant or metastatic setting.

There are also a number of chemotherapies and cancer therapies approved today and in clinical development for the treatment of colorectal cancer. Approved therapies for the treatment of colorectal cancer include Eloxatin® (oxaliplatin), Camptosar® (irinotecan), Avastin® (bevacizumab), Zaltrap® (Ziv-aflibercept), Stivarga® (regorafenib), Erbitux® (cetuximab), Vectibix® (panitumumab), Xeloda® (capecitabine), Aducril® (fluorouracil), and Wellcovorin® (leucovorin). These therapies are only partially effective in treating the disease. There are a number of drugs in various stages of preclinical and clinical development from companies exploring cancer therapies or improved chemotherapeutic agents to potentially treat colorectal cancer. If these drugs are approved, they could be competitive with etirinotecan pegol if it is approved by government health authorities. These include products in development from Bristol-Myers Squibb Company, Pfizer, Inc., GlaxoSmithKline plc, Antigenics, Inc., F. Hoffman-La Roche Ltd, Novartis AG, Cell Therapeutics, Inc., Neopharm Inc., Mediatech Research Ltd, Alchemia Limited, and many others.

BAY41-6551 (Amikacin Inhale, formerly NKTR-061)

There are currently no approved drugs on the market for adjunctive treatment or prevention of gram-negative pneumonias in mechanically ventilated patients which are also administered via the pulmonary route. The current standard of care includes approved intravenous antibiotics which are partially effective for the

[Table of Contents](#)

treatment of either hospital-acquired pneumonia or ventilator-associated pneumonia in patients on mechanical ventilators. These drugs include drugs that fall into the categories of antipseudomonal cephalosporins, antipseudomonal carbapenems, beta-lactam/beta-lactamase inhibitors, antipseudomonal fluoroquinolones, such as ciprofloxacin or levofloxacin, and aminoglycosides, such as amikacin, gentamycin or tobramycin.

Research and Development

Our total research and development expenditures can be disaggregated into the following significant types of expenses (in millions):

	Years Ended December 31,		
	2012	2011	2010
Salaries and employee benefits	\$ 49.8	\$ 43.8	\$ 37.8
Stock compensation expense	7.1	7.9	7.2
Facility and equipment	11.3	12.9	13.0
Outside services, including Contract Research Organizations	58.9	43.0	33.4
Supplies, including clinical trial materials	12.5	14.9	13.1
Travel, lodging and meals	3.4	3.1	2.5
Other	5.7	1.2	1.1
Research and development expense	<u>\$148.7</u>	<u>\$126.8</u>	<u>\$108.1</u>

Manufacturing and Supply

We have a manufacturing facility located in Huntsville, Alabama that is capable of manufacturing PEGylated derivatives and starting materials for active pharmaceutical ingredients (APIs). The facility is also used to produce APIs to support the early phases of clinical development of our proprietary drug candidates. The facility and associated equipment are designed and operated to be consistent with the all applicable laws and regulations.

As we do not maintain the capability to manufacture finished drug products, we utilize contract manufacturers to manufacture the finished drug product for us. We source drug starting materials for our manufacturing activities from one or more suppliers. For the drug starting materials necessary for our proprietary drug candidate development, we have agreements for the supply of such drug components with drug manufacturers or suppliers that we believe have sufficient capacity to meet our demands. However, from time to time, we source critical raw materials and services from one or a limited number of suppliers and there is a risk that if such supply or services were interrupted, it would materially harm our business. In addition, we typically order raw materials and services on a purchase order basis and do not enter into long-term dedicated capacity or minimum supply arrangements. We utilize the services of contract manufacturers to manufacture APIs required for later phases of clinical development and eventual commercialization for us under all applicable laws and regulations.

Environment

As a manufacturer of PEG reagents for the U.S. market, we are subject to inspections by the FDA for compliance with cGMP and other U.S. regulatory requirements, including U.S. federal, state and local regulations regarding environmental protection and hazardous and controlled substance controls, among others. Environmental laws and regulations are complex, change frequently and have tended to become more stringent over time. We have incurred, and may continue to incur, significant expenditures to ensure we are in compliance with these laws and regulations. We would be subject to significant penalties for failure to comply with these laws and regulations.

Employees and Consultants

As of December 31, 2012, we had 433 employees, of which 325 employees were engaged in research and development, commercial operations and quality activities and 108 employees were engaged in general administration and business development. Of the 433 employees, 353 were located in the United States and 80 were located in India. We have a number of employees who hold advanced degrees, such as Ph.D.s. None of our employees are covered by a collective bargaining agreement, and we have experienced no work stoppages. We believe that we maintain good relations with our employees.

To complement our own expert professional staff, we utilize specialists in regulatory affairs, process engineering, manufacturing, quality assurance, clinical development and business development. These individuals include certain of our scientific advisors as well as independent consultants.

Available Information

Our website address is <http://www.nektar.com>. The information in, or that can be accessed through, our website is not part of this annual report on Form 10-K. Our annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K and amendments to those reports are available, free of charge, on or through our website as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities Exchange Commission (SEC). The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. Information on the operation of the Public Reference Room can be obtained by calling 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements and other information regarding our filings at www.sec.gov.

EXECUTIVE OFFICERS OF THE REGISTRANT

The following table sets forth the names, ages and positions of our executive officers as of February 28, 2013:

Name	Age	Position
Howard W. Robin	60	Director, President and Chief Executive Officer
John Nicholson	61	Senior Vice President and Chief Financial Officer
Robert A. Medve, M.D.	47	Senior Vice President and Chief Medical Officer
Stephen K. Doberstein, Ph.D.	54	Senior Vice President and Chief Scientific Officer
Gil M. Labrucherie, J.D.	41	Senior Vice President, General Counsel and Secretary
Maninder Hora, Ph.D	59	Senior Vice President, Pharmaceutical Development and Manufacturing Operations
Jillian B. Thomsen	47	Senior Vice President, Finance and Chief Accounting Officer
Rinko Ghosh	49	Senior Vice President and Chief Business Officer

Howard W. Robin has served as our President and Chief Executive Officer since January 2007 and has served as a member of our board of directors since February 2007. Mr. Robin served as Chief Executive Officer, President and a director of Sirna Therapeutics, Inc., a biotechnology company, from July 2001 to November 2006 and from January 2001 to June 2001, served as their Chief Operating Officer, President and as a director. From 1991 to 2001, Mr. Robin was Corporate Vice President and General Manager at Berlex Laboratories, Inc., a pharmaceutical products company that is a subsidiary of Schering, AG, and from 1987 to 1991 he served as Vice President of Finance and Business Development and Chief Financial Officer of Berlex. From 1984 to 1987, Mr. Robin was Director of Business Planning and Development at Berlex. He was a Senior Associate with

[Table of Contents](#)

Arthur Andersen & Co. prior to joining Berlex. Mr. Robin serves as a director of the Biotechnology Industry Organization, the world's largest biotechnology industry trade organization, and also serves as a director of BayBio, a non-profit trade association serving the Northern California life sciences community. He received his B.S. in Accounting and Finance from Fairleigh Dickinson University in 1974.

John Nicholson has served as our Senior Vice President and Chief Financial Officer since December 2007. Mr. Nicholson joined the Company as Senior Vice President of Corporate Development and Business Operations in October 2007 and was appointed Senior Vice President and Chief Financial Officer in December 2007. Before joining Nektar, Mr. Nicholson spent 18 years in various executive roles at Schering Berlin, Inc., the U.S. management holding company of Bayer Schering Pharma AG, a pharmaceutical company. From 1997 to September 2007, Mr. Nicholson served as Schering Berlin Inc.'s Vice President of Corporate Development and Treasurer. From 2001 to September 2007, he concurrently served as President of Schering Berlin Insurance Co., and from February 2007 through September 2007, he also concurrently served as President of Bayer Pharma Chemicals and Schering Berlin Capital Corp. Mr. Nicholson holds a B.B.A. from the University of Toledo.

Robert A. Medve, M.D. has served as our Senior Vice President and Chief Medical Officer since June 2011 and previously served as our Vice President Drug Development and Medical Affairs when he joined Nektar in March 2011 until June 2011. From November 2006 to March 2011, he was Chief Medical and Regulatory Officer at NeurAxon, Inc., a privately held biotechnology company developing drug candidates for the treatment of pain and CNS disorders. From April 2006 to November 2006, Dr. Medve served as Corporate Vice President, Science, Research and Development for Lifetree Clinical Research, and thereafter served in a consulting capacity from time to time. From May 2003 to November 2005, Dr. Medve served as Senior Vice President, Drug Development and Chief Medical and Regulatory Officer for Metaphore Pharmaceuticals, a biotechnology company developing drug candidates for pain and inflammation. From January 1998 to May 2003, he served in various leadership positions at Johnson & Johnson, a pharmaceutical company, most recently as Executive Director of Pediatric Drug Development. From May 1996 to January 1998, he served in the medical affairs group at Knoll Pharmaceutical Company, a wholly-owned pharmaceutical subsidiary of BASF acquired by Abbot in 2001, most recently as Director of Medical Affairs. Prior to joining industry, Dr. Medve served as the Director of Pediatric Pain Management and Instructor of Anesthesiology at the State University of New York at Buffalo (SUNY) and also completed a Pain Management Fellowship at SUNY. He completed his residency in anesthesia at Thomas Jefferson University Hospital and served as a surgical intern at Mercy Health Systems Medical Center. Dr. Medve received his M.D. from Jefferson Medical College and received his B.S. in Biology from the Pennsylvania State University.

Stephen K. Doberstein, Ph.D. has served as our Senior Vice President and Chief Scientific Officer since January 2010. From October 2008 through December 2009, Dr. Doberstein served as Vice President, Research at Xoma (US) LLC, a publicly traded clinical stage biotechnology company. From July 2004 until August 2008, he served as Vice President, Research at privately held Five Prime Therapeutics, a clinical stage biotechnology company. From September 2001 until July 2004, Dr. Doberstein was Vice President, Research at privately held Xencor, Inc., a clinical stage biotechnology company. From 1997 to 2000, he held various pharmaceutical research positions at Exelixis, Inc., a publicly traded clinical stage biotechnology company. Prior to working at Exelixis, Dr. Doberstein was a Howard Hughes Postdoctoral Fellow and a Muscular Dystrophy Association Senior Postdoctoral Fellow at the University of California Berkeley. Dr. Doberstein received his Ph.D. Biochemistry, Cell and Molecular Biology from the Johns Hopkins University School of Medicine and received a B.S. in Chemical Engineering from the University of Delaware.

Gil M. Labrucherie has served as our Senior Vice President, General Counsel and Secretary since April 2007, responsible for all aspects of our legal affairs. Mr. Labrucherie served as our Vice President, Corporate Legal from October 2005 through April 2007. From October 2000 to September 2005, Mr. Labrucherie was Vice President of Corporate Development at E2open. While at E2open, Mr. Labrucherie was responsible for global corporate alliances and merger and acquisitions. Prior to E2open, he was the Senior Director of Corporate Development at AltaVista Company, an Internet search company, where he was responsible for strategic

[Table of Contents](#)

partnerships and mergers and acquisitions. Mr. Labrucherie serves on the General Counsels Committee of the Biotechnology Industry Organization, the world's largest biotechnology industry trade organization. Mr. Labrucherie began his career as an associate in the corporate practice of the law firm of Wilson Sonsini Goodrich & Rosati, P.C. Mr. Labrucherie received his J.D. from the Berkeley Law School and a B.A. from the University of California Davis.

Maninder Hora, Ph.D. has served as our Senior Vice President, Pharmaceutical Development and Manufacturing Operations since August 2010. From December 2008 to July 2010, he was Vice President, Product and Quality Operations at Facet Biotech Corporation, a clinical stage biotechnology company, which was acquired by Abbot in April 2010. From July 2006 to December 2008, Dr. Hora served in various management capacities at PDL Biopharma, Inc., a biopharmaceutical company, most recently as Vice President, Product Operations. From 1986 to 2006, Dr. Hora held positions of increasing responsibility with Chiron Corporation (now Novartis), a pharmaceutical company, serving most recently at Chiron as Vice President of Process and Product Development. Dr. Hora served as a key member of various teams that successfully registered eight drugs or vaccines in the U.S. and Europe during his 20-year tenure at Chiron. Dr. Hora has also held positions at Wyeth Pharmaceuticals and GlaxoSmithKline PLC prior to joining Chiron. Dr. Hora completed his Ph.D. in Bioengineering from the Indian Institute of Technology, Delhi, India, and was a Fulbright Scholar at the University of Washington, and received his B.S. in chemistry from the University of Jabalpur.

Jillian B. Thomsen has served as our Senior Vice President, Finance and Chief Accounting Officer since February 2010. From March 2006 through March 2008, Ms. Thomsen served as our Vice President Finance and Corporate Controller and from April 2008 through January 2010 she served as our Vice President Finance and Chief Accounting Officer. Before joining Nektar, Ms. Thomsen was Vice President Finance and Deputy Corporate Controller of Calpine Corporation from September 2002 to February 2006. Ms. Thomsen is a certified public accountant and previously was a senior manager at Arthur Andersen LLP, where she worked from 1990 to 2002, and specialized in audits of multinational consumer products, life sciences, manufacturing and energy companies. Ms. Thomsen holds a Masters of Accountancy from the University of Denver and a B.A. in Business Economics from Colorado College.

Rinko Ghosh has served as our Senior Vice President and Chief Business Officer since March 2010. He served as our Senior Vice President, Business Development and Alliance Management from March 2008 through February 2010, our Vice President, Business Development from August 2006 until February 2008, Senior Director, Business Development from July 2005 until July 2006, and prior to that he worked in a variety of corporate and business development roles for us from May 2001 to June 2005. From February 2001 to April 2001, he was engaged as a commercial development consultant at Aviron (now Medimmune/AstraZeneca) in Palo Alto. From 1999 to 2000, Mr. Ghosh was co-Chief Executive Officer of a private biotechnology company in Asia. From 1994 to 1999, he was engaged as a management consultant with A.T. Kearney, a global management consulting firm. From 1989 to 1992, he worked as an environmental consultant with Environ Corporation, a human health and environmental consulting firm. Mr. Ghosh earned his M.B.A. from the Wharton School, University of Pennsylvania, his M.S. in Environmental Engineering from Vanderbilt University, and his B.S. in Chemical Engineering from the Indian Institute of Technology, Bombay.

Item 1A. Risk Factors

We are providing the following cautionary discussion of risk factors, uncertainties and assumptions that we believe are relevant to our business. These are factors that, individually or in the aggregate, we think could cause our actual results to differ materially from expected and historical results and our forward-looking statements. We note these factors for investors as permitted by Section 21E of the Exchange Act and Section 27A of the Securities Act. You should understand that it is not possible to predict or identify all such factors. Consequently, you should not consider this section to be a complete discussion of all potential risks or uncertainties that may substantially impact our business. Moreover, we operate in a competitive and rapidly changing environment.

New factors emerge from time to time and it is not possible to predict the impact of all of these factors on our business, financial condition or results of operations.

Risks Related to Our Business

Drug development is a long and inherently uncertain process with a high risk of failure at every stage of development.

We have a number of proprietary drug candidates and partnered drug candidates in research and development ranging from the early discovery research phase through preclinical testing and clinical trials. Preclinical testing and clinical studies are long, expensive and highly uncertain processes. It will take us, or our collaborative partners, several years to complete clinical studies. The start or end of a clinical study is often delayed or halted due to changing regulatory requirements, manufacturing challenges, required clinical trial administrative actions, slower than anticipated patient enrollment, changing standards of care, availability or prevalence of use of a comparator drug or required prior therapy, clinical outcomes, or our and our partners' financial constraints.

Drug development is a highly uncertain scientific and medical endeavor, and failure can unexpectedly occur at any stage of clinical development. Typically, there is a high rate of attrition for drug candidates in preclinical and clinical trials due to scientific feasibility, safety, efficacy, changing standards of medical care and other variables. The risk of failure increases for our drug candidates that are based on new technologies, such as the application of our advanced polymer conjugate technology to small molecules, including naloxegol, etirinotecan pegol, NKTR-181, NKTR-192, NKTR-171 and other drug candidates currently in discovery research or preclinical development. The failure of one or more of our drug candidates could have a material adverse effect on our business, financial condition and results of operations.

If we or our partners do not obtain regulatory approval for our drug candidates on a timely basis, or at all, or if the terms of any approval impose significant restrictions or limitations on use, our business, results of operations and financial condition will be negatively affected.

We or our partners may not obtain regulatory approval for drug candidates on a timely basis, or at all, or the terms of any approval (which in some countries includes pricing approval) may impose significant restrictions or limitations on use. Drug candidates must undergo rigorous animal and human testing and an extensive FDA mandated or equivalent foreign government health authority review process for safety and efficacy. The time required for obtaining regulatory decisions is uncertain and difficult to predict. The FDA and other U.S. and foreign health authorities have substantial discretion, at any phase of development, to terminate clinical studies, require additional clinical development or other testing, delay or withhold registration and marketing approval and mandate product withdrawals, including recalls. Further, health authorities have the discretion to analyze data using their own methodologies that may differ from those used by us or our partners which could lead such authorities to arrive at different conclusions regarding the safety or efficacy of a drug candidate. In addition, undesirable side effects caused by our drug candidates could cause us or regulatory authorities to interrupt, delay or halt clinical trials and could result in a more restricted label or the delay or denial of regulatory approval by regulatory authorities. For example, we understand that the FDA is exploring whether there is any evidence of a potential cardiovascular class effect related to opioid withdrawal associated with mu-opioid antagonists and naloxegol is a mu-opioid antagonist. Although AstraZeneca has completed comprehensive safety studies for naloxegol as part of the KODIAC development program and the results from these studies are positive, the health authorities retain significant discretion over regulatory requirements which remain very uncertain and difficult to predict prior to obtaining approval.

Even if we or our partners receive regulatory approval of a product, the approval may limit the indicated uses for which the drug may be marketed. Our partnered drugs that have obtained regulatory approval, and the manufacturing processes for these products, are subject to continued review and periodic inspections by the FDA

and other regulatory authorities. Discovery from such review and inspection of previously unknown problems may result in restrictions on marketed products or on us, including withdrawal or recall of such products from the market, suspension of related manufacturing operations or a more restricted label. The failure to obtain timely regulatory approval of product candidates, any product marketing limitations or a product withdrawal would negatively impact our business, results of operations and financial condition.

Even with success in previously completed clinical trials, the risk of clinical failure for any drug candidate remains high prior to regulatory approval.

A number of companies have suffered significant unforeseen failures in late stage clinical studies due to factors such as inconclusive efficacy or safety, even after achieving positive results in earlier clinical studies that were satisfactory both to them and to reviewing government health authorities. While etirinotecan pegol, Amikacin Inhale, and BAX 855 have each demonstrated positive results from Phase 1 and 2 clinical studies, there is a substantial risk that Phase 3 clinical study outcomes for these drug candidates from larger patient populations will not demonstrate positive efficacy, safety or other clinical outcomes sufficient to support regulatory filings and achieve regulatory approval. Phase 3 clinical study outcomes remain very unpredictable and it is possible that one or more of these Phase 3 clinical studies could fail at any time due to efficacy, safety or other important clinical findings or regulatory requirements. If one or more of these drug candidates fail in Phase 3 clinical studies, it would have a material adverse effect on our business, financial condition and results of operations.

We are a party to numerous collaboration agreements and other significant agreements which contain complex commercial terms that could result in disputes, litigation or indemnification liability that could adversely affect our business, results of operations and financial condition.

We currently derive, and expect to derive in the foreseeable future, all of our revenue from collaboration agreements with biotechnology and pharmaceutical companies. These collaboration agreements contain complex commercial terms, including:

- clinical development and commercialization obligations that are based on certain commercial reasonableness performance standards that can often be difficult to enforce if disputes arise as to adequacy of our partner's performance;
- research and development performance and reimbursement obligations for our personnel and other resources allocated to partnered drug candidate development programs;
- clinical and commercial manufacturing agreements, some of which are priced on an actual cost basis for products supplied by us to our partners with complicated cost allocation formulas and methodologies;
- intellectual property ownership allocation between us and our partners for improvements and new inventions developed during the course of the collaboration;
- royalties on drug sales based on a number of complex variables, including net sales calculations, geography, scope of patent claim coverage, patent life, generic competitors, bundled pricing and other factors; and
- indemnity obligations for intellectual property infringement, product liability and certain other claims.

We are a party to certain significant agreements including an asset purchase agreement with Novartis pursuant to which we sold a significant portion of our pulmonary business at the end of 2008, the worldwide exclusive license agreement with AstraZeneca related to the further development and commercialization of naloxegol, and the purchase and sale agreement with RPI Finance Trust (RPI) related to the sale of our royalty interests in UCB's CIMZIA® and Roche's MIRCERA® that we completed in February 2012. Each of these agreements contains complex representations and warranties, covenants and indemnification obligations that

[Table of Contents](#)

could result in substantial future liability and harm our financial condition if we breach any of our agreements with Novartis, AstraZeneca, RPI or any third party agreements impacted by these complex transactions.

From time to time, we have informal dispute resolution discussions with third parties regarding the appropriate interpretation of the complex commercial terms contained in our agreements. One or more disputes may arise or escalate in the future regarding our collaboration agreements, transaction documents, or third-party license agreements that may ultimately result in costly litigation and unfavorable interpretation of contract terms, which would have a material adverse effect on our business, financial condition and results of operations.

We have substantial future capital requirements and there is a risk we may not have access to sufficient capital to meet our current business plan. If we do not receive substantial milestone payments from our existing collaboration agreements, execute new high value collaborations or other arrangements, or are unable to raise additional capital in one or more financing transactions, we would be unable to continue our current level of investment in research and development.

As of December 31, 2012, we had cash, cash equivalents, and investments in marketable securities valued at approximately \$302.2 million and indebtedness of approximately \$149.0 million, including approximately \$125.0 million in senior secured notes due July 2017, \$14.6 million in capital lease obligations, and \$9.4 million of other liabilities. In addition, at December 31, 2012, we had a \$131.3 million liability related to the sale of future royalties. While this royalty obligation liability will not be settled in cash, we may be required to make a payment of up to \$7.0 million in 2014 if the worldwide net sales thresholds of MIRCERA® in 2013 are not met. While we believe that our cash position will be sufficient to meet our liquidity requirements through at least the next 12 months, our future capital requirements will depend upon numerous unpredictable factors, including:

- the cost, timing and outcomes of clinical studies and regulatory reviews of our proprietary drug candidates that we have licensed to our collaboration partners —important examples include naloxegol that has been licensed to AstraZeneca, Amikacin Inhale that has been licensed to Bayer, and BAX 855 in connection with our licensing transaction with Baxter;
- if and when we receive potential milestone payments and royalties from our existing collaborations if the drug candidates subject to those collaborations achieve clinical, regulatory or commercial success. In particular, depending on whether AstraZeneca successfully submits regulatory filings with the FDA and with the EMA for naloxegol, we may or may not receive up to \$95.0 million in milestone payments under our license agreement with AstraZeneca, although AstraZeneca has indicated it plans to make such filings in the third quarter of 2013 subject to AstraZeneca's final preparation of the registration package and a pre-NDA meeting with the FDA;
- the progress, timing, cost and results of our clinical development programs — in particular our Phase 3 BEACON study for etirinotecan pegol and our Phase 2 clinical program for NKTR-181;
- the success, progress, timing and costs of our efforts to implement new collaborations, licenses and other transactions that increase our current net cash, such as the sale of additional royalty interests held by us, term loan or other debt arrangements, and the issuance of securities;
- the outcome of the regulatory review process and commercial success of drug products for which we are entitled to receive royalties (e.g., Map Pharmaceutical's LEVADEX®);
- the number of patients, enrollment criteria, primary and secondary endpoints, and the number of clinical studies required by the government health authorities in order to consider for approval our drug candidates and those of our collaboration partners;
- our general and administrative expenses, capital expenditures and other uses of cash; and
- disputes concerning patents, proprietary rights, or license and collaboration agreements that negatively impact our receipt of milestone payments or royalties or require us to make significant payments arising from licenses, settlements, adverse judgments or ongoing royalties.

[Table of Contents](#)

A significant multi-year capital commitment is required to advance our drug candidates through the various stages of research and development in order to generate sufficient data to enable high value collaboration partnerships with significant up-front payments or to successfully achieve regulatory approval. In the event we do not enter into any new collaboration partnerships with significant up-front payments and we choose to continue our main research and development programs, we may need to pursue financing alternatives, including dilutive equity-based financings, such as an offering of convertible debt or common stock, which would dilute the percentage ownership of our current common stockholders and could significantly lower the market value of our common stock. If sufficient capital is not available to us or is not available on commercially reasonable terms, it could require us to delay or reduce one or more of our research and development programs. If we are unable to sufficiently advance our research and development programs, it could substantially impair the value of such programs and result in a material adverse effect on our business, financial condition and results of operations.

The results from the expanded Phase 2 clinical study for etirinotecan pegol in women with platinum-resistant/refractory ovarian cancer are unlikely to result in a review or an approval of a NDA by the FDA.

We expanded the etirinotecan pegol Phase 2 study by 110 patients in women with platinum-resistant/refractory ovarian cancer that had received prior Doxil® therapy with the potential for us to consider an early NDA submission after we evaluate these expanded study results. We are currently in the process of compiling and performing verification procedures on the data from this study. Acceptance and approval of an NDA by the FDA almost always requires the sponsor to conduct comparative Phase 3 clinical studies prior to acceptance for review or approval of an NDA. As a result, acceptance for review or approval of an accelerated NDA submitted to the FDA based on overall response rate from our single-arm Phase 2 study in platinum-resistant/refractory ovarian cancer would be unusual and is highly unlikely. Therefore we do not expect the FDA to accept or approve a NDA based on this Phase 2 clinical study. The FDA has significant discretion to determine what constitutes a high unmet medical need, what therapies should be considered available to patients regardless of which therapies are approved or typically prescribed in a particular setting, the relevance of certain efficacy end points (e.g. overall response rate, progression free survival, overall survival), and the number of patients required to be studied to demonstrate sufficient therapeutic benefit and safety profile. One or more of such judgments and determinations by the FDA could impair our ability to submit an NDA for platinum resistant/refractory ovarian cancer patients, and even if submitted, whether the FDA would accept it for review or approve the NDA.

Further, this expansion of our Phase 2 clinical study in platinum resistant/refractory ovarian cancer will necessarily change the final efficacy (e.g., overall response rates, progression-free survival, overall survival) and safety (i.e., frequency and severity of serious adverse events) results, and, accordingly, the final results in this study remain subject to substantial change and could be materially and adversely different from previously announced results. If the clinical studies for etirinotecan pegol ovarian cancer are not successful, it could significantly harm our business, results of operations and financial condition.

While we have conducted numerous experiments using laboratory and home-based chemistry techniques that have not been able to convert NKTR-181 into a rapid-acting and more abusable opioid, there is a risk that in the future a technique could be discovered to convert NKTR-181 into a rapid-acting and more abusable opioid which would significantly diminish the value of this drug candidate.

An important objective of our NKTR-181 drug development program is to create a unique opioid molecule that does not rapidly enter a patient's central nervous system and therefore has the potential to be less susceptible to abuse than alternative opioid therapies. To date, we have conducted numerous experiments using laboratory and home-based chemistry techniques that have been unable to convert NKTR-181 into a rapidly-acting, more abusable form of opioid. In the future, an alternative chemistry technique, process or method of administration,

or combination thereof, may be discovered to enable the conversion of NKTR-181 into a more abusable opioid which could significantly and negatively impact the potential of NKTR-181.

If we are unable to establish and maintain collaboration partnerships on attractive commercial terms, our business, results of operations and financial condition could suffer.

We intend to continue to seek partnerships with pharmaceutical and biotechnology partners to fund a portion of our research and development capital requirements. The timing of new collaboration partnerships is difficult to predict due to availability of clinical data, the outcomes from our clinical studies, the number of potential partners that need to complete due diligence and approval processes, the definitive agreement negotiation process and numerous other unpredictable factors that can delay, impede or prevent significant transactions. If we are unable to find suitable partners or to negotiate collaboration arrangements with favorable commercial terms with respect to our existing and future drug candidates or the licensing of our intellectual property, or if any arrangements we negotiate, or have negotiated, are terminated, it could have a material adverse effect on our business, financial condition and results of operations.

Preliminary and interim data from our clinical studies that we announce or publish from time to time is subject to audit and verification procedures that could result in material changes in the final data and may change as more patient data becomes available.

From time to time, we publish preliminary or interim data from our clinical studies. For example, we have announced preliminary tumor response rate data from our expanded Phase 2 clinical study for etirinotecan pegol in platinum resistant/refractory ovarian cancer. Preliminary data remains subject to audit confirmation and verification procedures that may result in the final data being materially different from the preliminary data we previously published. Interim data is also subject to the risk that one or more of the clinical outcomes may materially change as patient enrollment continues and more patient data becomes available. As a result, preliminary and interim data should be viewed with caution until the final data are available. Material adverse changes in the final data could significantly harm our business prospects.

Delays in clinical studies are common and have many causes, and any significant delay in clinical studies being conducted by us or our partners could result in delay in regulatory approvals and jeopardize the ability to proceed to commercialization.

We or our partners may experience delays in clinical trials of drug candidates. Etirinotecan pegol and BAX 855 are currently in Phase 3 clinical studies and Bayer plans to advance Amikacin Inhale into Phase 3 clinical development in March 2013. In addition, we are conducting a Phase 2 study for NKTR-181 that we estimate will be completed in mid-2013 and we also plan to start a human abuse liability study for NKTR-181 during the first half of 2013. These and other of our planned clinical studies may not begin on time, have an effective design, enroll a sufficient number of patients or be completed on schedule, if at all. Our clinical trials for any of our product candidates could be delayed for a variety of reasons, including:

- delays in obtaining regulatory approval to commence a clinical study;
- delays in reaching agreement with applicable health authorities on a clinical study design;
- imposition of a clinical hold following an inspection of our clinical trial operations or trial sites by the FDA or other health authorities;
- we, our partners, the FDA or foreign health authorities could suspend or terminate a clinical study due to adverse side effects of a drug on subjects in the trial;
- delays in recruiting suitable patients to participate in a trial;
- delays in having patients complete participation in a trial or return for post-treatment follow-up;
- clinical sites dropping out of a trial to the detriment of enrollment rates;

[Table of Contents](#)

- delays in manufacturing and delivery of sufficient supply of clinical trial materials; and
- any change in health authorities policies or guidances applicable to our drug candidates.

If initiation or completion of any of the planned clinical studies are delayed for our drug candidates for any of the above reasons or otherwise, the approval process could be delayed and the ability to commercialize and commence sales of these drug candidates could be materially harmed, which could have a material adverse effect on our business, financial condition and results of operations.

The commercial potential of a drug candidate in development is difficult to predict. If the market size for a new drug is significantly smaller than we anticipate, it could significantly and negatively impact our revenue, results of operations and financial condition.

It is very difficult to estimate the commercial potential of product candidates due to important factors such as safety and efficacy compared to other available treatments, including potential generic drug alternatives with similar efficacy profiles, changing standards of care, third party payer reimbursement standards, patient and physician preferences, the availability of competitive alternatives that may emerge either during the long drug development process or after commercial introduction, and the availability of generic versions of our successful product candidates following approval by government health authorities based on the expiration of regulatory exclusivity or our inability to prevent generic versions from coming to market by asserting our patents. If due to one or more of these risks the market potential for a drug candidate is lower than we anticipated, it could significantly and negatively impact the commercial terms of any collaboration partnership potential for such drug candidate or, if we have already entered into a collaboration for such drug candidate, the revenue potential from royalty and milestone payments could be significantly diminished and would negatively impact our business, financial condition and results of operations.

We may not be able to obtain intellectual property licenses related to the development of our drug candidates on a commercially reasonable basis, if at all.

Numerous pending and issued U.S. and foreign patent rights and other proprietary rights owned by third parties relate to pharmaceutical compositions, methods of preparation and manufacturing, and methods of use and administration. We cannot predict with any certainty which, if any, patent references will be considered relevant to our or our collaboration partners' technology or drug candidates by authorities in the various jurisdictions where such rights exist, nor can we predict with certainty which, if any, of these rights will or may be asserted against us by third parties. In certain cases, we have existing licenses or cross-licenses with third parties, however the scope and adequacy of these licenses is very uncertain and can change substantially during long development and commercialization cycles for biotechnology and pharmaceutical products. There can be no assurance that we can obtain a license to any technology that we determine we need on reasonable terms, if at all, or that we could develop or otherwise obtain alternate technology. If we are required to enter into a license with a third party, our potential economic benefit for the products subject to the license will be diminished. If a license is not available on commercially reasonable terms or at all, we may be prevented from developing and selling the drug, which could significantly harm our business, results of operations, and financial condition.

If any of our pending patent applications do not issue, or are deemed invalid following issuance, we may lose valuable intellectual property protection.

The patent positions of pharmaceutical and biotechnology companies, such as ours, are uncertain and involve complex legal and factual issues. We own more than 150 U.S. and 500 foreign patents and a number of pending patent applications that cover various aspects of our technologies. There can be no assurance that patents that have issued will be held valid and enforceable in a court of law. Even for patents that are held valid and enforceable, the legal process associated with obtaining such a judgment is time consuming and costly. Additionally, issued patents can be subject to opposition or other proceedings that can result in the

[Table of Contents](#)

revocation of the patent or maintenance of the patent in amended form (and potentially in a form that renders the patent without commercially relevant and/or broad coverage). Further, our competitors may be able to circumvent and otherwise design around our patents. Even if a patent is issued and enforceable, because development and commercialization of pharmaceutical products can be subject to substantial delays, patents may expire early and provide only a short period of protection, if any, following the commercialization of a products encompassed by our patent(s). We may have to participate in interference proceedings declared by the U.S. Patent and Trademark Office, which could result in a loss of the patent and/or substantial cost to us.

We have filed patent applications, and plan to file additional patent applications, covering various aspects of our PEGylation and advanced polymer conjugate technologies and our proprietary product candidates. There can be no assurance that the patent applications for which we apply would actually issue as a patents, or do so with commercially relevant and/or broad coverage. The coverage claimed in a patent application can be significantly reduced before the patent is issued. The scope of our claim coverage can be critical to our ability to enter into licensing transactions with third parties and our right to receive royalties from our collaboration partnerships. Since publication of discoveries in scientific or patent literature often lags behind the date of such discoveries, we cannot be certain that we were the first inventor of inventions covered by our patents or patent applications. In addition, there is no guarantee that we will be the first to file a patent application directed to an invention.

An adverse outcome in any judicial proceeding involving intellectual property, including patents, could subject us to significant liabilities to third parties, require disputed rights to be licensed from or to third parties or require us to cease using the technology in dispute. In those instances where we seek an intellectual property license from another, we may not be able to obtain the license on a commercially reasonable basis, if at all, thereby raising concerns on our ability to freely commercialize our technologies and/or products.

We could be involved in legal proceedings and may incur substantial litigation costs and liabilities that will adversely affect our business, financial condition and results of operations.

From time to time, third parties have asserted, and may in the future assert, that we or our partners infringe their proprietary rights, such as patents and trade secrets, or have otherwise breached our obligations to them. The third party often bases its assertions on a claim that its patents cover our technology platform or drug candidates or that we have misappropriated its confidential or proprietary information. Similar assertions of infringement could be based on future patents that may issue to third parties. In certain of our agreements with our partners, we are obligated to indemnify and hold harmless our collaboration partners from intellectual property infringement, product liability and certain other claims, which could cause us to incur substantial costs and liability if we are called upon to defend ourselves and our partners against any claims. If a third party obtains injunctive or other equitable relief against us or our partners, they could effectively prevent us, or our partners, from developing or commercializing, or deriving revenue from, certain drugs or drug candidates in the U.S. and abroad. Currently, the Research Foundation of the State University of New York (SUNY) seeks to recover amounts it alleges it is owed pursuant to a technology licensing contract between SUNY and us. SUNY has filed an action in the United States District Court for the Northern District of New York. We dispute SUNY's claims. However, we cannot predict with certainty the eventual outcome of any pending or future litigation. Costs associated with such litigation, substantial damage claims, indemnification claims or royalties paid for licenses from third parties could have a material adverse effect on our business, financial condition and results of operations.

Third-party claims involving proprietary rights or other matters could also result in substantial settlement payments or substantial damages to be paid by us. For instance, a settlement might require us to enter a license agreement under which we would pay substantial royalties or other compensation to a third party, diminishing our future economic returns from the related drug. In October 2011, we entered into a settlement related to a trade secret and breach of contract litigation where we agreed to make an upfront payment of \$2.7 million and a future contingent payment of \$3.0 million if a certain drug candidate receives FDA approval. In 2006, we entered into a litigation settlement related to an intellectual property dispute with the University of Alabama in Huntsville

pursuant to which we paid \$11.0 million and agreed to pay an additional \$10.0 million in equal \$1.0 million installments over ten years ending with the last payment due on July 1, 2016.

In addition, from time to time, we may in the future assert claims against third parties, based on infringement of our proprietary rights or otherwise. Any such claims may not ultimately be successful, and we may incur substantial costs and liabilities in pursuing them.

Our manufacturing operations and those of our contract manufacturers are subject to laws and other governmental regulatory requirements, which, if not met, would have a material adverse effect on our business, results of operations and financial condition.

We and our contract manufacturers are required in certain cases to maintain compliance with current good manufacturing practices (cGMP), including cGMP guidelines applicable to active pharmaceutical ingredients, and with laws and regulations governing manufacture and distribution of controlled substances, and are subject to inspections by the FDA, DEA or comparable agencies in other jurisdictions to confirm such compliance. We anticipate periodic regulatory inspections of our drug manufacturing facilities and the manufacturing facilities of our contract manufacturers for compliance with applicable regulatory requirements. Any failure to follow and document our or our contract manufacturers' adherence to such cGMP and other laws and governmental regulations or satisfy other manufacturing and product release regulatory requirements may disrupt our ability to meet our manufacturing obligations to our customers, lead to significant delays in the availability of products for commercial use or clinical study, result in the termination or hold on a clinical study or delay or prevent filing or approval of marketing applications for our products. Failure to comply with applicable laws and regulations may also result in sanctions being imposed on us, including fines, injunctions, civil penalties, failure of regulatory authorities to grant marketing approval of our products, delays, suspension or withdrawal of approvals, license revocation, seizures or recalls of products, operating restrictions and criminal prosecutions, any of which could harm our business. The results of these inspections could result in costly manufacturing changes or facility or capital equipment upgrades to satisfy the FDA that our manufacturing and quality control procedures are in substantial compliance with cGMP. Manufacturing delays, for us or our contract manufacturers, pending resolution of regulatory deficiencies or suspensions would have a material adverse effect on our business, results of operations and financial condition.

If we or our contract manufacturers are not able to manufacture drugs or drug substances in sufficient quantities that meet applicable quality standards, it could delay clinical studies, result in reduced sales or constitute a breach of our contractual obligations, any of which could significantly harm our business, financial condition and results of operations.

If we or our contract manufacturers are not able to manufacture and supply sufficient drug quantities meeting applicable quality standards required to support large clinical studies or commercial manufacturing in a timely manner, we risk delaying our clinical studies or those of our collaboration partners, reducing drug sales by our collaboration partners or breaching contractual obligations. As a result, we could incur substantial costs and damages, and reduce or even eliminate product or royalty revenue. In some cases, we rely on contract manufacturing organizations to manufacture and supply drug product for our clinical studies and those of our collaboration partners. Pharmaceutical manufacturing involves significant risks and uncertainties related to the demonstration of adequate stability, sufficient purification of the drug substance and drug product, the identification and elimination of impurities, optimal formulations, process validation, and challenges in controlling for all of these variables. We have faced and may in the future face significant difficulties, delays and unexpected expenses as we validate third party contract manufacturers required for drug supply to support our clinical studies and the clinical studies and products of our collaboration partners. Failure by us or our contract manufacturers to supply drug product in sufficient quantities that meet all applicable quality requirements could result in supply shortages for our clinical studies or the clinical studies and commercial activities of our collaboration partners. Such failures could significantly and materially delay clinical trials and regulatory submissions or result in reduced sales, any of which could significantly harm our business prospects, results of operations and financial condition.

[Table of Contents](#)

Failures in device manufacturing could have similar effects. For instance, we entered a service agreement with Novartis pursuant to which we subcontract to Novartis certain important services to be performed in relation to our partnered program for Amikacin Inhale with Bayer Healthcare LLC. If our subcontractors do not dedicate adequate resources to our programs, we risk breach of our obligations to our partners. Building and validating large scale clinical or commercial-scale manufacturing facilities and processes, recruiting and training qualified personnel and obtaining necessary regulatory approvals is complex, expensive and time consuming. In the past we have encountered challenges in scaling up manufacturing to meet the requirements of large scale clinical trials without making modifications to the drug formulation, which may cause significant delays in clinical development. We experienced repeated significant delays in starting the Phase 3 clinical development program for Amikacin Inhale as we sought to finalize and validate the device design with a demonstrated capability to be manufactured at commercial scale. Drug/device combination products are particularly complex, expensive and time-consuming to develop due to the number of variables involved in the final product design, including ease of patient and doctor use, maintenance of clinical efficacy, reliability and cost of manufacturing, regulatory approval requirements and standards and other important factors. There continues to be substantial and unpredictable risk and uncertainty related to manufacturing and supply until such time as the commercial supply chain is validated and proven.

Our revenue is exclusively derived from our collaboration agreements, which can result in significant fluctuation in our revenue from period to period, and our past revenue is therefore not necessarily indicative of our future revenue.

Our revenue is derived from our collaboration agreements from which we receive contract research payments, milestone payments based on clinical progress, regulatory progress or net sales achievements, royalties and manufacturing revenue. Significant variations in the timing of receipt of cash payments and our recognition of revenue can result from significant milestone payments based on the execution of new collaboration agreements, the timing of clinical outcomes, regulatory approval, commercial launch and the achievement of certain annual sales thresholds. The amount of our revenue derived from collaboration agreements in any given period will depend on a number of unpredictable factors, including our ability to find and maintain suitable collaboration partners, the timing of the negotiation and conclusion of collaboration agreements with such partners, whether and when we or our collaboration partners achieve clinical, regulatory and sales milestones, the timing of regulatory approvals in one or more major markets, reimbursement levels by private and government payers, and the market introduction of new drugs or generic versions of the approved drug, as well as other factors.

If our partners, on which we depend to obtain regulatory approvals for and to commercialize our partnered drug candidates, are not successful, or if such collaborations fail, the development or commercialization of our partnered drug candidates may be delayed or unsuccessful.

When we sign a collaborative development agreement or license agreement to develop a drug candidate with a pharmaceutical or biotechnology company, the pharmaceutical or biotechnology company is generally expected to:

- design and conduct large scale clinical studies;
- prepare and file documents necessary to obtain government approvals to sell a given drug candidate; and/or
- market and sell the drugs when and if they are approved.

Our reliance on collaboration partners poses a number of risks to our business, including risks that:

- we may be unable to control whether, and the extent to which, our partners devote sufficient resources to the development programs or commercial marketing and sales efforts;

[Table of Contents](#)

- disputes may arise or escalate in the future with respect to the ownership of rights to technology or intellectual property developed with partners;
- disagreements with partners could lead to delays in, or termination of, the research, development or commercialization of product candidates or to litigation or arbitration proceedings;
- contracts with our partners may fail to provide us with significant protection, or to be effectively enforced, in the event one of our partners fails to perform;
- partners have considerable discretion in electing whether to pursue the development of any additional product candidates and may pursue alternative technologies or products either on their own or in collaboration with our competitors;
- partners with marketing rights may choose to devote fewer resources to the marketing of our partnered products than they do to products of their own development or products in-licensed from other third parties;
- the timing and level of resources that our partners dedicate to the development program will affect the timing and amount of revenue we receive;
- we do not have the ability to unilaterally terminate agreements (or partners may have extension or renewal rights) that we believe are not on commercially reasonable terms or consistent with our current business strategy;
- partners may be unable to pay us as expected; and
- partners may terminate their agreements with us unilaterally for any or no reason, in some cases with the payment of a termination fee penalty and in other cases with no termination fee penalty.

Given these risks, the success of our current and future partnerships is highly unpredictable and can have a substantial negative or positive impact on our business. We have entered into collaborations in the past that have been subsequently terminated, such as our collaboration with Pfizer for the development and commercialization of inhaled insulin that was terminated by Pfizer in November 2007. If other collaborations are suspended or terminated, our ability to commercialize certain other proposed product candidates could also be negatively impacted. If our collaborations fail, our product development or commercialization of product candidates could be delayed or cancelled, which would negatively impact our business, results of operations and financial condition.

If we are unable either to create sales, marketing and distribution capabilities or to enter into agreements with third parties to perform these functions, we will be unable to commercialize our products successfully.

We currently have no sales, marketing or distribution capabilities. To commercialize any of our drugs that receive regulatory approval for commercialization, we must either develop internal sales, marketing and distribution capabilities, which would be expensive and time consuming, or enter into collaboration arrangements with third parties to perform these services. If we decide to market our products directly, we must commit significant financial and managerial resources to develop a marketing and sales force with technical expertise and with supporting distribution, administration and compliance capabilities. Factors that may inhibit our efforts to commercialize our products directly or indirectly with our partners include:

- our inability to recruit and retain adequate numbers of effective sales and marketing personnel;
- the inability of sales personnel to obtain access to or persuade adequate numbers of physicians to use or prescribe our products;
- the lack of complementary products or multiple product pricing arrangements may put us at a competitive disadvantage relative to companies with more extensive product lines; and
- unforeseen costs and expenses associated with creating and sustaining an independent sales and marketing organization.

If we, or our partners through our collaborations, are not successful in recruiting sales and marketing personnel or in building a sales and marketing infrastructure, we will have difficulty commercializing our products, which would adversely affect our business, results of operations and financial condition.

