Item 5.02. Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

(e) On February 5, 2014, the Organization and Compensation Committee of the Board of Directors (the “*Committee*”) of the Nektar Therapeutics, a Delaware corporation (the “*Company*”) approved changes to the compensation of the Company’s named executive officers.

Effective February 1, 2014, the Committee approved increases in annual base salary for certain executive officers. For Howard W. Robin, President and Chief Executive Officer, the Committee increased his annual base salary from \$833,270 to \$862,434. For John Nicholson, Senior Vice President and Chief Financial Officer, the Committee increased his annual base salary from \$525,500 to \$544,000. For Gil M. Labrucherie, Senior Vice President and General Counsel, the Committee increased his annual base salary from \$505,500 to \$528,000. The Committee also approved the following cash bonuses for 2013: Mr. Robin - \$656,200 (approximately 105% of his 2013 annual performance-based bonus compensation target); Mr. Nicholson - \$276,000 (approximately 105% of his 2013 annual performance-based bonus compensation target); Mr. Labrucherie - \$278,000 (approximately 110% of his 2013 annual performance-based bonus compensation target); and Robert A. Medve, Senior Vice President and Chief Medical Officer - \$80,000 (approximately 35% of his 2013 annual performance-based bonus compensation target).

The Committee also approved target levels for each executive’s 2014 annual performance-based bonus compensation as follows (expressed in each case as a percentage of the executive’s base salary): Mr. Robin - 75%; Mr. Nicholson - 50%; Mr. Labrucherie - 50%; and Dr. Medve - 50%. The actual amount of each executive’s 2014 annual performance bonus will range from 0% to 200% of the target annual bonus based on the Committee’s assessment of his achievement of a combination of corporate and personal objectives. The corporate objectives for 2014 that have been approved by the Committee include specific goals related to drug development and regulatory outcomes, research program advancement, manufacturing performance and financial objectives.

Item 7.01. Regulation FD Disclosure

On February 5, 2014, Messrs. Robin, Nicholson, Medve, and Labrucherie were granted stock options to purchase 450,000, 175,000, 25,000, and 170,000 shares, respectively, of the Company’s common stock pursuant to the terms and conditions of the Company’s 2012 Performance Incentive Plan (the “*Stock Plan*”). The exercise price of each stock option is \$12.43, the closing price of the Company’s common stock on the NASDAQ Global Select Market on the grant date. Fifty percent (50%) of the shares subject to each stock option grant will vest according to a four-year vesting schedule on a monthly pro rata basis (“*Time-Based Vesting*”), and fifty percent (50%) of the shares subject to each stock option grant will vest according to Time-Based Vesting and will only be exercisable upon the attainment of a performance goal (the “*Performance-Based Vesting*”) within five years of the grant date (the “*Performance Period*”). The performance goal that must be met before the end of the Performance Period in order to achieve the Performance-Based Vesting condition is the filing by the Company or a collaboration partner of the Company of either (i) a new drug application (an “*NDA*”) or biologics license application (a “*BLA*”) with the United States Food and Drug Administration or (ii) a marketing authorization application (an “*MAA*”) with the European Medicines Agency for any Proprietary Company Program. For these purposes, a “*Proprietary Company Program*” includes drug candidates for which the Company acts as the sponsor of the NDA, BLA or MAA, as the case may be, or drug candidates licensed by the Company to a third party (and in such case the third party is the sponsor of the NDA, BLA or MAA, as the case may be) in which the Company is entitled to an average potential royalty on net sales of the drug candidate equal to or greater than 7.5%, including, without limitation, any one of the following drug candidates: (1) etirinotecan pegol (a topoisomerase I inhibitor); (2) NKTR-061/Amikacin Inhale (a drug-device combination for an inhaled solution of amikacin); (3) BAX-855 (a longer-acting (PEGylated) form of a full-length recombinant factor VIII (rFVIII) protein); or (4) dry powder ciprofloxacin. The “average potential royalty on net sales” is determined by the quotient of (x) the sum of the lowest and highest applicable royalty rates payable to the Company based on net sales of the drug candidate, divided by (y) two.

The information in this Item 7.01 is being furnished and shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “*Exchange Act*”), or otherwise subject to the liability of that section, nor shall such information be deemed to be incorporated by reference in any registration statement or other document filed under the Securities Act of 1933, as amended, or the Exchange Act, except as otherwise stated in such filing.

SIGNATURES

Pursuant to the requirement of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