To the extent we rely on other pharmaceutical or biotechnology companies with established sales, marketing and distribution systems to market our products, we will need to establish and maintain partnership arrangements, and we may not be able to enter into these arrangements on acceptable terms or at all. To the extent that we enter into co-promotion or other arrangements, any revenues we receive will depend upon the efforts of third parties, which may not be successful and are only partially in our control. In the event that we market our products without a partner, we would be required to build a sales and marketing organization and infrastructure, which would require a significant investment and we may not be successful in building this organization and infrastructure in a timely or efficient manner.

We purchase some of the starting material for drugs and drug candidates from a single source or a limited number of suppliers, and the partial or complete loss of one of these suppliers could cause production delays, clinical trial delays, substantial loss of revenue and contract liability to third parties.

We often face very limited supply of a critical raw material that can only be obtained from a single, or a limited number of, suppliers, which could cause production delays, clinical trial delays, substantial lost revenue opportunity or contract liability to third parties. For example, there are only a limited number of qualified suppliers, and in some cases single source suppliers, for the raw materials included in our PEGylation and advanced polymer conjugate drug formulations, and any interruption in supply or failure to procure such raw materials on commercially feasible terms could harm our business by delaying our clinical trials, impeding commercialization of approved drugs or increasing our costs to the extent we cannot pass on increased costs to a manufacturing customer.

We rely on trade secret protection and other unpatented proprietary rights for important proprietary technologies, and any loss of such rights could harm our business, results of operations and financial condition.

We rely on trade secret protection for our confidential and proprietary information. No assurance can be given that others will not independently develop substantially equivalent confidential and proprietary information or otherwise gain access to our trade secrets or disclose such technology, or that we can meaningfully protect our trade secrets. In addition, unpatented proprietary rights, including trade secrets and know-how, can be difficult to protect and may lose their value if they are independently developed by a third party or if their secrecy is lost. Any loss of trade secret protection or other unpatented proprietary rights could harm our business, results of operations and financial condition.

We expect to continue to incur substantial losses and negative cash flow from operations and may not achieve or sustain profitability in the future.

For the year ended December 31, 2012, we reported a net loss of \$171.9 million. If and when we achieve profitability depends upon a number of factors, including the timing and recognition of milestone payments and royalties received, the timing of revenue under our collaboration agreements, the amount of investments we make in our proprietary product candidates and the regulatory approval and market success of our product candidates. We may not be able to achieve and sustain profitability.

Other factors that will affect whether we achieve and sustain profitability include our ability, alone or together with our partners, to:

- develop drugs utilizing our technologies, either independently or in collaboration with other pharmaceutical or biotech companies;
- effectively estimate and manage clinical development costs, particularly the cost of the BEACON study and the Phase 2 clinical study for NKTR-181;

[Table of Contents](#)

- receive necessary regulatory and marketing approvals;
- maintain or expand manufacturing at necessary levels;
- achieve market acceptance of our partnered products;
- receive royalties on products that have been approved, marketed or submitted for marketing approval with regulatory authorities; and
- maintain sufficient funds to finance our activities.

If government and private insurance programs do not provide payment or reimbursement for our partnered products or proprietary products, those products will not be widely accepted, which would have a negative impact on our business, results of operations and financial condition.

In both domestic and foreign markets, sales of our partnered and proprietary products that have received regulatory approval will depend in part on market acceptance among physicians and patients, pricing approvals by government authorities and the availability of payment or reimbursement from third-party payers, such as government health administration authorities, managed care providers, private health insurers and other organizations. Such third-party payers are increasingly challenging the price and cost effectiveness of medical products and services. Therefore, significant uncertainty exists as to the pricing approvals for, and the payment or reimbursement status of, newly approved healthcare products. Moreover, legislation and regulations affecting the pricing of pharmaceuticals may change before regulatory agencies approve our proposed products for marketing and could further limit pricing approvals for, and reimbursement of, our products from government authorities and third-party payers. A government or third-party payer decision not to approve pricing for, or provide adequate coverage and reimbursements of, our products would limit market acceptance of such products.

We depend on third parties to conduct the clinical trials for our proprietary product candidates and any failure of those parties to fulfill their obligations could harm our development and commercialization plans.

We depend on independent clinical investigators, contract research organizations and other third-party service providers to conduct clinical trials for our proprietary product candidates. We rely heavily on these parties for successful execution of our clinical trials. Though we are ultimately responsible for the results of their activities, many aspects of their activities are beyond our control. For example, we are responsible for ensuring that each of our clinical trials is conducted in accordance with the general investigational plan and protocols for the trials, but the independent clinical investigators may prioritize other projects over ours or communicate issues regarding our products to us in an untimely manner. Third parties may not complete activities on schedule or may not conduct our clinical trials in accordance with regulatory requirements or our stated protocols. The early termination of any of our clinical trial arrangements, the failure of third parties to comply with the regulations and requirements governing clinical trials or our reliance on results of trials that we have not directly conducted or monitored could hinder or delay the development, approval and commercialization of our product candidates and would adversely affect our business, results of operations and financial condition.

Significant competition for our polymer conjugate chemistry technology platforms and our partnered and proprietary products and product candidates could make our technologies, products or product candidates obsolete or uncompetitive, which would negatively impact our business, results of operations and financial condition.

Our PEGylation and advanced polymer conjugate chemistry platforms and our partnered and proprietary products and product candidates compete with various pharmaceutical and biotechnology companies. Competitors of our PEGylation and polymer conjugate chemistry technologies include Biogen, Savient, Dr. Reddy's Laboratories Ltd., Enzon Pharmaceuticals, Inc., SunBio Corporation, Mountain View Pharmaceuticals, Inc., Novo Nordisk A/S (formerly assets held by Neose Technologies, Inc.), and NOF

[Table of Contents](#)

Corporation. Several other chemical, biotechnology and pharmaceutical companies may also be developing PEGylation technologies or technologies that have similar impact on target drug molecules. Some of these companies license or provide the technology to other companies, while others are developing the technology for internal use.

There are several competitors for our proprietary product candidates currently in development. For Amikacin Inhale, the current standard of care includes several approved intravenous antibiotics for the treatment of either hospital-acquired pneumonia or ventilator-associated pneumonia in patients on mechanical ventilators. For naloxegol, there are currently several alternative therapies used to address opioid-induced constipation (OIC) and opioid-induced bowel dysfunction (OBD), including subcutaneous Relistor® (methylnaltrexone bromide) and oral and rectal over-the-counter laxatives and stool softeners such as docusate sodium, senna and milk of magnesia. In addition, there are a number of companies developing potential products which are in various stages of clinical development and are being evaluated for the treatment of OIC and OBD in different patient populations, including Cubist Pharmaceuticals, Progenics Pharmaceuticals, Inc. in collaboration with Salix Pharmaceuticals, Ltd., Mundipharma Int. Limited, Sucampo Pharmaceuticals and Takeda Pharmaceutical Company Limited. For etirinotecan pegol, there are a number of chemotherapies and cancer therapies approved today and in various stages of clinical development for breast and ovarian cancers including but not limited to: Abraxane® (paclitaxel protein-bound particles for injectable suspension (albumin bound)), Afinitor® (everolimus), Doxil® (doxorubicin HCl), Ellence® (epirubicin), Gemzar® (gemcitabine), Halaven® (eribulin), Herceptin® (trastuzumab), Hycamtin® (topotecan), Ixempra® (ixabepilone), Navelbine® (vinorelbine), Iniparib, Paraplatin® (carboplatin), Taxol® (paclitaxel) and Taxotere® (docetaxel). Major pharmaceutical or biotechnology companies with approved drugs or drugs in development for these cancers include, but are not limited to, Bristol-Myers Squibb, Eli Lilly & Co., Roche, GlaxoSmithKline plc, Johnson and Johnson, Pfizer, Inc. and Sanofi Aventis. There are approved therapies for the treatment of colorectal cancer, including Eloxatin® (oxaliplatin), Camptosar® (irinotecan), Avastin® (bevacizumab), Zaltrap® (Ziv-aflibercept), Stivarga® (regorafenib), Erbitux® (cetuximab), Vectibix® (panitumumab), Xeloda® (capecitabine), Adrucil® (fluorouracil) and Wellcovorin® (leucovorin). In addition, there are a number of drugs in various stages of preclinical and clinical development from companies exploring cancer therapies or improved chemotherapeutic agents to potentially treat colorectal cancer, including, but not limited to, products in development from Bristol-Myers Squibb Company, Pfizer, Inc., GlaxoSmithKline plc, Antigenics, Inc., F. Hoffmann-La Roche Ltd, Novartis AG, Cell Therapeutics, Inc., Neopharm Inc., Meditech Research Ltd, Alchemia Limited, and Enzon Pharmaceuticals, Inc.

There can be no assurance that we or our partners will successfully develop, obtain regulatory approvals for and commercialize next-generation or new products that will successfully compete with those of our competitors. Many of our competitors have greater financial, research and development, marketing and sales, manufacturing and managerial capabilities. We face competition from these companies not just in product development but also in areas such as recruiting employees, acquiring technologies that might enhance our ability to commercialize products, establishing relationships with certain research and academic institutions, enrolling patients in clinical trials and seeking program partnerships and collaborations with larger pharmaceutical companies. As a result, our competitors may succeed in developing competing technologies, obtaining regulatory approval or gaining market acceptance for products before we do. These developments could make our products or technologies uncompetitive or obsolete.

If product liability lawsuits are brought against us, we may incur substantial liabilities.

The manufacture, clinical testing, marketing and sale of medical products involve inherent product liability risks. If product liability costs exceed our product liability insurance coverage, we may incur substantial liabilities that could have a severe negative impact on our financial position. Whether or not we are ultimately successful in any product liability litigation, such litigation would consume substantial amounts of our financial and managerial resources and might result in adverse publicity, all of which would impair our business. Additionally, we may not be able to maintain our clinical trial insurance or product liability insurance at an acceptable cost, if at all, and this insurance may not provide adequate coverage against potential claims or losses.

Our future depends on the proper management of our current and future business operations and their associated expenses.

Our business strategy requires us to manage our business to provide for the continued development and potential commercialization of our proprietary and partnered drug candidates. Our strategy also calls for us to undertake increased research and development activities and to manage an increasing number of relationships with partners and other third parties, while simultaneously managing the capital necessary to support this strategy. Our decision to bear a majority or all of the clinical development costs of etirinotecan pegol substantially increases our future capital requirements. If we are unable to manage effectively our current operations and any growth we may experience, our business, financial condition and results of operations may be adversely affected. If we are unable to effectively manage our expenses, we may find it necessary to reduce our personnel-related costs through reductions in our workforce, which could harm our operations, employee morale and impair our ability to retain and recruit talent. Furthermore, if adequate funds are not available, we may be required to obtain funds through arrangements with partners or other sources that may require us to relinquish rights to certain of our technologies, products or future economic rights that we would not otherwise relinquish or require us to enter into other financing arrangements on unfavorable terms.

We are dependent on our management team and key technical personnel, and the loss of any key manager or employee may impair our ability to develop our products effectively and may harm our business, operating results and financial condition.

Our success largely depends on the continued services of our executive officers and other key personnel. The loss of one or more members of our management team or other key employees could seriously harm our business, operating results and financial condition. The relationships that our key managers have cultivated within our industry make us particularly dependent upon their continued employment with us. We are also dependent on the continued services of our technical personnel because of the highly technical nature of our products and the regulatory approval process. Because our executive officers and key employees are not obligated to provide us with continued services, they could terminate their employment with us at any time without penalty. We do not have any post-employment noncompetition agreements with any of our employees and do not maintain key person life insurance policies on any of our executive officers or key employees.

Because competition for highly qualified technical personnel is intense, we may not be able to attract and retain the personnel we need to support our operations and growth.

We must attract and retain experts in the areas of clinical testing, manufacturing, research, regulatory and finance, and may need to attract and retain marketing and distribution experts and develop additional expertise in our existing personnel. We face intense competition from other biopharmaceutical companies, research and academic institutions and other organizations for qualified personnel. Many of the organizations with which we compete for qualified personnel have greater resources than we have. Because competition for skilled personnel in our industry is intense, companies such as ours sometimes experience high attrition rates with regard to their skilled employees. Further, in making employment decisions, job candidates often consider the value of the stock options they are to receive in connection with their employment. Our equity incentive plan and employee benefit plans may not be effective in motivating or retaining our employees or attracting new employees, and significant volatility in the price of our stock may adversely affect our ability to attract or retain qualified personnel. If we fail to attract new personnel or to retain and motivate our current personnel, our business and future growth prospects could be severely harmed.

If earthquakes or other catastrophic events strike, our business may be harmed.

Our corporate headquarters, including a substantial portion of our research and development operations, are located in the San Francisco Bay Area, a region known for seismic activity and a potential terrorist target. In addition, we own facilities for the manufacture of products using our PEGylation and advanced polymer conjugate technologies in Huntsville, Alabama and own and lease offices in Hyderabad, India. There are no

[Table of Contents](#)

backup facilities for our manufacturing operations located in Huntsville, Alabama. In the event of an earthquake or other natural disaster, political instability, or terrorist event in any of these locations, our ability to manufacture and supply materials for drug candidates in development and our ability to meet our manufacturing obligations to our customers would be significantly disrupted and our business, results of operations and financial condition would be harmed. Our collaborative partners may also be subject to catastrophic events, such as earthquakes, floods, hurricanes and tornadoes, any of which could harm our business, results of operations and financial condition. We have not undertaken a systematic analysis of the potential consequences to our business, results of operations and financial condition from a major earthquake or other catastrophic event, such as a fire, sustained loss of power, terrorist activity or other disaster, and do not have a recovery plan for such disasters. In addition, our insurance coverage may not be sufficient to compensate us for actual losses from any interruption of our business that may occur.

We have implemented certain anti-takeover measures, which make it more difficult to acquire us, even though such acquisitions may be beneficial to our stockholders.

Provisions of our certificate of incorporation and bylaws, as well as provisions of Delaware law, could make it more difficult for a third party to acquire us, even though such acquisitions may be beneficial to our stockholders. These anti-takeover provisions include:

- establishment of a classified board of directors such that not all members of the board may be elected at one time;
- lack of a provision for cumulative voting in the election of directors, which would otherwise allow less than a majority of stockholders to elect director candidates;
- the ability of our board to authorize the issuance of “blank check” preferred stock to increase the number of outstanding shares and thwart a takeover attempt;
- prohibition on stockholder action by written consent, thereby requiring all stockholder actions to be taken at a meeting of stockholders;
- establishment of advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted upon by stockholders at stockholder meetings; and
- limitations on who may call a special meeting of stockholders.

Further, provisions of Delaware law relating to business combinations with interested stockholders may discourage, delay or prevent a third party from acquiring us. These provisions may also discourage, delay or prevent a third party from acquiring a large portion of our securities or initiating a tender offer or proxy contest, even if our stockholders might receive a premium for their shares in the acquisition over the then current market prices. We also have a change of control severance benefit plan which provides for certain cash severance, stock award acceleration and other benefits in the event our employees are terminated (or, in some cases, resign for specified reasons) following an acquisition. This severance plan could discourage a third party from acquiring us.

The price of our common stock is expected to remain volatile.

Our stock price is volatile. During the year ended December 31, 2012, based on closing bid prices on The NASDAQ Global Select Market, our stock price ranged from \$10.83 to \$5.68 per share. We expect our stock price to remain volatile. A variety of factors may have a significant effect on the market price of our common stock, including: announcements of data from, or material developments in, our clinical studies and those of our collaboration partners, including data regarding efficacy and safety, delays in clinical development, regulatory approval or commercial launch;

- announcements of data from, or material developments in, our clinical studies and those of our collaboration partners, including data regarding efficacy and safety, delays in clinical development, regulatory approval or commercial launch;

[Table of Contents](#)

- announcements by collaboration partners as to their plans or expectations related to drug candidates and approved drugs in which we have a substantial economic interest;
- announcements regarding terminations or disputes under our collaboration agreements;
- fluctuations in our results of operations;
- developments in patent or other proprietary rights, including intellectual property litigation or entering into intellectual property license agreements and the costs associated with those arrangements;
- announcements of technological innovations or new therapeutic products that may compete with our approved products or products under development;
- announcements of changes in governmental regulation affecting us or our competitors;
- litigation brought against us or third parties to whom we have indemnification obligations;
- public concern as to the safety of drug formulations developed by us or others; and
- general market conditions.

The indenture governing the senior secured notes imposes significant operating and financial restrictions on us and our subsidiaries that may prevent us from pursuing certain business opportunities and restrict our ability to operate our business.

The indenture governing the senior secured notes contains covenants that restrict our and our subsidiaries' ability to take various actions, such as:

- incur or guarantee additional indebtedness or issue disqualified capital stock or cause certain of our subsidiaries to issue preferred stock;
- pay dividends or distributions, redeem equity interests or subordinated indebtedness or make certain types of investments;
- create or incur liens;
- transfer, sell, lease or otherwise dispose of assets and issue or sell equity interests in certain of our subsidiaries;
- incur restrictions on certain of our subsidiaries' ability to pay dividends or other distributions to the Company or to make intercompany loans or asset transfers;
- enter into transactions with affiliates;
- engage in any business other than businesses which are the same, similar, ancillary or reasonably related to the our business as of July 11, 2012; and
- consummate a merger, consolidation, reorganization or business combination, or sell, assign, transfer, lease or otherwise dispose of all or substantially all of our assets.

In addition, the indenture governing the senior secured notes contains a financial maintenance covenant requiring us to maintain a \$25.0 million segregated cash reserve account until July 1, 2015 to be applied to interest payments on the notes in the event of a default, subject to certain conditions. This indenture also requires us not to permit, thereafter and through the quarter ending June 30, 2017, the aggregate balance of our unrestricted cash and cash equivalents at the end of any two consecutive fiscal quarters to be less than \$25.0 million, subject to certain conditions. Our ability to comply with these covenants will likely be affected by many factors, including events beyond our control, and we may not satisfy those requirements. Our failure to comply with our debt-related obligations could result in an event of default under our other indebtedness and the acceleration of our other indebtedness, in whole or in part, could result in an event of default under the indenture governing the senior secured notes.

[Table of Contents](#)

The restrictions contained in the indenture governing the senior secured notes could also limit our ability to plan for or react to market conditions, meet capital needs or otherwise restrict our activities or business plans and adversely affect our ability to finance our operations, enter into acquisitions or to engage in other business activities that would be in our interest.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

California

We lease a 102,283 square foot facility in the Mission Bay Area of San Francisco, California (Mission Bay Facility), under an operating lease which expires in 2020. In November 2010, we moved into the Mission Bay Facility relocating all of our functions from the San Carlos, California facility (San Carlos Facility), including our corporate headquarters and research and development for our PEGylation and advanced polymer conjugate technology operations. In December 2011, we expanded our lease of the Mission Bay Facility to include an additional 24,002 square feet of space. However, we retain the right to terminate the lease expansion on May 31, 2013. If we do not exercise the early termination right, the lease for the expanded space will expire in 2020, on the same date as the original lease agreement for the Mission Bay Facility.

Our lease for approximately 100,000 square feet of the San Carlos Facility is under a capital lease which expires in 2016. We have subleased portions of the San Carlos Facility and are currently seeking one or more subtenants for the remaining space.

Alabama

We currently own three facilities consisting of approximately 160,000 square feet in Huntsville, Alabama, which house laboratories as well as administrative, clinical and commercial manufacturing facilities for our PEGylation and advanced polymer conjugate technology operations as well as manufacturing of APIs for early clinical studies.

In July 2012, we consolidated our U.S.-based research activities into our Mission Bay Facility and ceased use of one of our buildings located in Huntsville that was dedicated to research activities. We are currently seeking a buyer for the land and building.

India

We own a research and development facility consisting of approximately 88,000 square feet, near Hyderabad, India. In addition, we lease approximately 504 square feet of office space in Hyderabad, India, under a one-year operating lease that will expire in 2013.

Item 3. Legal Proceedings

From time to time, we are subject to legal proceedings, including the proceedings described specifically below. We are not currently a party to or aware of any proceedings that we believe will have, individually or in the aggregate, a material adverse effect on our business, financial condition or results of operations.

On November 18, 2009, the Research Foundation of the State University of New York (SUNY) filed an action against Nektar in the United States District Court for the Northern District of New York. SUNY seeks to recover amounts it alleges it is owed pursuant to a technology licensing contract between Nektar and SUNY. We

[Table of Contents](#)

dispute SUNY's claims. Discovery in the matter has closed and cross motions for summary judgment (including Nektar's motion for summary judgment dismissing the action) were filed in October 2012. The motions are fully briefed and are currently being considered by the court. In the event the action survives Nektar's motion, we expect that a trial would be scheduled in the first half of 2013. We believe that SUNY's claims are without merit. No reasonable estimate of the possible loss or range of loss can be made at this time and no liabilities have been recorded for this matter on our Consolidated Balance Sheets as of December 31, 2012 or 2011.

Item 4. Mine Safety Disclosures

Not applicable.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock trades on the NASDAQ Global Select Market under the symbol "NKTR." The table below sets forth the high and low closing sales prices for our common stock as reported on the NASDAQ Global Select Market during the periods indicated.

	<u>High</u>	<u>Low</u>
Year Ended December 31, 2011:		
1st Quarter	\$ 12.53	\$8.58
2nd Quarter	10.44	7.22
3rd Quarter	7.65	4.85
4th Quarter	5.62	4.22
Year Ended December 31, 2012:		
1st Quarter	\$ 8.22	\$5.68
2nd Quarter	8.14	6.41
3rd Quarter	10.78	7.99
4th Quarter	10.83	5.99

Holders of Record

As of February 21, 2013, there were approximately 229 holders of record of our common stock.

Dividend Policy

We have never declared or paid any cash dividends on our common stock. We currently expect to retain any future earnings for use in the operation and expansion of our business and do not anticipate paying any cash dividends on our common stock in the foreseeable future.

There were no sales of unregistered securities and there were no common stock repurchases made during the year ended December 31, 2012.

Securities Authorized for Issuance Under Equity Compensation Plans

Information regarding our equity compensation plans as of December 31, 2012 is disclosed in Item 12 "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" of this Annual Report on Form 10-K and is incorporated herein by reference from our proxy statement for our 2013 annual meeting of stockholders to be filed with the SEC pursuant to Regulation 14A not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K.

Performance Measurement Comparison

The material in this section is being furnished and shall not be deemed “filed” with the SEC for purposes of Section 18 of the Exchange Act or otherwise subject to the liability of that section, nor shall the material in this section be deemed to be incorporated by reference in any registration statement or other document filed with the SEC under the Securities Act or the Exchange Act, except as otherwise expressly stated in such filing.

The following graph compares, for the five year period ended December 31, 2012, the cumulative total stockholder return (change in stock price plus reinvested dividends) of our common stock with (i) the NASDAQ Composite Index, (ii) the NASDAQ Pharmaceutical Index, (iii) the RGD SmallCap Pharmaceutical Index, (iv) the NASDAQ Biotechnology Index and (v) the RGD SmallCap Biotechnology Index. Measurement points are the last trading day of each of our fiscal years ended December 31, 2008, December 31, 2009, December 31, 2010, December 31, 2011 and December 31, 2012. The graph assumes that \$100 was invested on December 31, 2007 in the common stock of the Company, the NASDAQ Composite Index, the Nasdaq Pharmaceutical Index, the RGD SmallCap Pharmaceutical Index, the NASDAQ Biotechnology Index and the RGD SmallCap Biotechnology Index and assumes reinvestment of any dividends. The stock price performance in the graph is not intended to forecast or indicate future stock price performance.

*\$100 invested on December 31, 2007 in stock or index, including reinvestment of dividends.
 Fiscal year ending December 31.

Item 6. Selected Financial Data

SELECTED CONSOLIDATED FINANCIAL INFORMATION
(In thousands, except per share information)

The selected consolidated financial data set forth below should be read together with the consolidated financial statements and related notes, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and the other information contained herein.

	Year Ended December 31,				
	2012	2011	2010	2009	2008
Statements of Operations Data:					
Revenue:					
Product sales	\$ 35,399	\$ 24,864	\$ 27,412	\$ 30,116	\$ 37,799
Royalty revenues	4,874	10,327	7,255	5,172	3,456
Non cash royalty revenue related to sale of future royalties ⁽¹⁾	10,791	—	—	—	—
License, collaboration and other revenue	30,127	36,289	124,372	36,643	48,930

Loss from operations	(141,201)	(123,937)	(28,255)	(95,132)	(82,652)
Gain on debt extinguishment	—	—	—	—	50,149
Non-cash interest expense on liability related to sale of future royalties ⁽¹⁾	(18,057)	—	—	—	—
Interest and other income (expense), net	(12,191)	(9,023)	(8,802)	(7,640)	(2,639)
Provision (benefit) for income taxes	406	1,018	881	(253)	(806)
Net loss	<u>\$(171,855)</u>	<u>\$(133,978)</u>	<u>\$(37,938)</u>	<u>\$(102,519)</u>	<u>\$(34,336)</u>
Basic and diluted net loss per share ⁽³⁾	<u>\$ (1.50)</u>	<u>\$ (1.19)</u>	<u>\$ (0.40)</u>	<u>\$ (1.11)</u>	<u>\$ (0.37)</u>
Shares used in computing basic and diluted net loss per share ⁽³⁾	<u>114,820</u>	<u>112,942</u>	<u>94,079</u>	<u>92,772</u>	<u>92,407</u>

	As of December 31,				
	2012	2011	2010	2009	2008
Balance Sheet Data:					
Cash, cash equivalents and investments	\$ 302,194	\$ 414,936	\$ 315,932	\$ 396,211	\$ 378,994
Working capital	\$ 236,094	\$ 1,174	\$ 289,871	\$ 260,650	\$ 337,846
Total assets	\$ 497,790	\$ 606,550	\$ 521,225	\$ 575,518	\$ 560,536
Deferred revenue	\$ 118,447	\$ 127,831	\$ 145,347	\$ 192,372	\$ 65,577
Convertible subordinated notes	\$ —	\$ 214,955	\$ 214,955	\$ 214,955	\$ 214,955
Senior secured notes	\$ 125,000	\$ —	\$ —	\$ —	\$ —
Liability related to the sale of future royalties ⁽¹⁾	\$ 131,266	\$ —	\$ —	\$ —	\$ —
Other long-term liabilities	\$ 20,014	\$ 21,741	\$ 22,585	\$ 23,344	\$ 25,585
Accumulated deficit	\$ (1,570,380)	\$ (1,398,525)	\$ (1,264,547)	\$ (1,226,609)	\$ (1,124,090)
Total stockholders’ equity	\$ 47,018	\$ 197,811	\$ 90,662	\$ 102,367	\$ 190,154

(1) In February 2012, we sold all of our rights to receive future royalty payments on net sales of UCB’s CIMZIA® and Roche’s MIRCERA®. As described in Note 7 to our Consolidated Financial Statements, this

[Table of Contents](#)

royalty sale transaction has been recorded as a liability that amortizes over the estimated royalty payment period. As a result of this liability accounting, even though the royalties from UCB and Roche are remitted directly to the purchaser of these royalty interests starting in the second quarter of 2012, we will continue to record revenue for these royalties.

- (2) Operating costs and expenses includes the Gain on sale of pulmonary assets of \$69.6 million in 2008.
- (3) Basic and diluted net loss per share is based upon the weighted average number of common shares outstanding.

The following discussion contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those discussed here. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in this section as well as factors described in “Part I, Item 1A — Risk Factors.”

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Overview

Strategic Direction of Our Business

We are a clinical-stage biopharmaceutical company developing a pipeline of drug candidates that utilize our PEGylation and advanced polymer conjugate technology platforms, which are designed to enable the development of new molecular entities that target known mechanisms of action. Our current proprietary pipeline is comprised of drug candidates across a number of therapeutic areas including oncology, pain, anti-infectives, and immunology. Our research and development activities involve small molecule drugs, peptides and other biologic drug candidates. We create innovative drug candidates by using our proprietary advanced polymer conjugate technologies and expertise to modify the chemical structure of pharmacophores to create new molecular entities. Polymer chemistry is a science focused on the synthesis or bonding of polymer architectures with drug molecules to alter the properties of a molecule when it is bonded with polymers. Additionally, we may utilize established pharmacologic targets to engineer a new drug candidate relying on a combination of the known properties of these targets and our proprietary polymer chemistry technology and expertise. Our drug candidates are designed to improve the overall benefits and use of a drug for patients by improving the metabolism, distribution, pharmacokinetics, pharmacodynamics, half-life and/or bioavailability of drugs. Our objective is to apply our advanced polymer conjugate technology platform to create new drug candidates in multiple therapeutic areas that address large potential markets.

Our most advanced proprietary product candidate, naloxegol (formerly known as NKTR-118), is a peripheral opioid antagonist which has completed Phase 3 clinical studies for the treatment of opioid-induced constipation (OIC). We are a party to an exclusive worldwide license agreement with AstraZeneca for the global development and commercialization of naloxegol and naloxegol fixed-dose combination products (formerly known as NKTR-119). The core Phase 3 clinical development program for naloxegol, which AstraZeneca calls the KODIAC program, is comprised of four clinical trials which are designed to investigate the safety and efficacy of naloxegol for the treatment of OIC in patients with non-cancer related pain. The outcome and timing of the naloxegol development program will have a substantial impact on our financial condition as we are entitled to up to \$95 million in regulatory filing milestones and \$140 million in commercial launch milestones.

On November 12, 2012, AstraZeneca announced positive top-line results from two Phase 3 efficacy and safety clinical trials and from a safety extension trial (KODIAC-04, -05, and -07). On February 26, 2013, AstraZeneca announced positive top-line results from the long-term safety study (KODIAC-08) of naloxegol in patients with OIC. AstraZeneca has stated that it plans to submit an NDA filing in the U.S. and a marketing authorization application (MAA) filing in the E.U. in the third quarter of 2013, pending AstraZeneca’s final preparation of the registration package and a pre-NDA meeting with the FDA. In the event regulatory approval filings are submitted by AstraZeneca and accepted by the U.S. Food and Drug Administration (FDA) and by the European Medicines Agency (EMA), we would be entitled to receive \$95.0 million in milestone payments. As a

[Table of Contents](#)

result, the outcome of AstraZeneca's determination to make regulatory filings for naloxegol with the FDA and EMA is critical to our financial position in 2013 as well as our future business prospects as a result of the significant economic stake that we have in success of the potential commercialization of naloxegol.

Our second most advanced proprietary drug candidate, etirinotecan pegol (formerly known as NKTR-102), is a next-generation topoisomerase I inhibitor. Etirinotecan pegol is currently being evaluated as a single-agent therapy in a Phase 3 open-label, randomized, multicenter clinical study in patients with metastatic breast cancer. This Phase 3 clinical study, which we call the BEACON study (BrEAst Cancer Outcomes with NKTR-102), is scheduled to enroll approximately 840 patients with metastatic breast cancer that have previously received treatment with an anthracycline, a taxane, and capecitabine. The BEACON study will require a substantial investment over the next two years. In November 2012, etirinotecan pegol was designated by the FDA as a Fast Track development program for the treatment of patients with locally recurrent or metastatic breast cancer progressing after treatment with an anthracycline, a taxane, and capecitabine. We have completed an expanded Phase 2 clinical study for etirinotecan pegol in patients with platinum-resistant ovarian cancer. We are currently in the process of finalizing the data in furtherance of planned meetings with health authorities in 2013 which will guide our future development and regulatory strategy for etirinotecan pegol in ovarian cancer. In addition, a Phase 2 clinical study for etirinotecan pegol in patients with metastatic colorectal cancer is still open for enrollment.

We have a significant collaboration with Bayer Healthcare LLC (Bayer) to develop BAY41-6551 (Amikacin Inhale, formerly known as NKTR-061), which is an inhaled solution of amikacin, an aminoglycoside antibiotic, that has completed Phase 2 clinical development. We originally developed the liquid aerosol inhalation platform and Amikacin Inhale and entered into a collaboration agreement with Bayer in August 2007 to further advance the drug candidate's development and potential commercialization. The stability studies on the nebulizer device that needed to be completed prior to the start of the Phase 3 clinical study were successfully completed in February 2013. The Phase 3 clinical program is expected to be initiated by Bayer in March 2013. In 2011, Bayer achieved agreement with the FDA on the design of the planned Phase 3 clinical studies of BAY41-6551 under the Special Protocol Assessment process that is intended to support the submission of a NDA if the planned Phase 3 clinical study is successful.

We also have a significant collaboration with Baxter Healthcare to identify and develop PEGylated drug candidates with the objective of providing new long-acting therapies for hemophilia patients. Under the terms of this collaboration, we are providing a license to our intellectual property and our PEGylation technology and expertise. Baxter is responsible for all clinical development. The first drug candidate in this collaboration, BAX 855, is a longer-acting (PEGylated) form of a full-length recombinant factor VIII (rFVIII) protein which has completed Phase 1 clinical development in patients with hemophilia A. In February 2013, Baxter initiated a Phase 3 multi-center, open-label clinical study called PROLONG-ATE that will enroll more than 100 previously treated adult patients with severe hemophilia A to assess the efficacy, safety and pharmacokinetics of BAX 855 for prophylaxis and on-demand treatment of bleeding. If BAX 855 is approved by health authorities and is successfully commercialized by Baxter, this would represent a substantial royalty revenue opportunity for us, subject to significant risks and uncertainties relating to regulatory approval with health authorities and subsequent commercial success.

While the late stage clinical development programs described above are key elements of the future success of our company, we believe it is critically important that we continue to make substantial investments in our earlier-stage drug candidate pipeline. For example, in April 2012 we advanced NKTR-192, our short-acting opioid drug candidate, into Phase 1 clinical studies and in July 2012 we advanced NKTR-181 into a Phase 2 clinical study and plan to conduct a human abuse liability study for NKTR-181 in the first half of 2013. While we believe that our substantial investment in research and development has the potential to create significant value if one or more of our drug candidates demonstrate positive clinical results and receive regulatory approval in one or more major markets, drug research and development is an inherently uncertain process and there is a high risk of failure at every stage prior to approval and the timing and outcome of clinical trial results are extremely difficult

to predict. Clinical development successes and failures can have a disproportionate positive or negative impact on our scientific and medical prospects, financial prospects, financial condition, and market value.

Historically, we have entered into a number of license and supply contracts under which we manufactured and supplied our proprietary PEGylation reagents on a cost-plus or fixed price basis. Our current strategy is to manufacture and supply PEGylation reagents to support our proprietary drug candidates or our third party collaborators where we have a strategic development and commercialization relationship or where we derive substantial economic benefit. As a result, whenever possible, we are renegotiating or not seeking renewal of legacy manufacturing supply arrangements that do not include a strategic development or commercialization component. For example, in October 2010, we entered into a supply, dedicated suite and manufacturing guarantee agreement with Amgen, Inc. and Amgen Manufacturing, Limited, which has significantly amended economic and other terms in the non-exclusive supply and license agreement we previously entered into with Amgen in 1995. In addition, in December 2010, we entered into an amended manufacturing and supply agreement with Merck (through its acquisition of Schering-Plough Corporation) to provide for transfer to an alternative manufacturer and revised economics for an interim supply arrangement until that transition is completed.

Key Developments and Trends in Liquidity and Capital Resources

At December 31, 2012, we had approximately \$302.2 million in cash, cash equivalents, and investments in marketable securities and \$149.0 million in indebtedness. The indebtedness includes \$125.0 million in aggregate principal amount of 12.0% senior secured notes due July 15, 2017 which we issued during the three months ended September 30, 2012, but excludes our long-term liability relating to the sale of future royalties under the Purchase and Sale Agreement with RPI Finance Trust (RPI). As is further described in Note 7, this royalty obligation liability will not be settled in cash, but we may be required to make a payment of up to \$7.0 million in 2014 if the worldwide net sales thresholds of MIRCERA® in 2013 are not met. During the year-ended December 31, 2012, we retired \$215.0 million in aggregate principal amount of our previously outstanding convertible subordinated notes.

As of December 31, 2012, we had at least twelve months of working capital to fund our current business plans. We expect the clinical development of our proprietary drug candidates including etirinotecan pegol, Amikacin Inhale, NKTR-181, and NKTR-192 will require significant investment in order to continue to advance in clinical development with the objective of entering into a collaboration partnership or obtaining regulatory approval. However, we have no credit facility or any other sources of committed capital. In addition, while in the past we have received a number of significant payments from license and collaboration agreements and other significant transactions, we do not currently anticipate completing new transactions with substantial upfront payments in the near-term. Our current business plan is also subject to significant uncertainties and risks as a result of, among other factors, expenses being higher than anticipated, unplanned expenses, cash receipts being lower than anticipated, and the need to satisfy contingent liabilities including litigation matters and indemnification obligations.

The availability and terms of various financing alternatives substantially depend on the success or failure of our drug development programs including naloxegol, etirinotecan pegol, BAX 855, Amikacin Inhale, NKTR-181, and NKTR-192. The availability and terms of financing alternatives and any future significant payments from existing or new collaborations all depend on the positive outcome of ongoing or planned clinical studies, whether we or our partners are successful in obtaining health authority approvals in major markets, and if approved, the commercial success of these drugs. In particular, we are entitled to up to \$235.0 million of regulatory and commercial launch milestones under our license agreement with AstraZeneca, \$95.0 million of which is related to AstraZeneca submitting regulatory approval filings for naloxegol with the FDA and with the EMA. AstraZeneca has indicated that it plans to submit regulatory filings for naloxegol subject to subject to AstraZeneca's final preparation of the registration package and a pre-NDA meeting with the FDA. In the event we do not enter into any new collaboration partnerships with significant up-front payments or do not receive the naloxegol regulatory milestone payments in 2013, we would likely be required to pursue financing alternatives.

[Table of Contents](#)

In the event we determine to explore financing alternatives, our objective would be to first pursue financing alternatives that are not dilutive to the ownership of our common stock security holders. However, if non-dilutive financing alternatives are not available to us on commercially reasonable terms or at all, we could be required to pursue dilutive equity-based financing alternatives such as an offering of convertible debt or common stock.

Results of Operations

Years Ended December 31, 2012, 2011, and 2010

Revenue (in thousands, except percentages)

	<u>Year Ended December 31,</u>			<u>Increase/</u>	<u>Increase/</u>	<u>Percentage</u>	<u>Percentage</u>
	<u>2012</u>	<u>2011</u>	<u>2010</u>	<u>(Decrease)</u>	<u>(Decrease)</u>	<u>(Decrease)</u>	<u>(Decrease)</u>
				<u>2012 vs.</u>	<u>2011 vs.</u>	<u>2012 vs.</u>	<u>2011 vs.</u>
				<u>2011</u>	<u>2010</u>	<u>2011</u>	<u>2010</u>
Product sales	\$35,399	\$24,864	\$ 27,412	\$ 10,535	\$ (2,548)	42%	(9)%
Royalty revenues	4,874	10,327	7,255	(5,453)	3,072	(53)%	42%
Non cash royalty revenue related to sale of future royalties	10,791	—	—	10,791	—	100%	N/A
License, collaboration and other	30,127	36,289	124,372	(6,162)	(88,083)	(17)%	(71)%
Total revenue	\$81,191	\$71,480	\$159,039	\$ 9,711	\$(87,559)	14%	(55)%

Our revenue is derived from our collaboration agreements, under which we may receive product sales revenue, royalties, license fees, milestone payments or contract research payments. Revenue is recognized when there is persuasive evidence that an arrangement exists, delivery has occurred, the price is fixed or determinable, and collection is reasonably assured. The amount of upfront fees received under our license and collaboration agreements allocated to continuing obligations, such as manufacturing and supply commitments, are recognized ratably over our expected performance period under the arrangement. As a result, there may be significant variations in the timing of receipt of cash payments and our recognition of revenue. We make our best estimate of the period over which we expect to fulfill our performance obligations. Given the uncertainties in research and development collaborations, significant judgment is required by us to determine the performance periods.

Product sales

Product sales include fixed price and cost-plus manufacturing and supply agreements with our collaboration partners. Product sales increased during the year ended December 31, 2012 compared to the year ended December 31, 2011 as a result of increased product demand from a number of our collaboration partners. Product sales decreased during the year ended December 31, 2011 compared to the year ended December 31, 2010 due in part to the transfer of manufacturing activities to certain collaboration partners. The timing of shipments is based solely on the demand and requirements of our collaboration partners and is not ratable throughout the year. We expect product sales to increase in 2013 as compared to 2012.

Royalty revenues and non cash royalty revenue related to sale of future royalties

We receive royalty revenue from certain of our collaboration partners based on their net sales of commercial products. Royalty revenues decreased during the year ended December 31, 2012 compared to the year ended December 31, 2011 primarily as a result of the sale of the royalties we receive from UCB's CIMZIA® and Roche's MIRCERA® product sales as is further described below. Royalty revenues increased during the year ended December 31, 2011 as compared to the year ended December 31, 2010 primarily as a result of the increase in royalties received from net sales of CIMZIA® and MIRCERA®. We expect royalties to decrease in 2013 as compared to 2012.

[Table of Contents](#)

During the years ended December 31, 2011 and 2010, we recognized \$8.3 million and \$5.4 million, respectively, in aggregate royalties from net sales of CIMZIA® and MIRCERA®. In February 2012, we sold all of our rights to receive future royalty payments on CIMZIA® and MIRCERA® effective for all periods from January 1, 2012 through the life of the royalty obligation. As described in Note 7 to our Consolidated Financial Statements, this royalty sale transaction has been recorded as a liability that amortizes over the estimated royalty payment period. As a result of this liability accounting, even though the royalties from UCB and Roche are remitted directly to the purchaser, we will continue to record revenue for these royalties. During the year ended December 31, 2012, we recognized \$13.5 million in aggregate royalties from net sales of CIMZIA® and MIRCERA®, of which the \$2.7 million recognized in the three months ended March 31, 2012 was retained by us as these amounts resulted from product sales in the fourth quarter of 2011 and the \$10.8 million recognized in the nine months ended December 31, 2012 was remitted directly to the purchaser as these amounts resulted from product sales in the first three quarters of 2012. We expect non cash royalties from net sales of CIMZIA® and MIRCERA® to increase in 2013 as compared to 2012.

License, collaboration and other revenue

License, collaboration and other revenue includes amortization of upfront payments and milestone payments received in connection with our license and collaboration agreements and reimbursed research and development expenses. The level of license, collaboration and other revenue depends in part upon the estimated amortization period of the upfront payments, the achievement of milestones, the continuation of existing collaborations, the amount of reimbursed research and development work, and entering into new collaboration agreements, if any. License, collaboration and other revenue for the year ended December 31, 2012 decreased compared to the year ended December 31, 2011 primarily due to the recognition in 2011 of a \$5.0 million license fee from an agreement signed in September 2011.

License, collaboration and other revenue for the year ended December 31, 2011 decreased compared to the year ended December 31, 2010 primarily due to the complete recognition as of December 31, 2010 of the \$125.0 million upfront payment received in the fourth quarter of 2009 from AstraZeneca in connection with the global license agreement for naloxegol (formerly known as NKTR-118) and naloxegol fixed-dose combination program (formerly known as NKTR-119). This decrease was partially offset by the recognition of the \$5.0 million license fee noted above, \$6.0 million in milestones earned under existing collaboration agreements, and increases in revenue recognized in 2011 from upfront payments received by us during 2010.

We expect license, collaboration and other revenue in 2013 to increase as compared to 2012 primarily as a result of the recognition of milestones under existing collaboration agreements. In the event regulatory approval filings for naloxegol are submitted by AstraZeneca and accepted by the FDA and by the EMA, we would be entitled to \$95.0 million in milestone payments. If these filings occur in 2013, our license, collaboration and other revenue in 2013 will increase significantly from 2012.

The timing and future success of our drug development programs and those of our collaboration partners are subject to a number of risks and uncertainties. See “Part I, Item 1A — Risk Factors” for discussion of the risks associated with the complex nature of our collaboration agreements.

[Table of Contents](#)

Revenue by geography

Revenue by geographic area is based on locations of our partners. The following table sets forth revenue by geographic area (in thousands):

	Year Ended December 31,		
	2012	2011	2010
United States	\$34,591	\$37,896	\$ 29,636
European countries	46,600	33,584	129,403
Total revenue	<u>\$81,191</u>	<u>\$71,480</u>	<u>\$159,039</u>

The increase in revenue attributable to European countries for the year ended December 31, 2012 compared to the year ended December 31, 2011 is primarily attributable to increased product sales and royalty revenues from our existing European collaboration partners. The decrease in revenue attributable to European countries for the year ended December 31, 2011 compared to the year ended December 31, 2010 is primarily attributable to the revenue we recognized in 2010 from the AstraZeneca license agreement.

Cost of goods sold (in thousands, except percentages)

	Year Ended December 31,			Increase/ (Decrease) 2012 vs. 2011	Increase/ (Decrease) 2011 vs. 2010	Percentage Increase/ (Decrease) 2012 vs. 2011	Percentage Increase/ (Decrease) 2011 vs. 2010
	2012	2011	2010				
Cost of goods sold	\$30,428	\$21,891	\$25,667	\$ 8,537	\$ (3,776)	39%	(15)%
Product gross profit	4,971	2,973	1,745	1,998	1,228	67%	70%
Product gross margin	14%	12%	6%				

Cost of goods sold increased during the year ended December 31, 2012 compared to the year ended December 31, 2011 primarily due to the \$10.5 million increase in product sales in 2012. The increase in product gross margin during the year ended December 31, 2012 compared to the year ended December 31, 2011 is primarily due to the decreased cost per unit in 2012 resulting from increased manufacturing activity, resulting in improved overhead absorption.

The decrease in cost of goods sold during the year ended December 31, 2011 compared to the year ended December 31, 2010 is primarily due to the \$2.5 million decrease in product sales in 2011 and an increase in overall commercial and proprietary manufacturing activity in 2011 compared to 2010 that resulted in decreased costs per unit. The increase in product gross margin during the year ended December 31, 2011 compared to the year ended December 31, 2010 is primarily due to the different mix of products sold and the decreased costs per unit in 2011 resulting from increased manufacturing activity.

We expect product gross margin to fluctuate in future periods depending on the level and mix of manufacturing orders from our customers due to the fixed cost base associated with our manufacturing activities.

Research and development expense (in thousands, except percentages)

	Year Ended December 31,			Increase/ (Decrease) 2012 vs. 2011	Increase/ (Decrease) 2011 vs. 2010	Percentage Increase/ (Decrease) 2012 vs. 2011	Percentage Increase/ (Decrease) 2011 vs. 2010
	2012	2011	2010				
Research and development expense	\$148,675	\$126,766	\$108,065	\$ 21,909	\$ 18,701	17%	17%

Table of Contents

Research and development expense consists primarily of personnel costs (including salaries, benefits, and stock-based compensation), clinical study costs, direct costs of outside research conducted by clinical research organizations, materials, supplies, licenses and fees. Research and development expense also includes certain overhead allocations consisting of various support and facilities related costs.

The increase in research and development expense for the year ended December 31, 2012 compared to the year ended December 31, 2011 is primarily attributable to the \$15.2 million increase in direct research and development program costs, a substantial portion of which is attributable to the etirinotecan pegol (NKTR-102) Phase 3 BEACON clinical study initiated in December 2011 as well as the NKTR-181 Phase 2 clinical study initiated in July 2012. In addition, research and development expense increased due to a \$6.2 million increase in salaries and employee benefits resulting from increased headcount to support our expanded clinical development activities.

The increase in research and development expense for the year ended December 31, 2011 compared to the year ended December 31, 2010 is primarily attributable to a \$7.5 million increase in direct research and development program and materials costs, a \$3.0 million increase in salaries and employee benefits, and a \$6.3 million increase in support and facilities-related costs, which includes increased non-cash depreciation and non-cash rent expenses related to the move to our facility in the Mission Bay Area of San Francisco, California (Mission Bay Facility) at the end of 2010.

We utilize our employee and infrastructure resources across multiple development and research programs. The following table shows expenses incurred for preclinical study support, clinical supplies, clinical and regulatory services provided by third parties and direct materials costs for each of our drug candidates. The table also presents other costs and overhead consisting of personnel, facilities and other indirect costs (in thousands):

	Clinical Study Status ⁽¹⁾	Year Ended December 31,		
		2012	2011	2010
Etirinotecan pegol (NKTR-102) (topoisomerase I inhibitor-polymer conjugate) ⁽²⁾	Phase 3	\$ 31,650	\$ 13,106	\$ 14,730
NKTR-181 (mu-opioid analgesic molecule for chronic pain)	Phase 2	13,537	9,747	4,389
BAY41-6551 (Amikacin Inhale) ⁽³⁾	Completed			
	Phase 2	13,512	11,389	12,606
NKTR-192 (mu-opioid analgesic molecule for acute pain)	Phase 1	2,676	3,100	—
Naloxegol (NKTR-118) (orally available peripheral opioid antagonist) ⁽⁴⁾	Phase 3	27	988	3,439
Other product candidates	Various	4,236	12,071	9,597
Total third party and direct materials costs		65,638	50,401	44,761
Personnel, overhead and other costs		68,781	59,433	48,736
Stock-based compensation and depreciation		14,256	16,932	14,568
Research and development expense		<u>\$ 148,675</u>	<u>\$ 126,766</u>	<u>\$ 108,065</u>

(1) Clinical Study Status definitions are provided in the chart found in Part I, Item 1. Business.

(2) In addition, during the year ended December 31, 2011, we made \$11.2 million of prepayments to certain vendors in our BEACON study.

(3) We partnered this program with Bayer Healthcare LLC in August 2007. As part of the Novartis Pulmonary Asset Sale in 2008, we retained an exclusive license to this technology for the development and commercialization of this drug candidate.

(4) We partnered this program with AstraZeneca AB (AstraZeneca) in 2009. In general, all development costs incurred by us after partnering with AstraZeneca are reimbursed by AstraZeneca.

[Table of Contents](#)

We expect research and development expense to increase in 2013 as compared to 2012 and to continue at or above the 2012 level for the next several years. We plan to continue to advance etirinotecan pegol in the Phase 3 BEACON study for metastatic breast cancer for which we expect patient enrollment to continue throughout 2013 and the clinical study to continue through 2014. We are also finishing data analysis from the expanded Phase 2 clinical study for etirinotecan pegol in patients with platinum resistant/refractory ovarian cancer in preparation for meetings with health authorities in 2013. At the same time, we continue to advance the Phase 2 clinical study for etirinotecan pegol in colorectal cancer patients. Our current plan is to fund all of the clinical development costs for etirinotecan pegol for the foreseeable future without reimbursement from a collaboration partner. The clinical development costs for the BEACON clinical study will continue to be significant. We estimate that the total third party and direct material costs over the life of the BEACON study will range from approximately \$110.0 million to \$120.0 million, of which \$26.0 million was incurred through the end of 2012. We are unable to estimate the timing or costs to complete the clinical development for etirinotecan pegol across all the potential oncology indications.

In addition to our etirinotecan pegol development activities, in 2013, we plan to continue to enroll the ongoing Phase 2 clinical study for NKTR-181 and also initiate and complete a human abuse liability study for NKTR-181. Further, if the Phase 2 clinical results are successful, we plan to begin preparations for the commencement of Phase 3 clinical studies for NKTR-181. We also plan to continue to advance the development of NKTR-192. We are also actively advancing the preclinical development work for NKTR-171 and NKTR-214 in preparation for entering clinical development in the 2013-2014 timeframe.

In addition, we plan to continue to make substantial investments to support the clinical and commercial manufacturing preparation and scale-up for the nebulizer devices to supply Bayer for the Amikacin Inhale program. Under our collaboration agreement with Bayer, we are responsible for all clinical and commercial supply of the nebulizer devices for this drug candidate. We do not expect to have any significant future research and development costs associated with naloxegol or the naloxegol fixed-dose combination products as AstraZeneca is responsible for all further development and commercialization costs for these drug candidates.

In addition to our drug candidates that we plan to have in clinical development during 2013 and beyond, we believe it is vitally important to continue our substantial investment in a diverse pipeline of new drug candidates to continue to build the value of our drug candidate pipeline and our business. Our discovery research organization is identifying new drug candidates by applying our pegylation technology platform to a wide range of molecule classes, including small molecules and large proteins, peptides and antibodies, across multiple therapeutic areas. We plan to continue to advance our most promising early research drug candidates into preclinical development with the objective to advance these early stage research programs to human clinical studies over the next several years.

Our expenditures on current and future preclinical and clinical development programs are subject to numerous uncertainties in timing and cost to completion. In order to advance our drug candidates through clinical development, each drug candidate must be tested in numerous preclinical safety, toxicology and efficacy studies. We then conduct clinical studies for our drug candidates that take several years to complete. The cost and time required to complete clinical trials may vary significantly over the life of a clinical development program as a result of a variety of factors, including but not limited to:

- the number of patients required for a given clinical study design;
- the length of time required to enroll clinical study participants;
- the number and location of sites included in the clinical studies;
- the clinical studies designs required by the health authorities (i.e. primary, secondary end points and the size of the study needed to demonstrate efficacy and safety outcomes);
- the potential for changing standards of care for the target patient population;

[Table of Contents](#)

- the competition for patient recruitment from competitive drug candidates being studied in the same clinical setting;
- the costs of producing supplies of the product candidates needed for clinical trials and regulatory submissions;
- the safety and efficacy profile of the drug candidate;
- the use of clinical research organizations to assist with the management of the trials; and
- the costs and timing of, and the ability to secure, approvals from government health authorities.

Furthermore, our strategy includes the potential of entering into collaborations with third parties to participate in the development and commercialization of some of our drug candidates such as those collaborations that we have already completed for naloxegol and Amikacin Inhale. In these situations, the clinical development program and process for a drug candidate and the estimated completion date will largely be under the control of that third party and not under our control. We cannot forecast with any degree of certainty which of our drug candidates will be subject to future collaborations or how such arrangements would affect our development plans or capital requirements.

The risks and uncertainties associated with our research and development projects are discussed more fully in Item 1A — Risk Factors. As a result of the uncertainties discussed above, we are unable to determine with any degree of certainty the duration and completion costs of our research and development projects, anticipated completion dates or when and to what extent we will receive cash inflows from a collaboration arrangement or the commercialization of a drug candidate.

General and administrative expense (in thousands, except percentages)

	Year Ended December 31,			Increase/ (Decrease)	Increase/ (Decrease)	Percentage Increase/ (Decrease)	Percentage Increase/ (Decrease)
	2012	2011	2010	2012 vs. 2011	2011 vs. 2010	2012 vs. 2011	2011 vs. 2010
General and administrative expense	\$41,614	\$46,760	\$40,986	\$ (5,146)	\$ 5,774	(11)%	14%

General and administrative expense includes the cost of administrative staffing, business development, marketing, finance, human resources and legal activities.

General and administrative expense decreased during the year ended December 31, 2012 compared to the year ended December 31, 2011 primarily as a result of a \$2.7 million payment obligation incurred in 2011 related to the settlement of a commercial litigation matter as well as a \$2.1 million decrease in non-cash stock-based compensation expense in 2012 as compared to 2011.

For the year ended December 31, 2011 compared to the year ended December 31, 2010, general and administrative expense increased by \$2.7 million due to the payment obligation related to the settlement of a commercial litigation matter noted above. In addition, general and administrative expense increased due to personnel-related costs, support and facilities-related costs, and other administrative costs.

In 2013, we expect general and administrative expenses to increase modestly compared to 2012.

Impairment of long lived assets (in thousands except percentages)

	Year Ended December 31,			Increase/ (Decrease) 2012 vs. 2011	Increase/ (Decrease) 2011 vs. 2010	Percentage Increase/ (Decrease) 2012 vs. 2011	Percentage Increase/ (Decrease) 2011 vs. 2010
	2012	2011	2010				
Impairment of long-lived assets	\$1,675	\$—	\$12,576	\$ 1,675	\$ (12,576)	100%	(100)%

In an effort to reduce ongoing operating costs and improve our organizational structure, efficiency and productivity, in March 2012, we announced a plan to consolidate our U.S.-based research activities at our existing San Francisco location and to cease the use of and offer for sale one of our buildings located in Huntsville, Alabama that was dedicated to research activities. As a result, we concluded that the combined carrying value of the land and building exceeded fair value and we recorded an impairment loss of \$1.7 million in March 2012. No further impairment losses were recorded in the year ended December 31, 2012, however, until we dispose of these assets, we will update our analysis of their fair value on a regular basis and such updates could result in further impairment charges in future periods. As of December 31, 2012, the remaining net book value of these assets is \$2.8 million.

During the year ended December 31, 2010, we relocated all of our operations previously located in San Carlos, California, including our corporate headquarters, to our Mission Bay Facility in San Francisco, California. We determined that the carrying value of the San Carlos facility exceeded its fair value based on a discounted cash flow model and an impairment charge of \$12.6 million was recognized as a result. As of December 31, 2012, the remaining net book value of these assets is \$1.4 million.

Interest income (in thousands except percentages)

	Year Ended December 31,			Increase/ (Decrease) 2012 vs. 2011	Increase/ (Decrease) 2011 vs. 2010	Percentage Increase/ (Decrease) 2012 vs. 2011	Percentage Increase/ (Decrease) 2011 vs. 2010
	2012	2011	2010				
Interest income	\$2,315	\$2,244	\$1,545	\$ 71	\$ 699	3%	45%

Interest income for the year ended December 31, 2012 was consistent with the year ended December 31, 2011.

The increase in interest income for the year ended December 31, 2011 compared to the year ended December 31, 2010 is a result of higher average cash and investment balances partially offset by the impact of lower interest rates earned on our cash, cash equivalents, and available-for-sale investments.

Interest expense (in thousands except percentages)

	Year Ended December 31,			Increase/ (Decrease) 2012 vs. 2011	Increase/ (Decrease) 2011 vs. 2010	Percentage Increase/ (Decrease) 2012 vs. 2011	Percentage Increase/ (Decrease) 2011 vs. 2010
	2012	2011	2010				
Interest expense	\$15,489	\$10,223	\$11,174	\$ 5,266	\$ (951)	52%	(9)%
Non-cash interest expense on liability related to sale of future royalties	\$18,057	\$ —	\$ —	\$ 18,057	\$ —	100%	N/A

[Table of Contents](#)

The increase in interest expense for the year ended December 31, 2012 compared to the year ended December 31, 2011 is attributable to the interest expense recorded on the senior secured notes we issued in 2012. On July 11, 2012, we issued \$125.0 million of 12% senior secured notes maturing on July 15, 2017. In connection with this transaction, we retired a principal amount of \$42.5 million of our \$215.0 million in aggregate principal amount of 3.25% convertible subordinated notes in exchange for \$42.5 million in principal amount of 12% senior secured notes. We repaid the remaining \$172.4 million in principal amount of convertible subordinated notes in full at maturity on September 28, 2012.

The increase in non-cash interest expense on liability related to sale of future royalties for the year ended December 31, 2012 compared to the year ended December 31, 2011 is attributable to the royalty sale transaction that we completed in 2012. On February 24, 2012, we sold all of our rights to receive future royalty payments on CIMZIA® and MIRCERA® in exchange for \$124.0 million. As described in Note 7 to our Consolidated Financial Statements, this royalty sale transaction has been recorded as a liability that amortizes over the estimated royalty payment period as CIMZIA® and MIRCERA® royalties are remitted directly to the purchaser. We impute interest on the transaction and record interest expense at the effective interest rate, which we currently estimated to be approximately 17%. There are a number of factors that could materially affect the estimated interest rate and we will assess this estimate on a periodic basis. As a result, future interest rates could differ significantly and any such change in interest rate will be adjusted prospectively.

As a result of the timing of the royalty sale transaction and the issuance of the senior secured notes in 2012, we expect interest expense and non-cash interest expense to increase in 2013 as compared to 2012.

The decrease in interest expense for the year ended December 30, 2011 compared to the year ended December 31, 2010 is primarily attributable to the complete amortization of deferred financing costs during 2010 relating to our 3.25% convertible subordinated notes that matured in September 2012.

Liquidity and Capital Resources

We have financed our operations primarily through revenue from product sales, royalties and research and development contracts, as well as public and private placements of debt and equity. As of December 31, 2012, we had cash, cash equivalents and investments in marketable securities of \$302.2 million and indebtedness of \$149.0 million. The indebtedness includes \$125.0 million in aggregate principal amount of 12.0% senior secured notes due July 15, 2017, but excludes our long-term liability relating to the sale of future royalties. As is further described in Note 7 to our Consolidated Financial Statements, this royalty obligation liability will not be settled in cash, but we may be required to make a payment of up to \$7.0 million in 2014 if the worldwide net sales thresholds of MIRCERA® in 2013 are not met. On July 11, 2012, we issued \$125.0 million in aggregate principal amount of senior secured notes. In connection with this transaction, we retired a principal amount of \$42.5 million of our \$215.0 million in aggregate principal amount of 3.25% convertible subordinated notes in exchange for \$42.5 million in principal amount of senior secured notes. As a result of these transactions, we received cash of \$82.5 million, less approximately \$4.5 million in transaction costs, of which \$25.0 million is required to be maintained in a restricted account until July 1, 2015. On September 28, 2012, we repaid the remaining \$172.4 million in principal amount on the convertible subordinated notes. Additionally at December 31, 2012, we had letter of credit arrangements with certain financial institutions and vendors, including our landlord, totaling \$2.4 million. These letters of credit will expire during 2013 and are secured by investments of similar amounts. We have no material credit facility or other material committed sources of capital.

As of December 31, 2012, we had at least twelve months of working capital to fund our current business plans. We expect the clinical development of our proprietary drug candidates including etirinotecan pegol (NKTR-102), Amikacin Inhale, NKTR-181, and NKTR-192 will require significant investment in order to continue to advance in clinical development with the objective of entering into a collaboration partnership or obtaining regulatory approval. However, we have no credit facility or any other sources of committed capital. In addition, while in the past we have received a number of significant payments from license and collaboration

[Table of Contents](#)

agreements and other significant transactions, we do not currently anticipate completing new transactions with substantial upfront payments in the near -term. Our current business plan is also subject to significant uncertainties and risks as a result of, among other factors, expenses being higher than anticipated, unplanned expenses, cash receipts being lower than anticipated, and the need to satisfy contingent liabilities including litigation matters and indemnification obligations.

The availability and terms of various financing alternatives substantially depend on the success or failure of our drug development programs including naloxegol, BAX 855, Amikacin Inhale, etirinotecan pegol, NKTR-181, and NKTR-192. The availability and terms of financing alternatives and any future significant payments from existing or new collaborations all depend on the positive outcome of ongoing or planned clinical studies, whether we or our partners are successful in obtaining health authority approvals in major markets, and if approved, the commercial success of these drugs. In particular, we are entitled to up to \$235.0 million of regulatory and commercial launch milestones under our license agreement with AstraZeneca, \$95.0 million of which is related to AstraZeneca submitting regulatory approval filings for naloxegol with the FDA and with the EMA. AstraZeneca has indicated that it plans to submit regulatory filings for naloxegol subject to AstraZeneca's preparation of the NDA submission package and a pre-NDA meeting with the FDA. In the event we do not enter into any new collaboration partnerships with significant up-front payments or do not receive the naloxegol regulatory milestone payments in 2013, we would likely be required to pursue financing alternatives. In the event we determine to explore financing alternatives, our objective would be to first pursue financing alternatives that are not dilutive to the ownership of our common stock security holders. However, if non-dilutive financing alternatives are not available to us on commercially reasonable terms or at all, we could be required to pursue dilutive equity-based financing alternatives such as an offering of convertible debt or common stock.

Due to the potential for continued uncertainty in the credit markets in 2013 and thereafter, we may experience reduced liquidity with respect to some of our investments in marketable securities. These investments are generally held to maturity, which is less than two years. However, if the need arises to liquidate such securities before maturity, we may experience losses on liquidation. At December 31, 2012, the average time to maturity of the investments held in our portfolio was approximately four months and the maturity of any single investment did not exceed two years. To date we have not experienced any liquidity issues with respect to these securities, but if such issues arise, we may be required to hold some, or all, of these securities until maturity. We believe that, even allowing for potential liquidity issues with respect to these securities, our remaining cash, cash equivalents, and investments will be sufficient to meet our anticipated cash needs for at least the next twelve months.

Cash flows from operating activities

Cash flows used in operating activities for the year ended December 31, 2012 totaled \$129.8 million, which includes \$148.3 million of net operating cash uses, partially offset by the receipt of \$18.5 million from collaboration agreements. Net operating cash uses also include \$6.7 million in interest payments on our convertible subordinated notes retired in full on September 28, 2012. We expect that cash flows used in operating activities, excluding upfront and milestone payments received, if any, will increase in 2013 as a result of increased spending on our proprietary research and development programs, in particular, our BEACON study.

Cash flows used in operating activities for the year ended December 31, 2011 totaled \$113.7 million, which includes \$7.0 million for semi-annual interest payments on our convertible subordinated notes, \$11.2 million of prepayments to certain vendors in our BEACON study, and \$125.0 million of other net operating cash uses, partially offset by the receipt of \$29.5 million from collaboration agreements, of which \$16.5 million was included in accounts receivable at December 31, 2010 resulting from an upfront payment obligation arising from an amendment to one of our manufacturing and supply agreements.

During the year ended December 31, 2010, net cash used in operating activities totaled \$55.9 million, which primarily consisted of spending on operating costs and expenses and includes \$7.0 million for interest payments

[Table of Contents](#)

on our convertible subordinated notes, and was partially offset by a \$50.0 million upfront payment received from Amgen under the supply, dedicated suite and manufacturing guarantee agreement that we entered into with Amgen in October 2010.

Cash flows from investing activities

We purchased \$10.6 million, \$9.7 million, and \$31.5 million of property and equipment in the years ended December 31, 2012, 2011, and 2010, respectively. Our capital expenditures were higher in 2010 as we constructed the leasehold improvements for the Mission Bay Facility and completed our research and development facility in Hyderabad, India. We expect our capital expenditures in 2013 to be consistent with 2012.

Cash flows used in financing activities

On February 24, 2012, we sold all of our rights to receive future royalty payments on CIMZIA® and MIRCERA® in exchange for \$124.0 million. As part of this sale, we incurred approximately \$4.4 million in transaction costs.

On July 11, 2012, we issued \$125.0 million of senior secured notes maturing on July 15, 2017. As part of this transaction, we incurred approximately \$4.5 million in issuance costs. In connection with this transaction, we retired the principal amount of \$42.5 million of our \$215.0 million in aggregate principal amount of convertible subordinated notes in exchange for \$42.5 million in principal amount of the senior secured notes. In addition, \$25.0 million of the proceeds from the senior secured notes issuance is required to be maintained in a restricted account until July 1, 2015. On September 28, 2012, we repaid the remaining \$172.4 million in principal amount of the convertible subordinated notes.

On January 24, 2011, we completed a public offering of our common stock with gross proceeds of approximately \$220.4 million. As part of the public offering, we incurred approximately \$0.6 million in legal and accounting fees, filing fees, and other offering expenses.

We received proceeds from issuance of common stock related to our employee option and stock purchase plans of \$4.1 million, \$4.5 million, and \$8.9 million in the years ended December 31, 2012, 2011, and 2010, respectively.

Contractual Obligations (in thousands)

	Payments Due by Period				
	Total	<=1 Yr 2013	2-3 Yrs 2014- 2015	4-5 Yrs 2016-2017	2018+
Obligations⁽¹⁾					
12% Senior secured notes due July 2017, including interest	\$200,000	\$15,000	\$30,000	\$155,000	\$ —
Operating leases ⁽²⁾	21,520	200	5,176	7,665	8,479
Capital leases, including interest ⁽³⁾	19,634	5,129	10,471	4,034	—
Purchase commitments ⁽⁴⁾	14,648	14,648	—	—	—
Litigation settlement, including interest	4,000	1,000	2,000	1,000	—
	<u>\$259,802</u>	<u>\$35,977</u>	<u>\$47,647</u>	<u>\$167,699</u>	<u>\$8,479</u>

(1) The above table does not include certain commitments and contingencies which are discussed in Note 8 of Item 8. Financial Statements and Supplementary Data.

(2) In November 2010, we moved into our Mission Bay Facility, which includes our corporate headquarters and a research and development center. Under the terms of the sublease we entered into with Pfizer Inc. on

[Table of Contents](#)

September 30, 2009 for the Mission Bay Facility, we will begin making non-cancelable lease payments in 2014. On December 28, 2011, we amended the sublease of the Mission Bay Facility to include an additional 24,002 square feet of space. Under the terms of the amendment, beginning January 1, 2012, we began making lease payments for this additional space of \$40,000 per month until at least May 31, 2013. The sublease is discussed in Note 6 of Item 8. Financial Statements and Supplementary Data.

- (3) These amounts primarily result from capital lease obligations arising from our office space lease at 201 Industrial Road in San Carlos, California. In November 2010, we ceased use of this space as a result of the relocation of all of our California functions to our Mission Bay Facility. We have subleased a portion of the San Carlos Facility and are currently seeking one or more subtenants for the remaining space. This is further discussed in Note 6 of Item 8. Financial Statements and Supplementary Data.
- (4) Substantially all of this amount was subject to open purchase orders as of December 31, 2012 that were issued under existing contracts. This amount does not represent any minimum contract termination liabilities for our existing contracts.

Given our current cash requirements, we forecast that we will have sufficient cash to meet our net operating expense requirements and contractual obligations at least through December 31, 2013. We plan to continue to invest in the advancement of our research and development drug candidate pipeline and our future cash requirements will depend upon the timing and results of these investments. Our capital needs will depend on many factors, including continued progress in our research and development programs, progress with preclinical and clinical trials of our proprietary and partnered drug candidates, our ability to successfully enter into additional collaboration agreements for one or more of our proprietary drug candidates or intellectual property that we control, the time and costs involved in obtaining regulatory approvals, the costs of developing and scaling our clinical and commercial manufacturing operations, the costs involved in preparing, filing, prosecuting, maintaining and enforcing patent claims, the need to acquire licenses to new technologies and the status of competitive products.

Our substantial debt, the market price of our securities, and the general economic climate, among other factors, could have material consequences for our financial condition and could affect our sources of short-term and long-term funding. Our ability to meet our ongoing operating expenses and repay our outstanding indebtedness is dependent upon our and our partners' ability to successfully complete clinical development of, obtain regulatory approvals for and successfully commercialize new drugs. Even if we or our partners are successful, we may require additional capital to continue to fund our operations and repay our debt obligations as they become due. There can be no assurance that additional funds, if and when required, will be available to us on favorable terms, if at all.

Off Balance Sheet Arrangements

We do not utilize off-balance sheet financing arrangements as a source of liquidity or financing.

Critical Accounting Policies

The preparation of financial statements in conformity with U.S. Generally Accepted Accounting Principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form our basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources, and evaluate our estimates on an ongoing basis. Actual results may differ from those estimates under different assumptions or conditions. We have determined that for the periods reported in this report, the following accounting policies and estimates are critical in understanding our financial condition and results of our operations.

Revenue Recognition

License, collaboration and other research revenue is recognized based on the facts and circumstances of each contractual agreement and includes amortization of upfront fees. We defer income under contractual agreements when we have further obligations that indicate that a separate earnings process has not been completed. Upfront fees are recognized ratably over the expected performance period under each arrangement. Management makes its best estimate of the period over which we expect to fulfill our performance obligations, which may include technology transfer assistance, clinical development activities, or manufacturing activities through the completion of clinical development or the termination or expiration of the collaboration agreement. Given the complexities and uncertainties of collaboration arrangements, significant judgment is required by management to determine the duration of the performance period.

As of December 31, 2012, we had \$25.8 million of deferred upfront fees related to two collaboration agreements that are being amortized over 11 to 14 years, or an average of 12.5 years. For our collaboration agreements, our performance obligations may span the life of the agreement. For these, the shortest reasonable period is the end of the development period (estimated to be 4 to 6 years) and the longest period is the contractual life of the agreement, which is generally 10-12 years from the first commercial sale. Given the statistical probability of drug development success in the bio-pharmaceutical industry, drug development programs have only a 5% to 10% probability of reaching commercial success. If we had determined a longer or shorter amortization period was appropriate, our annual upfront fee amortization for these agreements could be as low as \$2.4 million or as high as \$11.0 million as compared to the \$3.2 million recognized in the year ended December 31, 2012.

As of December 31, 2012, we also had \$90.4 million of deferred upfront fees related to seven license, manufacturing and supply agreements that are being amortized over periods from 5 to 10 years. Our performance obligations for these agreements may include technology transfer assistance and/or back-up manufacturing and supply services for a specified period of time; therefore, the time estimated to complete the performance obligations related to licenses is either specified or is much shorter than the collaboration agreements. We may experience delays in the execution of technology transfer plans, which may result in a longer amortization period for applicable agreements.

Our original estimates are periodically evaluated to determine if circumstances have caused the estimates to change and if so, amortization of revenue is adjusted prospectively.

On January 1, 2011, we adopted on a prospective basis Accounting Standards Update (ASU) 2009-13, which amends the criteria to identify separate units of accounting within Subtopic 605-25, "Revenue Recognition-Multiple-Element Arrangements." In the year ended December 31, 2012, we entered into our first arrangement that requires accounting under this guidance. Under this guidance, at the inception of each new multiple-element arrangement or the material modification of an existing multiple-element arrangement, we allocate arrangement consideration to all units of accounting based on the relative selling price method, generally based on our best estimate of selling price (ESP). The objective of ESP is to determine the price at which we would transact a sale if the product or service was sold on a stand-alone basis. We determine ESP for the elements in our collaboration arrangements by considering multiple factors including, but not limited to, technical complexity of the performance obligation and similarity of elements to those performed under previous arrangements. Since we apply significant judgment in arriving at the ESPs, any material changes would significantly affect the allocation of the total consideration to the different elements of a multiple element arrangement.

Clinical Trial Accruals

We record accruals for the estimated costs of our clinical study activities performed by third parties. We generally accrue costs associated with the start-up and reporting phases of the clinical studies ratably over the

estimated duration of the start-up and reporting phases. If the actual timing of these phases varies from the estimate, we will adjust the accrual prospectively. We generally accrue costs associated with the treatment phase of clinical studies based on the total estimated cost of the treatment phase on a per patient basis and we expense the per patient cost ratably based on patient enrollment in the studies. In addition, certain time-based costs are expensed ratably over the treatment phase. Advance payments for goods or services that will be used or rendered for future research and development activities are capitalized as prepaid expenses and recognized as expense as the related goods are delivered or the related services are performed.

Stock-Based Compensation

We use the Black-Scholes option valuation model for each respective grant to determine the estimated fair value of stock options on the date of grant (grant date fair value) and common stock purchased under the ESPP. We expense the estimated fair value of each award, as adjusted by the estimated historical forfeiture rate, ratably over the expected service period of the award. The Black-Scholes option pricing model requires the input of highly subjective assumptions. Because our employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect fair value estimates, in management's opinion, the existing models may not provide a reliable single measure of the fair value of our employee stock options or common stock purchased under our employee stock purchase plan. In addition, management continually assesses the assumptions and methodologies used to calculate the estimated fair value of stock-based compensation. Circumstances may change and additional data may become available over time, which could result in changes to the assumptions and methodologies, and which could materially impact our fair value determination, as well as our stock-based compensation expense.

In addition, for awards that vest upon the achievement of performance milestones, we estimate the vesting period based on our evaluation of the probability of achievement of each respective milestone and the related estimated date of achievement.

Non-cash Interest Expense on Liability Related to Sale of Future Royalties

In February 2012, we sold all of our rights to receive future royalty payments from sales of the CIMZIA[®] and MIRCERA[®] drug products marketed by UCB and Roche, respectively. Although we are required to make payments to the purchaser only in certain situations, including the event of our breach of a representation, warranty or covenant in the Purchase and Sale Agreement that gives rise to a liability in accordance with the terms and conditions of such agreement, this royalty sale transaction was recorded as a liability (Royalty Obligation) that we will amortize using the interest method over the estimated life of the Purchase and Sale Agreement. As a result, we impute interest on the transaction and record interest expense at the estimated interest rate. Our estimate of the interest rate under the agreement is based on the amount of royalty payments to be received by RPI over the life of the arrangement and payments we may be required to make to RPI under the agreement, if any. We will periodically assess the expected royalty payments to RPI from UCB and Roche using a combination of historical results and forecasts from market data sources. To the extent such payments are greater or less than our initial estimates or the timing of such payments is materially different than our original estimates, we will prospectively adjust the amortization of the Royalty Obligation. There are a number of factors that could materially affect the amount and timing of royalty payments from CIMZIA[®] and MIRCERA[®], most of which are not within our control. Such factors include, but are not limited to, changing standards of care, the introduction of competing products, manufacturing or other delays, biosimilar competition, intellectual property matters, adverse events that result in health authority imposed restrictions on the use of the drug products, and other events or circumstances that result in reduced royalty payments from CIMZIA[®] and MIRCERA[®], all of which would result in a reduction of non-cash royalty revenues and non-cash interest expense over the life of the Royalty Obligation. Conversely, if sales of CIMZIA[®] and MIRCERA[®] are higher than expected, non-cash royalty revenues and non-cash interest expense would also be greater over the term of the Royalty Obligation. If we had determined that the interest rate used in 2012 should have been one percentage point higher than our

[Table of Contents](#)

current estimate of 17%, the non-cash interest expense recognized in the year ended December 31, 2012 would have increased by \$1.2 million.

Recent Accounting Pronouncements

On January 1, 2012, we were required to adopt new accounting guidance related to the presentation of comprehensive income that prohibits the presentation of other comprehensive income (OCI) in the statement of stockholders' equity and instead, provides the option of presenting OCI in a continuous statement of comprehensive income or as two separate consecutive statements. We elected to present OCI in two separate consecutive statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate and Market Risk

The primary objective of our investment activities is to preserve principal while at the same time maximizing yields without significantly increasing risk. To achieve this objective, we invest in liquid, high quality debt securities. Our investments in debt securities are subject to interest rate risk. To minimize the exposure due to an adverse shift in interest rates, we invest in short-term securities and maintain a weighted average maturity of one year or less.

A hypothetical 50 basis point increase in interest rates would result in an approximate \$0.4 million decrease, less than 1%, in the fair value of our available-for-sale securities at December 31, 2012. This potential change is based on sensitivity analyses performed on our investment securities at December 31, 2012. Actual results may differ materially. The same hypothetical 50 basis point increase in interest rates would have resulted in an approximate \$1.7 million decrease, less than 1%, in the fair value of our available-for-sale securities at December 31, 2011.

Due to the potential for continued uncertainty in the credit markets in 2013, we may experience reduced liquidity with respect to some of our investments in marketable securities. These investments are generally held to maturity, which is less than two years. However, if the need arises to liquidate such securities before maturity, we may experience losses on liquidation. As of December 31, 2012, we held \$252.8 million of available-for-sale investments, excluding money market funds, with an average time to maturity of four months. To date we have not experienced any liquidity issues with respect to these securities, but should such issues arise, we may be required to hold some, or all, of these securities until maturity. We believe that, even allowing for potential liquidity issues with respect to these securities, our remaining cash, cash equivalents, and investments will be sufficient to meet our anticipated cash needs for at least the next twelve months. Based on our available cash and our expected operating cash requirements, we currently do not intend to sell these securities prior to maturity and it is more likely than not that we will not be required to sell these securities before we recover the amortized cost basis. Accordingly, we believe there are no other-than-temporary impairments on these securities and have not recorded any provisions for impairment.

Foreign Currency Risk

The majority of our revenue, expense, and capital purchasing activities are transacted in U.S. dollars. However, since a portion of our operations consists of research and development activities outside the United States, we have entered into transactions in other currencies, primarily the Indian Rupee, and we therefore are subject to foreign exchange risk.

Our international operations are subject to risks typical of international operations, including, but not limited to, differing economic conditions, changes in political climate, differing tax structures, other regulations and restrictions, and foreign exchange rate volatility. We do not utilize derivative financial instruments to manage our exchange rate risks.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of Nektar Therapeutics

We have audited the accompanying consolidated balance sheets of Nektar Therapeutics as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive loss, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2012. Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Nektar Therapeutics at December 31, 2012 and 2011, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Nektar Therapeutics' internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2013 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Redwood City, California
February 28, 2013

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of Nektar Therapeutics

We have audited Nektar Therapeutics' internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Nektar Therapeutics' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Nektar Therapeutics maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Nektar Therapeutics as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive loss, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2012 of Nektar Therapeutics and our report dated February 28, 2013 expressed an unqualified opinion thereon.

NEKTAR THERAPEUTICS
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2012

Note 1 — Organization and Summary of Significant Accounting Policies

Organization

We are a clinical-stage biopharmaceutical company headquartered in San Francisco, California and incorporated in Delaware. We are developing a pipeline of drug candidates that utilize our PEGylation and advanced polymer conjugate technology platforms with the objective to improve the benefits of drugs for patients.

Our research and development activities have required significant resources to date and are expected to continue to require significant resources. As a result, we expect to continue to incur substantial losses and negative cash flows from operations in the future. We have financed our operations primarily through cash from licensing, collaboration and manufacturing agreements as well as financing transactions. At December 31, 2012, we had approximately \$302.2 million in cash, cash equivalents and investments in marketable securities, of which \$25.0 million was restricted, and \$149.0 million in indebtedness. The indebtedness includes \$125.0 million in aggregate principal amount of 12.0% senior secured notes due July 15, 2017 which we issued during the year ended December 31, 2012, but excludes our long-term liability relating to the sale of future royalties. As is further described in Note 7, this royalty obligation liability will not be settled in cash, but we may be required to make a payment of up to \$7.0 million to the royalty purchaser in 2014 if certain worldwide net sales thresholds of MIRCERA® in 2013 are not met. During the year ended December 31, 2012, we retired \$215.0 million in aggregate principal amount of all of our previously outstanding convertible subordinated notes.

Basis of Presentation, Principles of Consolidation and Use of Estimates

Our consolidated financial statements include the financial position, results of operations and cash flows of our wholly-owned subsidiaries: Nektar Therapeutics (India) Private Limited, Nektar Therapeutics UK, Ltd. (Nektar UK) and Aerogen, Inc. All intercompany accounts and transactions have been eliminated in consolidation. In December 2010, we completed the dissolution of Aerogen, Inc. and all remaining assets were transferred to Nektar Therapeutics.

Our consolidated financial statements are denominated in U.S. dollars. Accordingly, changes in exchange rates between the applicable foreign currency and the U.S. dollar will affect the translation of each foreign subsidiary's financial results into U.S. dollars for purposes of reporting our consolidated financial results. Translation gains and losses are included in accumulated other comprehensive income (loss) in the stockholders' equity section of the balance sheet. To date, such cumulative translation adjustments have not been material to our consolidated financial position. Aggregate gross foreign currency transaction gains (losses) recorded in operations for the years ended December 31, 2012, 2011, and 2010 were not material.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from those estimates. On an ongoing basis, we evaluate our estimates, including those related to deferred revenue recognition periods, inventories, the impairment of investments, the impairment of goodwill and long-lived assets, contingencies, estimated interest expense from our liability related to our sale of future royalties, stock-based compensation, and ongoing litigation, amongst other estimates. We base our estimates on historical experience and on other assumptions that management believes are reasonable under the circumstances. These estimates also form the basis for making judgments about the carrying values of assets and liabilities when these values are not readily apparent from other sources.

[Table of Contents](#)

Reclassifications

Certain items previously reported in specific financial statement captions have been reclassified to conform to the current period presentation. Such reclassifications do not impact previously reported total revenue, operating loss or net loss or total assets, liabilities or stockholders' equity.

Cash, Cash Equivalents, and Investments, and Fair Value of Financial Instruments

We consider all investments in marketable securities with an original maturity of three months or less when purchased to be cash equivalents. Investments in securities with remaining maturities of less than one year, or where our intent is to use the investments to fund current operations or to make them available for current operations, are classified as short-term investments.

Investments are designated as available-for-sale and are carried at fair value, with unrealized gains and losses reported in stockholders' equity as accumulated other comprehensive income (loss). The disclosed fair value related to our cash equivalents and investments is based primarily on the reported fair values in our period-end brokerage statements, which are based on market prices from a variety of industry standard data providers and generally represent quoted prices for similar assets in active markets or have been derived from observable market data. We independently validate these fair values using available market quotes and other information.

Interest and dividends on securities classified as available-for-sale, as well as amortization of premiums and accretion of discounts to maturity, are included in interest income. Realized gains and losses and declines in value of available-for-sale securities judged to be other-than-temporary, if any, are included in other income (expense). The cost of securities sold is based on the specific identification method.

Accounts Receivable and Significant Customer Concentrations

Our customers are primarily pharmaceutical and biotechnology companies that are located in the U.S. and Europe. Our accounts receivable balance contains billed and unbilled trade receivables from product sales and royalties, as well as time and materials based billings from collaborative research and development agreements. When appropriate, we provide for an allowance for doubtful accounts by reserving for specifically identified doubtful accounts. We generally do not require collateral from our customers. We perform a regular review of our customers' payment histories and associated credit risk. We have not experienced significant credit losses from our accounts receivable. At December 31, 2012, four different customers represented 38%, 27%, 14% and 11%, respectively, of our accounts receivable. At December 31, 2011, four different customers represented 26%, 20%, 19% and 17%, respectively, of our accounts receivable.

Inventory and Significant Supplier Concentrations

Inventory is generally manufactured upon receipt of firm purchase orders from our collaboration partners. Inventory includes direct materials, direct labor, and manufacturing overhead and cost is determined on a first-in, first-out basis. Inventory is stated at the lower of cost or market and is net of reserves determined using specific identification plus an estimated reserve for defective or excess inventory based on historical experience or projected usage. Inventory related to research and development activities are expensed when purchased.

We are dependent on our suppliers and contract manufacturers to provide raw materials, drugs and devices of appropriate quality and reliability and to meet applicable contract and regulatory requirements. In certain cases, we rely on single sources of supply of one or more critical materials. Consequently, in the event that supplies are delayed or interrupted for any reason, our ability to develop and produce our drug candidates or our ability to meet our supply obligations could be significantly impaired, which could have a material adverse effect on our business, financial condition and results of operations.

[Table of Contents](#)

Property and Equipment

Property and equipment are stated at cost. Major improvements are capitalized, while maintenance and repairs are expensed when incurred. Manufacturing, laboratory and other equipment are depreciated using the straight-line method generally over estimated useful lives of three to seven years. Leasehold improvements and buildings are depreciated using the straight-line method over the shorter of the estimated useful life or the remaining term of the lease.

We periodically review our property and equipment for recoverability whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Generally, an impairment loss would be recognized if the carrying amount of an asset exceeds the sum of the discounted cash flows expected to result from the use and eventual disposal of the asset (See Note 11).

Goodwill

Goodwill represents the excess of the price paid for another entity over the fair value of the assets acquired and liabilities assumed in a business combination. We test for impairment in the fourth quarter of each year using an October 1 measurement date, as well as at other times when impairment indicators exist or when events occur or circumstances change that would indicate the carrying amount may not be fully recoverable.

We are organized in one reporting unit and have evaluated the goodwill for the Company as a whole. In order to test for goodwill impairment, we first assess qualitative factors to determine whether it is more likely than not that the fair value of our single reporting unit is less than its carrying amount and, if so, we perform a two-step goodwill impairment test. The first step, identifying a potential impairment, compares the fair value of the reporting unit with its carrying amount. If the carrying amount exceeds its fair value, the second step would need to be performed; otherwise, no. The second step compares the book value of our assigned goodwill to the implied fair value of our goodwill. We did not recognize any goodwill-related impairment charges during 2012, 2011, or 2010.

Revenue Recognition

We enter into arrangements with pharmaceutical and biotechnology collaboration partners that may involve multiple deliverables. Our arrangements may contain one or more of the following elements: upfront fees, contract research and development, milestone payments, manufacturing and supply payments, royalties, and license fees. Each deliverable in the arrangement is evaluated to determine whether it meets the criteria to be accounted for as a separate unit of accounting or whether it should be combined with other deliverables. Revenue is recognized separately for each element.

On January 1, 2011, we adopted on a prospective basis Accounting Standards Update (ASU) 2009-13, which amends the criteria to identify separate units of accounting within Subtopic 605-25, "Revenue Recognition-Multiple-Element Arrangements." Under this guidance, at the inception of each new multiple-element arrangement or the material modification of an existing multiple-element arrangement, we allocate all consideration received under multiple-element arrangements to all units of accounting based on the relative selling price method, generally based on our best estimate of selling price (ESP). The objective of ESP is to determine the price at which we would transact a sale if the product or service was sold on a stand-alone basis. We determine ESP for the elements in our collaboration arrangements by considering multiple factors including, but not limited to, technical complexity of the performance obligation and similarity of elements to those performed under previous arrangements. Since we apply significant judgment in arriving at the ESPs, any material change in our estimates would significantly affect the allocation of the total consideration to the different elements of a multiple element arrangement.

Product sales

Product sales are primarily derived from cost-plus and fixed price manufacturing and supply agreements with our collaboration partners and revenue is recognized when there is persuasive evidence that an arrangement

[Table of Contents](#)

exists, delivery has occurred, the price is fixed or determinable, and collection is reasonably assured. We have not experienced any significant returns from our customers.

Royalty revenues

Generally, we are entitled to royalties from our partners based on the net sales of their approved drugs that are marketed and sold in one or more countries where we hold royalty rights. We recognize royalty revenue when the cash is received or when the royalty amount to be received is estimable and collection is reasonably assured. With respect to the non-cash royalties related to sale of future royalties described at Note 7, revenues are recognized during the period in which the related royalty report is received, which generally occurs in the quarter after the applicable product sales are made.

License, collaboration and other

Upfront fees received by us in license and collaboration arrangements that include future obligations, such as manufacturing and supply obligations, are recognized ratably over our expected performance period under each respective arrangement. We make our best estimate of the period over which we expect to fulfill our performance obligations, which may include technology transfer assistance, research activities, clinical development activities, and manufacturing activities from development through the commercialization of the product. Given the uncertainties of these collaboration arrangements, significant judgment is required to determine the duration of the performance period.

On January 1, 2011, we elected to prospectively adopt ASU 2010-17, "Milestone Method of Revenue Recognition". Under the milestone method, contingent consideration received from the achievement of a substantive milestone is recognized in its entirety in the period in which the milestone is achieved, which we believe is consistent with the substance of our performance under our various license and collaboration agreements. A milestone is defined as an event (i) that can only be achieved based in whole or in part either on the entity's performance or on the occurrence of a specific outcome resulting from the entity's performance, (ii) for which there is substantive uncertainty at the date the arrangement is entered into that the event will be achieved, and (iii) that would result in additional payments being due to the entity. A milestone is substantive if the consideration earned from the achievement of the milestone is consistent with our performance required to achieve the milestone or the increase in value to the collaboration resulting from our performance, relates solely to our past performance, and is reasonable relative to all of the other deliverables and payments within the arrangement.

Our license and collaboration agreements with our partners provide for payments to us upon the achievement of development milestones, such as the completion of clinical trials or regulatory submissions, approvals by health authorities, and commercial launches of drugs. Given the challenges inherent in developing and obtaining regulatory approval for drug products and in achieving commercial launches, there was substantial uncertainty whether any such milestones would be achieved at the time of execution of these licensing and collaboration agreements. In addition, we evaluated whether the development milestones meet the remaining criteria to be considered substantive. As a result of our analysis, we consider our remaining development milestones under all of our license and collaboration agreements to be substantive and, accordingly, we expect to recognize as revenue future payments received from such milestones only if and as each milestone is achieved.

Our license and collaboration agreements with certain partners also provide for contingent payments to us based solely upon the performance of the respective partner. For such contingent amounts we expect to recognize the payments as revenue when earned under the applicable contract, which is generally upon completion of performance by the respective partner, provided that collection is reasonably assured.

Our license and collaboration agreements with our partners also provide for payments to us upon the achievement of specified sales volumes of approved drugs. We consider these payments to be similar to royalty payments and we will recognize such sales-based payments upon achievement of such sales volumes, provided that collection is reasonably assured.

[Table of Contents](#)

Shipping and Handling Costs

We recognize costs related to shipping and handling of product to customers in cost of goods sold.

Stock-Based Compensation

Stock-based compensation arrangements include stock option grants and restricted stock unit (RSU) awards under our equity incentive plans, as well as shares issued under our Employee Stock Purchase Plan (ESPP), in which employees may purchase our common stock at a discount to the market price.

We use the Black-Scholes option valuation model for the respective grant to determine the estimated fair value of the option on the date of grant (grant date fair value) and the estimated fair value of common stock purchased under the ESPP. The Black-Scholes option pricing model requires the input of highly subjective assumptions. Because our employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models may not provide a reliable single measure of the fair value of our employee stock options or common stock purchased under the ESPP. Management will continue to assess the assumptions and methodologies used to calculate the estimated fair value of stock-based compensation. Circumstances may change and additional data may become available over time, which could result in changes to these assumptions and methodologies, and which could materially impact our fair value determination.

We expense the value of the portion of the option or award that is ultimately expected to vest based on the historical forfeiture rate on a straight line basis over the requisite service periods in our Consolidated Statements of Operations. For awards that vest upon the achievement of performance milestones, we estimate the vesting period based on our evaluation of the probability of achievement of each respective milestone and the related estimated date of achievement. Stock-based compensation expense for purchases under the ESPP are recognized based on the estimated fair value of the common stock during each offering period and the percentage of the purchase discount. Expense amounts are allocated among inventory, cost of goods sold, research and development expense, and general and administrative expense based on the function of the applicable employee. Stock-based compensation charges are non-cash charges and as such have no impact on our reported cash flows.

Research and Development Expense

Research and development costs are expensed as incurred and include salaries, benefits and other operating costs such as outside services, supplies and allocated overhead costs. We perform research and development for our proprietary drug candidates and technology development and for certain third parties under collaboration agreements. For our proprietary drug candidates and our internal technology development programs, we invest our own funds without reimbursement from a third party.

We record accruals for the estimated costs of our clinical trial activities performed by third parties. We generally accrue costs associated with the start-up and reporting phases of the clinical trials ratably over the estimated duration of the start-up and reporting phases. We generally accrue costs associated with the treatment phase of clinical trials based on the total estimated cost of the treatment phase on a per patient basis and we expense the per patient cost ratably over the estimated patient treatment period based on patient enrollment in the trials. In addition, certain time-based costs are expensed ratably over the treatment phase. Advance payments for goods or services that will be used or rendered for future research and development activities are capitalized as prepaid expenses and recognized as expense as the related goods are delivered or the related services are performed.

Net Loss Per Share

Basic net loss per share is calculated based on the weighted-average number of common shares outstanding during the periods presented. For all periods presented in the Consolidated Statements of Operations, the net loss

[Table of Contents](#)

available to common stockholders is equal to the reported net loss. Basic and diluted net loss per share are the same due to our historical net losses and the requirement to exclude potentially dilutive securities which would have an anti-dilutive effect on net loss per share. The weighted average of these potentially dilutive securities has been excluded from the diluted net loss per share calculation and is as follows (in thousands):

	Year Ended December 31,		
	2012	2011	2010
Stock options	13,970	11,338	9,338
Convertible subordinated notes	—	9,989	9,989
Total	<u>13,970</u>	<u>21,327</u>	<u>19,327</u>

Income Taxes

We account for income taxes under the liability method. Under this method, deferred tax assets and liabilities are determined based on differences between the financial reporting and tax reporting bases of assets and liabilities and are measured using enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse. Realization of deferred tax assets is dependent upon future earnings, the timing and amount of which are uncertain. We record a valuation allowance against deferred tax assets to reduce their carrying value to an amount that is more likely than not to be realized. When we establish or reduce the valuation allowance related to the deferred tax assets, our provision for income taxes will increase or decrease, respectively, in the period such determination is made.

We utilize a two-step approach to recognize and measure uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained upon tax authority examination, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement.

Comprehensive loss

Comprehensive loss is the change in stockholders' equity from transactions and other events and circumstances other than those resulting from investments by stockholders and distributions to stockholders. Our other comprehensive income (loss) is comprised of net loss, gains and losses from the foreign currency translation of the assets and liabilities of our India and UK subsidiaries, and unrealized gains and losses on investments.

Recent Accounting Pronouncements

On January 1, 2012, we were required to adopt new accounting guidance related to the presentation of comprehensive income that prohibits the presentation of other comprehensive income (OCI) in the statement of stockholders' equity and instead, provides the option of presenting OCI in a continuous statement of comprehensive income or as two separate consecutive statements. We elected to present OCI in two separate consecutive statements.

Note 2 — Cash, Cash Equivalents, and Available-For-Sale Investments

Cash, cash equivalents, and available-for-sale investments are as follows (in thousands):

	Estimated Fair Value at	
	December 31, 2012	December 31, 2011
Cash and cash equivalents	\$ 25,437	\$ 15,312
Short-term investments	251,757	225,856
Long-term investments	—	173,768
Restricted cash	25,000	—
Total cash, cash equivalents, and available-for-sale investments	<u>\$ 302,194</u>	<u>\$ 414,936</u>

[Table of Contents](#)

Included in our restricted cash balance on our Consolidated Balance Sheet at December 31, 2012 is \$25.0 million of restricted cash required to be maintained until July 1, 2017 under the terms of our senior secured notes issued in July 2012. At December 31, 2012 and 2011, we had letter of credit arrangements in favor of a landlord and certain vendors totaling \$2.4 million. These letters of credit are secured by investments of similar amounts.

Our portfolio of cash, cash equivalents, and available-for-sale investments includes (in thousands):

	Estimated Fair Value at	
	December 31, 2012	December 31, 2011
Corporate notes and bonds	\$ 241,158	\$ 344,427
U.S. corporate commercial paper	3,990	9,464
Obligations of U.S. government agencies	6,108	44,230
Obligations of U.S. states and municipalities	1,504	1,503
Available-for-sale investments	252,760	399,624
Cash and money market funds, including restricted cash	49,434	15,312
Total cash, cash equivalents, and available-for-sale investments	\$ 302,194	\$ 414,936

The following table summarizes our portfolio of available-for-sale investments reported as short-term and long-term investments by contractual maturity (in thousands):

	Estimated Fair Value at	
	December 31, 2012	December 31, 2011
Less than one year	\$ 251,757	\$ 213,386
Greater than one year but less than two years	—	186,238
Total available-for-sale investments	\$ 251,757	\$ 399,624

We invest in liquid, high quality debt securities. Our investments in debt securities are subject to interest rate risk. To minimize the exposure due to an adverse shift in interest rates, we invest in securities with maturities of two years or less and maintain a weighted average maturity of one year or less.

Gross unrealized gains and losses were not significant at December 31, 2012 and 2011. During the years ended December 31, 2012, 2011, and 2010, we sold available-for-sale securities totaling \$5.4 million, \$210.1 million and \$15.5 million, respectively, and realized gains and losses were not significant in any of those periods.

All of our investments are categorized as Level 1 or Level 2, as explained in the table below. During the years ended December 31, 2012, 2011, and 2010, there were no transfers between Level 1 and Level 2 of the fair value hierarchy. The following table represents the fair value hierarchy for our financial assets measured at fair value on a recurring basis as of December 31, 2012 and 2011 (in thousands):

<u>As of December 31, 2012:</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Money market funds	\$22,487	\$ —	\$ —	\$ 22,487
U.S. corporate commercial paper	—	3,990	—	3,990
Corporate notes and bonds	—	241,158	—	241,158
Obligations of U.S. government agencies	—	6,108	—	6,108
Obligations of U.S. states and municipalities	—	1,504	—	1,504
Cash equivalents and available-for-sale investments	\$22,487	\$252,760	\$ —	\$275,247
Cash, including restricted cash				26,947
Cash, cash equivalents, and available-for-sale investments				<u>\$302,194</u>

Table of Contents

As of December 31, 2011:	Level 1	Level 2	Level 3	Total
Money market funds	\$13,950	\$ —	\$ —	\$ 13,950
U.S. corporate commercial paper	—	9,464	—	9,464
Corporate notes and bonds	—	344,427	—	344,427
Obligations of U.S. government agencies	—	44,230	—	44,230
Obligations of U.S. states and municipalities	—	1,503	—	1,503
Cash equivalents and available-for-sale investments	\$13,950	\$399,624	\$ —	\$413,574
Cash				1,362
Cash, cash equivalents, and available-for-sale investments				\$414,936

Level 1 — Quoted prices in active markets for identical assets or liabilities.

Level 2 — Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Note 3 — Inventory

Inventory consists of the following (in thousands):

	December 31,	
	2012	2011
Raw materials	\$ 7,489	\$ 6,660
Work-in-process	6,661	4,313
Finished goods	4,119	1,683
Inventory	\$18,269	\$12,656

Note 4 — Property and Equipment

Property and equipment consist of the following (in thousands):

	December 31,	
	2012	2011
Building and leasehold improvements	\$ 72,180	\$ 72,473
Laboratory equipment	27,145	26,290
Manufacturing equipment	20,877	19,550
Furniture, fixtures and other equipment	21,914	20,750
Depreciable property and equipment at cost	142,116	139,063
Less: accumulated depreciation	(72,666)	(62,237)
Depreciable property and equipment, net	69,450	76,826
Construction-in-progress	2,765	1,750
Property and equipment, net	\$ 72,215	\$ 78,576

Building and leasehold improvements include our manufacturing, research and development and administrative facilities and the related improvements to these facilities. Laboratory and manufacturing equipment include assets that support both our manufacturing and research and development efforts. Construction-in-progress includes assets being built to enhance our manufacturing and research and development efforts. Property and equipment includes certain assets acquired through capital leases (See Note 6).

[Table of Contents](#)

In July 2012, we consolidated our U.S.-based research activities into our existing San Francisco facility and ceased use of one of our buildings located in Huntsville, Alabama that was dedicated to research activities. The announcement of this consolidation plan in March 2012 triggered the recognition of a \$1.7 million impairment charge relating to these assets (see Note 11).

Depreciation expense, including depreciation of assets acquired through capital leases, for the years ended December 31, 2012, 2011, and 2010 was \$13.8 million, \$15.0 million, and \$14.8 million, respectively.

Note 5 — Senior Secured Notes and Convertible Subordinated Notes

The outstanding balances of our senior secured notes and our convertible subordinated notes are as follows (in thousands):

	Semi-Annual Interest Payment Dates	December 31,	
		2012	2011
12% Senior Secured Notes due July 2017	January 15, July 15	\$ 125,000	\$ —
3.25% Convertible Subordinated Notes due September 2012	March 28, September 28	\$ —	\$ 214,955

On July 11, 2012, we issued \$125.0 million in aggregate principal amount of senior secured notes (Senior Notes) with the entire principal amount due on July 15, 2017. The Senior Notes bear interest at 12.0% per annum payable in cash semi-annually in arrears on January 15 and July 15 of each year, beginning January 15, 2013. The Senior Notes are secured by a first-priority lien on substantially all of our assets. In connection with this transaction, we retired \$42.5 million of principal amount of our convertible subordinated notes in exchange for the same principal amount of Senior Notes and received the remaining proceeds in cash, less approximately \$4.5 million in transaction costs. Given that the Senior Notes were recently issued in July 2012, we believe the carrying amount of the Senior Notes is consistent with its fair value at December 31, 2012.

The Senior Notes contain customary covenants, including covenants that limit or restrict our ability to incur liens, incur indebtedness, and make certain restricted payments, but do not contain covenants related to future financial performance. In particular, \$25.0 million of the proceeds is required to be maintained in a restricted account until July 1, 2015 and which is included in restricted cash. The Senior Notes are callable by us at any time, subject to certain prepayment premiums and conditions. If we experience certain change of control events, the holders of the Senior Notes will have the right to require us to purchase all or a portion of the Senior Notes at a purchase price in cash equal to 101% of the principal amount thereof, plus accrued and unpaid interest to the date of purchase. In addition, upon certain asset sales, we may be required to offer to use the net proceeds thereof to purchase some of the Senior Notes at 100% of the principal amount thereof, plus accrued and unpaid interest to the date of purchase.

We used the proceeds from the issuance of the Senior Notes and our existing cash to repay the remaining \$172.4 million in principal amount of our convertible subordinated notes in full at maturity on September 28, 2012.

[Table of Contents](#)**Note 6 — Leases****Capital Leases**

We lease office space and certain office equipment under capital lease arrangements. The gross carrying value by major asset class and accumulated depreciation as of December 31, 2012 and 2011 are as follows (in thousands):

	December 31,	
	2012	2011
Building and leasehold improvements	\$ 2,117	\$ 2,117
Furniture, fixtures and other equipment	195	195
Total assets recorded under capital leases	2,312	2,312
Less: accumulated depreciation	(882)	(464)
Net assets recorded under capital leases	<u>\$ 1,430</u>	<u>\$ 1,848</u>

We lease office space at 201 Industrial Road in San Carlos, California under capital lease arrangements. Under the terms of the lease, rent increases up to 3% annually and the lease termination date is October 5, 2016. As of November 29, 2010, we ceased use of this space as a result of the relocation of our San Carlos operations and corporate headquarters to San Francisco, California. We have subleased portions of the San Carlos facility and are currently seeking one or more subtenants for the remaining space, but have not been relieved of any obligations under the terms of this lease. As a result of our relocation, an impairment test was performed for the building and related leasehold improvements located in San Carlos. As a result of this impairment test, we recorded an impairment charge of \$12.6 million in November 2010 (see Note 11).

Future minimum payments for our capital leases at December 31, 2012 are as follows (in thousands):

Years ending December 31,	
2013	\$ 5,129
2014	5,191
2015	5,280
2016	4,034
Total minimum payments required	\$19,634
Less: amount representing interest	(5,057)
Present value of future minimum lease payments	\$14,577
Less: current portion	(2,970)
Capital lease obligation, less current portion	<u>\$ 11,607</u>

Operating Lease

On September 30, 2009, we entered into an operating sublease (Sublease) with Pfizer, Inc. for a 102,283 square foot facility located in San Francisco, California (Mission Bay Facility). Upon completion of construction of the Mission Bay Facility, we moved in on November 29, 2010. The Mission Bay Facility includes a research and development center with biology, chemistry, pharmacology, and clinical development capabilities, as well as all of the functions previously located in San Carlos, California, including our corporate headquarters.

Under the terms of the Sublease, we will begin making non-cancelable lease payments in 2014, after the expiration of our free rent period on August 1, 2014. The Sublease term is 114 months, commencing in August 2010 and terminating on January 31, 2020. Monthly base rent will start at \$2.95 per square foot and will escalate over the term of the sublease at various intervals to \$3.42 per square foot in the final period of the Sublease term.

[Table of Contents](#)

Rent expense is being recognized ratably from April 2010, the inception of our tenant improvement construction period, through the end of the Sublease term. In addition, throughout the term of the Sublease, we are responsible for paying certain costs and expenses specified in the Sublease, including insurance costs and a pro rata share of operating expenses and applicable taxes for the Mission Bay Facility.

On December 28, 2011, we amended the Sublease to include an additional 24,002 square feet of space. The amendment term commenced on December 28, 2011 and ends on January 31, 2020. However, we retain the right to terminate the amendment on or prior to May 31, 2013. Under the terms of the amendment, beginning January 1, 2012, we began making lease payments of \$40,000 per month which will continue until the termination option expires.

Our future minimum lease payments for our operating lease at December 31, 2012 are as follows (in thousands):

Years ending December 31,	
2013	\$ 200
2014	1,509
2015	3,667
2016	3,777
2017	3,888
2018 and thereafter	8,479
Total future minimum lease payments	<u>\$21,520</u>

We recognize rent expense on a straight-line basis over the lease period. For the years ended December 31, 2012, 2011, and 2010, rent expense for all our operating leases, including our Mission Bay Facility, was approximately \$2.8 million, \$2.4 million, and \$2.2 million, respectively.

Note 7 — Liability Related to Sale of Future Royalties

On February 24, 2012, we entered into a Purchase and Sale Agreement (the Purchase and Sale Agreement) with RPI Finance Trust (RPI), an affiliate of Royalty Pharma, pursuant to which we sold, and RPI purchased, our right to receive royalty payments (the Royalty Entitlement) arising from the worldwide net sales, from and after January 1, 2012, of (a) CIMZIA[®], under Nektar's license, manufacturing and supply agreement with UCB Pharma (UCB), and (b) MIRCERA[®], under Nektar's license, manufacturing and supply agreement with F. Hoffmann-La Roche Ltd and Hoffmann-La Roche Inc. (together referred to as Roche). We received aggregate cash proceeds for the Royalty Entitlement of \$124.0 million. As part of this sale, we incurred approximately \$4.4 million in transaction costs, which will be amortized to interest expense over the estimated life of the Purchase and Sale Agreement. As a result of our ongoing manufacturing and supply obligations related to the generation of these royalties, although we sold all of our rights to receive royalties from the CIMZIA[®] and MIRCERA[®] products, we will continue to account for these royalties as revenue and recorded the \$124.0 million in proceeds from this transaction as a liability (Royalty Obligation) that will be amortized using the interest method over the estimated life of the Purchase and Sale Agreement.

The following table shows the activity within the liability account during the year ended December 31, 2012 (in thousands):

Liability related to sale of future royalties—beginning balance	\$ —
Proceeds from sale of future royalties	124,000
Non-cash interest expense recognized during 2012	18,057
CIMZIA [®] and MIRCERA [®] royalties paid to RPI during 2012	<u>(10,791)</u>
Total liability related to sale of future royalties as of	
December 31, 2012	131,266
Less: current portion	<u>(3,000)</u>
Liability related to sale of future royalties, less current portion	<u>\$128,266</u>

[Table of Contents](#)

As a result of this liability accounting, even though the royalties from UCB and Roche are remitted directly to RPI which started in the second quarter of 2012 for royalties arising from product sales in the first quarter of 2012, we will continue to recognize revenue for these royalties. We recognize royalties from net sales of CIMZIA® and MIRCERA® upon notification of the actual royalty amount, which occurs in the quarter after such sales are made. During the year ended December 31, 2012, we recognized \$13.5 million in aggregate royalties from net sales of CIMZIA® and MIRCERA®, of which the \$2.7 million recognized in the three months ended March 31, 2012 was retained by us as these amounts resulted from royalties on product sales in the fourth quarter of 2011 and the \$10.8 million recognized in the nine month period ended December 31, 2012 was remitted by UCB and Roche directly to RPI as these amounts resulted from product sales in the first three quarters of 2012.

As royalties are remitted to RPI from Roche and UCB, the balance of the Royalty Obligation will be effectively repaid over the life of the agreement. In order to determine the amortization of the Royalty Obligation, we are required to estimate the total amount of future royalty payments to be received by RPI and payments we are required to make to RPI as noted below, if any, over the life of the agreement. The sum of these amounts less the \$124.0 million proceeds we received will be recorded as interest expense over the life of the Royalty Obligation. Since inception, our estimate of this total interest expense resulted in an effective annual interest rate of approximately 17%. We will periodically assess the estimated royalty payments to RPI from UCB and Roche and to the extent such payments are greater or less than our initial estimates, or the timing of such payments is materially different than our original estimates, we will prospectively adjust the amortization of the Royalty Obligation. There are a number of factors that could materially affect the amount and timing of royalty payments from CIMZIA® and MIRCERA®, most of which are not within our control. Such factors include, but are not limited to, changing standards of care, the introduction of competing products, manufacturing or other delays, biosimilar competition, intellectual property matters, adverse events that result in governmental health authority imposed restrictions on the use of the drug products, and other events or circumstances that could result in reduced royalty payments from CIMZIA® and MIRCERA®, all of which would result in a reduction of non-cash royalty revenues and the non-cash interest expense over the life of the Royalty Obligation. Conversely, if sales of CIMZIA® and MIRCERA® are more than expected, the non-cash royalty revenues and the non-cash interest expense recorded by us would be greater over the term of the Royalty Obligation.

Pursuant to the Purchase and Sale Agreement, we are required to pay to RPI (a) \$3.0 million if certain worldwide net sales thresholds of MIRCERA® for the 12 month period ending on December 31, 2012 are not achieved and (b) up to an additional \$7.0 million if certain worldwide net sales thresholds of MIRCERA® for the 12 month period ending on December 31, 2013 are not achieved. The Purchase and Sale Agreement grants RPI the right to receive certain reports and other information relating to the Royalty Entitlement and contains other representations and warranties, covenants and indemnification obligations that are customary for a transaction of this nature. In particular, if we breach our obligations under the Purchase and Sale Agreement, we could be required to pay damages to RPI that are not limited to the purchase price we received in the sale transaction. As of December 31, 2012, we have concluded that it is probable that the minimum 2012 MIRCERA® net sales threshold will not be met and, therefore, we expect to make the \$3.0 million payment to RPI described above in the first quarter of 2013. The liability for this expected \$3.0 million payment is included in other current liabilities on our Consolidated Balance Sheet at December 31, 2012.

Note 8 — Commitments and Contingencies

Royalty Expense

We have third party licenses that require us to pay royalties based on our shipment of certain products and/or on our receipt of royalty payments under certain of our collaboration agreements. Royalty expense, which is reflected in cost of goods sold in our Consolidated Statements of Operations, was approximately \$2.9 million, \$1.8 million, and \$2.2 million for the years ended December 31, 2012, 2011, and 2010, respectively. The overall maximum amount of these obligations is based upon sales of the applicable products by our collaboration partners and cannot be reasonably estimated.

[Table of Contents](#)

Purchase Commitments

In the normal course of business we enter into various firm purchase commitments related to contract manufacturing, clinical development and certain other items. As of December 31, 2012, these commitments were approximately \$14.6 million, all of which are expected to be paid in 2013.

Legal Matters

From time to time, we are involved in lawsuits, arbitrations, claims, investigations and proceedings, consisting of intellectual property, commercial, employment and other matters, which arise in the ordinary course of business. We make provisions for liabilities when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Such provisions are reviewed at least quarterly and adjusted to reflect the impact of settlement negotiations, judicial and administrative rulings, advice of legal counsel, and other information and events pertaining to a particular case. Litigation is inherently unpredictable. If any unfavorable ruling were to occur in any specific period, there exists the possibility of a material adverse impact on the results of operations of that period or on our cash flows and liquidity.

On November 18, 2009, the Research Foundation of the State University of New York (SUNY) filed an action against Nektar in the United States District Court for the Northern District of New York. SUNY seeks to recover amounts it alleges it is owed pursuant to a technology licensing contract between Nektar and SUNY. We dispute SUNY's claims. Discovery in the matter has closed and cross motions for summary judgment (including Nektar's motion for summary judgment dismissing the action) were filed in October 2012. The motions are fully briefed and are currently being considered by the court. In the event the action survives Nektar's motion, we expect that a trial would be scheduled in the first half of 2013. We believe that SUNY's claims are without merit. No reasonable estimate of the possible loss or range of loss can be made at this time and no liabilities have been recorded for this matter on our Consolidated Balance Sheets as of December 31, 2012 or 2011.

Indemnifications in Connection with Commercial Agreements

As part of our collaboration agreements with our partners related to the license, development, manufacture and supply of drugs based on our proprietary technologies, we generally agree to defend, indemnify and hold harmless our partners from and against third party liabilities arising out of the agreement, including product liability (with respect to our activities) and infringement of intellectual property to the extent the intellectual property is developed by us and licensed to our partners. The term of these indemnification obligations is generally perpetual any time after execution of the agreement. There is generally no limitation on the potential amount of future payments we could be required to make under these indemnification obligations.

As part of the sale of our royalty interest in the CIMZIA® and MIRCERA® products, we and RPI made representations and warranties and entered into certain covenants and ancillary agreements which are supported by indemnity obligations. Additionally, as part of our pulmonary asset sale to Novartis, we and Novartis made representations and warranties and entered into certain covenants and ancillary agreements which are supported by an indemnity obligation. In the event it is determined that we breached certain of the representations and warranties or covenants and agreements made by us in any such agreements, we could incur substantial indemnification liabilities depending on the timing, nature, and amount of any such claims.

To date we have not incurred costs to defend lawsuits or settle claims related to these indemnification obligations. If any of our indemnification obligations is triggered, we may incur substantial liabilities. Because the aggregate amount of any potential indemnification obligation is not a stated amount, the overall maximum amount of any such obligations cannot be reasonably estimated. No liabilities have been recorded for these obligations on our Consolidated Balance Sheets as of December 31, 2012 or 2011.

Indemnification of Underwriters and Initial Purchasers of our Securities

In connection with our sale of equity and senior secured debt securities, we have agreed to defend, indemnify and hold harmless our underwriters or initial purchasers, as applicable, as well as certain related parties from and against certain liabilities, including liabilities under the Securities Act of 1933, as amended. The term of these indemnification obligations is generally perpetual. There is no limitation on the potential amount of future payments we could be required to make under these indemnification obligations. We have never incurred costs to defend lawsuits or settle claims related to these indemnification obligations. If any of our indemnification obligations are triggered, however, we may incur substantial liabilities. Because the obligated amount of this agreement is not explicitly stated, the overall maximum amount of the obligations cannot be reasonably estimated. Historically, we have not been obligated to make significant payments for these obligations, and no liabilities have been recorded for these obligations in our Consolidated Balance Sheets as of December 31, 2012 or 2011.

Director and Officer Indemnifications

As permitted under Delaware law, and as set forth in our Certificate of Incorporation and our Bylaws, we indemnify our directors, executive officers, other officers, employees, and other agents for certain events or occurrences that may arise while in such capacity. The maximum potential amount of future payments we could be required to make under this indemnification is unlimited; however, we have insurance policies that may limit our exposure and may enable us to recover a portion of any future amounts paid. Assuming the applicability of coverage, the willingness of the insurer to assume coverage, and subject to certain retention, loss limits and other policy provisions, we believe any obligations under this indemnification would not be material, other than an initial \$500,000 per incident for securities related claims and \$150,000 per incident for non-securities related claims retention deductible per our insurance policy. However, no assurances can be given that the covering insurers will not attempt to dispute the validity, applicability, or amount of coverage without expensive litigation against these insurers, in which case we may incur substantial liabilities as a result of these indemnification obligations. Because the obligated amount of this agreement is not explicitly stated, the overall maximum amount of the indemnification obligations cannot be reasonably estimated. Historically, we have not been obligated to make significant payments for these obligations, and no liabilities have been recorded for these obligations in our Consolidated Balance Sheets as of December 31, 2012 or 2011.

Note 9 — Stockholders' Equity

Preferred Stock

We have authorized 10,000,000 shares of Preferred Stock with each share having a par value of \$0.0001. In 2011, 3,100,000 shares were previously designated Series A Junior Participating Preferred Stock (Series A Preferred Stock) in connection with our Share Purchase Rights Plan (Rights Plan) that expired on June 1, 2011. On March 30, 2012, we filed a certificate of elimination of the Series A Preferred Stock. As of December 31, 2012, no shares are designated, issued or outstanding.

Common Stock

On January 24, 2011, we completed the issuance and sale of 19,000,000 shares of our common stock for gross proceeds to the Company of approximately \$220.4 million. Additionally, we incurred approximately \$0.6 million in legal and accounting fees, filing fees, and other offering expenses.

[Table of Contents](#)

Equity Compensation Plans

At December 31, 2012, we had 29,915,641 reserved shares of common stock, all of which are reserved for issuance in our equity compensation plans as summarized in the following table (share number in thousands):

<u>Plan Category</u>	<u>Number of Securities to be Issued Upon Exercise of Outstanding Options & Vesting of RSUs</u> (a)	<u>Weighted-Average Exercise Price of Outstanding Options</u> (b)	<u>Number of Securities Remaining Available for Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column(a))</u> (c)
Equity compensation plans approved by security holders(1)	12,292	\$ 8.66	10,800
Equity compensation plans not approved by security holders	6,824	\$ 9.71	—
Total	19,116	\$ 9.03	10,800

(1) Includes shares of common stock available for future issuance under our ESPP as of December 31, 2012.

2012 Performance Incentive Plan

Our 2012 Performance Incentive Plan (2012 Plan) was adopted by the Board of Directors on April 4, 2012 and was approved by our stockholders on June 28, 2012. On the date of approval, any shares of the company's common stock that were available for issuance under all other previously existing stock plans (the 2008 Equity Incentive Plan, the 2000 Equity Incentive Plan, and the 2000 Non-Officer Equity Incentive Plan) became available for issuance under the 2012 Plan. In addition, 5,300,000 new shares were made available for award grants under the 2012 Plan. No new awards were granted under any of the previous stock plans after June 28, 2012. Any shares of common stock subject to outstanding awards under the previous stock plans that expire, are cancelled, or otherwise terminate at any time after December 31, 2011 will also be available for award grant purposes under the 2012 Plan.

The purpose of the 2012 Plan and our other incentive plans is to attract, motivate, retain, and reward directors, officers, employees, and other eligible persons through the grant of awards and incentives for high levels of individual performance and increasing the value of our business, as well as to further align the interests of award recipients and our stockholders. The 2012 Plan authorizes stock options, stock appreciation rights, restricted stock, performance stock, stock units, stock bonuses, dividend equivalents, other similar rights to purchase or acquire shares, and other forms of awards granted or denominated in the company's common stock or units of the company's common stock, as well as cash bonus awards. Directors, officers, or employees, and certain consultants and advisors may receive awards under the 2012 Plan. In 2012, the requisite service period for stock options granted to our employees under the 2012 Plan as well as all other previously existing stock plans was generally four years; the requisite service period for stock options granted to our directors was generally one year.

The maximum number of shares of our common stock that may be issued or transferred pursuant to awards under the 2012 Plan is 10,347,140 shares, plus any shares subject to outstanding awards under the previous stock plans that expire, are cancelled, or otherwise terminate for any reason. Generally, shares that are subject to or underlie awards which expire or for any reason are cancelled or terminated, are forfeited, fail to vest, or for any other reason (except for shares exchanged by a participant or withheld to pay the exercise price of an award granted and related tax withholding obligations) are not paid or delivered under the 2012 Plan will again be available for subsequent awards under the 2012 Plan. Shares issued in respect of any award, other than a stock option or stock appreciation right, granted under the 2012 Plan will be counted against the plan's share limit as 1.5 shares for every one share actually issued in connection with the award.

The 2012 Plan will terminate on April 3, 2022, unless earlier terminated by the Board of Directors. The maximum term of a stock option or stock appreciation right under the 2012 Plan is eight years from the date of grant. The per share exercise price of an option generally may not be less than the fair market value of a share of the company's common stock on the Nasdaq Global Select Market on the date of grant.

[Table of Contents](#)

2008 Equity Incentive Plan

Our 2008 Equity Incentive Plan (2008 Plan) was adopted by the Board of Directors on March 20, 2008 and was approved by our stockholders on June 6, 2008. However, with the approval of the 2012 Plan, no new awards will be granted under the 2008 Plan. Pursuant to the 2008 Plan, we granted or issued incentive stock options to employees and officers and non-qualified stock options, rights to acquire restricted stock, restricted stock units, and stock bonuses to consultants, employees, officers and non-employee directors.

The 2008 Plan will terminate on March 20, 2018, unless earlier terminated by the Board of Directors. The maximum term of a stock option under the 2008 Equity Incentive Plan is eight years. The exercise price of stock options granted under the 2008 Plan must be at least equal to 100% (or 110% with respect to holders of more than 10% of the voting power of our outstanding capital stock) of the fair market value of the stock subject to the option as determined by the closing price of our common stock on the Nasdaq Global Select Market on the date of grant.

2000 Equity Incentive Plan

On April 19, 2000, our Board of Directors adopted the 2000 Equity Incentive Plan (2000 Plan) by amending and restating our 1994 Equity Incentive Plan. On February 9, 2010, the 2000 Plan expired. As a result, no new options may be granted, but existing options granted remain outstanding. Pursuant to the 2000 Plan, we granted or issued incentive stock options to employees and officers and non-qualified stock options, rights to acquire restricted stock, restricted stock units, and stock bonuses to consultants, employees, officers and non-employee directors.

The maximum term of a stock option under the 2000 Plan is eight years. The exercise price of incentive stock options granted under the 2000 Equity Incentive Plan must be at least equal to 100% (or 110% with respect to holders of more than 10% of the voting power of our outstanding capital stock) of the fair market value of the stock subject to the option as determined by the closing price of our common stock on the Nasdaq Global Market on the date of grant.

2000 Non-Officer Equity Incentive Plan

The 1998 Non-Officer Equity Incentive Plan was adopted by our Board of Directors on August 18, 1998, and was amended and restated in its entirety and renamed the 2000 Non-officer Equity Incentive Plan on June 6, 2000 (2000 Non-Officer Plan). However, with the approval of the 2012 Plan, no new awards will be granted under the 2000 Non-Officer Plan. Pursuant to the 2000 Non-Officer Plan, we granted or issued non-qualified stock options, rights to acquire restricted stock and stock bonuses to employees and consultants who are neither officers nor directors of Nektar.

The maximum term of a stock option under the 2000 Non-Officer Plan is eight years. The exercise price of stock options granted under the 2000 Non-Officer Plan was determined by our Board of Directors by reference to the closing price of our common stock on the Nasdaq Global Market on the date of grant.

Restricted Stock Units

RSU awards have been granted under the 2008 Plan, the 2000 Plan and the 2000 Non-Officer Plan and are settled by delivery of shares of our common stock on or shortly after the date the awards vest. During the year ended December 31, 2010, we granted RSU awards to certain officers, non-employee directors, employees and consultants. We did not grant any RSU awards during the years ended December 31, 2012 or 2011. RSU awards are similar to restricted stock in that they are issued for no consideration; however, the holder generally is not entitled to the underlying shares of common stock until the RSU award vests. Also, because the RSU awards are granted for \$0.01 per share, the grant-date fair value of the award is equal to the intrinsic value of our common stock on the date of grant.

[Table of Contents](#)

Beginning with shares granted during 2005, each RSU award depletes the pool of options available for grant under our equity incentive plans by a ratio of 1:1.5.

Employee Stock Purchase Plan

In February 1994, our Board of Directors adopted the Employee Stock Purchase Plan (ESPP) pursuant to section 423(b) of the Internal Revenue Code of 1986. Under the ESPP, 1,500,000 shares of our common stock have been authorized for issuance. The terms of the ESPP provide eligible employees with the opportunity to acquire an ownership interest in Nektar through participation in a program of periodic payroll deductions for the purchase of our common stock. Employees may elect to enroll or re-enroll in the ESPP on a semi-annual basis. Stock is purchased at 85% of the lower of the closing price on the first day of the enrollment period or the last day of the enrollment period.

401(k) Retirement Plan

We sponsor a 401(k) retirement plan whereby eligible employees may elect to contribute up to the lesser of 60% of their annual compensation or the statutorily prescribed annual limit allowable under Internal Revenue Service regulations. The 401(k) plan permits us to make matching contributions on behalf of all participants, up to a maximum of \$3,000 per participant. For the years ended December 31, 2012, 2011, and 2010, we recognized \$0.9 million, \$0.9 million, and \$1.0 million, respectively, of compensation expense in connection with our 401(k) retirement plan.

Change in Control Severance Plan

On December 6, 2006, our Board of Directors approved a Change of Control Severance Benefit Plan (CIC Plan). This CIC Plan has subsequently been amended a number of times by our Board of Directors with the most recent amendment occurring on April 5, 2011. The CIC Plan is designed to make certain benefits available to our eligible employees in the event of a change of control of Nektar and, following such change of control, an employee's employment with us or a successor company is terminated in certain specified circumstances. We adopted the CIC Plan to support the continuity of the business in the context of a change of control transaction. The CIC Plan was not adopted in contemplation of any specific change of control transaction.

Under the CIC Plan, in the event of a change of control of Nektar and a subsequent termination of employment initiated by us or a successor company other than for Cause (as defined in the CIC Plan) or initiated by the employee for a Good Reason Resignation (as defined in the CIC Plan) in each case within twelve months following a change of control transaction, (i) the Chief Executive Officer would be entitled to receive cash severance pay equal to 24 months base salary plus annual target incentive pay, the extension of employee benefits over this severance period and the full acceleration of unvested outstanding equity awards, and (ii) our Senior Vice Presidents and Vice Presidents (including Principal Fellows) would each be entitled to receive cash severance pay equal to twelve months base salary plus annual target incentive pay, the extension of employee benefits over this severance period and the full acceleration of unvested outstanding equity awards. In the event of a change of control of Nektar and a subsequent termination of employment initiated by the Company or a successor company other than for Cause within twelve months following a change of control transaction, all other employees would each be entitled to receive cash severance pay equal to 6 months base salary plus a pro-rata portion of annual target incentive pay, the extension of employee benefits over this severance period and the full acceleration of each such employee's unvested outstanding equity awards. Under the CIC Plan, as amended, non-employee directors would also be entitled to full acceleration of vesting of all outstanding stock awards in the event of a change of control transaction.

Note 10 — License and Collaboration Agreements

We have entered into various license agreements and collaborative research, development and commercialization agreements with pharmaceutical and biotechnology companies. Under these arrangements, we are entitled to receive license fees, upfront payments, milestone payments, royalties, sales milestones, payment for the manufacture and supply of our proprietary PEGylation materials and/or reimbursement for research and development activities. All of our collaboration agreements are generally cancelable by our partners without significant financial penalty. Our costs of performing these services are generally included in research and development expense, however, costs for product sales to our collaboration partners are included in cost of goods sold.

In accordance with these agreements, we recognized license, collaboration and other revenue as follows (in thousands):

Partner	Agreement	Year Ended December 31,		
		2012	2011	2010
Roche	PEGASYS® and MIRCERA®	\$ 7,146	\$ 5,131	\$ 5,131
Baxter Healthcare	Hemophilia	6,238	5,646	1,701
Amgen, Inc.	Neulasta®	5,000	5,000	833
Bayer Healthcare LLC	BAY41-6551 (Amikacin Inhale)	2,971	2,992	3,300
Affymax, Inc.	OMONTYS®	2,829	3,838	1,867
AstraZeneca AB	Naloxegol (NKTR-118) and naloxegol fixed-dose combination program (NKTR-119)	59	2,496	107,854
Other		5,884	11,186	3,686
License, collaboration and other revenue		<u>\$30,127</u>	<u>\$36,289</u>	<u>\$124,372</u>

As of December 31, 2012, our collaboration agreements with partners included potential future payments for development milestones totaling approximately \$161.1 million, including amounts from our agreements with Baxter and Bayer described below. In addition, we are entitled to receive up to \$235.0 million and \$75.0 million of contingent payments related to NKTR-118 and NKTR-119, respectively, based on development and regulatory events to be pursued and completed solely by AstraZeneca.

Roche: PEGASYS® and MIRCERA®

In February 1997, we entered into a license, manufacturing and supply agreement with Roche, under which we granted Roche a worldwide, exclusive license to certain intellectual property related to our proprietary PEGylation materials used in the manufacture and commercialization of PEGASYS®. As a result of Roche exercising a license extension option in December 2009, Roche has the right to manufacture all of its requirements for our proprietary PEGylation materials for PEGASYS® and we perform additional manufacturing, if any, only on an as-requested basis. In connection with Roche's exercise of the license extension option in December 2009, we received a payment of \$31.0 million. As of December 31, 2012, we have deferred revenue of approximately \$15.4 million related to this agreement, which we expect to recognize through December 2015, the period through which we are required to provide back-up manufacturing and supply services related to PEGASYS®.

In February 2012, we entered into a toll-manufacturing agreement with Roche under which we will manufacture the proprietary PEGylation material used by Roche to produce MIRCERA®. Roche entered into the toll-manufacturing agreement with the objective of establishing us as a secondary back-up source on a non-exclusive basis. Under the terms of the toll-manufacturing agreement, Roche paid us an upfront payment of \$5.0 million and will pay a total of up to \$22.0 million in performance-based milestone payments upon our

[Table of Contents](#)

achievement of certain manufacturing readiness, validation and production milestones, including the delivery of specified quantities of PEGylation materials, all of which were completed as of January 2013. Roche will also pay us additional consideration for any future orders of the PEGylation materials for MIRCERA® beyond the initial quantities manufactured through January 2013. Roche may terminate the toll-manufacturing agreement due to an uncured material default by us. As of December 31, 2012, we have received \$16.0 million in upfront and milestone payments under this agreement. We achieved the remaining \$11.0 million milestone in January 2013.

We analyzed the milestone payments under the agreement and determined that they did not meet the criteria for revenue recognition under the milestone method as a result of our continuing manufacturing obligations. We have identified our back-up manufacturing obligation through December 2016 and the delivery of PEGylation materials specified in the agreement in 2012 and early 2013 as the units of accounting in the arrangement. We made our best estimate of the selling prices for these deliverables and have allocated the expected \$27.0 million consideration to these items based on the relative selling price method. As of December 31, 2012, we have recognized revenue of \$3.0 million related to this agreement. As of December 31, 2012, we have deferred revenue of approximately \$13.0 million, which we expect to recognize through December 2016, the estimated end of our obligations under this agreement.

Baxter Healthcare: Hemophilia

In September 2005, we entered into an exclusive research, development, license and manufacturing and supply agreement with Baxter Healthcare SA and Baxter Healthcare Corporation (together referred to as Baxter) to develop products designed to improve therapies for Hemophilia A patients using our PEGylation technology. In December 2007, we expanded our agreement with Baxter to include the license of our PEGylation technology with the potential to improve any future products Baxter may develop for Hemophilia B patients. Under the terms of the agreement, we are entitled to research and development funding and are responsible for supplying Baxter with its requirements for our proprietary materials. Baxter is responsible for all clinical development, regulatory, and commercialization expenses. The agreement is terminable by the parties under customary conditions.

We are entitled to up to \$28.0 million of development milestones related to Hemophilia A upon achievement of certain development objectives, as well as sales milestones upon achievement of annual sales targets and royalties based on annual worldwide net sales of products resulting from this agreement. This Hemophilia A program includes BAX-855, which is currently in a Phase 3 clinical study initiated in February 2013. In prior years, we received an upfront payment of \$4.0 million related to the Hemophilia A programs. As of December 31, 2012, we have deferred revenue of \$1.3 million, which we expect to recognize through September 2016, the estimated end of our obligations under this agreement.

In prior years, we received an upfront payment of \$5.0 million relating to the Hemophilia B program. In May 2012, Baxter notified us that they intended to cease all future research activities under our agreement related to Hemophilia B. As a result, in the year ended December 31, 2012, we recognized the remaining \$3.9 million deferred revenue balance related to the Hemophilia B program since we have no ongoing or additional performance obligations.

Amgen, Inc.: Neulasta®

In October 2010, we amended and restated an existing supply and license agreement by entering into a supply, dedicated suite and manufacturing guarantee agreement (the amended and restated agreement) and a license agreement with Amgen Inc. and Amgen Manufacturing, Limited (together referred to as Amgen). Under the terms of the amended and restated agreement, we guarantee the manufacture and supply of our proprietary PEGylation materials (Polymer Materials) to Amgen in an existing manufacturing suite to be used exclusively for the manufacture of Polymer Materials for Amgen (the Manufacturing Suite) in our manufacturing facility in Huntsville, Alabama (the Facility). This supply arrangement is on a non-exclusive basis (other than the use of the Manufacturing Suite and certain equipment) whereby Nektar is free to manufacture and supply the Polymer

[Table of Contents](#)

Materials to any other third party and Amgen is free to procure the Polymer Materials from any other third party. Under the terms of the amended and restated agreement, we received a \$50.0 million payment in the fourth quarter of 2010 in return for our guaranteeing the supply of certain quantities of Polymer Materials to Amgen including without limitation the Additional Rights described below and manufacturing fees that are calculated based on fixed and variable components applicable to the Polymer Materials ordered by Amgen and delivered by us. Amgen has no minimum purchase commitments. If quantities of the Polymer Materials ordered by Amgen exceed specified quantities, significant additional payments become payable to us in return for our guaranteeing the supply of additional quantities of the Polymer Materials.

The term of the amended and restated agreement ends on October 29, 2020. In the event we become subject to a bankruptcy or insolvency proceeding, we cease to own or control the Facility, we fail to manufacture and supply or certain other events, Amgen or its designated third party will have the right to elect, among certain other options, to take title to the dedicated equipment and access the Facility to operate the Manufacturing Suite solely for the purpose of manufacturing the Polymer Materials (the Additional Rights). Amgen may terminate the amended and restated agreement for convenience or due to an uncured material default by us. Our research facility in Huntsville, Alabama that we propose to sell is a different building and location from that of the Facility as described here.

As of December 31, 2012, we have deferred revenue of approximately \$39.2 million related to this agreement, which we expect to recognize through October 2020, the estimated end of our obligations under this agreement.

Bayer Healthcare LLC: BAY41-6551 (Amikacin Inhale)

In August 2007, we entered into a co-development, license and co-promotion agreement with Bayer Healthcare LLC (Bayer) to develop a specially-formulated inhaled Amikacin. We are responsible for development and manufacturing and supply of the nebulizer device included in the Amikacin product. Bayer is responsible for most future clinical development and commercialization costs, all activities to support worldwide regulatory filings, approvals and related activities, further development of Amikacin Inhale and final product packaging and distribution. We received an upfront payment of \$40.0 million in 2007 and performance milestone payments of \$20.0 million, of which \$10.0 million will be used to reimburse Bayer for Phase 3 clinical trial costs. This \$10.0 million obligation is recorded in accrued clinical trial expense in our Consolidated Balance Sheets. We are entitled to up to \$60.0 million of development milestones upon achievement of certain development objectives, as well as sales milestones upon achievement of annual sales targets and royalties based on annual worldwide net sales of Amikacin Inhale. As of December 31, 2012, we have deferred revenue of approximately \$24.5 million related to this agreement, which we expect to recognize through July 2021, the estimated end of our obligations under this agreement.

Affymax, Inc.: OMONTYS®

In April 2004, we entered into a license, manufacturing and supply agreement with Affymax, Inc. (Affymax) under which we provided Affymax with a worldwide, non-exclusive license under certain of our proprietary PEGylation technology to develop, manufacture and commercialize OMONTYS® (peginesatide). On March 27, 2012, the U.S. Food and Drug Administration (FDA) approved OMONTYS® to treat anemia in patients with chronic kidney disease on dialysis and OMONTYS® sales were initiated in the second quarter of 2012. On February 23, 2013, Affymax and Takeda announced a voluntary recall of all lots of OMONTYS® drug product to the user level as a result of new post-marketing reports regarding serious hypersensitivity reactions, including anaphylaxis, which can be life-threatening or fatal. Under our agreement, Affymax is obligated to purchase its entire requirements of the proprietary PEGylation materials required to manufacture OMONTYS® exclusively from Nektar. Affymax is responsible for all clinical development, regulatory and commercialization expenses. We are entitled to royalties based on annual worldwide net sales of OMONTYS®. For a certain period of time, we will share a portion of our future royalty payments with Enzon Pharmaceuticals, Inc.

[Table of Contents](#)

In addition, as a result of the FDA's approval of OMONTYS®, we earned a \$2.0 million milestone payment. Under our milestone method revenue recognition policy, this substantive milestone was recognized in its entirety upon achievement in March 2012. We have previously received other milestone and related payments under our agreement with Affymax and, as of December 31, 2012, we have deferred revenue of approximately \$7.1 million, which we expect to recognize through March 2022, the estimated period through which we are required to provide manufacturing and supply services.

AstraZeneca AB: naloxegol (NKTR-118) and naloxegol fixed-dose combination program (NKTR-119)

In September 2009, we entered into a license agreement with AstraZeneca AB (AstraZeneca), under which we granted AstraZeneca a worldwide, exclusive, perpetual, royalty-bearing, and sublicensable license under our patents and other intellectual property to develop, market, and sell naloxegol (NKTR-118) and naloxegol fixed-dose combination program (NKTR-119). AstraZeneca is responsible for all costs associated with research, development and commercialization and is responsible for all drug development and commercialization decisions for naloxegol and naloxegol fixed-dose combination program. AstraZeneca paid us an upfront payment of \$125.0 million, which we received in the fourth quarter of 2009 and which was fully recognized as of December 31, 2010. We are entitled to receive up to \$235.0 million and \$75.0 million of contingent payments related to naloxegol and naloxegol fixed-dose combination program, respectively, based on development events to be pursued and completed solely by AstraZeneca. In particular, if AstraZeneca files for regulatory approval of naloxegol with and such filings are accepted by the FDA and the European Medicines Agency (EMA), Nektar will be entitled to \$95.0 million of these payments. We will be entitled to the remaining \$140.0 million of these payments if naloxegol is approved by the FDA and EMA and commercial launch is achieved in the U.S. and one major country in the European Union. In addition, we are also entitled to sales milestone payments and royalties based on annual worldwide net sales of naloxegol and naloxegol fixed-dose combination products.

Other

During the year ended December 31, 2011, in addition to the revenues recognized from the collaboration agreements discussed above, we also recorded license, collaboration and other revenue of approximately \$11.2 million in connection with a number of our license and collaboration agreements. This revenue included a \$5.0 million up-front payment from a license agreement entered into in 2011, as well as revenues from milestone payments, amortization of upfront payments, and reimbursed research and development activities related to agreements entered into in previous years.

In addition, we have a number of collaboration agreements with other partners under which we are entitled to up to a total of \$73.1 million of development milestones upon achievement of certain development objectives, as well as sales milestones upon achievement of annual sales targets and royalties based on net sales of commercialized products, if any. However, given the current phase of development of the potential products under these collaboration agreements, we cannot estimate the probability or timing of achieving these milestones.

Note 11 — Impairment of Long Lived Assets

During the years ended December 31, 2012 and 2010, we recorded a charge for the impairment of long-lived assets of \$1.7 million and \$12.6 million, respectively. We did not record any such charge in 2011.

In an effort to reduce ongoing operating costs and improve our organizational structure, efficiency and productivity, in March 2012, we announced a plan to consolidate our U.S.-based research activities at our existing San Francisco location and to cease the use of and sell one of our buildings located in Huntsville, Alabama that was dedicated to research activities. As a result, we performed a preliminary analysis of the fair value of the land, building and related improvements based primarily on available market data. Based upon this analysis, we concluded that the combined carrying value of the land and building exceeded fair value and we recorded an impairment loss of \$1.7 million in March 2012. No further impairment losses were recorded in 2012,

[Table of Contents](#)

however, until we dispose of these assets, we will update our analysis of their fair value on a regular basis and such updates could result in further impairment charges in future periods. As of December 31, 2012, the remaining net book value of these assets is \$2.8 million.

On November 29, 2010, we ceased use of the San Carlos facility as a result of our relocation to the Mission Bay Facility. The remaining assets at the San Carlos location consist of the building capital lease and related leasehold improvements. We have subleased portions of the San Carlos building and are currently seeking one or more subtenants for the remaining space through the lease termination date. As a result of our relocation, we performed an impairment analysis on these assets. We concluded that the carrying values of the building and leasehold improvements exceeded their fair values based on a probability-weighted discounted cash flow model of the future estimated net sublease income and recorded an impairment loss of \$12.6 million. As of December 31, 2012, the remaining net book value of these assets is \$1.4 million.

Note 12 — Stock-Based Compensation

We issue stock-based awards from our equity incentive plans, which are more fully described in Note 9. Stock-based compensation expense was recognized as follows (in thousands):

	Year Ended December 31,		
	2012	2011	2010
Cost of goods sold	\$ 1,496	\$ 1,266	\$ 915
Research and development	7,082	7,944	7,218
General and administrative	7,621	9,675	9,266
Total stock-based compensation	<u>\$16,199</u>	<u>\$18,885</u>	<u>\$17,399</u>

As of December 31, 2012, total unrecognized compensation costs of \$25.0 million related to unvested stock-based compensation arrangements are expected to be recognized as expense over a weighted-average period of 1.6 years.

Black-Scholes Assumptions

The following tables list the Black-Scholes option-pricing model assumptions used to calculate the fair value of employee and director stock options and ESPP purchases.

	Year Ended December 31, 2012		Year Ended December 31, 2011		Year Ended December 31, 2010	
	Stock Options	ESPP	Stock Options	ESPP	Stock Options	ESPP
Average risk-free interest rate	0.9%	0.1%	1.6%	0.1%	1.8%	0.2%
Dividend yield	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%
Volatility factor	62.2%	45.6%	63.8%	53.6%	62.7%	47.8%
Weighted average expected life	5.0 years	0.5 years	4.9 years	0.5 years	4.9 years	0.5 years

The average risk-free interest rate is based on the U.S. treasury yield curve in effect at the time of grant for periods commensurate with the expected life of the stock-based award. We have never paid dividends, nor do we expect to pay dividends in the foreseeable future; therefore, we used a dividend yield of 0.0%. Our estimate of expected volatility is based on the daily historical trading data of our common stock over a historical period commensurate with the expected life of the stock-based award.

For the years ended December 31, 2012, 2011, and 2010, we estimated the weighted-average expected life based on the contractual and vesting terms of the stock options, as well as historic cancellation and exercise data.

[Table of Contents](#)

Summary of Stock Option Activity

The table below presents a summary of stock option activity under our equity incentive plans (in thousands, except for price per share and contractual life information):

	<u>Number of Shares</u>	<u>Weighted-Average Exercise Price per Share</u>	<u>Weighted-Average Remaining Contractual Life (in Years)</u>	<u>Aggregate Intrinsic Value(1)</u>
Outstanding at December 31, 2011	17,046	\$ 9.29		
Options granted	3,435	7.46		
Options exercised	(631)	5.48		
Options forfeited and canceled	(852)	10.34		
Outstanding at December 31, 2012	<u>18,998</u>	\$ 9.03	4.73	\$ 10,972
Vested and expected to vest at December 31, 2012	18,688	\$ 9.04	4.70	\$ 10,916
Exercisable at December 31, 2012	13,449	\$ 9.05	4.04	\$ 9,874

(1) Aggregate intrinsic value represents the difference between the exercise price of the option and the closing market price of our common stock on December 31, 2012.

The weighted-average grant-date fair value per share of options granted during the years ended December 31, 2012, 2011, and 2010 was \$3.92, \$5.22, and \$6.30, respectively. The total intrinsic value of options exercised during the years ended December 31, 2012, 2011, and 2010 was \$1.9 million, \$3.7 million, and \$6.8 million, respectively. The estimated fair value of options vested during the years ended December 31, 2012, 2011, and 2010 was \$15.7 million, \$18.1 million, and \$14.7 million, respectively.

RSU Awards

We issued RSU awards to certain officers and employees. The RSU awards granted in 2006 vest upon achievement of pre-determined performance milestones, while the RSU awards granted in 2007 through 2010 have a time-based vesting schedule. There were no RSU awards granted in 2011 and 2012. There were 120,580 and 136,080 RSU awards outstanding at December 31, 2012 and 2011, respectively. We expense the grant date fair value of the RSU awards ratably over the expected service or performance period.

Note 13 — Income Taxes

Loss before provision for income taxes includes the following components (in thousands):

	<u>Year Ended December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
Domestic	<u>\$(174,258)</u>	<u>\$(135,880)</u>	<u>\$(39,321)</u>

[Table of Contents](#)**Provision for Income Taxes**

The provision (benefit) for income taxes consists of the following (in thousands):

	Year Ended December 31,		
	2012	2011	2010
Current:			
Federal	\$ (137)	\$ —	\$ 1
State	1	1	2
Foreign	1,029	921	698
Total Current	<u>893</u>	<u>922</u>	<u>701</u>
Deferred:			
Federal	(422)	—	—
State	(49)	—	—
Foreign	(16)	96	180
Total Deferred	<u>(487)</u>	<u>96</u>	<u>180</u>
Provision for income taxes	<u>\$ 406</u>	<u>\$ 1,018</u>	<u>\$ 881</u>

Income tax provision related to continuing operations differs from the amount computed by applying the statutory income tax rate of 35% to pretax loss as follows (in thousands):

	Year Ended December 31,		
	2012	2011	2010
U.S. federal provision (benefit)			
At statutory rate	\$ (60,007)	\$ (46,536)	\$ (12,970)
State taxes	(48)	1	2
Change in valuation allowance	47,349	48,959	15,123
Foreign tax inclusion	6,510	—	—
Non-cash interest expense on liability related to sale of future royalties	6,320	—	—
Foreign tax differential	(227)	(129)	86
Unrecognized tax credits	(591)	(893)	(1,833)
Other	1,100	(384)	473
Provision for income taxes	<u>\$ 406</u>	<u>\$ 1,018</u>	<u>\$ 881</u>

[Table of Contents](#)

Deferred Tax Assets and Liabilities

Deferred income taxes reflect the net tax effects of loss and credit carryforwards and temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of our deferred tax assets for federal and state income taxes are as follows (in thousands):

	December 31,	
	2012	2011
Deferred tax assets:		
Net operating loss carryforwards	\$ 351,354	\$ 342,128
Research and other credits	52,769	51,125
Sale of future royalties	39,750	—
Deferred revenue	39,521	48,732
Stock-based compensation	23,746	19,268
Capitalized research expenses	7,192	9,514
Property and equipment	8,482	8,081
Reserves and accruals	8,776	8,083
Other	2,773	3,895
Deferred tax assets before valuation allowance	534,363	490,826
Valuation allowance for deferred tax assets	(534,268)	(490,689)
Total deferred tax assets	95	137
Deferred tax liabilities:		
Property and equipment	—	(75)
Total deferred tax liabilities	—	(75)
Net deferred tax assets	\$ 95	\$ 62

Realization of our deferred tax assets is dependent upon future earnings, if any, the timing and amount of which are uncertain. Because of our lack of U.S. earnings history, the net U.S. deferred tax assets have been fully offset by a valuation allowance. The valuation allowance increased by \$43.6 million and \$52.9 million during the years ended December 31, 2012 and 2011, respectively. The valuation allowance includes approximately \$35.6 million of income tax benefit at both December 31, 2012 and December 31, 2011 related to stock-based compensation and exercises prior to the implementation of the accounting guidance for stock-based compensation that will be credited to additional paid in capital when realized.

Undistributed earnings of our foreign subsidiary in India are considered to be permanently reinvested and accordingly, no deferred U.S. income taxes have been provided thereon. Upon distribution of those earnings in the form of dividends or otherwise, we would be subject to U.S. income tax. As of December 31, 2012, U.S. income taxes have not been provided on a cumulative total of \$3.1 million of such earnings. At the present time it is not practicable to estimate the amount of U.S. income taxes that might be payable if these earnings were repatriated.

Net Operating Loss and Tax Credit Carryforwards

As of December 31, 2012, we had a net operating loss carryforward for federal income tax purposes of approximately \$909.4 million, portions of which will begin to expire in 2018. We had a total state net operating loss carryforward of approximately \$602.5 million, which will begin to expire in 2013. Utilization of some of the federal and state net operating loss and credit carryforwards are subject to annual limitations due to the “change in ownership” provisions of the Internal Revenue Code of 1986 and similar state provisions. The annual limitations may result in the expiration of net operating losses and credits before utilization.

[Table of Contents](#)

We have federal research credits of approximately \$23.7 million, which will begin to expire in 2019 and state research credits of approximately \$14.7 million which have no expiration date. We have federal orphan drug credits of \$14.0 million which will begin to expire in 2026. These tax credits are subject to the same limitations discussed above.

The American Taxpayer Relief Act of 2012 was signed into law on January 2, 2013. The act retroactively reinstated various expired tax extenders for the 2012 year. None of the extenders included in the Act are material to our financial statements and the impact of the tax law change will be accounted for in 2013 as this is the period of enactment.

A change in California law occurred in November 2012 with the enactment of RTC Sec. 25128.7 related to apportionment of income. The new law is effective beginning in 2013. All California deferred tax assets have been adjusted using the rates that will be in effect when the deferred tax assets are expected to be utilized.

Unrecognized tax benefits

We have incurred net operating losses since inception. Our policy is to include interest and penalties related to unrecognized tax benefits, if any, within the provision for income taxes in the consolidated statements of operations. If we are eventually able to recognize our uncertain positions, our effective tax rate would be reduced. We currently have a full valuation allowance against our net deferred tax asset which would impact the timing of the effective tax rate benefit should any of these uncertain tax positions be favorably settled in the future. Any adjustments to our uncertain tax positions would result in an adjustment of our net operating loss or tax credit carry forwards rather than resulting in a cash outlay.

We file income tax returns in the U.S., California, Alabama, India and the U.K. The 2009 and 2010 tax years were previously under audit by the IRS. These audits were completed and we received no change letters. The 2005 through 2010 tax years were previously under audit in Alabama. These audits were completed with no changes to the tax liability. Because of net operating losses and research credit carryovers, substantially all of our domestic tax years remain open and subject to examination. We are currently under examination in India for the fiscal years ending 2009 through 2011.

We have the following activity relating to unrecognized tax benefits (in thousands):

	<u>December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
Beginning balance	\$13,576	\$13,058	\$13,084
Tax positions related to current year			
Additions:			
Federal	289	297	259
State	302	221	208
Reductions	—	—	—
Tax positions related to prior year			
Additions:			
Federal	37	—	—
State	—	—	—
Reductions	—	—	(493)
Settlements	—	—	—
Lapses in statute of limitations	(137)	—	—
Ending balance	<u>\$14,067</u>	<u>\$13,576</u>	<u>\$13,058</u>

[Table of Contents](#)

Although it is reasonably possible that certain unrecognized tax benefits may increase or decrease within the next twelve months due to tax examination changes, settlement activities, expirations of statute of limitations, or the impact on recognition and measurement considerations related to the results of published tax cases or other similar activities, we do not anticipate any significant changes to unrecognized tax benefits over the next twelve months. During the years ended December 31, 2012, 2011 and 2010, no interest or penalties were required to be recognized relating to unrecognized tax benefits.

Note 14 — Segment Reporting

We operate in one business segment which focuses on applying our technology platforms to improve the performance of established and novel medicines. We operate in one segment because our business offerings have similar economics and other characteristics, including the nature of products and manufacturing processes, types of customers, distribution methods and regulatory environment. We are comprehensively managed as one business segment by our Chief Executive Officer and his management team. Within our one business segment we have two components, PEGylation technology and pulmonary technology.

Our revenue is derived primarily from clients in the pharmaceutical and biotechnology industries. UCB, Roche, and Affymax represented 30%, 23%, and 11% of our revenue, respectively, for the year ended December 31, 2012. Revenue from UCB and Roche represented 27% and 16% of our revenue, respectively, for the year ended December 31, 2011.

Revenue by geographic area is based on the locations of our partners. The following table sets forth revenue by geographic area (in thousands):

	Years Ended December 31,		
	2012	2011	2010
United States	\$34,591	\$37,896	\$ 29,636
European countries	46,600	33,584	129,403
Total revenue	\$81,191	\$71,480	\$159,039

At December 31, 2012, \$62.5 million, or approximately 87%, of the net book value of our property and equipment was located in the United States and \$9.7 million, or approximately 13%, was located in India. At December 31, 2011, \$67.7 million, or approximately 86%, of the net book value of our property and equipment was located in the United States and \$10.9 million, or approximately 14%, was located in India.

Note 15 — Selected Quarterly Financial Data (Unaudited)

The following table sets forth certain unaudited quarterly financial data. In our opinion, the unaudited information set forth below has been prepared on the same basis as the audited information and includes all adjustments necessary to present fairly the information set forth herein. We have experienced fluctuations in our quarterly results and expect these fluctuations to continue in the future. Due to these and other factors, we believe that quarter-to-quarter comparisons of our operating results will not be meaningful, and you should not rely on our results for any one quarter as an indication of our future performance. Certain items previously reported in specific financial statement captions have been reclassified to conform to the current period presentation. Such reclassifications have not impacted previously reported total revenues, operating loss or net loss. All data is in thousands except per share information.

	Fiscal Year 2012				Fiscal Year 2011			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
Product sales	\$ 6,945	\$ 9,694	\$ 8,355	\$ 10,405	\$ 2,474	\$ 8,641	\$ 7,677	\$ 6,073
Total revenue	\$ 17,949	\$ 23,684	\$ 18,412	\$ 21,146	\$ 11,299	\$ 17,331	\$ 27,068	\$ 15,782
Cost of goods sold	\$ 8,707	\$ 7,203	\$ 7,228	\$ 7,290	\$ 3,263	\$ 8,140	\$ 5,038	\$ 5,450
Research and development expenses	\$ 35,085	\$ 33,201	\$ 34,016	\$ 46,373	\$ 30,176	\$ 32,270	\$ 31,018	\$ 33,302
Operating loss	\$(37,932)	\$(26,988)	\$(32,900)	\$(43,381)	\$(33,867)	\$(34,264)	\$(21,338)	\$(34,468)
Net loss	\$(41,097)	\$(34,285)	\$(43,547)	\$(52,926)	\$(36,034)	\$(36,381)	\$(24,068)	\$(37,495)
Basic and diluted net loss per share(1)	\$ (0.36)	\$ (0.30)	\$ (0.38)	\$ (0.46)	\$ (0.33)	\$ (0.32)	\$ (0.21)	\$ (0.33)

(1) Quarterly loss per share amounts may not total to the year-to-date loss per share due to rounding.

[Table of Contents](#)

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act of 1934 (Exchange Act) reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required financial disclosure.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based upon, and as of the date of, this evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures were effective. Accordingly, management believes that the financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP.

Our management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2012. In making its assessment of internal control over financial reporting, management used the criteria described in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on our evaluation under the framework described in *Internal Control — Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2012.

The effectiveness of our internal control over financial reporting as of December 31, 2012 has been audited by an independent registered public accounting firm, as stated in their report, which is included herein.

Changes in Internal Control Over Financial Reporting

We continuously seek to improve the efficiency and effectiveness of our internal controls. This results in refinements to processes throughout the Company. There was no change in our internal control over financial reporting during the quarter ended December 31, 2012, which was identified in connection with our management's evaluation required by Exchange Act Rules 13a-15(f) and 15d-15(f) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on the Effectiveness of Controls

Our management, including the Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not

[Table of Contents](#)

absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Item 9B. Other Information

None.

PART III

Item 10. *Directors, Executive Officers and Corporate Governance*

Information relating to our executive officers required by this item is set forth in Part I — Item 1 of this report under the caption “Executive Officers of the Registrant” and is incorporated herein by reference. The other information required by this Item is incorporated by reference from the definitive proxy statement for our 2013 Annual Meeting of Stockholders to be filed with the SEC pursuant to Regulation 14A (Proxy Statement) not later than 120 days after the end of the fiscal year covered by this Form 10-K under the captions “Corporate Governance and Board of Directors,” “Proposal 1 — Election of Directors” and “Section 16(a) Beneficial Ownership Reporting Compliance.”

Information regarding our audit committee financial expert will be set forth in the Proxy Statement under the caption “Audit Committee,” which information is incorporated herein by reference.

We have a Code of Business Conduct and Ethics applicable to all employees, including the principal executive officer, principal financial officer and principal accounting officer or controller, or persons performing similar functions. The Code of Business Conduct and Ethics is posted on our website at www.nektar.com. Amendments to, and waivers from, the Code of Business Conduct and Ethics that apply to any of these officers, or persons performing similar functions, and that relate to any element of the code of ethics definition enumerated in Item 406(b) of Regulation S-K will be disclosed at the website address provided above and, to the extent required by applicable regulations, on a current report on Form 8-K.

As permitted by SEC Rule 10b5-1, certain of our executive officers, directors and other employees have or may set up a predefined, structured stock trading program with their broker to sell our stock. The stock trading program allows a broker acting on behalf of the executive officer, director or other employee to trade our stock during blackout periods or while such executive officer, director or other employee may be aware of material, nonpublic information, if the trade is performed according to a pre-existing contract, instruction or plan that was established with the broker when such executive officer, director or employee was not aware of any material, nonpublic information. Our executive officers, directors and other employees may also trade our stock outside of the stock trading programs set up under Rule 10b5-1 subject to our securities trading policy.

Item 11. *Executive Compensation*

The information required by this Item is included in the Proxy Statement and incorporated herein by reference.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

The information required by this Item is included in the Proxy Statement and incorporated herein by reference.

Item 13. *Certain Relationships and Related Transactions and Director Independence*

The information required by this Item is included in the Proxy Statement and incorporated herein by reference.

Item 14. *Principal Accountant Fees and Services*

The information required by this Item is included in the Proxy Statement and incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed as part of this report:

(1) *Consolidated Financial Statements:*

The following financial statements are filed as part of this Annual Report on Form 10-K under Item 8 “Financial Statements and Supplementary Data.”

Reports of Independent Registered Public Accounting Firm	Page
Consolidated Balance Sheets at December 31, 2012 and 2011	74
Consolidated Statements of Operations for each of the three years in the period ended December 31, 2012	76
Consolidated Statements of Comprehensive Loss for each of the three years in the period ended December 31, 2012	77
Consolidated Statements of Stockholders’ Equity for each of the three years in the period ended December 31, 2012	78
Consolidated Statements of Cash Flows for each of the three years in the period ended December 31, 2012	79
Notes to Consolidated Financial Statements	80
	81

(2) *Financial Statement Schedules:*

Schedule II, *Valuation and Qualifying Accounts and Reserves*, is filed as part of this Annual Report on Form 10-K under Item 8 “Financial Statements and Supplementary Data”. All other financial statement schedules have been omitted because they are not applicable, or the information required is presented in our consolidated financial statements and notes thereto under Item 8 of this Annual Report on Form 10-K.

(3) *Exhibits.*

Except as so indicated in Exhibit 32.1, the following exhibits are filed as part of, or incorporated by reference into, this Annual Report on Form 10-K.

<u>Exhibit Number</u>	<u>Description of Documents</u>
2.1(1)	Asset Purchase Agreement, dated October 20, 2008, by and between Nektar Therapeutics, a Delaware corporation, AeroGen, Inc., a Delaware corporation and wholly-owned subsidiary of Nektar Therapeutics, Novartis Pharmaceuticals Corporation, a Delaware corporation, and Novartis Pharma AG, a Swiss corporation.+
3.1(2)	Certificate of Incorporation of Inhale Therapeutic Systems (Delaware), Inc.
3.2(3)	Certificate of Amendment of the Amended Certificate of Incorporation of Inhale Therapeutic Systems, Inc.
3.3(4)	Certificate of Ownership and Merger of Nektar Therapeutics.
3.4(5)	Certificate of Ownership and Merger of Nektar Therapeutics AL, Corporation with and into Nektar Therapeutics.
3.5(6)	Amended and Restated Bylaws of Nektar Therapeutics.
4.1	Reference is made to Exhibits 3.1, 3.2, 3.3, 3.4, and 3.5.
4.2(4)	Specimen Common Stock certificate.

Table of Contents

<u>Exhibit Number</u>	<u>Description of Documents</u>
4.3(8)	Indenture dated July 11, 2012 by and between Nektar Therapeutics and Wells Fargo Bank, National Association, including the form of 12.0% Senior Secured Note due 2017.
10.1(9)	Employee Stock Purchase Plan, as amended and restated.++
10.2(10)	2000 Non-Officer Equity Incentive Plan, as amended and restated.++

**NEKTAR THERAPEUTICS
2012 PERFORMANCE INCENTIVE PLAN**

**STOCK OPTION AGREEMENT
(US OPTIONHOLDERS)**

Pursuant to the Stock Option Grant Notice, which may be in such form (including electronic form) as prescribed by the Administrator from time to time (“**Option Notice**”), and this Stock Option Agreement, Nektar Therapeutics (the “**Company**”) has granted you an option under its 2012 Performance Incentive Plan (the “**Plan**”) to purchase the number of shares of the Company’s Common Stock indicated in the Option Notice at the exercise price indicated in the Option Notice. Defined terms not explicitly defined in this Stock Option Agreement but defined in the Plan shall have the same definitions as in the Plan.

The details of your option are as follows:

1. VESTING. Subject to the limitations contained herein, your option will vest as provided in the Option Notice, provided that vesting will cease upon the termination of your continuous employment or service with the Company or any of its Subsidiaries (your “**Continuous Service**”). Notwithstanding the foregoing, in the event your Continuous Service is terminated as a result of your death, your option shall become fully vested and exercisable as of the date of such termination.

2. NUMBER OF SHARES AND EXERCISE PRICE. The number of shares subject to your option and your exercise price per share referenced in the Option Notice may be adjusted from time to time for capitalization adjustments, as provided in the Plan.

3. EXERCISE RESTRICTION FOR NON-EXEMPT EMPLOYEES. If you are an employee eligible for overtime compensation under the Fair Labor Standards Act of 1938, as amended (*i.e.*, a “**Non-Exempt Employee**”), you may not exercise your option until at least six (6) months following the Date of Grant specified in your Option Notice, notwithstanding any other provision of your option.

4. METHOD OF PAYMENT. Payment of the exercise price is due in full upon exercise of all or any part of your option. You may elect to make payment of the exercise price in one or more of the following forms:

(a) In cash or by check;

(b) Provided that at the time of exercise the Common Stock is publicly traded on a nationally recognized stock exchange, and as may be permitted by the Company in its sole discretion and subject to such procedures as the Administrator may adopt, pursuant to a “cashless exercise” with a third party who provides financing for the purposes of (or who otherwise facilitates) the purchase or exercise of awards; or

(c) As permitted by the Company in its sole discretion, (i) by delivery of already-owned shares of Common Stock either that you have held for the period required to avoid a charge to the Company's reported earnings or that you did not acquire, directly or indirectly from the Company, that are owned free and clear of any liens, claims, encumbrances or security interests, and that are valued at fair market value on the date of exercise (as determined under the Plan), or (ii) a reduction in the number of shares of Common Stock otherwise deliverable to you (valued at their fair market value on the exercise date, as determined under the Plan) pursuant to the exercise of the option. "Delivery" for these purposes, in the sole discretion of the Company at the time your option is exercised, shall include delivery to the Company of your attestation of ownership of such shares of Common Stock in a form approved by the Company. Notwithstanding the foregoing, your option may not be exercised by tender to the Company of Common Stock to the extent such tender would constitute a violation of the provisions of any law, regulation or agreement restricting the redemption of the Company's stock.

5. SECURITIES LAW COMPLIANCE. Notwithstanding anything to the contrary contained herein, your option may not be exercised unless the shares issuable upon exercise of your option are then registered under the Securities Act or, if such shares are not then so registered, the Company has determined that such exercise and issuance would be exempt from the registration requirements of the Securities Act. The exercise of your option must also comply with other applicable laws and regulations governing the option, and the option may not be exercised if the Company determines that the exercise would not be in material compliance with such laws and regulations.

6. TERM. The term of your option commences on the Date of Grant and expires upon the *earliest* of the following:

(a) three (3) months after the termination of your Continuous Service for any reason other than death or Disability, provided that (i) if during any part of such three (3)-month period the option is not exercisable solely because of the condition set forth in Section 5, the option shall not expire until the earlier of the Expiration Date indicated on the Option Notice or until it shall have been exercisable for an aggregate period of three (3) months after the termination of your Continuous Service, and (ii) if (x) you are a Non-Exempt Employee, (y) you terminate your Continuous Service within six (6) months after the Date of Grant specified in your Option Notice, and (z) you have vested in a portion of your option at the time of your termination of Continuous Service, your option shall not expire until the earlier of (A) the later of the date that is seven (7) months after the Date of Grant specified in your Option Notice or the date that is three (3) months after the termination of your Continuous Service or (B) the Expiration Date;

(b) twelve (12) months after the termination of your Continuous Service due to Disability;

(c) eighteen (18) months after your death if you die either during your Continuous Service or within three (3) months after your Continuous Service terminates for a reason other than death;

(d) the Expiration Date indicated in the Option Notice (which shall not be later than the eighth (8th) anniversary of the Date of Grant); or

(e) the eighth (8th) anniversary of the Date of Grant.

For purposes of the option, “**Disability**” means a “permanent and total disability” within the meaning of Section 22(e)(3) of the Code.

Note, if you are a US taxpayer and your option is an incentive stock option, to obtain the federal income tax advantages associated with an “incentive stock option,” the Code requires that at all times beginning on the Date of Grant of your option and ending on the day three (3) months before the date of your option’s exercise, you must be an employee of the Company or a Subsidiary, except in the event of your death or Disability. The Company has provided for extended exercisability of your option under certain circumstances for your benefit but cannot guarantee that your option will necessarily be treated as an “incentive stock option” if you continue to provide services to the Company or a Subsidiary as a consultant or director after your employment terminates or if you otherwise exercise your option more than three (3) months after the date your employment terminates.

7. EXERCISE.

(a) You may exercise the vested portion of your option during its term by delivering a Notice of Exercise (in a form designated by the Company), or by completion of such other exercise procedures as may be prescribed by the Administrator from time to time, and payment of the exercise price to the Secretary of the Company, or to such other person as the Company may designate, during regular business hours, together with such additional documents as the Company may then require.

(b) By exercising your option you agree that, as a condition to any exercise of your option, the Company may require you to arrange for the payment to the Company of any required tax withholding in connection with such exercise as described in Section 10 below.

(c) If your option is an incentive stock option, by exercising your option you agree that you will notify the Company in writing within fifteen (15) days after the date of any disposition of any of the shares of the Common Stock issued upon exercise of your option that occurs within two (2) years after the date of your option grant or within one (1) year after such shares of Common Stock are transferred upon exercise of your option.

8. TRANSFERABILITY. Your option is not transferable, except by will or by the laws of descent and distribution, and is exercisable during your life only by you.

9. OPTION NOT A SERVICE CONTRACT. Your option is not an employment or service contract, and nothing in your option shall be deemed to create in any way whatsoever any obligation on your part to continue in the employ or service of the Company or a Subsidiary, or of the Company or a Subsidiary to continue your employment or service. In addition, nothing in your option shall obligate the Company or any Subsidiary, their respective shareholders, boards of directors, officers or employees to continue any relationship that you might have as a director or consultant for the Company or any Subsidiary.

10. TAX OBLIGATIONS.

(a) You are responsible for satisfaction of all federal, state, local and foreign tax withholding obligations of the Company and its Subsidiaries, if any, which arise in connection with the option, including, without limitation, obligations arising upon (i) the exercise, in whole or in part, of the option, (ii) the transfer, in whole or in part, of any shares acquired upon exercise of the option, (iii) the operation of any law or regulation providing for the imputation of interest, or (iv) the lapsing of any restriction with respect to any shares acquired upon exercise of the option. No shares of Common Stock will be issued until the Company has received a definitive agreement or other documentation satisfactory to the Company, in its sole discretion, that all such obligations have been or will be satisfied by you. Regardless of whether the Company properly withholds the full amount of such obligations, you hereby acknowledge and agree that all such obligations shall transfer in their entirety from the Company to you and that such liability shall be ultimately your responsibility and liability.

(b) You hereby authorize the Company or any of its Subsidiaries to withhold from payroll and any other amounts payable to you and otherwise agree to make adequate provision for any sums required to satisfy the federal, state, local and foreign tax obligations, if any, of the Company or any of its Subsidiaries arising in connection with the option. In the event that the Company determines that the tax obligations will not be satisfied by the method described above, you authorize the Company's designated third party plan administrator (i.e. E*Trade or such successor third party administrator as the Company may designate from time to time), to sell a number of shares of Common Stock that are exercised under the option, which the Company determines is sufficient to generate an amount that meets the tax obligations plus additional shares, as necessary, to account for rounding and market fluctuations, and to pay such tax withholding amounts to the Company. The shares of Common Stock may be sold as part of a block trade with other participants of the Plan in which all participants receive an average price. Any adverse consequences to you resulting from the procedure permitted under this Section 10, including, without limitation, tax consequences and any loss of prospective stock appreciation, shall be your sole responsibility and there shall be no liability to the Company for any adverse consequences of any nature whatsoever.

(c) The Company may, in its discretion, permit or require you to satisfy all or any portion of the tax withholding obligations described in this Section 10 by deducting from the shares of Common Stock otherwise deliverable to you in settlement of the option a number of shares of Common Stock having a fair market value, as determined by the Company as of the date on which the tax obligations arise, not in excess of the minimum amount of such tax obligations determined by the applicable withholding rates.

(d) You hereby acknowledge that you understand that you may suffer adverse tax consequences as a result of the exercise of the option or disposition of the shares. You hereby represent that you have consulted with any tax consultants the you deem advisable in connection with the exercise of the option or disposition of the shares and that you are not relying on the Company for any tax advice.

11. EMPLOYMENT CONDITIONS. In accepting the option, you acknowledge that:

(a) Any notice period mandated under any applicable laws shall not be treated as service for the purpose of determining the vesting of the option; and your right to receive shares of Common Stock in settlement of the option after termination as an employee, if any, will be measured by the date of your termination as an employee and will not be extended by any notice period mandated under the applicable law. Subject to the foregoing and the provisions of the Plan, the Company, in its sole discretion, shall determine whether your status as an employee or other service-provider has terminated and the effective date of such termination.

(b) The vesting of the option shall cease upon, and no portion of the option shall become vested following, your termination as an employee or other service-provider for any reason except as may be explicitly provided by the Plan or this Stock Option Agreement. Unless otherwise provided in the Plan or this Stock Option Agreement, the unvested portion of the option at the time of your termination as an employee or other service-provider will be forfeited.

(c) The Plan is established voluntarily by the Company. It is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time, subject to Section 8.6.5 of the Plan.

(d) The grant of the option is voluntary and occasional and does not create any contractual or other right to receive future grants of options, or benefits in lieu of options, even if options have been granted repeatedly in the past.

(e) All decisions with respect to future option grants, if any, will be at the sole discretion of the Company.

(f) You are voluntarily participating in the Plan.

(g) The option is an extraordinary item that does not constitute compensation of any kind for service rendered to the Company (or any Subsidiary), and which is outside the scope of your employment contract, if any. In addition, the option is not part of normal or expected compensation or salary for any purpose, including, but not limited to, calculating any severance, resignation, termination, redundancy, end-of-service payments, bonuses, long-service awards, pension or retirement benefits or similar payments.

(h) The future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty. If you obtain shares upon settlement of the option, the value of those shares may increase or decrease.

(i) No claim or entitlement to compensation or damages arises from termination of the option or diminution in value of the option or shares of Common Stock acquired upon settlement of the option resulting from your termination of employment or service (for any reason whether or not in breach of the local law) and you irrevocably release the Company and each Subsidiary from any such claim that may arise. If, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen then, by signing this Stock Option Agreement, you shall be deemed irrevocably to have waived your entitlement to pursue such a claim.

12. GENERAL PROVISIONS.

(a) Successors and Assigns. Except as provided herein to the contrary, this Stock Option Agreement shall be binding upon and inure to the benefit of the parties to this Stock Option Agreement, their respective successors and permitted assigns.

(b) No Assignment. Except as otherwise provided in this Stock Option Agreement, you shall not assign any of your under this Stock Option Agreement without the prior written consent of the Company, which consent may be withheld in its sole discretion. The Company shall be permitted to assign its rights or obligations under this Stock Option Agreement, but no such assignment shall release the Company of any obligations pursuant to this Stock Option Agreement.

(c) Severability. The validity, legality or enforceability of the remainder of this Stock Option Agreement shall not be affected even if one or more of the provisions of this Stock Option Agreement shall be held to be invalid, illegal or unenforceable in any respect.

(d) Administration. Any determination by the Administrator in connection with any question or issue arising under the Plan or this Stock Option Agreement shall be final, conclusive, and binding on you, the Company, and all other persons.

(e) Headings. The section headings in this Stock Option Agreement are inserted only as a matter of convenience, and in no way define, limit or interpret the scope of this Stock Option Agreement or of any particular section.

(f) Delivery of Documents and Notices. Any document relating to participation in the Plan, or any notice required or permitted hereunder shall be given in writing and shall be deemed effectively given (except to the extent that this Stock Option Agreement provides for effectiveness only upon actual receipt of such notice) upon personal delivery through electronic delivery at the e-mail address, if any, provided for you by the Company, or, upon deposit in the local postal service, by registered or certified mail, or with a nationally recognized overnight courier service with postage and fees prepaid, addressed to the other party at the address of such party set forth in this Stock Option Agreement or at such other address as such party may designate in writing from time to time to the other party.

(i) Description of Electronic Delivery. The Plan documents, which may include but do not necessarily include: the Plan, the Option Notice, this Stock Option Agreement, and any reports of the Company provided generally to the Company's shareholders, may be delivered to you electronically. In addition, if permitted by the Company, you may deliver electronically this Stock Option Agreement and Exercise Notice called for by Section 7(a) to the Company or to such third party involved in administering the Plan as the Company may designate from time to time. Such means of electronic delivery may include but do not necessarily include the delivery of a link to a Company intranet or the internet site of a third party involved in administering the Plan, the delivery of the document via e-mail or such other means of electronic delivery specified by the Company.

(ii) Consent to Electronic Delivery. You acknowledge that you have read Section 12(f)(i) of this Stock Option Agreement and consent to the electronic delivery of the Plan documents and, if permitted by the Company, the delivery of this Stock Option Agreement and exercise notice, as described in Section 12(f)(i) You acknowledge that you may receive from the Company a paper copy of any documents delivered electronically at no cost to you by contacting the Company by telephone or in writing. You further acknowledge that you will be provided with a paper copy of any documents if the attempted electronic delivery of such documents fails. Similarly, you understand that you must provide the Company or any designated third party administrator with a paper copy of any documents if the attempted electronic delivery of such documents fails. You may revoke your consent to the electronic delivery of documents described in Section 12(f)(i) or may change the electronic mail address to which such documents are to be delivered (if you have provided an electronic mail address) at any time by notifying the Company of such revoked consent or revised e-mail address by telephone, postal service or electronic mail. Finally, you understand that you are not required to consent to electronic delivery of documents described in Section 12(f)(i).

13. GOVERNING PLAN DOCUMENT. Your option is subject to all the provisions of the Plan, the provisions of which are hereby made a part of your option, and is further subject to all interpretations, amendments, rules and regulations which may from time to time be promulgated and adopted pursuant to the Plan. In the event of any conflict between the provisions of your option and those of the Plan, the provisions of the Plan shall control. This Stock Option Agreement is governed by the laws of the State of Delaware.

14. CLAWBACK POLICY. Your option is subject to the terms of the Company's recoupment, clawback or similar policy as it may be in effect from time to time, as well as any similar provisions of applicable law, any of which could in certain circumstances require forfeiture of the option and repayment or forfeiture of any shares of Common Stock or other cash or property received with respect to the option (including any value received from a disposition of the shares acquired upon exercise of the option).

NEKTAR THERAPEUTICS
2012 PERFORMANCE INCENTIVE PLAN

PERFORMANCE STOCK OPTION AGREEMENT
(EXECUTIVE OFFICERS)

Pursuant to the Stock Option Grant Notice, which may be in such form (including electronic form) as prescribed by the Administrator from time to time (“**Option Notice**”), and this Stock Option Agreement, Nektar Therapeutics (the “**Company**”) has granted you an option under its 2012 Performance Incentive Plan (the “**Plan**”) to purchase the number of shares of the Company’s Common Stock indicated in the Option Notice at the exercise price indicated in the Option Notice. Defined terms not explicitly defined in this Stock Option Agreement but defined in the Plan shall have the same definitions as in the Plan.

The details of your option are as follows:

1. VESTING. Your option is subject to both the time-based and performance-based vesting requirements provided below in this Section 1.

(a) TIME-BASED VESTING. Subject to Section 1(b) below, your option will vest in forty-eight (48) substantially equal monthly installments following the Vesting Commencement Date, subject in each case to your Continuous Service through the applicable vesting date. Notwithstanding the foregoing, in the event your Continuous Service is terminated as a result of your death, your option shall become fully vested and exercisable as of the date of such termination.

(b) PERFORMANCE-BASED VESTING. Notwithstanding the vesting schedule set forth in Section 1(a), the vesting of your option is contingent upon the achievement by the Company of the performance goal set forth below in this Section 1(b) (the “**Performance Goal**”) at any time during the period of five (5) years commencing on the Date of Grant (the “**Performance Period**”). If the Company achieves the Performance Goal during the Performance Period and your Continuous Service with the Company continues through the date on which the Performance Goal is achieved, your option will be vested and exercisable on the date of achievement of the Performance Goal to the extent the time-based vesting requirements set forth in Section 1(a) have been met and, as to any portion of your option that is outstanding and unvested on such date, will continue to be eligible to vest and become exercisable in accordance with the vesting schedule set forth in Section 1(a). In the event that the Company does not achieve the Performance Goal set forth below on or before the last day of the Performance Period (and the option has not previously vested in connection with your death as provided above in Section 1(a) or in connection with a corporate transaction as provided in Section 7.2 of the Plan), your option, to the extent then outstanding, will terminate on the last day of the Performance Period.

The Performance Goal applicable to your option shall be the filing by the Company, or a collaboration partner of the Company, of either a new drug application (a

“**NDA**”) or biologics license application (a “**BLA**”) with the United States Food and Drug Administration or a marketing authorization application with the European Medicines Agency (an “**MAA**”) for any Proprietary Company Program (as hereinafter defined), including without limitation, any one of the following drug candidates: (1) naloxegol (an oral peripherally-acting opioid antagonist); (2) etirinotecan (a topoisomerase I inhibitor); (3) NKTR-061/Amikacin Inhale (a drug-device combination for an inhaled solution of amikacin); or (4) BAX-855 (a longer-acting (PEGylated) form of a full-length recombinant factor VIII (rFVIII) protein). For the purposes of the foregoing, a “Proprietary Company Program” includes drug candidates for which the Company acts as the sponsor of the NDA, BLA or MAA, as the case may be, or drug candidates licensed by the Company to a third party (and in such case the third party is the sponsor of the NDA, BLA or MAA, as the case may be) in which the Company is entitled to an average potential royalty on net sales of the drug candidate equal to or greater than 7.5%. The “average potential royalty on net sales” is determined by the quotient of (x) the sum of the lowest and highest applicable royalty rate payable to the Company based on net sales of the drug candidate, divided by (y) 2.

2. NUMBER OF SHARES AND EXERCISE PRICE. The number of shares subject to your option and your exercise price per share referenced in the Option Notice may be adjusted from time to time for capitalization adjustments, as provided in the Plan.

3. EXERCISE RESTRICTION FOR NON-EXEMPT EMPLOYEES. If you are an employee eligible for overtime compensation under the Fair Labor Standards Act of 1938, as amended (*i.e.*, a “**Non-Exempt Employee**”), you may not exercise your option until at least six (6) months following the Date of Grant specified in your Option Notice, notwithstanding any other provision of your option.

4. METHOD OF PAYMENT. Payment of the exercise price is due in full upon exercise of all or any part of your option. You may elect to make payment of the exercise price in one or more of the following forms:

(a) In cash or by check;

(b) Provided that at the time of exercise the Common Stock is publicly traded on a nationally recognized stock exchange, and as may be permitted by the Company in its sole discretion and subject to such procedures as the Administrator may adopt, pursuant to a “cashless exercise” with a third party who provides financing for the purposes of (or who otherwise facilitates) the purchase or exercise of awards; or

(c) As permitted by the Company in its sole discretion, (i) by delivery of already-owned shares of Common Stock either that you have held for the period required to avoid a charge to the Company’s reported earnings or that you did not acquire, directly or indirectly from the Company, that are owned free and clear of any liens, claims, encumbrances or security interests, and that are valued at fair market value on the date of exercise (as determined under the Plan), or (ii) a reduction in the number of shares of Common Stock otherwise deliverable to you (valued at their fair market value on the exercise date, as determined under the Plan) pursuant to the exercise of the option. “Delivery” for these purposes, in the sole

discretion of the Company at the time your option is exercised, shall include delivery to the Company of your attestation of ownership of such shares of Common Stock in a form approved by the Company. Notwithstanding the foregoing, your option may not be exercised by tender to the Company of Common Stock to the extent such tender would constitute a violation of the provisions of any law, regulation or agreement restricting the redemption of the Company's stock.

5. SECURITIES LAW COMPLIANCE. Notwithstanding anything to the contrary contained herein, your option may not be exercised unless the shares issuable upon exercise of your option are then registered under the Securities Act or, if such shares are not then so registered, the Company has determined that such exercise and issuance would be exempt from the registration requirements of the Securities Act. The exercise of your option must also comply with other applicable laws and regulations governing the option, and the option may not be exercised if the Company determines that the exercise would not be in material compliance with such laws and regulations.

6. TERM. The term of your option commences on the Date of Grant and expires upon the *earliest* of the following:

(a) three (3) months after the termination of your Continuous Service for any reason other than death or Disability, provided that (i) if during any part of such three (3)-month period the option is not exercisable solely because of the condition set forth in Section 5, the option shall not expire until the earlier of the Expiration Date indicated on the Option Notice or until it shall have been exercisable for an aggregate period of three (3) months after the termination of your Continuous Service, and (ii) if (x) you are a Non-Exempt Employee, (y) you terminate your Continuous Service within six (6) months after the Date of Grant specified in your Option Notice, and (z) you have vested in a portion of your option at the time of your termination of Continuous Service, your option shall not expire until the earlier of (A) the later of the date that is seven (7) months after the Date of Grant specified in your Option Notice or the date that is three (3) months after the termination of your Continuous Service or (B) the Expiration Date;

(b) twelve (12) months after the termination of your Continuous Service due to Disability;

(c) eighteen (18) months after your death if you die either during your Continuous Service or within three (3) months after your Continuous Service terminates for a reason other than death;

(d) the Expiration Date indicated in the Option Notice (which shall not be later than the eighth (8th) anniversary of the Date of Grant); or

(e) the eighth (8th) anniversary of the Date of Grant.

For purposes of the option, "**Disability**" means a "permanent and total disability" within the meaning of Section 22(e)(3) of the Code.

Note, if you are a US taxpayer and your option is an incentive stock option, to obtain the federal income tax advantages associated with an “incentive stock option,” the Code requires that at all times beginning on the Date of Grant of your option and ending on the day three (3) months before the date of your option’s exercise, you must be an employee of the Company or a Subsidiary, except in the event of your death or Disability. The Company has provided for extended exercisability of your option under certain circumstances for your benefit but cannot guarantee that your option will necessarily be treated as an “incentive stock option” if you continue to provide services to the Company or a Subsidiary as a consultant or director after your employment terminates or if you otherwise exercise your option more than three (3) months after the date your employment terminates.

7. EXERCISE.

(a) You may exercise the vested portion of your option during its term by delivering a Notice of Exercise (in a form designated by the Company), or by completion of such other exercise procedures as may be prescribed by the Administrator from time to time, and payment of the exercise price to the Secretary of the Company, or to such other person as the Company may designate, during regular business hours, together with such additional documents as the Company may then require.

(b) By exercising your option you agree that, as a condition to any exercise of your option, the Company may require you to arrange for the payment to the Company of any required tax withholding in connection with such exercise as described in Section 10 below.

(c) If your option is an incentive stock option, by exercising your option you agree that you will notify the Company in writing within fifteen (15) days after the date of any disposition of any of the shares of the Common Stock issued upon exercise of your option that occurs within two (2) years after the date of your option grant or within one (1) year after such shares of Common Stock are transferred upon exercise of your option.

8. TRANSFERABILITY. Your option is not transferable, except by will or by the laws of descent and distribution, and is exercisable during your life only by you.

9. OPTION NOT A SERVICE CONTRACT. Your option is not an employment or service contract, and nothing in your option shall be deemed to create in any way whatsoever any obligation on your part to continue in the employ or service of the Company or a Subsidiary, or of the Company or a Subsidiary to continue your employment or service. In addition, nothing in your option shall obligate the Company or any Subsidiary, their respective shareholders, boards of directors, officers or employees to continue any relationship that you might have as a director or consultant for the Company or any Subsidiary.

10. TAX OBLIGATIONS.

(a) You are responsible for satisfaction of all federal, state, local and foreign tax withholding obligations of the Company and its Subsidiaries, if any, which arise in connection with the option, including, without limitation, obligations arising upon (i) the exercise, in whole

or in part, of the option, (ii) the transfer, in whole or in part, of any shares acquired upon exercise of the option, (iii) the operation of any law or regulation providing for the imputation of interest, or (iv) the lapsing of any restriction with respect to any shares acquired upon exercise of the option. No shares of Common Stock will be issued until the Company has received a definitive agreement or other documentation satisfactory to the Company, in its sole discretion, that all such obligations have been or will be satisfied by you. Regardless of whether the Company properly withholds the full amount of such obligations, you hereby acknowledge and agree that all such obligations shall transfer in their entirety from the Company to you and that such liability shall be ultimately your responsibility and liability.

(b) You hereby authorize the Company or any of its Subsidiaries to withhold from payroll and any other amounts payable to you and otherwise agree to make adequate provision for any sums required to satisfy the federal, state, local and foreign tax obligations, if any, of the Company or any of its Subsidiaries arising in connection with the option. In the event that the Company determines that the tax obligations will not be satisfied by the method described above, you authorize the Company's designated third party plan administrator (i.e. E*Trade or such successor third party administrator as the Company may designate from time to time), to sell a number of shares of Common Stock that are exercised under the option, which the Company determines is sufficient to generate an amount that meets the tax obligations plus additional shares, as necessary, to account for rounding and market fluctuations, and to pay such tax withholding amounts to the Company. The shares of Common Stock may be sold as part of a block trade with other participants of the Plan in which all participants receive an average price. Any adverse consequences to you resulting from the procedure permitted under this Section 10, including, without limitation, tax consequences and any loss of prospective stock appreciation, shall be your sole responsibility and there shall be no liability to the Company for any adverse consequences of any nature whatsoever.

(c) The Company may, in its discretion, permit or require you to satisfy all or any portion of the tax withholding obligations described in this Section 10 by deducting from the shares of Common Stock otherwise deliverable to you in settlement of the option a number of shares of Common Stock having a fair market value, as determined by the Company as of the date on which the tax obligations arise, not in excess of the minimum amount of such tax obligations determined by the applicable withholding rates.

(d) You hereby acknowledge that you understand that you may suffer adverse tax consequences as a result of the exercise of the option or disposition of the shares. You hereby represent that you have consulted with any tax consultants the you deem advisable in connection with the exercise of the option or disposition of the shares and that you are not relying on the Company for any tax advice.

11. EMPLOYMENT CONDITIONS. In accepting the option, you acknowledge that:

(a) Any notice period mandated under any applicable laws shall not be treated as service for the purpose of determining the vesting of the option; and your right to receive shares of Common Stock in settlement of the option after termination as an employee, if any, will be

measured by the date of your termination as an employee and will not be extended by any notice period mandated under the applicable law. Subject to the foregoing and the provisions of the Plan, the Company, in its sole discretion, shall determine whether your status as an employee or other service-provider has terminated and the effective date of such termination.

(b) The vesting of the option shall cease upon, and no portion of the option shall become vested following, your termination as an employee or other service-provider for any reason except as may be explicitly provided by the Plan or this Stock Option Agreement. Unless otherwise provided in the Plan or this Stock Option Agreement, the unvested portion of the option at the time of your termination as an employee or other service-provider will be forfeited.

(c) The Plan is established voluntarily by the Company. It is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time, subject to Section 8.6.5 of the Plan.

(d) The grant of the option is voluntary and occasional and does not create any contractual or other right to receive future grants of options, or benefits in lieu of options, even if options have been granted repeatedly in the past.

(e) All decisions with respect to future option grants, if any, will be at the sole discretion of the Company.

(f) You are voluntarily participating in the Plan.

(g) The option is an extraordinary item that does not constitute compensation of any kind for service rendered to the Company (or any Subsidiary), and which is outside the scope of your employment contract, if any. In addition, the option is not part of normal or expected compensation or salary for any purpose, including, but not limited to, calculating any severance, resignation, termination, redundancy, end-of-service payments, bonuses, long-service awards, pension or retirement benefits or similar payments.

(h) The future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty. If you obtain shares upon settlement of the option, the value of those shares may increase or decrease.

(i) No claim or entitlement to compensation or damages arises from termination of the option or diminution in value of the option or shares of the Common Stock acquired upon settlement of the option resulting from your termination of employment or service (for any reason whether or not in breach of the local law) and you irrevocably release the Company and each Subsidiary from any such claim that may arise. If, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen then, by signing this Stock Option Agreement, you shall be deemed irrevocably to have waived your entitlement to pursue such a claim.

12. GENERAL PROVISIONS.

(a) Successors and Assigns. Except as provided herein to the contrary, this Stock Option Agreement shall be binding upon and inure to the benefit of the parties to this Stock Option Agreement, their respective successors and permitted assigns.

(b) No Assignment. Except as otherwise provided in this Stock Option Agreement, you shall not assign any of your under this Stock Option Agreement without the prior written consent of the Company, which consent may be withheld in its sole discretion. The Company shall be permitted to assign its rights or obligations under this Stock Option Agreement, but no such assignment shall release the Company of any obligations pursuant to this Stock Option Agreement.

(c) Severability. The validity, legality or enforceability of the remainder of this Stock Option Agreement shall not be affected even if one or more of the provisions of this Stock Option Agreement shall be held to be invalid, illegal or unenforceable in any respect.

(d) Administration. Any determination by the Administrator in connection with any question or issue arising under the Plan or this Stock Option Agreement shall be final, conclusive, and binding on you, the Company, and all other persons.

(e) Headings. The section headings in this Stock Option Agreement are inserted only as a matter of convenience, and in no way define, limit or interpret the scope of this Stock Option Agreement or of any particular section.

(f) Delivery of Documents and Notices. Any document relating to participation in the Plan, or any notice required or permitted hereunder shall be given in writing and shall be deemed effectively given (except to the extent that this Stock Option Agreement provides for effectiveness only upon actual receipt of such notice) upon personal delivery through electronic delivery at the e-mail address, if any, provided for you by the Company, or, upon deposit in the local postal service, by registered or certified mail, or with a nationally recognized overnight courier service with postage and fees prepaid, addressed to the other party at the address of such party set forth in this Stock Option Agreement or at such other address as such party may designate in writing from time to time to the other party.

(i) Description of Electronic Delivery. The Plan documents, which may include but do not necessarily include: the Plan, the Option Notice, this Stock Option Agreement, and any reports of the Company provided generally to the Company's shareholders, may be delivered to you electronically. In addition, if permitted by the Company, you may deliver electronically this Stock Option Agreement and Exercise Notice called for by Section 7(a) to the Company or to such third party involved in administering the Plan as the Company may designate from time to time. Such means of electronic delivery may include but do not necessarily include the delivery of a link to a Company intranet or the internet site of a third party involved in administering the Plan, the delivery of the document via e-mail or such other means of electronic delivery specified by the Company.

(ii) Consent to Electronic Delivery. You acknowledge that you have read Section 12(f)(i) of this Stock Option Agreement and consent to the electronic delivery of the Plan documents and, if permitted by the Company, the delivery of this Stock Option Agreement

and exercise notice, as described in Section 12(f)(i) You acknowledge that you may receive from the Company a paper copy of any documents delivered electronically at no cost to you by contacting the Company by telephone or in writing. You further acknowledge that you will be provided with a paper copy of any documents if the attempted electronic delivery of such documents fails. Similarly, you understand that you must provide the Company or any designated third party administrator with a paper copy of any documents if the attempted electronic delivery of such documents fails. You may revoke your consent to the electronic delivery of documents described in Section 12(f)(i) or may change the electronic mail address to which such documents are to be delivered (if you have provided an electronic mail address) at any time by notifying the Company of such revoked consent or revised e-mail address by telephone, postal service or electronic mail. Finally, you understand that you are not required to consent to electronic delivery of documents described in Section 12(f)(i).

13. GOVERNING PLAN DOCUMENT. Your option is subject to all the provisions of the Plan, the provisions of which are hereby made a part of your option, and is further subject to all interpretations, amendments, rules and regulations which may from time to time be promulgated and adopted pursuant to the Plan. In the event of any conflict between the provisions of your option and those of the Plan, the provisions of the Plan shall control. This Stock Option Agreement is governed by the laws of the State of Delaware.

14. CLAWBACK POLICY. Your option is subject to the terms of the Company's recoupment, clawback or similar policy as it may be in effect from time to time, as well as any similar provisions of applicable law, any of which could in certain circumstances require forfeiture of the option and repayment or forfeiture of any shares of Common Stock or other cash or property received with respect to the option (including any value received from a disposition of the shares acquired upon exercise of the option).

**NEKTAR THERAPEUTICS
2012 PERFORMANCE INCENTIVE PLAN**

**STOCK OPTION AGREEMENT
(NON-EMPLOYEE DIRECTORS)**

Pursuant to the Stock Option Grant Notice, which may be in such form (including electronic form) as prescribed by the Administrator from time to time (“**Option Notice**”), and this Stock Option Agreement, Nektar Therapeutics (the “**Company**”) has granted you an option under its 2012 Performance Incentive Plan (the “**Plan**”) to purchase the number of shares of the Company’s Common Stock indicated in the Option Notice at the exercise price indicated in the Option Notice. Defined terms not explicitly defined in this Stock Option Agreement but defined in the Plan shall have the same definitions as in the Plan.

The details of your option are as follows:

1. VESTING. Subject to the limitations contained herein, your option will vest as provided in the Option Notice, provided that vesting will cease upon the termination of your continuous employment or service with the Company or any of its Subsidiaries (your “**Continuous Service**”). Notwithstanding the foregoing, in the event your Continuous Service is terminated as a result of your death, your option shall become fully vested and exercisable as of the date of such termination.

2. NUMBER OF SHARES AND EXERCISE PRICE. The number of shares subject to your option and your exercise price per share referenced in the Option Notice may be adjusted from time to time for capitalization adjustments, as provided in the Plan.

3. METHOD OF PAYMENT. Payment of the exercise price is due in full upon exercise of all or any part of your option. You may elect to make payment of the exercise price in one or more of the following forms:

(a) In cash or by check;

(b) Provided that at the time of exercise the Common Stock is publicly traded on a nationally recognized stock exchange, and as may be permitted by the Company in its sole discretion and subject to such procedures as the Administrator may adopt, pursuant to a “cashless exercise” with a third party who provides financing for the purposes of (or who otherwise facilitates) the purchase or exercise of awards; or

(c) As permitted by the Company in its sole discretion, by (i) delivery of already-owned shares of Common Stock either that you have held for the period required to avoid a charge to the Company’s reported earnings or that you did not acquire, directly or indirectly from the Company, that are owned free and clear of any liens, claims, encumbrances or security interests, and that are valued at fair market value on the date of exercise (as determined under the Plan), or (ii) a reduction in the number of shares of Common Stock

otherwise deliverable to you (valued at their fair market value on the exercise date, as determined under the Plan) pursuant to the exercise of the option. "Delivery" for these purposes, in the sole discretion of the Company at the time your option is exercised, shall include delivery to the Company of your attestation of ownership of such shares of Common Stock in a form approved by the Company. Notwithstanding the foregoing, your option may not be exercised by tender to the Company of Common Stock to the extent such tender would constitute a violation of the provisions of any law, regulation or agreement restricting the redemption of the Company's stock.

4. SECURITIES LAW COMPLIANCE. Notwithstanding anything to the contrary contained herein, your option may not be exercised unless the shares issuable upon exercise of your option are then registered under the Securities Act or, if such shares are not then so registered, the Company has determined that such exercise and issuance would be exempt from the registration requirements of the Securities Act. The exercise of your option must also comply with other applicable laws and regulations governing the option, and the option may not be exercised if the Company determines that the exercise would not be in material compliance with such laws and regulations.

5. TERM. The term of your option commences on the Date of Grant and expires upon the *earliest* of the following:

(a) eighteen (18) months after the termination of your Continuous Service for any reason other than death or Disability, provided that if during any part of such eighteen (18)-month period the option is not exercisable solely because of the condition set forth in Section 4, the option shall not expire until the earlier of the Expiration Date indicated on the Option Notice or until it shall have been exercisable for an aggregate period of eighteen (18) months after the termination of your Continuous Service;

(b) eighteen (18) months after the termination of your Continuous Service due to Disability;

(c) eighteen (18) months after your death if you die either during your Continuous Service or within three (3) months after your Continuous Service terminates for a reason other than death;

(d) the Expiration Date indicated in the Option Notice (which shall not be later than the eighth (8th) anniversary of the Date of Grant); or

(e) the eighth (8th) anniversary of the Date of Grant.

For purposes of the option, "*Disability*" means a "permanent and total disability" within the meaning of Section 22(e)(3) of the Code.

6. EXERCISE.

(a) You may exercise the vested portion of your option during its term by delivering a Notice of Exercise (in a form designated by the Company), or by completion of such other exercise procedures as may be prescribed by the Administrator from time to time, and payment of the exercise price to the Secretary of the Company, or to such other person as the Company may designate, during regular business hours, together with such additional documents as the Company may then require.

(b) By exercising your option you agree that, as a condition to any exercise of your option, the Company may require you to arrange for the payment to the Company of any required tax withholding in connection with such exercise as described in Section 9 below.

(c) If your option is an incentive stock option, by exercising your option you agree that you will notify the Company in writing within fifteen (15) days after the date of any disposition of any of the shares of the Common Stock issued upon exercise of your option that occurs within two (2) years after the date of your option grant or within one (1) year after such shares of Common Stock are transferred upon exercise of your option.

7. TRANSFERABILITY. Your option is not transferable, except by will or by the laws of descent and distribution, and is exercisable during your life only by you. Notwithstanding the foregoing, by delivering written notice to the Company, in a form satisfactory to the Company, you may designate a third party who, in the event of your death, shall thereafter be entitled to exercise your option.

8. OPTION NOT A SERVICE CONTRACT. Your option is not an employment or service contract, and nothing in your option shall be deemed to create in any way whatsoever any obligation on your part to continue in the employ or service of the Company or a Subsidiary, or of the Company or a Subsidiary to continue your employment or service. In addition, nothing in your option shall obligate the Company or any Subsidiary, their respective shareholders, boards of directors, officers or employees to continue any relationship that you might have as a director or consultant for the Company or any Subsidiary.

9. TAX OBLIGATIONS.

(a) You are responsible for satisfaction of all federal, state, local and foreign tax withholding obligations of the Company and its Subsidiaries, if any, which arise in connection with the option, including, without limitation, obligations arising upon (i) the exercise, in whole or in part, of the option, (ii) the transfer, in whole or in part, of any shares acquired upon exercise of the option, (iii) the operation of any law or regulation providing for the imputation of interest, or (iv) the lapsing of any restriction with respect to any shares acquired upon exercise of the option. No shares of Common Stock will be issued until the Company has received a definitive agreement or other documentation satisfactory to the Company, in its sole discretion, that all such obligations have been or will be satisfied by you. Regardless of whether the Company properly withholds the full amount of such obligations, you hereby acknowledge and agree that all such obligations shall transfer in their entirety from the Company to you and that such liability shall be ultimately your responsibility and liability.

(b) You hereby authorize the Company or any of its Subsidiaries to withhold from payroll and any other amounts payable to you and otherwise agree to make adequate provision for any sums required to satisfy the federal, state, local and foreign tax obligations, if any, of the Company or any of its Subsidiaries arising in connection with the option. In the event that the Company determines that the tax obligations will not be satisfied by the method described above, you authorize the Company's designated third party plan administrator (i.e. E*Trade or such successor third party administrator as the Company may designate from time to time), to sell a number of shares of Common Stock that are exercised under the option, which the Company determines is sufficient to generate an amount that meets the tax obligations plus additional shares, as necessary, to account for rounding and market fluctuations, and to pay such tax withholding amounts to the Company. The shares of Common Stock may be sold as part of a block trade with other participants of the Plan in which all participants receive an average price. Any adverse consequences to you resulting from the procedure permitted under this Section 9, including, without limitation, tax consequences and any loss of prospective stock appreciation, shall be your sole responsibility and there shall be no liability to the Company for any adverse consequences of any nature whatsoever.

(c) The Company may, in its discretion, permit or require you to satisfy all or any portion of the tax withholding obligations described in this Section 9 by deducting from the shares of Common Stock otherwise deliverable to you in settlement of the option a number of shares of Common Stock having a fair market value, as determined by the Company as of the date on which the tax obligations arise, not in excess of the minimum amount of such tax obligations determined by the applicable withholding rates.

(d) You hereby acknowledge that you understand that you may suffer adverse tax consequences as a result of the exercise of the option or disposition of the shares. You hereby represent that you have consulted with any tax consultants the you deem advisable in connection with the exercise of the option or disposition of the shares and that you are not relying on the Company for any tax advice.

10. EMPLOYMENT CONDITIONS. In accepting the option, you acknowledge that:

(a) Any notice period mandated under any applicable laws shall not be treated as service for the purpose of determining the vesting of the option; and your right to receive shares of Common Stock in settlement of the option after termination as an employee, if any, will be measured by the date of your termination as an employee and will not be extended by any notice period mandated under the applicable law. Subject to the foregoing and the provisions of the Plan, the Company, in its sole discretion, shall determine whether your status as an employee or other service-provider has terminated and the effective date of such termination.

(b) The vesting of the option shall cease upon, and no portion of the option shall become vested following, your termination as an employee or other service-provider for any reason except as may be explicitly provided by the Plan or this Stock Option Agreement. Unless otherwise provided in the Plan or this Stock Option Agreement, the unvested portion of the option at the time of your termination as an employee or other service-provider will be forfeited.

(c) The Plan is established voluntarily by the Company. It is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time, subject to Section 8.6.5 of the Plan.

(d) The grant of the option is voluntary and occasional and does not create any contractual or other right to receive future grants of options, or benefits in lieu of options, even if options have been granted repeatedly in the past.

(e) All decisions with respect to future option grants, if any, will be at the sole discretion of the Company.

(f) You are voluntarily participating in the Plan.

(g) The option is an extraordinary item that does not constitute compensation of any kind for service rendered to the Company (or any Subsidiary), and which is outside the scope of your employment contract, if any. In addition, the option is not part of normal or expected compensation or salary for any purpose, including, but not limited to, calculating any severance, resignation, termination, redundancy, end-of-service payments, bonuses, long-service awards, pension or retirement benefits or similar payments.

(h) The future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty. If you obtain shares upon settlement of the option, the value of those shares may increase or decrease.

(i) No claim or entitlement to compensation or damages arises from termination of the option or diminution in value of the option or shares of Common Stock acquired upon settlement of the option resulting from your termination of employment or service (for any reason whether or not in breach of the local law) and you irrevocably release the Company and each Subsidiary from any such claim that may arise. If, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen then, by signing this Stock Option Agreement, you shall be deemed irrevocably to have waived your entitlement to pursue such a claim.

11. GENERAL PROVISIONS.

(a) Successors and Assigns. Except as provided herein to the contrary, this Stock Option Agreement shall be binding upon and inure to the benefit of the parties to this Stock Option Agreement, their respective successors and permitted assigns.

(b) No Assignment. Except as otherwise provided in this Stock Option Agreement, you shall not assign any of your under this Stock Option Agreement without the prior written consent of the Company, which consent may be withheld in its sole discretion. The Company shall be permitted to assign its rights or obligations under this Stock Option Agreement, but no such assignment shall release the Company of any obligations pursuant to this Stock Option Agreement.

(c) Severability. The validity, legality or enforceability of the remainder of this Stock Option Agreement shall not be affected even if one or more of the provisions of this Stock Option Agreement shall be held to be invalid, illegal or unenforceable in any respect.

(d) Administration. Any determination by the Administrator in connection with any question or issue arising under the Plan or this Stock Option Agreement shall be final, conclusive, and binding on you, the Company, and all other persons.

(e) Headings. The section headings in this Stock Option Agreement are inserted only as a matter of convenience, and in no way define, limit or interpret the scope of this Stock Option Agreement or of any particular section.

(f) Delivery of Documents and Notices. Any document relating to participation in the Plan, or any notice required or permitted hereunder shall be given in writing and shall be deemed effectively given (except to the extent that this Stock Option Agreement provides for effectiveness only upon actual receipt of such notice) upon personal delivery through electronic delivery at the e-mail address, if any, provided for you by the Company, or, upon deposit in the local postal service, by registered or certified mail, or with a nationally recognized overnight courier service with postage and fees prepaid, addressed to the other party at the address of such party set forth in this Stock Option Agreement or at such other address as such party may designate in writing from time to time to the other party.

(i) Description of Electronic Delivery. The Plan documents, which may include but do not necessarily include: the Plan, the Option Notice, this Stock Option Agreement, and any reports of the Company provided generally to the Company's shareholders, may be delivered to you electronically. In addition, if permitted by the Company, you may deliver electronically this Stock Option Agreement and Exercise Notice called for by Section 6(a) to the Company or to such third party involved in administering the Plan as the Company may designate from time to time. Such means of electronic delivery may include but do not necessarily include the delivery of a link to a Company intranet or the internet site of a third party involved in administering the Plan, the delivery of the document via e-mail or such other means of electronic delivery specified by the Company.

(ii) Consent to Electronic Delivery. You acknowledge that you have read Section 11(f)(i) of this Stock Option Agreement and consent to the electronic delivery of the Plan documents and, if permitted by the Company, the delivery of this Stock Option Agreement and exercise notice, as described in Section 11(f)(i). You acknowledge that you may receive from the Company a paper copy of any documents delivered electronically at no cost to you by contacting the Company by telephone or in writing. You further acknowledge that you will be provided with a paper copy of any documents if the attempted electronic delivery of such documents fails. Similarly, you understand that you must provide the Company or any designated third party administrator with a paper copy of any documents if the attempted electronic delivery of such documents fails. You may revoke your consent to the electronic delivery of documents described in Section 11(f)(i) or may change the electronic mail address to which such documents are to be delivered (if you have provided an electronic mail address) at any time by notifying the Company of such revoked consent or revised e-mail address by telephone, postal service or electronic mail. Finally, you understand that you are not required to consent to electronic delivery of documents described in Section 11(f)(i).

12. GOVERNING PLAN DOCUMENT. Your option is subject to all the provisions of the Plan, the provisions of which are hereby made a part of your option, and is further subject to all interpretations, amendments, rules and regulations which may from time to time be promulgated and adopted pursuant to the Plan. In the event of any conflict between the provisions of your option and those of the Plan, the provisions of the Plan shall control. This Stock Option Agreement is governed by the laws of the State of Delaware.

13. CLAWBACK POLICY. Your option is subject to the terms of the Company's recoupment, clawback or similar policy as it may be in effect from time to time, as well as any similar provisions of applicable law, any of which could in certain circumstances require forfeiture of the option and repayment or forfeiture of any shares of Common Stock or other cash or property received with respect to the option (including any value received from a disposition of the shares acquired upon exercise of the option).

**AMENDED AND RESTATED
COMPENSATION PLAN FOR NON-EMPLOYEE DIRECTORS**

This is the Compensation Plan (the "Plan") for Non-Employee Directors (each a "Non-Employee Director") of Nektar Therapeutics (the "Company"). This Plan was most recently amended and restated by the Board of Directors on February 6, 2013 and made effective as of January 1, 2013. The terms and conditions of the Plan are described below:

- An annual retainer of \$30,000 for serving on the Board of Directors, payable in equal quarterly installments (the "Annual Retainer");
- An additional annual retainer of \$50,000 for serving as the Chair or Lead Director of the Board of Directors, payable in quarterly installments;
- An annual retainer of \$20,000 for serving as the Chair of the Company's Audit Committee, payable in equal quarterly installments;
- An annual retainer of \$15,000 for serving as Chair of the Company's Compensation Committee, payable in equal quarterly installments;
- An annual retainer of \$10,000 for serving as Chair of the Company's Nominating/Governance Committee, payable in equal quarterly installments;
- An annual retainer of \$5,000 for serving as Chair of any other committee established by the Board of Directors, payable in equal quarterly installments;
- Each Non-Employee Director shall receive \$2,000 for attending each in-person or telephonic board meeting. Each Non-Employee Director shall receive \$1,000 for each in-person board meeting attended via conference telephone.
- Each Non-Employee Director shall receive \$1,750 for attending a each in person or telephonic committee meeting. Each Non-Employee Director shall receive \$875 for each in-person committee meeting attended via conference telephone.

- Each Non-Employee Director shall be reimbursed for customary expenses for attending Board of Director, committee and stockholder meetings;
- Upon initial appointment to the Board of Directors, each Non-Employee Director shall be awarded equity compensation composed of stock options and/or restricted stock units under the Company's equity incentive plans. This initial appointment equity compensation award will be based on one hundred and fifty percent (150%) of the annual equity compensation grant, as determined annually by the Board of Directors in consultation with its professional advisors. For purposes of the foregoing, the value of stock options will be determined based on the Black-Scholes valuation methodology and the value of restricted stock units will be based on the value of the Company's common stock on the grant date;
- In September of each year, each Non-Employee Director shall be awarded equity compensation composed of stock options and/or restricted stock units under the Company's equity incentive plans. This annual equity compensation award will be based on a review of equity compensation for non-employee directors of comparable companies as determined by the Board of Directors in consultation with its professional advisors. For purposes of the foregoing, the value of stock options will be determined based on the Black-Scholes valuation methodology and the value of restricted stock units will be based on the value of the Company's common stock on the grant date. If any Non-Employee Director is appointed following the annual grant of equity compensation, he or she will also be entitled to a pro-rata portion of the most recent annual grant of equity compensation awarded by the Board of Directors; and
- Non-Employee Directors are also eligible for discretionary grants of options or restricted stock units under the Company's equity incentive plans.

Options granted to a Non-Employee Director for their annual service on the Board of Directors shall vest monthly over a period of one year. Restricted stock unit awards granted to a Non-Employee Director for their annual service shall vest monthly over a period of one year. Options granted to a Non-Employee Director for their initial appointment to the Board of Directors shall vest monthly over a period of three years. Restricted stock unit awards granted to a Non-Employee Director for their initial appointment shall vest monthly over a period of three years. The exercise price of options granted to Non-Employee Directors shall be equal to 100% of the fair market value of the Company's common stock on the grant date. Following completion of a Non-Employee Director's service on the Board of Directors, his or her stock options will remain exercisable for a period of eighteen months. The term of options granted to a Non-

Employee Director is eight years. All restricted stock units that are awarded under this Plan may only be delivered to the non-employee director upon either the earlier of (i) the completion of the entire vesting period to which the restricted stock unit award relates, or (ii) the termination of the Non-Employee Director's service, and in no event at any earlier date or upon the election or request of a Non-Employee Director at any other alternative date. In the event of a change of control, the vesting of each option or restricted stock unit award shall accelerate in full as of the closing of such transaction.

Ownership Guidelines

The Board of Directors of the Company believes that Non-Employee Directors should own and hold common stock of the Company to further align their interests and actions with the interests of the Company's stockholders.

Non-Employee Directors of the Company should own shares of Nektar's common stock equivalent to at least three times the value of the Annual Retainer. The minimum stock ownership level should be achieved by each Non-Employee Director by January 1, 2015 or within five years of his or her first appointment to the Board of Directors. Any change in the value of the stock (such as a stock split, stock dividend, recapitalization, etc.) will not affect the amount of stock Non-Employee Directors must hold. Once achieved, ownership of the guideline amount should be maintained as long as the Non-Employee Director retains his or her seat on the Board.

Stock that counts towards satisfaction of these guidelines include:

- Stock purchased on the open market;
- Stock obtained through stock option exercises;
- Stock issued pursuant to the vesting of restricted stock units;
- Stock beneficially owned in a trust, by a spouse and/or children; and
- Other equity vehicles such as deferred stock units that may be implemented from time to time.

These ownership guidelines are non-binding. There may be rare instances where these guidelines would place a severe hardship on a Non-Employee Director. In these cases, the Board will make the final decision as to developing an alternative stock ownership guideline for a Non-Employee Director that reflects the intention of these guidelines and his or her personal circumstances.

PLEDGE AND SECURITY AGREEMENT

THIS PLEDGE AND SECURITY AGREEMENT (this "Agreement") is made as of July 11, 2012, by Nektar Therapeutics, a corporation organized under the laws of the State of Delaware (the "Company"), and the subsidiaries of the Company that become guarantors hereunder pursuant to Section 10(o) hereof (together with the Company, the "Grantors" and each one a "Grantor"), whose principal place of business and chief executive office (as those terms are used in the Uniform Commercial Code of the State of New York (the "New York UCC")) are set forth beneath their corresponding signature pages hereto, in favor of Wells Fargo Bank, National Association, not in its individual capacity but solely as collateral agent (together with its successors and assigns, in such capacity "Collateral Agent"), for the benefit of the Secured Parties (as hereinafter defined), the Notes, the Note Guarantees and all other Obligations under the other Indenture Documents. The Grantors hereby agree with Collateral Agent as follows:

1. Definitions.

(a) Except as specifically defined in this Agreement, (i) capitalized terms used but not defined in this Agreement that are defined in the Indenture shall have their respective meanings ascribed to them in the Indenture, and the principles of construction and interpretation provided in Section 1.04 of the Indenture shall be incorporated herein by reference and (ii) all terms used but not defined in this Agreement and defined in the New York UCC, including the terms accessions, account debtor, certificated security, chattel paper, clearing corporation, commercial tort claim, deposit account, document, electronic chattel paper, equipment, financial asset, fixtures, goods, inventory, instrument, investment property, letter-of-credit rights, payment intangibles, proceeds, securities accounts, securities intermediary, security, security entitlement, software, supporting obligations, tangible chattel paper and uncertificated security, shall have the meaning given therein or unless the context provides otherwise.

(b) As used in this Agreement, the following terms shall have the meanings indicated below:

"Accounts" shall mean and include as to each Grantor, all of such Grantor's "accounts" as defined in the UCC, whether now owned or hereafter acquired including, without limitation all present and future rights of such Grantor to payment of a monetary obligation, whether or not earned by performance, which is not evidenced by chattel paper or an instrument, (i) for property that has been or is to be sold, leased, licensed, assigned, or otherwise disposed of, (ii) for services rendered or to be rendered, (iii) for a secondary obligation incurred or to be incurred, or (iv) arising out of the use of a credit or charge card or information contained on or for use with any such card.

"Cash Collateral Account" is defined in Section 4(e).

"Cash Reserve Account" shall mean the deposit account established on the date hereof pursuant to the Escrow Agreement.

“Collateral” shall mean all tangible and intangible property of each Grantor, all personal and real property of each Grantor, all movable and immovable property of each Grantor, in each case whether now owned or hereafter acquired and wherever located, including, but not limited to, the following of each Grantor:

- (c) all Accounts;
- (d) all certificated securities and uncertificated securities;
- (e) all chattel paper, including electronic chattel paper;
- (f) all Computer Hardware and Software and all rights with respect thereto, including, any and all licenses, options, warranties, service contracts, program services, test rights, maintenance rights, supporting information, improvement rights, renewal rights and indemnifications, and any substitutions, replacements, additions or model conversions of any of the foregoing;
- (g) all Contract Rights;
- (h) all commercial tort claims, (including, without limitation any commercial tort claims from time to time described on Schedule 3 (as such Schedule 3 may from time to time be updated));
- (i) all deposit accounts, including the Cash Reserve Account;
- (j) all documents;
- (k) all financial assets;
- (l) all General Intangibles, including payment intangibles and software;
- (m) all goods (including all Equipment and Inventory), and all embedded software, accessions, additions, attachments, improvements, substitutions and replacements thereto and therefor;
- (n) all instruments;
- (o) all Intellectual Property;
- (p) all Investment Property;
- (q) all of the Capital Stock of each Subsidiary that is owned directly by the Company or a Grantor, including, without limitation, any shares, membership interests, Partnership Interests, Limited Liability Company Interests or other equity interests set forth on Schedule 1 hereto (the “Pledged Securities”);
- (r) all leasehold interests;

- (s) all cash, cash equivalents or other money;
- (t) all letter-of-credit rights;
- (u) all supporting obligations; and
- (v) all books, records, writings, data bases, information and other property relating to, used or useful in connection with, or evidencing, embodying, incorporating or referring to any of the foregoing, and all proceeds, products, offspring, rents, issues, profits and returns of and from any of the foregoing;

provided, however, that, no Excluded Assets shall be included in the Collateral.

“Collateral Documents” means, collectively, this Agreement, the Escrow Agreement, each Mortgage, collateral assignment, control agreement and any other related agreement, document or instrument pursuant to which a Lien is granted by a Grantor to secure any Indenture Obligations or under which rights or remedies with respect to any such Lien are governed, (including, without limitation, financing statements under the UCC of the relevant states and filings concerning intellectual property to be made with appropriate governmental agencies), in each case, as the same may be amended, supplemented, restated, renewed, replaced or otherwise modified from time to time.

“Computer Hardware and Software” shall mean all of each Grantor’s rights (including rights as licensee and lessee) with respect to (a) computer and other electronic data processing hardware, including all integrated computer systems, central processing units, memory units, display terminals, printers, computer elements, card readers, tape drives, hard and soft disk drives, cables, electrical supply hardware, generators, power equalizers, accessories, peripheral devices and other related computer hardware; (b) all software and all software programs designed for use on the computers and electronic data processing hardware described in clause (a) above, including all operating system software, utilities and application programs in whatsoever form (source code and object code in magnetic tape, disk or hard copy format or any other listings whatsoever); (c) any firmware associated with any of the foregoing; and (d) any documentation for hardware, software and firmware described in clauses (a), (b) and (c) above, including flow charts, logic diagrams, manuals, specifications, training materials, charts and pseudo codes. For the avoidance of doubt, this definition includes all outsourced information technology functions and relationships.

“Contract Right” shall mean any right of each Grantor to payment under a contract for the sale or lease of goods, the rendering of services or the licensing of any Intellectual Property, which right is at the time not yet earned by performance.

“Contracts” shall mean all contracts between any Grantor and one or more additional parties (including any license, manufacturing, supply, technology transfer, asset sale, partnership, joint venture, and limited liability company agreements).

“Copyrights” shall mean all of each Grantor’s now existing or hereafter acquired right, title, and interest in and to all of such Grantor’s copyrights, rights to any works of authorship or other copyrightable subject material and all applications for registration, registrations and recordings relating to the foregoing as may at any time be filed in the United States Copyright Office or in any similar office or agency in the United States of America, any State thereof, any political subdivision thereof or in any other country together with all rights and privileges arising under applicable law with respect to such Grantor’s use of any copyrights and all reissues, divisions, continuations and renewals thereof, including the right to sue and recover damages for past, present and future infringements of any of the foregoing.

“Domain Names” shall mean all Internet domain names and associated uniform resource locator addresses.

“Equipment” shall mean and include as to each Grantor, all of such Grantor’s, whether now owned or hereafter acquired and wherever located equipment, machinery, apparatus, motor vehicles, fittings, furniture, furnishings, fixtures, parts, accessories, and all other goods (other than Inventory) and all replacements and substitutions therefor or accessions thereto.

“Escrow Agreement” shall mean the Escrow and Deposit Account Control Agreement dated as of the date hereof among the Issuer, the Collateral Agent and Wells Fargo Bank, National Association, as escrow agent.

“Excluded Assets” shall mean:

(1) the Voting Stock of any direct or indirect Foreign Subsidiary of the Company in excess of 65% of all of the outstanding Voting Stock of such Foreign Subsidiary;

(2) any property or asset, if and only for so long as the grant of a Lien under the Collateral Documents will constitute or result in (i) a breach, termination or default under any lease, license or any agreement governing a Collaboration Transaction or Royalty, in each case to which such property or asset is subject (other than pursuant to any provision of any such lease, license or agreement that would be rendered ineffective pursuant to Section 9-406, 9-407, 9-408 or 9-409 of the UCC of any relevant jurisdiction or any other applicable law or principles of equity), but only to the extent the Collateral Agent has a perfected first priority lien on any payments, proceeds or other consideration received or receivable by the Company or any Restricted Subsidiary in connection with the applicable lease, license, Collaboration Transaction or Royalty Transaction or (ii) a violation of applicable law with respect to such property or asset;

(3) property and assets owned by any Grantor that are the subject (i) of Permitted Liens described in clause (6) of the definition thereof for so long as such Permitted Liens are in effect and the Indebtedness secured thereby constitutes Permitted Debt described in clause (4) of the definition thereof or (b) Permitted Liens described in clause (13) of the definition thereof for so long as such Permitted Liens are in effect and the Indebtedness secured thereby constitutes Permitted Debt described in clause (13) of the definition thereof incurred in respect of a Royalty Transaction, and in each case the agreements or instruments evidencing or governing such Indebtedness otherwise prohibits any other Liens thereon, but only for so long as such prohibition exists and is effective and valid;

(4) (i) deposit and securities accounts the balance of which consists exclusively of (a) withheld income taxes and federal, state or local employment taxes in such amounts as are required to be paid to the Internal Revenue Service or state or local government agencies within the following two months with respect to employees of any Grantor, and (b) amounts required to be paid over to an employee benefit plan pursuant to DOL Reg. Sec. 2510.3-102 on behalf of or for the benefit of employees of any Grantor, (ii) all segregated deposit accounts constituting (and the balance of which consists solely of funds set aside in connection with) tax accounts and trust accounts;

(5) vehicles and other items covered by certificates of title or ownership, in each case, with a Fair Market Value of less than \$1,000,000, to the extent that a security interest cannot be perfected solely by filing a UCC-1 financing statement (or similar instrument);

(6) proceeds and products from any and all of the foregoing excluded collateral described in clauses (1) through (5), unless such proceeds or products would otherwise constitute Collateral securing the Notes.

“Excluded Perfection Assets” shall mean (1) registered Intellectual Property to the extent registered in a country other than the Specified Jurisdictions, (2) leasehold interests in real property, to the extent that a security interest cannot be perfected solely by filing a UCC-1 financing statement (or similar instrument), (3) the land and building known as 490 Discovery Drive in Huntsville, Alabama, and (4) letter-of-credit rights, electronic chattel paper, commercial tort claims, promissory notes, uncertificated securities and deposit accounts and securities accounts with a Fair Market Value, in the aggregate, of less than \$2,000,000, to the extent that a security interest therein cannot be perfected solely by filing a UCC-1 financing statement (or similar instrument).

“General Intangibles” shall mean and include as to each Grantor all of such Grantor’s general intangibles (as such term is defined in the UCC), whether now owned or hereafter acquired including, without limitation, all payment intangibles, choses in action, commercial tort claims, causes of action, corporate

or other business records, inventions, designs, patents, patent applications, equipment formulations, manufacturing procedures, quality control procedures, trademarks, service marks, trade secrets, goodwill, copyrights, design rights, registrations, licenses, franchises, customer lists, tax refunds, tax refund claims, computer programs and computer software, all claims under guaranties, all rights of indemnification and all other intangible property of every kind and nature.

“Indenture” shall mean the Indenture dated as of July 11, 2012, by and among the Company, the other Grantors party thereto, the Trustee and the Collateral Agent, as amended, supplemented or otherwise modified from time to time.

“Indenture Documents” shall mean the Notes, the Indenture, the Note Guarantees and the Collateral Documents.

“Indenture Obligations” shall mean all Obligations in respect of the Notes or arising under the other Indenture Documents.

“Intellectual Property” shall mean, as to each Grantor, such Grantor’s now owned and hereafter arising or acquired: Patents, Copyrights, works which are the subject matter of copyrights, Marks, and designs, and licenses and rights to use any of the foregoing and all applications, registrations and recordings relating to any of the foregoing as may be filed in the United States Copyright Office, the United States Patent and Trademark Office or in any similar office or agency of the United States, any State thereof, any political subdivision thereof or in any other country or jurisdiction, together with all rights and privileges arising under applicable law with respect to any Grantor’s use of any of the foregoing; all extensions, adjustments, renewals, reissues, divisions, continuations, and continuations-in-part of any of the foregoing; all rights to sue for past, present and future infringement of any of the foregoing; inventions, trade secrets, formulae, processes, compounds, drawings, designs, blueprints, surveys, reports, manuals, and operating standards; goodwill (including any goodwill associated with any trademark or service mark, or the license of any trademark or service mark); customer and other lists in whatever form maintained; trade secret rights, Domain Names; software and contract rights relating to computer software programs, in whatever form created or maintained.

“Intellectual Property Rights” shall mean all Copyrights, Marks, and Patents, as well as any right, title, and interest in or to trade secrets and Domain Names.

“Inventory” shall mean and include as to each Grantor, all of such Grantor’s now owned or hereafter acquired inventory (as such term is defined in the UCC), goods, merchandise and other personal property, wherever located, to be furnished under any contract of service or held for sale or lease, all raw materials, work in process, finished goods and materials and supplies of any kind, nature or description which are or might be used or consumed in such Grantor’s business or used in selling or furnishing such goods, merchandise and other personal property, all other inventory of such Grantor, and all documents of title or other documents representing them.

“Investment Property” shall mean any “investment property” as such term is defined in Section 9-102 of the UCC now owned or hereafter acquired by any Grantor, wherever located, including (a) all securities, whether certificated or uncertificated, including stocks, bonds, interests in limited liability companies, partnership interests, treasuries, certificates of deposit, and mutual fund shares; (b) all securities entitlements of any Grantor, including the rights of any Grantor to any securities account and the financial assets held by a securities intermediary in such securities account and any free credit balance or other money owing by any securities intermediary with respect to that account; (c) all securities accounts of any Grantor; (d) all commodity contracts of any Grantor; and (e) all commodity accounts held by any Grantor.

“Limited Liability Company Interests” shall mean the entire limited liability company membership interest at any time owned by any Grantor in any limited liability company.

“Marks” shall mean all of each Grantor’s now existing or hereafter acquired right, title, and interest in and to all of such Grantor’s trademarks, tradenames, trade styles, trade dress, service marks and other protectable indicia of origin and all applications for registration, registrations and recordings relating to the foregoing as may at any time be filed in the United States Patent and Trademark Office, or any similar office or agency in the United States of America, any State thereof, any political subdivision thereof or in any other country, together with all rights and privileges arising under applicable law with respect to such Grantor’s use of any trademarks, tradenames, trade styles and service marks, and all reissues, extensions, continuation and renewals thereof, including the right to sue and recover damages for past, present and future infringements of any of the foregoing.

“New York UCC” is defined in the preamble hereto.

“Offering Memorandum” shall mean the final offering memorandum, dated as of July 3, 2012, relating to the offer and sale of 12.000% Notes due 2017 by the Company.

“Organizational Information” is defined in Section 3(h).

“Partnership Interest” shall mean the entire general partnership interest or limited partnership interest at any time owned by any Grantor in any general partnership or limited partnership.

“Patents” shall mean each of Grantor’s now existing, or hereafter acquired right, title and interest in and to all of such Grantor’s patents and patent applications, including any original, divisional, continuation, continuation-in-part, reissue and reexamination applications or any applications for extension or adjustment of the

term of that patent, as may at any time be filed in the United States Patent and Trademark Office or any similar office or agency in any other country, together with all rights and privileges arising under applicable law with respect to such Grantor's use of any such patents or patent applications, including the right to sue and recover damages for past, present and future infringements of any of the foregoing.

"Pledged Company" means, each Person listed on Schedule 1 hereto as a "Pledged Company", together with each other Person, all or a portion of whose Capital Stock, is acquired or otherwise owned by a Grantor after the Issue Date.

"Pledged Securities" is defined in clause (q) of the definition of "Collateral".

"Real Property" shall mean all of each Grantor's right, title and interest in and to its owned and leased premises.

"Secured Party" shall refer to each of the holders of the Notes, the Trustee and the Collateral Agent.

"Security Agreement Joinder" means a Pledge and Security Agreement Joinder, substantially in the form of the attached Annex E, executed and delivered to the Collateral Agent by a Subsidiary for the purpose of adding an additional Grantor as a party to this Agreement.

"Specified Jurisdictions" means the United States of America, the United Kingdom, France, Germany, Spain, Italy and Japan.

"Termination Date" shall mean the earliest to occur of the date on which (a) all Indenture Obligations (other than unasserted indemnification obligations) have been paid in full in cash; (b) the Company exercises its legal defeasance option or covenant defeasance option described in Article 8 of the Indenture; and (c) the satisfaction and discharge of the Indenture occurs in accordance with Article 8 thereof.

"Trustee" shall refer to Wells Fargo Bank, National Association, in its capacity as indenture trustee under the Indenture.

"UCC" shall mean the Uniform Commercial Code as in effect from time to time in the relevant jurisdiction.

2. Security Interest.

(a) Granting Clause. In consideration of and as collateral security for the prompt full and complete payment and performance when due of the Indenture Obligations now existing or hereafter arising, each Grantor, for value received, does hereby assign, mortgage, pledge and hypothecate to the Collateral Agent, for the benefit of the Secured Parties, and does hereby grant to the Collateral Agent, for the benefit of the Secured Parties, an absolute, unconditional and continuing security interest in all of such Grantor's Collateral.

(b) Voting, etc. Until the occurrence and continuance of a Default or Event of Default, each Grantor shall be entitled to vote any and all of the Capital Stock; provided, however, that no vote shall be cast or any action taken by such Grantor with respect to any Capital Stock which would materially violate any of the terms of this Agreement, the Indenture, any other Indenture Document or which would authorize or effect actions prohibited under the terms of the Indenture or any Indenture Document; and provided further, that the foregoing proviso shall not apply to Capital Stock described in clause (1) of the definition of Excluded Assets. All such rights of such Grantor to vote any Capital Stock (not subject to the provisos in the preceding sentence) shall cease upon written notice of the Collateral Agent delivered after the occurrence and during the continuance of a Default or an Event of Default; provided, however, that upon the cure or waiver of such Default or Event of Default, any rights of the Collateral Agent to vote any and all of the Capital Stock shall cease and all such rights of such Grantor to vote any and all of the Capital Stock shall resume.

(c) Payments and Other Distributions. Until the occurrence and continuance of a Default or Event of Default, all cash, dividends or distributions payable in respect of the Capital Stock (to the extent such payments shall be permitted pursuant to the terms and provisions of the Indenture) shall be paid to the applicable Grantor; provided, however, that upon written notice of the Collateral Agent (at the direction of the holders of the Notes) delivered after the occurrence and during the continuance of a Default or Event of Default, all cash dividends or distributions payable in respect of the Capital Stock shall be paid to the Collateral Agent as security for the Indenture Obligations; provided, further that upon the cure or waiver of such Default or Event of Default, all cash dividends or distributions payable in respect of the Capital Stock shall be paid to such Grantor. The Collateral Agent shall be entitled to receive directly, and to retain as part of the Collateral:

(i) all other or additional securities or Investment Property, or rights to subscribe for or purchase any of the foregoing, or property (other than cash) paid or distributed by way of dividend in respect of the Capital Stock; and

(ii) all other or additional securities, Investment Property or property (other than cash) paid or distributed in respect of the Capital Stock by way of split, spin-off, split-up, reclassification, combination of shares or similar rearrangement.

If at any time any Grantor shall obtain or possess any Capital Stock, such Grantor shall be deemed to hold such Capital Stock in trust for the Collateral Agent for the benefit of the Collateral Agent and the other Secured Parties, and such Grantor shall promptly surrender and deliver such Capital Stock to the Collateral Agent; provided, that the foregoing shall not apply to Capital Stock described in clause (1) of the definition of Excluded Assets.

3. *Representations, Warranties and Agreements.* In addition to any representations and warranties of any Grantor set forth in the Indenture Documents, which are incorporated herein by this reference, each Grantor hereby represents and warrants the following to the Collateral Agent:

(a) Authority. The execution, delivery and performance of this Agreement have been duly authorized by all necessary action of such Grantor.

(b) Accuracy of Information. The exact legal name of such Grantor is correctly shown on the signature pages hereof.

(c) Enforceability. This Agreement is the legal, valid and binding obligations of such Grantor, enforceable in accordance with their respective terms, except as limited by bankruptcy, insolvency or similar laws of general application relating to the enforcement of creditors' rights and except to the extent specific remedies may generally be limited by equitable principles.

(d) Ownership and Liens.

(i) At the time the Collateral becomes subject to the Collateral Agent's Lien, each Grantor shall be the sole owner of and fully authorized and able to sell, transfer, pledge and/or grant a Lien in each and every item of its respective Collateral to the Collateral Agent; and the Collateral shall be free and clear of all Liens and encumbrances whatsoever other than Permitted Liens;

(ii) All of the Pledged Securities (including, without limitation, the Pledged Securities indicated on Schedule 1) have been (to the extent such concepts are relevant with respect to such Pledged Securities) duly authorized and validly issued, are fully paid and non-assessable and other than in connection with a disposition permitted pursuant to the Indenture, there are no options to purchase or similar rights. Except as set forth on Schedule 1 hereto, such Grantor owns 100% of the issued and outstanding shares of Capital Stock or membership interests, Partnership Interests, Limited Liability Company Interests or other equity interests of each of the direct Subsidiaries of such Grantor, and the Pledged Securities constitute or will constitute the percentage of the issued and outstanding Capital Stock of the Pledged Companies of such Grantor identified on Schedule 1 hereto;

(iii) With respect to all Collateral of each Grantor whereby or with respect to which the Collateral Agent may obtain "control" thereof within the meaning of Section 8-106 of the UCC or under any provision of the UCC as the same may be amended or supplemented from time to time, or under the laws of any relevant State, such Grantor shall take commercially reasonable efforts to provide "control" of such Collateral (other than Excluded Perfection Assets) to the Collateral Agent; provided that with respect to such Collateral in existence as of the date hereof, such Grantor shall have sixty (60) days after the date hereof to take commercially reasonable efforts to provide "control" of such Collateral (other than Excluded Perfection Assets) to the Collateral Agent; and

(iv) Each Grantor represents, warrants, covenants and agrees that (a) the certificated Pledged Securities listed on Schedule 1 are the only equity interests owned by such Grantor which are certificated; and (b) the uncertificated Pledged Securities listed on Schedule 1 are the only equity interests owned by such Grantor which are uncertificated.

(e) Capital Stock.

(i) All of the issued and outstanding shares of Capital Stock, membership interests, Limited Liability Company Interests, Partnership Interests, or other similar equity interests, as applicable, owned by such Grantor have been duly authorized and validly issued, are fully paid and nonassessable and were not issued in violation of, and are not subject to, any preemptive or similar rights. All of the outstanding shares of Capital Stock, membership interests, Limited Liability Company Interests, Partnership Interests, or other similar equity interests of its Subsidiaries are owned directly or indirectly by the Company, free and clear of all Liens other than (A) those imposed by the Securities Act, the rules and regulations of the SEC and the securities or "Blue Sky" laws of certain U.S. state or non-U.S. jurisdictions and (B) those set forth in the corporate organizational documents of the relevant entities. No issuer of Capital Stock is party to any agreement granting "control" (as defined in Section 8-106 of the UCC) of such Grantor's Capital Stock to any third party, except as permitted pursuant to the Indenture Documents. All such Capital Stock is held by such Grantor directly and not through any securities intermediary.

(ii) All Capital Stock owned by each Grantor is and shall be at all times during the term of this Agreement, freely transferrable without restriction or limitation, except as limited (A) by the terms of the Indenture Documents and (B) by foreign laws in connection with the pledge of Capital Stock of issuers organized under the laws of a jurisdiction outside of the United States.

(iii) There are no outstanding options, warrants, convertible securities or other rights, contingent or absolute, to acquire the Capital Stock that is Collateral, and no Capital Stock that is Collateral is subject to any shareholder, voting trust or similar agreement. No consent of any Person is necessary or desirable in connection with the creation or perfection of the security interest in any Capital Stock or the exercise by the Collateral Agent of the voting or other rights and remedies in respect thereof provided for in this Agreement, except as may be required in connection with (A) any disposition by laws affecting the offering and sale of securities generally or (B) the Capital Stock of issuers organized under the laws of a jurisdiction outside the United States.

(f) No Conflicts or Consents. Neither the ownership or intended use of the Collateral by any Grantor, nor the grant of the security interest by each Grantor to the Collateral Agent herein, will (i) materially conflict with any provision of (A) any material federal, state or local law, statute, rule or regulation, (B) any provision of the organizational documents of any of the Grantors, (C) result in a loss or impairment of any Grantor's or its subsidiary's right to use any Intellectual Property to the same extent used prior to the date of this Agreement, or (D) any material agreement, judgment, license, order or permit applicable to or binding upon any of the Grantors, or (ii) result in or require the creation of any lien, charge or encumbrance upon any of

the Collateral except as may be contemplated or permitted in the Indenture Documents. Except as expressly contemplated in the Indenture Documents, no consent, approval, authorization or order of, and no notice to or filing with, any court, governmental authority or other Person is required in connection with the grant by each Grantor of the security interest herein or the exercise by the Collateral Agent of its rights and remedies hereunder, other than (x) those previously or contemporaneously obtained or received, (y) as may be required in connection with any disposition by laws affecting the offering and sale of securities generally or (z) as may be required in connection with the Capital Stock of issuers organized under the laws of a jurisdiction outside the United States.

(g) Security Interest. This Agreement creates a legal, valid and binding first priority Lien and security interest in favor of the Collateral Agent in the Collateral securing the Indenture Obligations, subject to no other Liens other than Permitted Liens except as limited by bankruptcy, insolvency or similar laws of general application relating to the enforcement of creditors' rights and except to the extent specific remedies may generally be limited by equitable principles.

(h) Location/Identity. Each Grantor's principal place of business and chief executive office (as those terms are used in the New York UCC) is located at the address set forth on Schedule 2 hereto. Each Grantor's (i) organizational structure and state of organization, (ii) organizational and taxpayer ID numbers, (iii) other legal names, together with the date of any relevant change within the last five years, (iv) recent changes to its identity or corporate structure, and (v) other names (including trade names and d/b/a names, but not including brand names or trademarks relating to products) used within the last five years (the "Organizational Information"), are set forth on Schedule 2 hereto.

(i) Collateral in the Possession of a Bailee.

If any Inventory or other Goods in excess of \$1,000,000 in the aggregate are at any time in the possession of a bailee (other than where such Inventory or Goods are in transit, temporarily relocated for maintenance or repair, or located temporarily at the applicable Grantor's customers' locations (with each such location being tracked in such Grantor's customary dispatch roster or other equipment deployment schedule which roster or schedule is held at the location listed on Schedule 6 hereto from which such Inventory or Equipment was deployed)), such Grantor shall promptly notify the thereof and shall use its commercially reasonable efforts to promptly obtain an acknowledgment from such bailee that the bailee holds such Collateral for the benefit of the Collateral Agent and that the bailee shall, following the occurrence of an Event of Default, act upon the instructions of the Collateral Agent without the further consent of such Grantor. The Collateral Agent agrees with such Grantor that the Collateral Agent shall not give any such instructions unless an Event of Default has occurred and is continuing. In addition, the Grantors agree that following the occurrence of an Event of Default that is continuing, the Collateral Agent shall be entitled to remove, without the further consent of the Grantors, any Inventory or Goods (whether or not in excess of \$1,000,000) in the possession of any bailee or located at any of such Grantor's customers' locations.

4. Covenants. In addition to all covenants and agreements of each Grantor set forth in the Indenture Documents, which are incorporated herein by this reference, the Grantors will

comply with the covenants contained in this Section 4 at all times during the period of time this Agreement is effective unless otherwise consented to by the Collateral Agent in writing at the direction of the holders of the Notes.

(a) Inspection and Further Identification of Collateral. The Grantors will keep commercially reasonable records concerning the Collateral and will permit the Collateral Agent and all representatives and agents appointed by the Collateral Agent to inspect, at the Company's expense and upon reasonable prior notice to the Grantors, and unless an Event of Default is continuing, no more than twice per calendar year, any of the Collateral and the books, records, audits, correspondence and all other documents relating to the Collateral at any time during normal business hours, to make and take away photocopies, photographs and printouts thereof and to write down and record any such information. Each Grantor will furnish to the Collateral Agent from time to time statements and schedules further identifying and describing the Collateral as the Collateral Agent or any other Secured Party may reasonably request, all in reasonable detail.

(b) Payment of Taxes. The Grantors will timely pay, when due, all taxes, assessments and governmental charges or levies lawfully imposed upon the Collateral or any part thereof. The Grantors may, however, delay paying or discharging any such taxes, assessments or charges so long as the validity thereof is contested in good faith by proper proceedings and provided the Grantors have set aside on such Grantors' books adequate reserves therefor and enforcement of any lien or levy relating to such tax is effectively stayed.

(c) Perfection of Security Interest. Each Grantor shall take all actions as may be reasonably necessary or as the Collateral Agent may reasonably request in writing so as at all times to maintain the validity, perfection, enforceability and priority of the Collateral Agent's security interest in and Lien on the Collateral or to enable the Collateral Agent to protect, exercise or enforce its rights hereunder and in the Collateral, including (i) promptly discharging all Liens other than Permitted Liens and (ii) executing and delivering financing statements, control agreements, instruments of pledge, mortgages, notices and assignments, in each case relating to the creation, validity, perfection, priority, maintenance or continuation of the Collateral Agent's security interest and Lien under the UCC or other applicable law, provided, however, that such Grantor shall not be required to take any actions to perfect security interests in the Excluded Perfection Assets.

(d) Inventory and Equipment. Each Grantor covenants and agrees that such Grantor shall keep such Grantor's Inventory and Equipment other than (i) Inventory and Equipment in transit, (ii) Inventory with an aggregate fair market or book value (whichever is more) less than \$1,000,000, (iii) Equipment with an aggregate fair market or book value (whichever is more) less than \$1,000,000, and (iv) Inventory and Equipment disposed of as permitted by the Indenture, only at the locations identified on Schedule 2 and its chief executive offices only at the locations identified on Schedule 2 (as such Schedule may from time to time be updated in accordance with Section 4(m), in each case unless such Grantor has provided written notice of the relocation of such Inventory and Equipment within twenty (20) Business Days thereof. All Equipment necessary to the conduct of any Grantor's business shall be maintained in good operating condition and repair (reasonable wear and tear excepted) and all necessary replacements of and repairs thereto shall be made (reasonable wear and tear excepted). Each Grantor shall use or operate any Equipment in compliance with applicable law in all material

respects. Except as permitted under the Indenture, no Grantor shall sell or otherwise dispose of any of its Equipment. Each Grantor agrees that, upon the reasonable request of the Collateral Agent (as directed by the Trustee or the holders of at least 25% in aggregate principal amount of the Notes then outstanding), such Grantor will promptly provide the Collateral Agent with confirmation of the specific location of any Equipment.

(e) Direction to Account Debtors; Contracting Parties; etc. Upon the occurrence and during the continuance of an Event of Default, if the Collateral Agent so directs any Grantor, such Grantor agrees (i) to cause all payments on account of the Accounts and Contracts to be made directly to a cash account held by the Collateral Agent (the "Cash Collateral Account"), (ii) that, upon concurrent notice to such Grantor, the Collateral Agent may directly notify the obligors with respect to any Accounts and/or under any Contracts to make payments with respect thereto as provided in the preceding clause (i), and (iii) that the Collateral Agent may enforce collection of any such Accounts and Contracts and may, in consultation with such Grantor, adjust, settle or compromise the amount of payment thereof, in the same manner and to the same extent as such Grantor. Without notice to or assent by any Grantor, the Collateral Agent may (at the direction of the holders of the Notes), upon the occurrence and during the continuance of an Event of Default, apply any or all amounts then in, or thereafter deposited in, the Cash Collateral Account toward the payment of the Indenture Obligations in the manner provided in Section 4.01 of the Indenture. The reasonable out-of-pocket costs and expenses of collection (including reasonable attorneys' fees), whether incurred by a Grantor or the Collateral Agent, shall be borne by the relevant Grantor. The Collateral Agent shall deliver a copy of each notice referred to in the preceding clause (ii) to the relevant Grantor; provided, that (x) the failure by the Collateral Agent to so notify such Grantor shall not affect the effectiveness of such notice or the other rights of the Collateral Agent created by this Section 4 and (y) no such notice shall be required if an Event of Default of the type described in Sections 6.01(7) or (8) of the Indenture has occurred and is continuing.

(f) Collection. (i) From and after the occurrence and during the continuance of an Event of Default, upon the demand of the Collateral Agent (acting at the direction of the holders of the Notes or the Trustee), each Grantor shall deliver to the Collateral Agent, in original form and on the date of receipt thereof, all checks, drafts, notes, money orders, acceptances, cash and other evidences of Indebtedness at any time received by Grantors. (ii) Following the occurrence and during the continuance of any Event of Default, at its option, the Collateral Agent (acting at the direction of the holders of the Notes or the Trustee), shall have the exclusive right to collect the Accounts of each Grantor, take possession of the Collateral, or both. In such case, the Collateral Agent's actual reasonable, documented, out-of-pocket collection expenses, including but not limited to, stationery and postage, telephone and facsimile, secretarial and clerical expenses and the salaries of any collection personnel used for collection, shall be for the account of the Company and added to the Indenture Obligations.

(g) Instruments and Documents. If any Grantor owns or acquires any instrument or document (as defined in the New York UCC) evidencing or forming a part of the Collateral in excess of (x) so long as no Event of Default has occurred and is continuing, \$1,000,000, or (y) so long as an Event of Default has occurred and is continuing, \$100,000, constituting Collateral (other than checks and other payment instruments received and collected in the ordinary course of business), such Grantor will within twenty (20) Business Days deliver such instrument or document to the Collateral Agent appropriately endorsed to the order of the Collateral Agent.

(h) Grantors Remain Liable Under Accounts and Contracts. Anything herein to the contrary notwithstanding, the Grantors shall remain liable under each of the Accounts and Contracts to observe and perform all of the conditions and obligations to be observed and performed by it thereunder, all in accordance with the terms of any agreement giving rise to such Accounts or Contracts. Neither the Collateral Agent nor any other Secured Party shall have any obligation or liability under any Account (or any agreement giving rise thereto) or Contract, in each case by reason of or arising out of this Agreement or the receipt by the Collateral Agent or any other Secured Party of any payment relating to such Account or Contract pursuant hereto, nor shall the Collateral Agent or any other Secured Party be obligated in any manner to perform any of the obligations of any Grantor under or pursuant to any Account (or any agreement giving rise thereto) or any Contract, to make any payment, to make any inquiry as to the nature or the sufficiency of any payment received by them or as to the sufficiency of any performance by any party under any Account (or any agreement giving rise thereto) or Contract, to present or file any claim, to take any action to enforce any performance or to collect the payment of any amounts which may have been assigned to them or to which they may be entitled at any time or times.

(i) Letter-of-Credit Rights. If any Grantor is at any time a beneficiary under a letter of credit with a stated amount of \$1,000,000 or more, such Grantor shall use its commercially reasonable efforts to (i) arrange for the issuer and any confirmer of such letter of credit to consent in writing to an assignment to the Collateral Agent of the proceeds of any drawing under such letter of credit or (ii) arrange for the Collateral Agent to become the transferee beneficiary of such letter of credit, with the Collateral Agent agreeing, in each case, that the proceeds of any drawing under the letter of credit are to be applied as provided in this Agreement upon the occurrence and during the continuance of an Event of Default.

(j) Commercial Tort Claims. All commercial tort claims of each in existence on the date of this Agreement are described in Schedule 3 hereto. If any Grantor shall at any time after the date of this Agreement acquire a commercial tort claim in an amount (taking the greater of the aggregate claimed damages thereunder or the reasonably estimated value thereof) of \$1,000,000 or more, such Grantor shall promptly (i) notify the Collateral Agent thereof in a writing signed by such Grantor and describing the details thereof; (ii) grant to the Collateral Agent in such writing a security interest therein and in the proceeds thereof, all upon the terms of this Agreement; and (iii) take such actions as may be reasonably necessary to perfect such security interest, including filing a UCC-1 financing statement or UCC-3 statement of amendment in such filing office as may be appropriate, and provide evidence thereof to the Collateral Agent.

(k) Chattel Paper. Upon the reasonable request of the Collateral Agent made at any time or from time to time, each Grantor shall promptly furnish to the Collateral Agent a list of all electronic chattel paper held or owned by such Grantor. Furthermore, if requested by the Collateral Agent, each Grantor shall promptly take all actions which are reasonably practicable so that the Collateral Agent has "control" of all electronic chattel paper with a value of (x) so long as no Event of Default has occurred and is continuing, \$1,000,000, or (y) so long as an Event of Default has occurred and is continuing, \$100,000, in accordance with the requirements of Section 9-105 of the UCC. Each Grantor will promptly (and in any event within ten (10) days) following any request by the Collateral Agent, deliver all of its tangible chattel paper to the Collateral Agent.

(l) **Additional Procedures.** To the extent that any Grantor at any time or from time to time owns, acquires or obtains any right, title or interest in any Capital Stock intended to be pledged as Collateral hereunder or the form or nature of any Capital Stock shall change, the Collateral Agent shall automatically (and without the taking of any action by any Grantor) have a security interest in all of the right, title and interest of such Grantor in, to and under such Capital Stock (other than Excluded Assets) pursuant to Section 2(a) of this Agreement and, in addition thereto, such Grantor shall (to the extent provided below but not as to any Excluded Perfection Assets) take the following actions as set forth below (as promptly as practicable and, in any event, within ten (10) Business Days after it obtains such Capital Stock) for the benefit of the Collateral Agent and the other Secured Parties:

(i) with respect to a certificated security (other than a certificated security credited on the books of a clearing corporation or securities intermediary), such Grantor shall physically deliver such certificated security to the Collateral Agent, endorsed to the Collateral Agent or endorsed in blank;

(ii) with respect to an uncertificated security (other (x) than an uncertificated security credited on the books of a clearing corporation or securities intermediary or (y) an uncertificated security of a Subsidiary that does not constitute a Significant Subsidiary), such Grantor shall use commercially reasonable efforts to cause the issuer of such uncertificated security to duly authorize, execute, and deliver to the Collateral Agent, an agreement for the benefit of the Collateral Agent and the other Secured Parties substantially in the form of Annex A hereto pursuant to which such issuer agrees to comply with any and all instructions originated by the Collateral Agent without further consent by the registered owner and not to comply with instructions regarding such uncertificated security (and any Partnership Interests and Limited Liability Company Interests issued by such issuer) originated by any other Person other than a court of competent jurisdiction;

(iii) with respect to a certificated security, uncertificated security, Partnership Interest or Limited Liability Company Interest credited on the books of a clearing corporation or securities intermediary (including a Federal Reserve Bank, Participants Trust Company or The Depository Trust Company), such Grantor shall promptly notify the Collateral Agent in writing thereof and shall comply with the applicable rules of such clearing corporation or securities intermediary (A) in the case of a clearing corporation, to perfect the security interest of the Collateral Agent under applicable law (including, in any event, under Sections 9-314(a), (b) and (c), 9-106 and 8-106(d) of the UCC) or (B) in the case of a securities intermediary, if required to perfect the security interest of the Collateral Agent under applicable law (including, in any event, under Sections 9-314(a), (b) and (c), 9-106 and 8-106(d) of the UCC); and

(iv) with respect to a Partnership Interest or a Limited Liability Company Interest (other than a Partnership Interest or Limited Liability Company Interest credited on the books of a clearing corporation or securities intermediary), (1) if such Partnership Interest or Limited Liability Company Interest is represented by a certificate and is a security for purposes of the UCC, follow the procedure set forth in Section 4(1)(i) hereof, and (2) if such Partnership Interest or Limited Liability Company Interest is not represented by a certificate or is not a security for purposes of the UCC, follow the procedure set forth in Section 4(1)(ii) hereof.

(m) Further Actions. Without limitation of any other covenant herein, no Grantor shall change or permit to be changed the jurisdiction in which it is incorporated or otherwise organized, or change its legal name (or use a different name), or location of chief executive office, unless such Grantor has given the Collateral Agent not less than ten (10) Business Days prior written notice thereof (along with an update of Schedule 2, as applicable) and the Grantors have taken (or caused to be taken) all steps reasonably necessary to maintain the Collateral Agent's Lien on such Collateral, as well as the priority (subject to Permitted Liens) and effectiveness of such Lien, in each case, other than with respect to Excluded Perfection Assets; provided, that, except as expressly permitted under the Indenture, no Grantor shall change its jurisdiction of incorporation or organization or location of any of its Collateral, in each case, to a jurisdiction or location outside of the Specified Jurisdictions.

(n) Insurance.

(i) Each Grantor shall:

(A) keep its properties adequately insured at all times by financially sound and reputable insurers, as is customary with companies in the same or similar businesses operating in the same or similar locations;

(B) maintain such other insurance, to such extent and against such risks (and with such deductibles, retentions and exclusions), including fire and other risks insured against by extended coverage and coverage for acts of terrorism, as is customary with companies in the same or similar businesses operating in the same or similar locations, including public liability insurance against claims for personal injury or death or property damage occurring upon, in, about or in connection with the use of any properties owned, occupied or controlled by them; and

(C) maintain such other insurance as may be required by law except as could not reasonably be expected to have a Material Adverse Effect.

(ii) Each Grantor shall furnish to the Collateral Agent no more than once each fiscal year information in reasonable detail as to its property and liability insurance carriers. Within thirty (30) days after the date hereof, the

Collateral Agent shall be named as an additional insured on all insurance policies of any Grantor and the Collateral Agent shall be named as loss payee, with 30 days' notice of cancellation on all property and casualty insurance policies of any Grantor.

(o) Leasehold Obligations. Each Grantor shall, and shall cause each of its Subsidiaries to, at all times pay, when and as due, its rental obligations under all leases under which it is a tenant, and shall otherwise comply, in all material respects, with all other terms of such leases and keep them in full force and effect, except, in each case, where the failure to do so could not reasonably be expected to have, either individually or in the aggregate, a Material Adverse Effect.

(p) Exculpation of Liability. Nothing herein contained shall be construed to constitute the Collateral Agent or any holder of the Notes as any Grantor's agent for any purpose whatsoever, nor shall the Collateral Agent or any holder of the Notes be responsible or liable for any shortage, discrepancy, damage, loss or destruction of any part of the Collateral wherever the same may be located and regardless of the cause thereof, except with respect to the Collateral Agent's or such holder's gross (not mere) negligence or willful misconduct as determined by a final and non-appealable order of a court of competent jurisdiction. Neither the Collateral Agent nor any holder of the Notes, whether by anything herein or in any assignment or otherwise, assumes any of any Grantor's obligations under any contract or agreement to which it is a party, and neither the Collateral Agent nor any holder of the Notes shall be responsible in any way for the performance by any Grantor of any of the terms and conditions thereof.

(q) Deposit Accounts; Etc.

(i) No Grantor maintains, or at any time after the date of this Agreement shall establish or maintain, any demand, time, savings, passbook or similar account, except for such accounts maintained with a bank (as defined in Section 9-102 of the UCC) whose jurisdiction (determined in accordance with Section 9-304 of the UCC) is within a State of the United States other than such accounts constituting Excluded Assets or Excluded Perfection Assets. Schedule 5 hereto accurately sets forth, as of the date of this Agreement, for each Grantor, each deposit account maintained by such Grantor (including a description thereof and the respective account number) and the name of the respective bank with which such deposit account is maintained. Subject to Section 4(c) hereof, for each deposit account that is Collateral (other than Excluded Perfection Assets, the Cash Reserve Account or the Cash Collateral Account or any other deposit account maintained with the Collateral Agent), the respective Grantor shall use commercially reasonable efforts to cause the bank with which the deposit account is maintained to execute and deliver to the Collateral Agent within thirty (30) days after the date of this Agreement (or, if later, the date of the establishment of the respective deposit account), a "control agreement" in form and substance acceptable to the Collateral Agent. If any bank with which a deposit account that is Collateral (other than an Excluded Perfection Asset) is maintained refuses to, or does not, enter into such a "control agreement", then the respective Grantor shall promptly (and in any event within thirty (30) days after the date of this Agreement or, if later, thirty (30) days after the establishment of such account) transfer all balances therein to the Cash Collateral Account or another deposit account meeting the requirements of this Section 4(q). If any bank with which a deposit account that is Collateral (other than an Excluded Perfection Asset) is maintained refuses

to subordinate all its claims with respect to such deposit account to the Collateral Agent's security interest therein, then the Collateral Agent, at the direction of the holders of the Notes, may (x) require that the balance in such deposit account be transferred in accordance with the immediately preceding sentence or (y) agree to a "control agreement" without such subordination, provided that in such event the Collateral Agent may at any time, at the direction of the holders of the Notes, subsequently require that the balance of such deposit account be transferred (within sixty (60) days after notice from the Collateral Agent) in accordance with the requirements of the immediately preceding sentence.

(ii) After the date of this Agreement, no Grantor shall establish any new demand, time, savings, passbook or similar account, except for (x) deposit accounts established and maintained with banks and meeting the requirements of preceding clause (i), (y) Excluded Assets, and (z) Excluded Perfection Assets. Subject to Section 4(c) hereof, at the time any such deposit account that is Collateral (other than an Excluded Perfection Asset) is established, the appropriate "control agreement" shall be entered into in accordance with the requirements of preceding clause (i) and the respective Grantor shall furnish to the Collateral Agent a supplement to Schedule 5 hereto containing the relevant information with respect to the respective deposit account and the bank with which same is established.

(iii) The Company shall maintain \$25,000,000 in the Cash Reserve Account at all times until July 1, 2015, at which time the funds in the Cash Reserve Account may be released to the Company upon its request, so long as no Default or Event of Default shall have occurred and be continuing. The Company agrees to maintain the Cash Reserve Account free and clear of all Liens, other than the Lien of this Agreement. If an Event of Default has occurred and is continuing, the Collateral Agent may, or at the direction of the holders of at least 30% of the aggregate outstanding principal amount of the Notes, shall, apply any amounts on deposit in the Cash Reserve Account to any remaining interest payments on the Notes in inverse order of scheduled payment. Any scheduled interest payments (or portion thereof) so paid shall no longer be due, on the scheduled date therefor or otherwise. Notwithstanding anything to the contrary herein, with respect to any redemption of the Notes (whether optional, by acceleration or otherwise) occurring after the application of such amounts, the otherwise applicable redemption price or prepayment amount shall be reduced by the pro rata amount of prepaid interest from interest payment dates later than the applicable redemption or prepayment allocable to the amount of Notes being redeemed or prepaid. All amounts in the Cash Reserve Account shall be released to the Company on July 1, 2015, after which such amounts shall not be subject to any restrictions on use other than compliance generally with the applicable covenants under the indenture.

(r) Stock Issuance. Except as may be permitted by the Indenture, no Grantor may, directly or indirectly, (i) issue, sell, grant, assign, transfer or otherwise dispose of, any additional stock or membership interests of such Grantor or any option or warrant with respect to, or other right or security convertible into, any additional stock or membership interests of such Grantor, now or hereafter authorized, unless all such additional stock or membership interests, options, warrants, rights or other such securities are made and shall remain part of the Collateral subject to the pledge and security interest granted herein, (ii) take any action to withdraw the authority of or to limit or restrict the authority of such Grantor's managers (if any) or officers to deal and contract with Collateral Agent and to bind and obligate such Grantor, or (iii) pay any interim

distribution in cash or other assets to any shareholder or member of any Grantor, except as permitted in the Indenture. Any distribution by any Grantor other than as permitted in the Indenture shall constitute a “wrongful distribution” for purposes of applicable law.

(s) Membership. In accordance with this Agreement, each Grantor hereby acknowledges and agrees that the Collateral Agent or any of its successors and assigns (or any designee of the Collateral Agent), shall, at the Collateral Agent’s option, as directed by the holders of the Notes, upon written notice to any Grantor (such Grantor, the “Parent Grantor”) of the Collateral Agent’s intent to be admitted as a member of any other Grantor (in the place of the Parent Grantor) at any time an Event of Default exists or has occurred and is continuing and following delivery of any required notice hereunder, be admitted as a member of the relevant Grantor without any further approval of the Parent Grantor and without compliance by the Collateral Agent or any other person with any of the conditions or other requirements of the applicable membership agreement and without conferring upon any Person any option (whether under the applicable membership agreement or otherwise) to acquire the stock or membership interests so transferred to the Collateral Agent, its successors or assigns, or its designees. At such time, each Grantor agrees to take such other action and execute such further documents as may be reasonably necessary or as the Collateral Agent may reasonably request from time to time in order to give effect to the provisions of this Agreement.

(t) Further Assurances. The Company will do, execute, acknowledge, deliver, record, re-record, file, re-file, register and re-register, as applicable, any and all such further acts, deeds, conveyances, security agreements, assignments, financing statements and continuations thereof, termination statements, notices of assignment, transfers, certificates, assurances and other instruments as may be required from time to time in order to:

- (i) carry out the terms and provisions of the Collateral Documents;
- (ii) subject to the Liens created by any of the Collateral Documents any of the properties, rights or interests required to be encumbered thereby;
- (iii) perfect and maintain the validity, effectively and priority of any of the Collateral Documents and the Liens intended to be created thereby; and
- (iv) assure, convey, grant, assign, transfer, preserve, protect and confirm to the Collateral Agent any of the rights granted now or hereafter intended by the parties thereto to be granted to the Collateral Agent under the Collateral Documents or under any other instrument executed in connection herewith.

Upon the exercise by the Trustee, the Collateral Agent or any holder of Notes of any power, right, privilege or remedy under the Indenture or any of the Collateral Documents which requires any consent, approval, recording, qualification or authorization of any governmental authority, the Company will execute and deliver all applications, certifications, instruments and other documents and papers that may be required from the Company for such governmental consent, approval, recording, qualification or authorization.

5. Special Provisions Concerning Intellectual Property.

(a) Additional Representations and Warranties. Each Grantor represents and warrants (i) that the Intellectual Property Rights listed in Schedule 4 hereto for such Grantor include all Intellectual Property Rights that such Grantor owns as of the date hereof which are issued or registered or applied for at the United States Patent and Trademark Office, the United States Copyright Office, or an equivalent thereof in any state of the United States or any foreign jurisdiction, and (ii) that except as set forth in Schedule 4 it is the true and lawful owner of all issuances, registrations and applications for patents or registration of Intellectual Property Rights listed in Schedule 4 hereto and such issuances, registrations and applications are valid and have not been canceled. Except as disclosed in the Offering Memorandum or as would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect, each Grantor owns, or is licensed under, and has the right to use, all (i) third party intellectual property and (ii) Intellectual Property, including the Intellectual Property Rights, in each case as used in its businesses as currently conducted and as presently contemplated to be conducted in the future and the Intellectual Property Rights are free and clear of all Liens. No claims or notices of any potential claim have been asserted by any person or entity challenging the use of any such third party intellectual property or Intellectual Property, including the Intellectual Property Rights, by any Grantor or questioning the validity, effectiveness of, or any Grantor's rights to, any Intellectual Property Right or any license or agreement related to third party intellectual property or Intellectual Property, including the Intellectual Property Rights, other than any claims that, if successful, would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect, and no Grantor is aware of any basis for such claims.

(b) Licenses and Assignments. Except as otherwise permitted by the Indenture Documents, each Grantor hereby agrees not to divest itself of any Intellectual Property Right or to exclusively license any Intellectual Property Right.

(c) Infringements. Except as such Grantor in its reasonable business judgment determines is not necessary in the conduct of the Grantor's business, each Grantor agrees to enforce and assert its Intellectual Property, diligently in accordance with reasonable business practices, against any person or entity infringing, misappropriating, misusing, diluting, or violating the Grantor's Intellectual Property, including the Intellectual Property Rights. The conduct of each Grantor's business, including its goods and services and the manufacturing, importation, use, and sale thereof, does not infringe, misappropriate, misuse, dilute, or violate any other person or entity's intellectual property, including any patents, copyrights, trademarks, trade secrets, and domain names, except to the extent that such infringement would not reasonably be expected to have a Material Adverse Effect.

(d) Preservation of Marks. Each Grantor agrees to use its Marks which are material to such Grantor's business in interstate commerce during the time in which this Agreement is in effect and to take all such other actions as are reasonably necessary to preserve such material Marks as trademarks or service marks under the laws of the United States (in each case, other than any such Marks which, in the Grantor's reasonable business judgment, are no longer necessary in the conduct of the Grantor's business).

(e) Maintenance of Patents, Registrations, and Applications. Each Grantor shall, at its own expense, take all commercially reasonable actions to maintain all patents, registrations and applications for patents and registration of its Intellectual Property Rights that are material to such Grantor's business or if involving any Marks, material to such Grantor's business in interstate commerce, during the time in which this Agreement is in effect.

(f) Future Intellectual Property. At its own expense, each Grantor shall take all commercially reasonable efforts to diligently prosecute all material applications for patents or registration of Intellectual Property Rights listed on Schedule 4, in each case for such Grantor and shall not abandon any such application prior to exhaustion of all administrative and judicial remedies (other than applications (i) deemed by such Grantor in its reasonable business judgment to be no longer prudent to pursue or (ii) that are deemed by such Grantor in its reasonable business judgment to no longer be necessary in the conduct of the Grantor's business). If any Grantor acquires Intellectual Property Rights after the effective date of this Agreement or makes an application for registration of an Intellectual Property Right before the United States Patent and Trademark Office, the United States Copyright Office, or an equivalent thereof in any state of the United States, any political subdivision thereof or in any other country or jurisdiction, within sixty (60) days of the acquisition of such Intellectual Property or submission of such application or, if later, as soon as legally permissible, such Grantor shall notify the Collateral Agent in writing concerning such Intellectual Property Right. Additionally such Grantor shall execute and deliver a grant of a security interest in such application prepared by the Collateral Agent, at the expense of such Grantor, confirming the grant of a security interest in such Intellectual Property Right to the Collateral Agent hereunder, the form of such security to be substantially in the form of Annex B hereto in the case of Marks, Annex C hereto in the case of Patents and Annex D hereto in the case of Copyrights or in such other form as may be reasonably satisfactory to the Collateral Agent; provided that the foregoing shall not apply to any Intellectual Property Right that is an Excluded Asset or Excluded Perfection Asset. Where a patent or registration that constitutes an Intellectual Property Right is issued hereafter to any Grantor as a result of any application now or hereafter pending, if a security interest in such application has not already been granted to or recorded on behalf of the Collateral Agent hereunder, such Grantor shall deliver to the Collateral Agent a grant of security interest within sixty (60) days; provided that the foregoing shall not apply to any Intellectual Property Right that is an Excluded Asset or Excluded Perfection Asset.

(g) Existing Intellectual Property. For all Intellectual Property Rights existing as of the effective date of this Agreement, by no later than the effective date of the Agreement, each Grantor shall deliver or cause to be delivered to the Collateral Agent a grant of a security interest in such applications, patents, and registrations, at the expense of such Grantor, confirming the grant of a security interest in such Intellectual Property Right to the Collateral Agent hereunder, the form of such security to be substantially in the form of Annex B hereto in the case of Marks, Annex C hereto in the case of Patents and Annex D hereto in the case of Copyrights or in such other form as may be reasonably satisfactory to the Collateral Agent; provided that the foregoing shall not apply to any Intellectual Property Right that is an Excluded Asset or Excluded Perfection Asset.

(h) Remedies. Each Grantor hereby grants to the Collateral Agent a limited power of attorney to sign, upon the occurrence and during the continuance of an Event of Default at the direction of the Trustee or the requisite holders of the Notes in accordance with the Indenture, any

document which may be required by the United States Patent and Trademark Office, the United States Copyright Office, or an equivalent thereof in any state of the United States, any political subdivision thereof or in any other country or jurisdiction, or similar registrar in order to effect an absolute assignment of all right, title and interest in each patented or registered Intellectual Property Right and each application for a patent or registration, and record the same. If an Event of Default shall occur and be continuing, the Collateral Agent may at the direction of the Trustee or the requisite holders of the Notes in accordance with the Indenture, by written notice to the relevant Grantor, take any or all of the following actions: (i) declare the entire right, title and interest of such Grantor in and to the Intellectual Property Rights, vested in the Collateral Agent for the benefit of the Secured Parties, in which event such rights, title and interest shall immediately vest, in the Collateral Agent for the benefit of the Secured Parties, and the Collateral Agent shall be entitled to exercise the power of attorney referred to in this Section 6(g) hereof to execute, cause to be acknowledged and notarized and record said absolute assignment with the applicable agency or registrar; (ii) take and use or sell the Intellectual Property Rights; (iii) take and use or sell the goodwill of such Grantor's business symbolized by the Marks and the right to carry on the business and use the assets of such Grantor in connection with which the Marks or Domain Names have been used; and (iv) direct such Grantor to refrain, in which event such Grantor shall refrain, from using the Intellectual Property Rights in any manner whatsoever, directly or indirectly, and such Grantor shall execute such further documents that the Collateral Agent may reasonably request to further confirm this and to transfer ownership of the Intellectual Property Rights and registrations and any pending applications in the United States Copyright Office, United States Patent and Trademark Office, equivalent office in a state of the United States or a foreign jurisdiction or applicable Domain Name registrar to the Collateral Agent.

(i) Intellectual Property Assignments. During the term of this Agreement, each Grantor shall secure valid written assignments of ownership from all persons who have contributed to the creation or development of Intellectual Property or who have applied for patents or registration of or obtained patents for or registered Intellectual Property of all rights of such persons in such Intellectual Property that the Grantors do not already own by operation of law and valid written agreements by all such persons to cooperate in the prosecution of any applications, patents or registrations of, and in the enforcement of, any such Intellectual Property (hereinafter all such assignments and agreements referred to as the "IP Assignments"); except to the extent that any failure to obtain an IP Assignment, individually or in the aggregate, does not adversely affect the value of the Company's Intellectual Property and would not impair the Collateral Agent's ability to use and dispose of such Intellectual Property as provided for in the Collateral Documents. Copies of all such IP Assignments shall be promptly delivered to the Collateral Agent upon the request of the Collateral Agent.

(j) Additional Covenants. Notwithstanding the foregoing, to the extent that any issuance of, or registration or application for, a Grantor's Intellectual Property Rights is subject to a chain of title defect, is not in the current legal name of the applicable Grantor, or is subject to any form of Lien, such Grantor shall promptly prepare, execute, file and record (and pay all costs, including legal and filing fees) as necessary to cure such title defects, provide for current ownership of the asset by the Grantor and remove such unpermitted Liens (hereinafter all such actions referred to as the "IP Title Defect Correction Actions"); except to the extent that any failure to perform an IP Title Defect Correction Action, individually or in the aggregate, does not adversely affect the value of the Company's Intellectual Property and would not impair the

Collateral Agent's ability to use and dispose of such Intellectual Property as provided for in Collateral Documents. By no later than the effective date of this Agreement, the Grantors shall have provided copies of all documentation and communications concerning such IP Title Defect Correction Actions to the Collateral Agent with respect to existing Intellectual Property Rights of the Grantor and following closing such documentation and communications for later developed or acquired Intellectual Property Rights shall promptly be provided.

6. Rights of Collateral Agent. The Collateral Agent shall have the rights contained in this Section 6 at all times during the period of time this Agreement is effective.

(a) Financing Statements Filings. Each Grantor hereby authorizes the Collateral Agent to file (or any Secured Party to file on behalf of the Collateral Agent), without the signature of such Grantor, (but the Collateral Agent shall not be obligated to so file and shall have no responsibility with respect to the form, content or renewal thereof) one or more financing or continuation statements, and amendments thereto, relating to the Collateral (which statements may describe the Collateral as "all assets" of such Grantor); provided, however, such authorization shall not relieve any Grantor from its respective obligations to take all actions necessary to perfect and maintain the perfection of the Collateral Agent's Lien on the Collateral to the extent required hereunder. All reasonable, documented, out-of-pocket charges, expenses and fees that the Collateral Agent may incur in doing any of the foregoing, and any local taxes relating thereto, shall be paid by the Grantors to the Collateral Agent within ten (10) Business Days of demand.

(b) Power of Attorney. Each Grantor hereby irrevocably appoints the Collateral Agent as such Grantor's attorney-in-fact, such power of attorney being coupled with an interest, with full authority in the place and stead of such Grantor and in the name of such Grantor or otherwise, after the occurrence and during the continuance of an Event of Default, to take any action and to execute any instrument that the Collateral Agent or any Secured Party may deem necessary or appropriate to accomplish the purposes of this Agreement, including without limitation: (i) to demand, collect, sue for, recover, compound, receive and give acquittance and receipts for moneys due and to become due under or in respect of the Collateral; (ii) to receive, endorse and collect any drafts or other instruments, documents and chattel paper in connection with clause (i) above; and (iii) to file any claims or take any action or institute any proceedings that the Collateral Agent or any Secured Party may deem necessary or appropriate for the collection and/or preservation of the Collateral or otherwise to enforce the rights of the Collateral Agent and the Secured Parties with respect to the Collateral.

(c) Further Rights. The Collateral Agent has been appointed as the Collateral Agent hereunder pursuant to the Indenture and shall be entitled to the benefits of the Indenture Documents. Notwithstanding anything contained herein to the contrary, the Collateral Agent may employ agents, trustees, or attorneys-in-fact and may vest any of them with any property (including, without limitation, any Collateral pledged hereunder), title, right or power deemed necessary for the purposes of such appointment. Notwithstanding anything to the contrary herein, the following provisions shall govern the Collateral Agent's rights, powers, obligations and duties under this Agreement:

(i) The Collateral Agent shall have no duty to act, consent or request any action of the Grantors or any other Person in connection with this Agreement

(including all schedules and exhibits attached hereto) unless the Collateral Agent shall have received written direction from the Trustee or the requisite holders of the Notes in accordance with the Indenture.

(ii) The Collateral Agent's sole duty with respect to the custody, safekeeping and physical preservation of the Collateral in its possession, under Section 9-207 of the New York UCC or otherwise, shall be to deal with it in the same manner as the Collateral Agent deals with similar property for its own account. Neither any Secured Party nor any of its officers, directors, employees or agents shall be liable to the Grantors for failure to demand, collect or realize upon any of the Collateral or for any delay in doing so or shall be under any obligation to sell or otherwise dispose of any Collateral upon the request of any Grantor or any other Person or to take any other action whatsoever with regard to the Collateral or any part thereof. The powers conferred on the Collateral Agent hereunder are solely to protect the interests of the Secured Parties in the Collateral and shall not impose any duty upon any of them to exercise any such powers. The Collateral Agent shall be accountable only for amounts that it actually receives as a result of the exercise of such powers, and neither it nor any of its officers, directors, employees or agents shall be responsible to any Grantor for any act or failure to act hereunder, except for its own gross negligence or willful misconduct. The Collateral Agent shall not be responsible for, nor incur any liability with respect to, (A) the existence, genuineness or value of any of the Collateral or for the validity, perfection, priority or enforceability of the security interest in any of the Collateral, whether impaired by operation of law or by reason of any action or omission to act on its part under this Agreement or any of the other Indenture Documents, except to the extent such action or omission constitutes gross negligence or willful misconduct on the part of the Collateral Agent, (B) the validity or sufficiency of the Collateral or any agreement or assignment contained therein, (C) the validity of the title of the Grantors to the Collateral, (D) insuring the Collateral or (E) the payment of taxes, charges or assessments upon the Collateral or otherwise as to the maintenance of the Collateral.

(iii) Notwithstanding any provision to the contrary elsewhere in this Agreement or any other Indenture Documents, the Collateral Agent shall not have any duties or responsibilities, except those expressly set forth in this Agreement or such other Indenture Documents and no implied covenants, functions or responsibilities shall be read into this Agreement or otherwise exist against the Collateral Agent.

(iv) The Collateral Agent shall not be deemed to be in a relationship of trust or confidence with any Secured Party, or any other Person by reason of this Agreement, and shall not owe any fiduciary, trust or other special duties to the any Secured Party, or any other Person by reason of this Agreement. The parties hereto acknowledge that the Collateral Agent's duties do not include any discretionary authority, determination, control or responsibility with respect to any Indenture Documents or any Collateral, notwithstanding any rights or

discretion that may be granted to the Collateral Agent in such Indenture Documents. The provisions of this Agreement, including, without limitation those provisions relating to the rights, duties, powers, privileges, protections and indemnification of the Collateral Agent shall apply with respect to any actions taken or not taken by the Collateral Agent under any Indenture Documents.

(v) Notwithstanding anything herein to the contrary, in no event shall the Collateral Agent have any obligation to inquire or investigate as to the correctness, veracity, or content of any instruction received from any party to this Agreement or any other Indenture Documents. In no event shall the Collateral Agent have any liability in respect of any such instruction received by it and relied on with respect to any action or omission taken pursuant thereto.

(vi) With respect to the Collateral Agent's duties under this Agreement or any of the Indenture Documents, the Collateral Agent may act through its attorneys, accountants, experts and such other professionals as the Collateral Agent deems reasonably necessary, advisable or appropriate and shall not be responsible for the misconduct or negligence of any attorney, accountant, expert or other such professional appointed with due care.

(vii) Neither the Collateral Agent nor any of its experts, officers, directors, employees, agents, attorneys-in-fact or affiliates shall be (x) liable for any action lawfully taken or omitted to be taken by it under or in connection with this Agreement or any of the Indenture Documents (except for its gross negligence or willful misconduct), or (y) responsible in any manner for any recitals, statements, representations or warranties (other than its own recitals, statements, representations or warranties) made in this Agreement or any of the other Indenture Documents or in any certificate, report, statement or other document referred to or provided for in, or received by the Collateral Agent under or in connection with, this Agreement or any of the Indenture Documents or for the value, validity, effectiveness, genuineness, enforceability or sufficiency of this Agreement or any of the Indenture Documents or for any failure of the Grantors or any other Person to perform their obligations hereunder and thereunder. The Collateral Agent shall not be under any obligation to any Person to ascertain or to inquire as to (A) the observance or performance of any of the agreements contained in, or conditions of, this Agreement or any of the Indenture Documents or to inspect the properties, books or records of the Grantors, (B) whether or not any representation or warranty made by any Person in connection with this Agreement or any Indenture Documents is true, (C) the performance by any Person of its obligations under this Agreement or any of the Indenture Documents or (D) the breach of or default by any Person of its obligations under this Agreement or any of the Indenture Documents.

(viii) The Collateral Agent shall not be bound or required to take any action that in the opinion of the Collateral Agent (which may be based on advice of counsel) is in conflict with any applicable law, this Agreement or any of the other Indenture Documents, or any order of any court or administrative agency.

(ix) The Collateral Agent shall be authorized to but shall not be responsible for filing any financing or continuation statements or recording any documents or instruments in any public office at any time or times or otherwise perfecting or monitoring or maintaining the perfection of any security interest in the Collateral. It is expressly agreed, to the maximum extent permitted by applicable law, that the Collateral Agent shall have no responsibility for (x) taking any necessary steps to preserve rights against any Person with respect to any Collateral or (y) taking any action to protect against any diminution in value of the Collateral, but, in each case (A) subject to the requirement that the Collateral Agent may not act or omit to take any action if such act or omission would constitute gross negligence or willful misconduct and (B) the Collateral Agent may do so and all expenses reasonably incurred in connection therewith shall be part of the Indenture Documents.

(x) The Collateral Agent shall not be liable or responsible for any loss or diminution in the value of any Collateral, by reason of the act or omission of any carrier, forwarding agency or other agent or bailee selected by the Collateral Agent in good faith, except to the extent of the Collateral Agent's gross negligence or willful misconduct.

(xi) Notwithstanding anything in this Agreement or any of the Indenture Documents to the contrary, (A) in no event shall the Collateral Agent or any officer, director, employee, representative or agent of the Collateral Agent be liable under or in connection with this Agreement or any of the Indenture Documents for indirect, special, incidental, punitive or consequential losses or damages of any kind whatsoever, including but not limited to lost profits or loss of opportunity, whether or not foreseeable, even if the Collateral Agent has been advised of the possibility thereof and regardless of the form of action in which such damages are sought; and (B) the Collateral Agent shall be afforded all of the rights, powers, immunities and indemnities set forth in this Agreement or in all of the other Indenture Documents to which it is a signatory as if such rights, powers, immunities and indemnities were specifically set out in each such Indenture Documents. In no event shall the Collateral Agent be obligated to invest any amounts received by it hereunder.

(xii) The Collateral Agent shall be entitled conclusively to rely, and shall be fully protected in relying, upon any note, writing, resolution, request, direction, certificate, notice, consent, affidavit, letter, cablegram, telegram, telecopy, email, telex or teletype message, statement, order or other document or conversation believed by it in good faith to be genuine and correct and to have been signed, sent or made by the proper Person or Persons and/or upon advice and/or statements of legal counsel, independent accountants and other experts reasonably selected by the Collateral Agent and need not investigate any fact or matter stated in any such document. Any such statement of legal counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it hereunder in accordance therewith. The Collateral Agent shall be fully justified in failing or refusing to take any action under this Agreement or any

of the other Indenture Documents (A) if such action would, in the reasonable opinion of the Collateral Agent (which may be based on the opinion of legal counsel), be contrary to applicable law or any of the Indenture Documents, (B) if such action is not provided for in this Agreement or any of the other Indenture Documents, (C) if, in connection with the taking of any such action hereunder or under any of the Indenture Documents that would constitute an exercise of remedies hereunder or under any of the Indenture Documents it shall not first be indemnified to its satisfaction by the holders of the Notes against any and all risk of nonpayment, liability and expense that may be incurred by it, its agents or its counsel by reason of taking or continuing to take any such action, or (D) if, notwithstanding anything to the contrary contained in this Agreement, in connection with the taking of any such action that would constitute a payment due under any agreement or document, it shall not first have received from the holders of the Notes or the applicable Grantor funds equal to the amount payable. The Collateral Agent shall in all cases be fully protected in acting, or in refraining from acting, under this Agreement or any of the other Indenture Documents in accordance with a request of the Trustee or the requisite holders of the Notes in accordance with the Indenture, and such request and any action taken or failure to act pursuant thereto shall be binding upon all the other holders of the Notes and the Trustee.

(xiii) The Collateral Agent shall not be deemed to have actual, constructive, direct or indirect knowledge or notice of the occurrence of any Default or Event of Default unless and until the Collateral Agent has received a written notice or a certificate from a Grantor, a holder of the Notes or the Trustee stating that a Default or Event of Default has occurred. The Collateral Agent shall have no obligation whatsoever either prior to or after receiving such notice or certificate to inquire whether a Default or Event of Default has in fact occurred and shall be entitled to rely conclusively, and shall be fully protected in so relying, on any notice or certificate so furnished to it. No provision of this Agreement or any of the Indenture Documents shall require the Collateral Agent to expend or risk its own funds or otherwise incur any financial liability in the performance of any of its duties under this Agreement, any of the other Indenture Documents or the exercise of any of its rights or powers, if it shall have reasonable grounds for believing that repayment of such funds or adequate indemnity against such risk or liability including an advance of moneys necessary to perform work or to take the action requested is not reasonably assured to it, the Collateral Agent may decline to act unless it receives indemnity satisfactory to it in its sole discretion, including an advance of moneys necessary to take the action requested. The Collateral Agent shall be under no obligation or duty to take any action under this Agreement or any of the other Indenture Documents or otherwise if taking such action (x) would subject the Collateral Agent to a tax in any jurisdiction where it is not then subject to a tax or (y) would require the Collateral Agent to qualify to do business in any jurisdiction where it is not then so qualified.

7. Remedies and Related Rights.

If an Event of Default shall have occurred and be continuing, then and in every such case, the Collateral Agent, in addition to any rights now or hereafter existing under applicable law and under the other provisions of this Agreement, shall have all rights as a secured creditor under any UCC, and such additional rights and remedies to which a secured creditor is entitled under the laws in effect in all relevant jurisdictions when a debtor is in default under a security agreement and may exercise one or more of the rights and remedies provided in this Section.

(a) Remedies. If an Event of Default shall have occurred and be continuing, the Collateral Agent may from time to time at the written direction of the Trustee or the requisite holders of the Notes in accordance with the Indenture and applicable law, without limitation and without notice except as expressly provided in any of the Indenture Documents:

- (i) exercise in respect of the Collateral all the rights and remedies of a secured party under the UCC (whether or not the UCC applies to the affected Collateral);
- (ii) require the Grantors to, and such Grantors hereby agree that they will at their expense and upon request of the Collateral Agent, assemble the Collateral as directed by the Collateral Agent and make it available to the Collateral Agent at a place where such Collateral is permitted to be kept pursuant to Section 3(h);
- (iii) reduce the Secured Parties' claim to judgment or foreclose or otherwise enforce, in whole or in part, the security interest granted hereunder by any available judicial procedure;
- (iv) sell or otherwise dispose of, at its office, on the premises of any Grantor or elsewhere, the Collateral, for cash, on credit, and upon such terms as may be commercially reasonable, as a unit or in parcels, by public or private proceedings, and by way of one or more contracts (it being agreed that the sale or other disposition of any part of the Collateral shall not exhaust the Collateral Agent's power of sale, but sales or other dispositions may be made from time to time until all of the Collateral has been sold or disposed of or until the Indenture Obligations have been paid and performed in full), and at any such sale or other disposition it shall not be necessary to exhibit any of the Collateral;
- (v) buy the Collateral, or any portion thereof, at any public sale;
- (vi) buy the Collateral, or any portion thereof, at any private sale, for cash, on credit, and upon such other terms as may be commercially reasonable, if the Collateral is of a type customarily sold in a recognized market or is of a type which is the subject of widely distributed standard price quotations;
- (vii) apply for the appointment of a receiver for the Collateral, and Grantors hereby consent to any such appointment; and

(viii) at the option of and if instructed by the requisite holders of the Notes, retain the Collateral on behalf of the holders of the Notes or distribute the Collateral to the holders of the Notes, in each case in satisfaction of the Indenture Obligations, whenever the circumstances are such that the Collateral Agent is entitled to do so under the UCC or otherwise; to the full extent permitted by the UCC, the Collateral Agent shall be permitted to elect whether such retention shall be in full or partial satisfaction of the Indenture Obligations.

In the event the Collateral Agent shall elect (at the instruction of the requisite holders of the Notes) to sell the Collateral, the Collateral Agent may sell the Collateral without giving any warranties and shall be permitted to specifically disclaim any warranties of title or the like. In the event the purchaser fails to pay for the Collateral, the Collateral Agent may resell (at the instruction of the requisite holders of the Notes) the Collateral and the Grantors shall be credited with the proceeds of the sale. Each Grantor agrees that in the event such Grantor or any obligor is entitled to receive any notice under the UCC, as it exists in the state governing any such notice, of the sale or other disposition of any Collateral, reasonable notice shall be deemed given when such notice is deposited in a depository receptacle under the care and custody of the United States Postal Service, postage prepaid, at such party's address set forth on the signature pages hereof, ten (10) days prior to the date of any public sale, or after which a private sale, of any of such Collateral is to be held. The Collateral Agent shall not be obligated to make any sale of Collateral regardless of notice of sale having been given. The Collateral Agent may adjourn any public or private sale from time to time by announcement at the time and place fixed therefor, and such sale may, without further notice, be made at the time and place to which it was so adjourned.

(b) Application of Proceeds. If any Event of Default shall have occurred and be continuing, any cash held by the Collateral Agent as Collateral, and any cash proceeds received by the Collateral Agent in respect of any sale or other disposition of, collection from, or other realization upon, all or any part of the Collateral shall be transferred, conveyed or distributed to the Trustee to be applied in accordance with the Indenture or as otherwise may be directed by the Trustee pursuant to the Indenture Documents.

(c) Deficiency. In the event that the proceeds of any sale of, collection from, or other realization upon, all or any part of the Collateral by the Collateral Agent are insufficient to pay all amounts to which the Collateral Agent is legally entitled, the Company, the other Grantors and any other Person who guaranteed or is otherwise obligated to pay all or any portion of the Indenture Obligations shall be liable for the deficiency, together with interest thereon as provided in the Indenture Documents, to the full extent permitted by the UCC.

(d) Waiver. Except as otherwise provided in this Agreement, EACH GRANTOR HEREBY WAIVES, TO THE EXTENT PERMITTED BY APPLICABLE LAW, NOTICE AND JUDICIAL HEARING IN CONNECTION WITH THE COLLATERAL AGENT'S TAKING POSSESSION OR THE COLLATERAL AGENT'S DISPOSITION OF ANY OF THE COLLATERAL, INCLUDING, WITHOUT LIMITATION, ANY AND ALL PRIOR NOTICE AND HEARING FOR ANY PREJUDGMENT REMEDY OR REMEDIES AND ANY SUCH RIGHT WHICH ANY GRANTOR WOULD OTHERWISE HAVE UNDER

THE CONSTITUTION OR ANY STATUTE OF THE UNITED STATES OR OF ANY STATE, and each Grantor hereby further waives, to the extent permitted by applicable law, and releases the Collateral Agent from:

(i) all claims, damages and demands against the Collateral Agent arising out of the repossession, retention or sale of all or any part of the Collateral, except any damages which are the direct result of the Collateral Agent's gross negligence or willful misconduct;

(ii) all claims, damages and demands against the Collateral Agent arising by reason of the fact that the price at which the Collateral, or any part thereof, may have been sold at a private sale was less than the price which might have been obtained at public sale or was less than the aggregate amount of the Indenture Obligations, even if the Collateral Agent accepts the first offer received which the Collateral Agent in good faith deems to be commercially reasonable under the circumstances and does not offer the Collateral, or any portion thereof, to more than one offeree;

(iii) all other requirements as to the time, place and terms of sale or other requirements with respect to the enforcement of the Collateral Agent's rights hereunder; and

(iv) all equities or rights of redemption, appraisal, valuation, stay, extension or moratorium now or hereafter in force under any applicable law in order to prevent or delay the enforcement of this Agreement or the absolute sale or other disposition of the Collateral or any portion thereof, and each Grantor, for itself and all who may claim under it, insofar as it or they now or hereafter lawfully may, hereby waives the benefit of all such laws.

Any sale of, or the grant of options to purchase, or any other realization upon, any Collateral shall operate to divest all right, title, interest, claim and demand, either at law or in equity, of each Grantor therein and thereto, and shall be a perpetual bar both at law and in equity against each Grantor and against any and all Persons claiming or attempting to claim the Collateral so sold, optioned or realized upon, or any part thereof, from, through and under the Grantor.

(e) Remedies Cumulative. No right, power or remedy herein conferred upon or reserved to the Collateral Agent is intended to be exclusive of any other right, power or remedy, and every such right, power and remedy shall, to the extent permitted by applicable Law, be cumulative and in addition to every other right, power and remedy given hereunder or now or hereafter existing at law or in equity or otherwise. The assertion or employment of any right or remedy hereunder, or otherwise, shall not prevent the concurrent or later assertion or employment of any other appropriate right, power or remedy.

(f) Delay Not Waiver. No delay or omission of the Collateral Agent or any other Secured Party to exercise any right, power or remedy accruing upon the occurrence and during the continuance of any Event of Default shall impair any such right or power or shall be construed to

be a waiver of any such Event of Default or an acquiescence therein; and every right, power and remedy given by this Agreement may be exercised from time to time, and as often as shall be deemed expedient, by the Collateral Agent.

(g) Restoration of Rights and Powers. In case the Collateral Agent shall have instituted any action or proceeding to enforce any right, power or remedy under this Agreement by foreclosure, sale, entry, leasing, conveyance, assignment, transfer, other disposition, other realization or otherwise, and such action or proceeding shall have been discontinued or abandoned for any reason or shall have been determined adversely to the Collateral Agent, then and in every such case each Grantor, the Collateral Agent and each other Secured Party shall be restored to their former positions and rights hereunder with respect to the Collateral subject to the security interest created under this Agreement, and all rights, remedies and powers of the Collateral Agent and each Grantor shall continue as if no such actions or proceedings had been instituted.

(h) Environmental Liability. In the event that the Collateral Agent is requested to acquire title to an asset for any reason, or take any managerial action of any kind in regard thereto, which in the Collateral Agent's sole discretion may cause the Collateral Agent to be considered an "owner or operator" under any environmental laws or otherwise cause the Collateral Agent to incur, or be exposed to, any environmental liability or any liability under any other federal, state or local law, the Collateral Agent reserves the right to not follow such direction, to resign as Collateral Agent or to arrange for the transfer of the title or control of the asset to a court appointed receiver. Neither the Trustee nor the Collateral Agent will be liable to any Person for any environmental liability or any environmental claims or contribution actions under any federal, state or local law, rule or regulation by reason of the Collateral Agent's actions and conduct as authorized, empowered and directed hereunder or relating to any kind of discharge or release or threatened discharge or release of any hazardous materials into the environment. Neither the Trustee nor the Collateral Agent shall be responsible for any loss incurred by the Secured Parties by the Collateral Agent's refusal to take actions to acquire title or other actions that may result in it being considered an "owner or operator".

8. Security Interest Absolute. All rights of the Collateral Agent and the security interests granted to the Collateral Agent hereunder, and all obligations of Grantors hereunder, to the extent permitted by applicable law, are absolute and unconditional, irrespective of:

(a) Any lack of validity or enforceability of the Indenture, the Notes or any other Indenture Document; or

(b) The failure of the Collateral Agent or any holder of a Note:

(i) To assert any claim or demand or to enforce any right or remedy under the provisions of the Notes or any other Indenture Document or otherwise, or

(ii) To exercise any right or remedy against any collateral securing any obligations of Grantors owing to the Secured Parties; or

(c) Any change in the time, manner or place of payment of, or in any other term of, all or any of the Indenture Obligations or any other extension, compromise or renewal of any Indenture Obligations; or

(d) Any reduction, limitation, impairment or termination of any Indenture Obligations for any reason (other than the satisfaction and discharge of the Indenture Obligations in full), including any claim of waiver, release, surrender, alteration or compromise (and the Grantors hereby waive any right to or claim of any defense or setoff, counterclaim, recoupment or termination whatsoever by reason of any invalidity, illegality, nongenuineness, irregularity, compromise, unenforceability of, or any other event or occurrence affecting, any Indenture Obligations); or

(e) Any amendment to, rescission, waiver, or other modification of, or any consent to departure from, the Notes or any other Indenture Document; or

(f) Any addition, exchange, release, surrender or nonperfection of any collateral (including the Collateral), or any amendment to or waiver or release of or addition to or consent to departure from any guaranty, for any of the Indenture Obligations; or

(g) Any other circumstances which might otherwise constitute a defense available to, or a legal or equitable discharge of, any Grantor, including, without limitation, any and all suretyship defenses.

9. *Indemnity.*

(a) Each Grantor jointly and severally agrees to indemnify, reimburse and hold the Collateral Agent, each other Secured Party and their respective successors, assigns, officers, directors, employees, affiliates and agents (hereinafter in this Section 9 referred to individually as “Indemnitee,” and collectively as “Indemnitees”) harmless from any and all liabilities, obligations, damages, injuries, penalties, claims, demands, actions, suits, judgments and any and all out-of-pocket costs, expenses or disbursements (including reasonable attorneys’ fees and expenses) (for the purposes of this Section 9 the foregoing are collectively called “expenses”) of whatsoever kind and nature imposed on, asserted against or incurred by any of the Indemnitees in any way relating to or arising out of this Agreement, any other Indenture Document or any other document executed in connection herewith or therewith or in any other way connected with the administration of the transactions contemplated hereby or thereby or the enforcement of any of the terms of, or the preservation of any rights under any thereof, or in any way relating to or arising out of the manufacture, ownership, ordering, purchase, delivery, control, acceptance, lease, financing, possession, operation, condition, sale, return or other disposition, or use of the Collateral (including latent or other defects, whether or not discoverable), the violation of the laws of any country, state or other governmental body or unit, any tort (including claims arising or imposed under the doctrine of strict liability, or for or on account of injury to or the death of any Person (including any Indemnitee), or property damage), or contract claim; provided, that no Indemnitee shall be indemnified pursuant to this Section 9(a) for losses, damages or liabilities to the extent caused by the gross negligence or willful misconduct of such Indemnitee (as determined by a court of competent jurisdiction in a final and non-appealable decision). Each Grantor agrees that upon written notice by any Indemnitee of the

assertion of such a liability, obligation, damage, injury, penalty, claim, demand, action, suit or judgment, the relevant Grantor shall assume full responsibility for the defense thereof. Each Indemnitee agrees to promptly notify the relevant Grantor of any such assertion of which such Indemnitee has knowledge.

(b) Without limiting the application of Section 9(a) hereof, each Grantor agrees, jointly and severally, to pay or reimburse the Collateral Agent for any and all reasonable fees, out-of-pocket costs and expenses of whatever kind or nature incurred in connection with the creation, preservation or protection of the Collateral Agent's Liens on, and security interest in, the Collateral, including all fees and taxes in connection with the recording or filing of instruments and documents in public offices, payment or discharge of any taxes or Liens upon or in respect of the Collateral, premiums for insurance with respect to the Collateral and all other fees, out-of-pocket costs and expenses in connection with protecting, maintaining or preserving the Collateral and the Collateral Agent's interest therein, whether through judicial proceedings or otherwise, or in defending or prosecuting any actions, suits or proceedings arising out of or relating to the Collateral.

(c) Without limiting the application of Section 9(a) or (b) hereof, each Grantor agrees, jointly and severally, to pay, indemnify and hold each Indemnitee harmless from and against any loss, out-of-pocket costs, damages and expenses which such Indemnitee may suffer, expend or incur in consequence of or growing out of any misrepresentation by any Grantor in this Agreement, any other Indenture Document or in any writing contemplated by or made or delivered pursuant to or in connection with this Agreement or any other Indenture Documents.

(d) If and to the extent that the obligations of any Grantor under this Section 9 are unenforceable for any reason, such Grantor hereby agrees to make the maximum contribution to the payment and satisfaction of such obligations which is permissible under applicable law.

(e) Any amounts paid by any Indemnitee as to which such Indemnitee has the right to reimbursement shall constitute Indenture Obligations secured by the Collateral. The indemnity obligations of each Grantor contained in this Section 9 shall continue in full force and effect notwithstanding the full payment of all of the other Indenture Obligations and notwithstanding the full payment of all the Notes issued under the Indenture and the payment of all other Indenture Obligations and notwithstanding the discharge thereof and the occurrence of the Termination Date.

(f) The agreements in this Section shall survive repayment of the Indenture Obligations, all other amounts payable under the Indenture Documents and the resignation or removal of the Collateral Agent.

10. Miscellaneous.

(a) Amendment. None of the terms and conditions of this Agreement may be changed, waived, modified or varied in any manner whatsoever unless in writing duly signed by each Grantor and the Collateral Agent (with the written consent of the holders of the Notes in accordance with the Indenture).

(b) No Waiver by Collateral Agent. Neither the failure by the Collateral Agent to exercise, nor the delay by the Collateral Agent in exercising, any right or remedy upon any Event of Default shall be construed as a waiver of such Event of Default or as a waiver of the right to exercise any such right or remedy at a later date. No single or partial exercise by the Collateral Agent of any right or remedy hereunder shall exhaust the same or shall preclude any other or further exercise thereof, and every such right or remedy hereunder may be exercised at any time. No waiver of any provision hereof or consent to any departure by any Grantor therefrom shall be effective unless the same shall be in writing and signed by the Collateral Agent and then such waiver or consent shall be effective only in the specific instances, for the purpose for which given and to the extent therein specified. No notice to or demand on any Grantor in any case shall of itself entitle such Grantor to any other or further notice or demand in similar or other circumstances.

(c) Costs and Expenses. The Grantors will upon demand pay to the Collateral Agent and the Secured Parties the amount of any and all reasonable, documented, out-of-pocket costs and expenses (including without limitation, reasonable attorneys' agents' and professional advisors' fees and expenses), which the Collateral Agent and the Secured Parties may incur in connection with the enforcement of any of the rights of the Collateral Agent and the Secured Parties under the Indenture Documents in connection with any Event of Default.

(d) No Third Party Beneficiaries. The agreements of the parties hereto are solely for the benefit of the Grantors, the Collateral Agent, and the other Secured Parties and their respective successors and assigns and no other Person shall have any rights hereunder.

(e) Termination; Release. After the Termination Date, this Agreement (including any provision providing for the appointment of the Collateral Agent as attorney-in-fact for any Grantor) and the Liens and security interests granted hereunder shall terminate automatically and without further action by any party, and the Collateral Agent, at the written request and sole expense of the Company, will execute and deliver to each Grantor the proper instruments acknowledging the termination of this Agreement, and will duly assign, transfer and deliver to each Grantor (without recourse and without any representation or warranty) such of the Collateral as may be in possession of the Collateral Agent and has not theretofore been sold or otherwise applied or released pursuant to this Agreement. In addition, the Collateral Agent, at the written request and sole expense of the Company, will release from the Lien created hereunder: (1) Collateral that is sold, transferred, disbursed or otherwise disposed of to a Person other than a Grantor to the extent such sale, transfer, disbursement or disposition is not prohibited by the provisions of the Indenture, as certified in writing by the Company; *provided* that any products, proceeds or other consideration received by the Grantors in respect of any such Collateral shall continue to constitute Collateral to the extent required hereunder; (2) the property and assets of a Grantor upon the release of such Grantor from its Note Guarantee in accordance with the terms of the Indenture, as certified in writing by the Company; and (3) any property or asset of a Grantor that is or becomes an Excluded Asset, as certified in writing by the Company. The Collateral Agent shall also execute and deliver, at the written request and expense of the Company, upon termination of this Agreement or occurrence of any event in the immediately preceding sentence, such UCC termination statements, and such other documentation as shall be reasonably requested by any Grantor to effect the termination and release of the Liens and security interests granted by this Agreement.

(f) Governing Law; Submission to Jurisdiction.

(i) THIS AGREEMENT, INCLUDING ALL MATTERS OF CONSTRUCTION, VALIDITY AND PERFORMANCE AND MATTERS RELATING TO THE CREATION, VALIDITY, ENFORCEMENT OR PRIORITY OF THE LIENS CREATED BY THIS AGREEMENT, SHALL BE GOVERNED BY THE LAWS OF THE STATE OF NEW YORK WITHOUT REGARD TO THE CONFLICT OF LAWS RULES THEREOF (OTHER THAN SECTION 5-1401 OF THE NEW YORK GENERAL OBLIGATION LAW) EXCEPT AS MAY BE REQUIRED BY OTHER MANDATORY PROVISIONS OF LAW.

(ii) Each Grantor hereby submits to the nonexclusive jurisdiction of the United States District Court for the Southern District of New York and of any New York State court sitting in New York City for the purposes of all legal proceedings arising out of or relating to this Agreement or the transactions contemplated hereby. Each Grantor hereby irrevocably waives, to the fullest extent permitted by applicable law, any objection which it may now or hereafter have to the laying of the venue of any such proceeding brought in such a court and any claim that any such proceeding brought in such a court has been brought in an inconvenient forum. To the extent permitted by applicable law, each Grantor further irrevocably agrees to the service of process of any of the aforementioned courts in any suit, action or proceeding by the mailing of copies thereof by certified mail, postage prepaid, return receipt requested, to such Grantor at the address referenced in Section 10(i), such service to be effective upon the date indicated on the postal receipt returned from the Grantor.

(iii) To the extent any Grantor may, in any action or proceeding arising out of or relating to this Agreement, be entitled under any applicable law to require or claim that the Collateral Agent or any Secured Party post security for costs or take similar action, such Grantor hereby irrevocably (to the extent permitted by applicable law) waives and agrees not to claim the benefit of such entitlement.

(g) WAIVER OF JURY TRIAL. EACH OF THE PARTIES HERETO HEREBY KNOWINGLY, VOLUNTARILY AND INTENTIONALLY WAIVES THE RIGHT ANY OF THEM MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LITIGATION BASED ON, OR ARISING OUT OF, UNDER OR IN CONNECTION WITH, THIS AGREEMENT, OR ANY COURSE OF CONDUCT, COURSE OF DEALING, STATEMENTS (WHETHER VERBAL OR WRITTEN) OR ACTIONS OF ANY PARTY RELATING HERETO OR THERETO. THIS PROVISION IS A MATERIAL INDUCEMENT FOR THE SECURED PARTIES TO ENTER INTO THIS AGREEMENT AND THE OTHER INDENTURE DOCUMENTS.

(h) Severability. If any provision of this Agreement is held by a court of competent jurisdiction to be illegal, invalid or unenforceable under present or future laws, such provision shall be fully severable, shall not impair or invalidate the remainder of this Agreement and the effect thereof shall be confined to the provision held to be illegal, invalid or unenforceable.

(i) **Notices.** All notices to permitted or required under this Agreement may be sent as follows:

If to any Grantor: to the address of each Grantor set forth on the signature page hereto with a copy (which shall not constitute notice) to:

O'Melveny & Myers LLP
7 Times Square, #34
New York, New York 10036
Attention: Sam Zucker, Esq. and Sung Pak, Esq.

If to the Collateral Agent:

Wells Fargo Bank, National Association, as Collateral Agent
45 Broadway, 14th Floor
New York, New York 10006
Attention: Corporate Trust Services

All notices to any Secured Party permitted or required under this Agreement may be sent to the Collateral Agent with a copy to the Trustee.

Any notice required to be given to any Grantor shall be given to all Grantors.

Unless otherwise specifically provided herein, any notices or other communications required or permitted hereunder shall be in writing, and shall be sufficiently given if made by hand delivery, by telecopier or registered or certified mail, postage prepaid, return receipt requested, addressed as set forth below each party's name on the signature pages hereto. Each of the parties by written notice to each other may designate additional or different addresses for notices to such Person. Any notice or communication to the parties shall be deemed to have been given or made as of the date so delivered if personally delivered; when receipt is acknowledged, if faxed; and five (5) calendar days after mailing if sent by registered or certified mail, postage prepaid (except that a notice of change of address or a notice sent by mail to the Collateral Agent shall not be deemed to have been given until actually received by the addressee).

(j) **Binding Effect and Assignment.** This Agreement (i) creates a continuing security interest in the Collateral, (ii) shall be binding on each Grantor and its successors and assigns, and (iii) shall inure to the benefit of the Collateral Agent and its successors and assigns. Neither the Collateral Agent's nor Grantors' rights and obligations hereunder may be assigned or otherwise transferred without the prior written consent of the other party, except that the Collateral Agent's rights under the Agreement may be assigned to any Person to whom the Indenture Obligations are validly assigned in accordance with the Indenture Documents.

(k) Cumulative Rights. All rights and remedies of the Collateral Agent hereunder are cumulative of each other and of every other right or remedy that the Collateral Agent may otherwise have at law or in equity or under any of the other Indenture Documents, and the exercise of one or more of such rights or remedies shall not prejudice or impair the concurrent or subsequent exercise of any other rights or remedies. Further, except as specifically noted as a waiver herein, no provision of this Agreement is intended by the parties to this Agreement to waive any rights, benefits or protection afforded to the Collateral Agent under the UCC.

(l) Gender and Number. Within this Agreement, words of any gender shall be held and construed to include the other gender, and words in the singular number shall be held and construed to include the plural and words in the plural number shall be held and construed to include the singular, unless in each instance the context requires otherwise.

(m) Descriptive Headings. The headings in this Agreement are for convenience only and shall in no way enlarge, limit or define the scope or meaning of the various and several provisions hereof.

(o) Additional Grantors. Additional Subsidiaries may become a party to this Agreement by the execution and delivery of a Security Agreement Joinder substantially in the form attached hereto as Annex E, and the execution and delivery of such other supporting documentation, corporate governance and authorization documents, and an opinion of counsel, as required by Section 4.17 of the Indenture.

(p) Post-Closing Actions. Notwithstanding anything in this Agreement to the contrary, the representations and covenants of the Company relating to the perfection of the security interests in (i) the Pledged Securities in Nektar Therapeutics (India) Pvt. Ltd (the “Indian Pledged Securities”) and (ii) the existing Intellectual Property Rights registered in Spain and Japan (the “Specified Intellectual Property Rights”) are limited to the extent that such security interests may not be perfected as of the date hereof in India with respect to the Indian Pledged Securities and in Spain and Japan with respect to the Specified Intellectual Property Rights, but the Company agrees (x) within sixty (60) days after the date hereof, to execute and deliver to the Collateral Agent all documents necessary to perfect the Collateral Agent’s security interest in and Lien on the Specified Intellectual Property Rights in Spain and Japan, and (y) within one hundred eighty (180) days after the date hereof, to perfect the Collateral Agent’s security interest in and Lien on the Indian Pledged Securities in India.

AMENDMENT TO PLEDGE AND SECURITY AGREEMENT

This AMENDMENT TO PLEDGE AND SECURITY AGREEMENT (this "Amendment") is dated as of February 28, 2013 and entered into by and between Nektar Therapeutics, a Delaware corporation (the "Company"), and Wells Fargo Bank, National Association, not in its individual capacity but solely as collateral agent (together with its successors and assigns, in such capacity, "Collateral Agent"), for the benefit of the Secured Parties (as hereinafter defined), and is made with reference to that certain Pledge and Security Agreement dated as of July 11, 2012 by and between the Company and the Collateral Agent (the "Security Agreement"). Capitalized terms used herein without definition shall have the same meanings herein as set forth in the Security Agreement.

RECITALS

WHEREAS, Section 9.02 of the Indenture provides that, with the consent of the Holders of at least a majority in aggregate principal amount of the then outstanding Notes voting as a single class, the Company may amend or supplement the Indenture Documents;

WHEREAS, the Company has obtained the consent of the Holders of at least a majority in aggregate principal amount of the outstanding Notes, as certified in an Officer's Certificate delivered to the Trustee and Collateral Agent, and has satisfied all other conditions required under the Indenture Documents to enable the Company and the Collateral Agent to enter into this Amendment;

WHEREAS, Company desires to, and has requested the Collateral Agent to enter into this Amendment to, amend the Security Agreement to in the manner and on the terms and conditions set forth herein;

NOW, THEREFORE, in consideration of the premises and the agreements, provisions and covenants herein contained, the parties hereto agree as follows:

1. AMENDMENTS TO THE SECURITY AGREEMENT

1.1 Amendments to Section 5(f): Future Intellectual Property.

(a) Section 5(f) of the Security Agreement is hereby amended by deleting the second sentence therefrom and substituting the following therefor: "If any Grantor acquires Intellectual Property Rights after the effective date of this Agreement or makes an application for registration of an Intellectual Property Right before the United States Patent and Trademark Office, the United States Copyright Office, or an equivalent thereof in any state of the United States, any political subdivision thereof or in any other country or jurisdiction, within sixty (60) days of the end of the fiscal quarter of the Company in which such acquisition or submission occurs or, if later, as soon as legally permissible, such Grantor shall notify the Collateral Agent in writing concerning such Intellectual Property Right."

(b) Section 5(f) of the Security Agreement is hereby further amended by inserting "after the end of the fiscal quarter of the Company in which such issuance occurs" immediately prior to the semicolon in the last sentence thereof.

1.2 Amendments to Section 10(p): Post-Closing Actions. Section 10(p) of the Security Agreement is hereby amended by (i) deleting the reference to "sixty (60) days" in clause (x) thereof and substituting "two hundred fifty (250) days" therefor and (ii) deleting clause (y) thereof and substituting "no later than January 1, 2014, use commercially reasonable efforts to perfect the Collateral Agent's security interest in and Lien on the Indian Pledged Securities in India" therefor.

2. LIMITED WAIVER

2.1 Waiver. Subject to the terms and conditions set forth herein and in reliance on the representations and warranties of the Company herein contained, Collateral Agent hereby waives compliance with the provisions of Section 10(p) of the Security Agreement to the extent, and only to the extent, relating to (a) the Company's failure to execute and deliver to the Collateral Agent all documents necessary to perfect the Collateral Agent's security interest in and Lien on the Specified Intellectual Property Rights in Spain and Japan within sixty (60) days of the date of the Security Agreement and (b) to perfect the Collateral Agent's security interest in and Lien on the Indian Pledged Securities in India within one hundred eighty (180) days after the date of the Security Agreement.

2.2 Limitation of Waiver. Without limiting the generality of the provisions of Section 10(a) of the Security Agreement, the waiver set forth above shall be limited precisely as written and relates solely to the noncompliance by the Company with the provisions of Section 10(p) of the Security Agreement in the manner and to the extent described above, and nothing in this Amendment shall be deemed to:

(a) constitute a waiver of compliance by the Company with respect to (i) Section 10(p) of the Security Agreement in any other instance or (ii) any other term, provision or condition of the Security Agreement or any other instrument or agreement referred to therein; or

(b) prejudice any right or remedy that Collateral Agent may now have (except to the extent such right or remedy was based upon existing defaults that will not exist after giving effect to this Amendment) or may have in the future under or in connection with the Security Agreement or any other instrument or agreement referred to therein.

3. COMPANY'S REPRESENTATIONS AND WARRANTIES

In order to induce Collateral Agent to enter into this Amendment and to amend the Security Agreement in the manner provided herein, the Company represents and warrants to Collateral Agent that the following statements are true, correct and complete:

3.1 Corporate Power and Authority. The Company has all requisite corporate power and authority to enter into this Amendment and to carry out the transactions contemplated by, and perform its obligations under, the Security Agreement as amended by this Amendment (the "Amended Agreement").

3.2 Authorization of Agreements. The execution and delivery of this Amendment have been duly authorized by all necessary corporate action on the part of the Company.

3.3 No Conflict. The execution and delivery by the of this Amendment and the performance by the Company of the Amended Agreement do not and will not violate any provision of any law or any governmental rule or regulation applicable to Company, the Certificate of Incorporation or Bylaws of the Company or any order, judgment or decree of any court or other agency of government binding on the Company or any of its Subsidiaries.

3.4 Governmental Consents. The execution and delivery by the Company of this Amendment and the performance by Company of the Amended Agreement do not and will not require any registration with, consent or approval of, or notice to, or other action to, with or by, any federal, state or other governmental authority or regulatory body.

3.5 Binding Obligation. This Amendment has been duly executed and delivered by the Company and this Amendment and the Amended Agreement are the legally valid and binding obligations of the Company, enforceable against the Company in accordance with their respective terms, except as may be limited by bankruptcy, insolvency, reorganization, moratorium or similar laws relating to or limiting creditors' rights generally or by equitable principles relating to enforceability.

3.6 Absence of Default. After giving effect to this Amendment, no event has occurred and is continuing or will result from the consummation of the transactions contemplated by this Amendment that would constitute an Event of Default.

4. MISCELLANEOUS

4.1 Reference to and Effect on the Security Agreement and the Documents.

(a) On and after the date hereof, each reference in the Security Agreement to "this Agreement", "hereunder", "hereof", "herein" or words of like import referring to the Security Agreement, and each reference in the other Indenture Documents to the "Pledge and Security Agreement", "thereunder", "thereof" or words of like import referring to the Credit Agreement shall mean and be a reference to the Amended Agreement.

(b) Except as specifically amended by this Amendment, the Security Agreement and the other Indenture Documents shall remain in full force and effect and are hereby ratified and confirmed.

(c) The execution, delivery and performance of this Amendment shall not, except as expressly provided herein, constitute a waiver of any provision of, or operate as a waiver of any right, power or remedy of Collateral Agent or any other Secured Party under, the Security Agreement or any of the other Indenture Documents.

4.2 Fees and Expenses. The Company acknowledges that all costs, fees and expenses as described in Section 10(c) of the Security Agreement incurred by Collateral Agent and its counsel with respect to this Amendment and the documents and transactions contemplated hereby shall be for the account of the Company.

4.3 Headings. Section and subsection headings in this Amendment are included herein for convenience of reference only and shall not constitute a part of this Amendment for any other purpose or be given any substantive effect.

4.4 Applicable Law. **THIS AMENDMENT AND THE RIGHTS AND OBLIGATIONS OF THE PARTIES HEREUNDER SHALL BE GOVERNED BY, AND SHALL BE CONSTRUED AND ENFORCED IN ACCORDANCE WITH, THE INTERNAL LAWS OF THE STATE OF NEW YORK (INCLUDING WITHOUT LIMITATION SECTION 5-1401 OF THE GENERAL OBLIGATIONS LAW OF THE STATE OF NEW YORK), WITHOUT REGARD TO CONFLICTS OF LAWS PRINCIPLES.**

4.5 Counterparts; Effectiveness. This Amendment may be executed in any number of counterparts and by different parties hereto in separate counterparts, each of which when so executed and delivered shall be deemed an original, but all such counterparts together shall constitute but one and the same instrument; signature pages may be detached from multiple separate counterparts and attached to a single counterpart so that all signature pages are physically attached to the same document. This Amendment shall become effective upon the execution of a counterpart hereof by the Company and Collateral Agent.

4.6 Collateral Agent Disclaimer. The Collateral Agent makes no representations as to the validity or sufficiency of this Amendment. The recitals and statements herein are deemed to be those of the Company and not of the Collateral Agent, and the Collateral Agent assumes no responsibility for the correctness thereof.

[Remainder of page intentionally left blank]

IN WITNESS WHEREOF, the parties hereto have caused this Amendment to be duly executed and delivered by their respective officers thereunto duly authorized as of the date first written above.

CERTIFICATIONS

I, Howard W. Robin, certify that:

1. I have reviewed this Annual Report on Form 10-K of Nektar Therapeutics for the year ended December 31, 2012;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under my supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under my supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Senior Vice President and Chief Financial Officer

SECTION 1350 CERTIFICATIONS*

Pursuant to the requirement set forth in Rule 13a-14(b) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and Section 1350 of Chapter 63 of Title 18 of the United States Code (18 U.S.C. § 1350), Howard W. Robin, Chief Executive Officer, President and Director of Nektar Therapeutics (the "Company"), and John Nicholson, Senior Vice President and Chief Financial Officer of the Company, each hereby certifies that, to the best of his knowledge:

1. The Company's Annual Report on Form 10-K, for the year ended December 31, 2012, to which this Certification is attached as Exhibit 32.1 (the "Annual Report"), fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
2. The information contained in the Annual Report fairly presents, in all material respects, the financial condition and results of operations of the Company for the period covered by the Annual Report.

Dated: February 28, 2013

/s/ HOWARD W. ROBIN

Howard W. Robin
Chief Executive Officer, President and Director

/s/ JOHN NICHOLSON

John Nicholson
Senior Vice President and Chief Financial Officer

* This certification accompanies the Annual Report on Form 10-K, to which it relates, is not deemed filed with the Securities and Exchange Commission and is not to be incorporated by reference into any filing of the Company under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended (whether made before or after the date of the Form 10-K), irrespective of any general incorporation language contained in such filing.
